A moment ago I spoke of the richness that diversity allows. We have a diverse student body, and as a fourth goal, I want to encourage that diversity. I mean minority students, I mean qualified foreign students, and I mean out-of-state students. The one institution in American society which has opened more doors of opportunity for our minority citizens has been the military. The Citadel is uniquely poised to emulate that example, and we will intensify our efforts in that direction. I also offer no apology for already having a good number of out-of-state students. I recognize our debt to this great state, and I assure you we have never turned away a qualified son of South Carolina, nor will we. I also remind critics that out-of-state students pay a hefty differential for the privilege of attending school in South Carolina. Moreove, out-of-state students are a investment for South Carolina. Many remain in the state after graduation or return at some point to live here. Just a few local young ladies have convinced Yankee boys that living in Charleston has its rewards. Finally, these out-of-state students are just the type of prospective citizens that any state would desire—college educated leaders.

I have pledged that The Citadel will retain that which has made her great, but she cannot and must not remain static. Our graduates enter a world that is increasingly technical, sophisticated and complicated. It is our duty to prepare them, so we must provide current equipment in our classrooms and labs. I am convinced that an excellent education comes only from a superior faculty and first-class facilities. We have the former; we shall acquire the latter. For example, those personal computers I mentioned earlier are no longer luxury items; they are as necessary to education today as slide rules and typewriters were to my generation. We have made great progress through the extraordinary generosity of friends, corporations, and The Citadel development foundation in acquiring these machines for the college and our faculty. We now have to acquire personal computers for our students, and it is my fifth goal for each student to have a personal computer not later than 1993.

Finally, I must admit I have the dream of all Citadel alumni: winning a national athletic championship. And we will accomplish this task by fielding teams of student-athletes whose members meet all NCAA standards and graduate on time.

My goals as president, then, are straightforward: preserve and enhance those strengths which have brought The Citadel to national prominence while modernizing our facilities and introducing those technologies which allow the Citadel graduates to compete in this increasingly sophisticated world. To accomplish these goals will be neither cheap nor easy. And no one person accomplish such lofty tasks by himself. We, and that "we" means me, faculty and staff, students and parents, alumni, friends of the college, and the state of South Carolina, must forge an alliance to prepare this college for the next century.

As president, it is my responsibility to articulate and focus a vision for The Citadel and to secure the means to fulfill those aspirations. Traditionally, support for a public institution comes from three sources: state assistance, tuition and fees, and private giving. All these have finite limits, and we are bumping up against those boundaries.

We are a state supported school, and to the uninitiated, that evokes a vision of an inexpensive education financed almost in its entirety by the public. Nothing could be further from the truth. At best, about one-third of our total revenues come from the state; it is perhaps more appropriate for us to say we are state-assisted. Unfortunately, year-by-year that assistance has eroded, caused largely by a lack of confidence. Public higher education has long claimed that financial support from the state is inadequate, yet sums have been spent in a manner that raises the question of whether or not our litany of complaints is justified. There is a crisis, and it stems from two causes: a funding system that rewards quantity instead of quality and our legislature's difficulty in appropriating the level of funding authorized by this state's own process.

In South Carolina, assistance from the state is derived from a formula that is largely predicated upon credit hour production. Since colleges are supposed to provide teaching, a formula based upon the number of classes taken by students appears both logical and irrefutable. Unfortunately, that formula rewards quantity without respect to quality. I'm not going to aruge that big is necessarily bad or that small is *de facto* good, but I am saying that a formula that rewards quantity over quality needs examination. The Citadel is a unique institution; we fill a special niche, and we have no desire to expand our cadet corps. This is our choice, and the strength of American higher education is that is fosters such diversity. Nonetheless, our endeavors to ensure quality to attract the best possible faculty and students, and to put them in worthy surroundings find no solace in a formula that is at best a mask for stagnation.

We deserve better. I am proud to say that two-thirds of all our students who matriculate complete their studies within the traditional four years, and for our athletes and minority students, the figures are 75% and 63%, respectively. I compare those figures to another set coming from the U.S. Department of Education. An article appearing in a recent edition of the Chronicle of Higher Education states that nation-wide, only 15% of students at four-year colleges and universities are graduated within the traditional four-year period. Only 15%. Our success emanates from selective admission standards and a tough, demanding, and challenging system. Yet, we see no tangible reward in the state funding formula for our efforts to provide quality. This situation cries for redress, so I challenge my fellow college presidents and our elected leaders to join with me in pressing for a funding process that is tied to an assessment of results that will reward quality, not just quantity.

Compounding the problems of a funding process that rewards only growth is the annual legislative dance over the level of funding. Only once in twelve years has the state of South Carolina provided the full level of the funding to the colleges and universities that it acknowledges as higher education's fair share. This year we face the likelihood of receiving only 86% of the state appropriations authorized by the approved higher education formula. This is not a recipe for success, much less quality. It is a formula for failure. It means that South Carolina's institutions of higher education will be funded well below the average for all 15 states in the southern region.

The balance of what we require to maintain our current programs and to make good the anticipated shortfall must come from

fees and tuition charged to students and the generous assistance we receive from alumni and friends. As I noted earlier, we are approaching the limits of what we can charge for tuition. To attend college is indeed a privilege, but we are penny-wise and pound foolish as a society if we do not keep the barriers to such privilege as low as possible. As an American, I believe privilege should come to those who earn it rather than those who buy it, so it is both my conviction and duty to keep our tuition and fees as low as possible.

I am thus compelled to turn to that third pillar of support, the alumni and friends of The Citadel. Your generosity has never faltered; your support is extraordinary; you are stalwarts. Just last year, we successfully completed our first capital campaign. I stand in front of you now to announce that today I am publicly launching an inaugural campaign which was quietly unveiled a month ago to our alumni. The purpose of this intensive effort is to reduce our debts incurred for essential capital improvements. This effort is a planned, focused campaign designed to clear the decks of debt prior to our 150th anniversary year beginning in 1992. We then must address a more daunting task in the mid 1990's: a multi-million dollar renovation of the barracks.

Nonetheless, there is a limit to the burden parents can and will bear, and there is also a limit to the philanthropy of our alumni and friends. In addition to calling for a re-evaluation of the higher education funding process, we have no alternative but to ask the citizens of this great state to consider the future. South Carolinians understand the simple and direct correlation between education and a future with a future. Higher education is not an expense; it is an investment. We risk our children's prosperity if we persist in neglecting higher education, and the current exodus of the best from our state will continue to swell. We must all join together to work for increased higher education funding.

Now, I have talked a great deal about what others must do for The Citadel. Let me conclude by stating what The Citadel must do. Assessment and its twin, accountability, comprise the current trend in education. We are just beginning this immense and complicated undertaking. We will evaluate our programs to measure their effectiveness so we are assured of fulfilling our mission. We owe a complete accounting to students, parents, alumni, and the public for the precious resources entrusted to us. Our stewardship must be of the highest caliber.

As president, I pledge to administer The Citadel and its resources in the most efficient manner possible. Excellence is an attitude, and we are committed to it. A college with average facilities and an average faculty can only attract average students, producing average graduates. The Citadel is not and never has been mediocre, and we will raise the resources to have first-class facilities and to attract and retain our excellent faculty. These steps will ensure that the quality of our students and, in the long run, our alumni, remains what is always has been: the best.

In 1842 The Citadel was founded upon the concept that learning best took place within the confines of a structured and disciplined environment. For almost a century and a half of turbulent, challenging years, this educational philosophy has proven its soundness, and this institution has held its head proudly among the premier institutions of higher education in our nation. As 17th president of The Citadel, I can only hold in trust our beloved institution which has stood the test of time so well. With your held and God's blessing, I will preserve and protect it while providing our graduates the technological tools and knowledge to step forth boldly and successfully into the 21st century.

THE INTERACTION COUNCIL'S LISBON STATEMENT ON GLOBAL INTERDEPENDENCE AND NATIONAL SECURITY

Mr. PELL. Mr. President, in March 1990 a group of 20 leaders from the fields of education, religion, human rights, and politics met in Lisbon to discuss the topic "Global Interdependence and National Sovereignty" under the auspices of the InterAction Council.

The group included eight former heads of government and was chaired by Maria de Lourdes Pintasilgo, Prime Minister of Portugal from 1979 to 1980. The InterAction Council, which includes 30 former presidents and prime ministers, is led by Helmut Schmidt, Chancellor of the Federal Republic of Germany, 1974–82, who participated in the meeting.

In a statement just published, the conferees concluded that stability in the 21st century will require "effective and cooperative steps to curb environmental degradation, to redress both the persistent economic imbalances between north and south and the financial disequilibria among industrialized countries, to stabilize population growth, to eradicate absolute poverty, and to reduce consumer demand in developed nations."

Mr. President, the conferees have addressed some of the most difficult and pressing issues facing our world today. While their proposals may at times be controversial, I believe that they are well worth consideration, and I commend their statement to my colleagues. I ask unanimous consent that the statement be printed following my remarks in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

LISBON STATEMENT ON GLOBAL INTERDEPENDENCE AND NATIONAL SOVEREIGNTY, MARCH 11, 1990

1. TOWARDS GLOBAL ORDER

The world is at a crucial turning point in its history. Behind us: forty years of cold war, superpower confrontation and ever-burgeoning military arsenals. Before us: the chance to move towards a new era of peace, co-operation and dialogue. But this new era will only begin if we take positive and concrete steps to seize the opportunity for change. It is in the interest of all mankind that the changes that we have so far witnessed should not be reversed.

The management of this era will require new instruments, new forms of leadership and a new definition of the interrelationship between national and global interests.

Global interdependence increasingly affects all aspects of human activity. As such, it is a reality which can no longer be ignored. Yet approaches to problem solving remain largely focused at the national level. The concept of national sovereignty, the inviolability of borders and the autonomy of the nation-state encapsulated as they are by international law, now function against a backdrop of ever-shrinking national autonomy. Unilateral national instruments cannot solve the growing number of global problems which confront us. Alone, the nation-state cannot cope.

To ensure stability for the twenty-first century, effective and co-operative steps must be taken to curb environmental degradation; to redress both the persistent economic imbalances between North and South and the financial disequilibria among industrialized countries; to stabilize population growth; to eradicate absolute poverty; and to reduce consumer demand in developed nations.

Managing interdependence will require the establishment of a new—essentially holistic—global order encompassing the areas of peace and security, the global economy, the population-environment-development nexus and human rights. This order will be characterized by the exercise of delegated sovereignty based on the principle that decisions should be taken at the lowest possible level at which they can be effective. This will entail the strengthening of existing, or the creation of new institutions. Religious leaders, scientists, educators, non-governmental organizations and the cultural community have a central role to play. But, ultimately, the global order will depend on the understanding of the citizens of all nations and on the commitment, quality and accountability of political leaders. Education is vital to the promotion of global citizenship.

II. MANAGING INTERDEPENDENCE

The following actions will be required:

Peace and Security

(a) An early conclusion of further arms reduction agreements.

(b) The establishment of international agreements to limit and control arms production and trade, particularly in the field of aircraft and ballistic missiles.

(c) The radical reduction of defence expenditures.

(d) Agreement to utilize and strengthen the United Security Council and the Conference on Security and Cooperation in Europe (CSCE).

The Global Economy

(a) The correction of the economic imbalances between the North and the South through the elimination of the debt burden, improvement in the terms of trade, and access to knowledge and skills of developed countries.

(b) The correction of financial imbalances between the United States on the one hand, and the Federal Republic of Germany and Japan on the other.

(c) The development of a system of international financial law leading to the establishment of a regulatory authority for financial markets and the international harmonization of rules governing the operations, financial transactions, social policies and practices of transnational corporations.

(d) The restoration of a system of stable and co-ordinated exchange rates.

(e) The acceptance of the principle of binding targets for Official Development Assistance (ODA) flows to developing coun-

tries linked to the progressive reduction of recipients' military expenditures.

(f) The conclusion and full application of international agreements among all those countries involved to check the growth, spread, trafficking and use of drugs.

Population

(a) The recognition that population is intimately linked to economic development and the availability of resources.

(b) The stabilisation of global population in the twenty-first century at eight to ten billion. A doubling of the resources allocated to international population assistance programmes for contraception, accompanied by a programme of education for birth control.

Environment

(a) The implementation of the agreement reached at the Hague in April 1989 for the establishment of a High Authority to set an internationally binding policy framework with regulatory powers.

(b) The convening of an international conference to adopt a convention on global warming with binding commitments.

(c) The creation of regional institutions to manage specific issues such as deforestation, shared water resources etc.

(d) The adoption of a convention on transboundary co-operation in environmental matters.

(e) The recognition that toxic wastes should be disposed of in the country of origin and should not be sent to developing countries or dumped at sea.

(f) Strict application of the 'polluter pays principle' at the national and the international level.

(g) The establishment and progressive reduction of targets for fossil fuel emissions by the major industrialized countries; the establishment of a monitoring system by the International Energy Agency (IEA) and the publication of its results.

(h) The creation of a facility to assist developing countries in the development and implementation of environmental programmes.

Energy

(a) The launching of a massive international research programme into the development of renewable energy sources—in particular nuclear fusion, solar energy (photovoltaics), and geothermal energy.

(b) The intensification of efforts, co-ordinated by the International Atomic Energy Agency (IAEA), to find solutions for safe and stable nuclear waste disposal and safe procedures for the decommissioning of nuclear reactors.

Human rights

(a) The promotion of the democratic process and international recognition of the fundamental principle of free access and unimpeded movement of observers in national elections.

(b) The International recognition and protection of the right to individuals to monitor their Government's observation of human rights.

(c) The ratification of existing human rights agreements, including the Optional Protocol to the Covenant on Civil and Political Rights which provides for the right of individuals, non-governmental organizations and governments to submit petitions to the United Nations Human Rights Committee.

(d) The incorporation into international law of the right of humanitarian assistance i.e., the right of humanitarian organizations to assist, the right to request assistance and the right to receive assistance.

(e) The extension of international law to cover United Nations-approved international sanctions against human rights violations.

Participants

Maria de Lourdes Pintasilgo, Chairperson, Prime Minister of Portugal, 1979–80.

Helmut Schmidt, Chancellor of the Federal Republic of Germany, 1974–82.

Takeo Fukuda, Prime Minister of Japan, 1976–79.

Lord Callaghan of Cardiff, Prime Minister of the United Kingdom, 1976–79.

Kurt Furgler, President of the Swiss Confederation, 1977, 1981, 1985.

Olusegun Obasanjo, Head of the Federal Military Government of Nigeria, 1976–79.

Hyon-Hwak Shin, Prime Minister of the Republic of Korea, 1979–80.

Pierre Elliott Trudeau, Prime Minister of Canada, 1969–79, 1980–84.

M. Aram (India), Executive President, World Conference on Religion and Peace; former Vice-Chancellor, Gandhigram University.

Abdelaziz Ben Dhia (Tunisia), Minister and President, Constitutional Consultative Council; former Minister for Social Affairs, National Education and Higher Education and Scientific Research; Professor of Law, Tunis.

Claude Geffré (France), Professor of Theology of Religions, Catholic Institute, Paris.

Jiri Hajek (Czechoslovakia), former Education and Culture Minister (1965–1968) and Foreign Minister (1968); Spokesman, Charter 77.

Joseph Ki-Zerbo (Burkina Faso), Professor of History, University Cheikh Anta Diop, Dakar (Senegal); President, Center of Research for Endogenous Development; President, Association of African Historians.

Bernard Kouchner (France), Secretary of State for Humanitarian Action, Office of the Prime Minister.

Halfdan Mahler (Denmark), Secretary-General, International Planned Parenthood Federation; former Director-General, World Health Organization.

Patricia M. Mische (United States), Co-founder of Global Education Associates; Founder and former Director, Institute for Peace, Justice and Human Values, Seton Hall University.

K.L. Seshagiri Rao (India), Professor of Religious Studies, University of Virginia; Chief Editor, Encyclopedia of Hinduism; President, International Association of Gandhian Studies.

Boaventura Sosa Santos (Portugal), Professor and Director, Faculty of Economics, University of Coimbra.

Manfred Stolpe (German Democratic Republic), Consistorial President, Lutheran Church of Berlin-Brandenburg and Deputy Chairman of Lutheran Church Council of the German Democratic Republic.

Karel Vasak (France), former Director of Division of Human Rights and Legal Advisor, UNESCO.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

FAVORED-NATION STATUS FOR HUNGARY

Mr. BENTSEN. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar Order No. 486, H.R. 1594.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

A bill (H.R. 1594) to extend nondiscriminatory treatment to the products of the People's Republic of Hungary for 3 years.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which has been reported from the Committee on Finance, with an amendment to strike all after the enacting clause and insert in lieu thereof, the following:

SECTION 1. TABLE OF CONTENTS.

TITLE I—TARIFF PROVISIONS

Subtitle A—Amendments to the Harmonized Tariff Schedule of the United States

Sec. 1001. Reference.

PART 1—PERMANENT CHANGES IN TARIFF TREATMENT

Sec. 1101. Gloves, mittens, and mitts.
Sec. 1102. Certain chipper knife steel products.
Sec. 1103. Bicycles having 26-inch wheels.
Sec. 1104. Edible molasses containing nonsugar solids.
Sec. 1105. Tobacco processed in Caribbean Basin country.
Sec. 1106. Articles exported and returned.
Sec. 1107. Brooms.
Sec. 1108. Foliage-type artificial flowers.

PART 2—TEMPORARY CHANGES IN TARIFF TREATMENT

SUBPART A—EXISTING PROVISIONS

Sec. 1201. Extension of certain existing provisions.
Sec. 1202. Certain hosiery knitting machines.
Sec. 1203. Parts and accessories of copying machines.
Sec. 1204. Toy jewelry, certain small toys and novelty goods.
Sec. 1205. Jacquard cards.
Sec. 1206. C-Amines.
Sec. 1207. Corned beef in airtight containers.
Sec. 1208. Menthol feedstocks.
Sec. 1209. Surgical gowns and drapes.

SUBPART B—NEW PROVISIONS

Sec. 1301. Calcium acetylsalicylate (calcium carbaspirin).
Sec. 1302. Bendiocarb.
Sec. 1303. Certain glass bulbs.
Sec. 1304. Octadecyl isocyanate.
Sec. 1305. Molten-salt-cooled acrylic acid reactors.
Sec. 1306. Dimethylbenzylidene sorbitol.
Sec. 1307. 4,4'-Isopropylidenedicyclohexanol.
Sec. 1308. Sulfachloropyridazine.
Sec. 1309. Thiothiamine hydrochloride.
Sec. 1310. Paramine acid.
Sec. 1311. Sucralfate.
Sec. 1312. Anthraquinone.
Sec. 1313. Theobromine.
Sec. 1314. Chlorhexanone.
Sec. 1315. Naphthalic acid anhydride.
Sec. 1316. K-Acid.
Sec. 1317. Broenner's acid.
Sec. 1318. D Salt.
Sec. 1319. Neville and winter's acid.
Sec. 1320. Anis base.
Sec. 1321. Naphthol as types.
Sec. 1322. Ceftazidime tertiary butyl ester.
Sec. 1323. Certain plastic web sheeting.

Sec. 1324. Magnetic video tape recordings.
Sec. 1325. Mixed ortho/para toluenesulfonomide.
Sec. 1326. 2,6-Dichlorobenzonitrile.
Sec. 1327. 1-[1-((4-Chloro-2-(trifluoromethyl)phenyl) imino)-2-propoxyethyl]-1-h-imidazole.
Sec. 1328. Certain Christmas ornaments.
Sec. 1329. Frozen carrots.
Sec. 1330. Impact line printers.
Sec. 1331. Amino acetanilide.
Sec. 1332. 6 Amino-2-naphthene sulfonic acid.
Sec. 1333. 8 Amino-2 naphthene sulfonic acid.
Sec. 1334. 5 (and 8) Amino-2 naphthalene sulfonic acid.
Sec. 1335. 5 Amino 2 naphthalene sulfonic acid.
Sec. 1336. 1-Naphthylamine.
Sec. 1337. 4 Amino-1-naphthalene sulfonic acid, sodium salt.
Sec. 1338. 1,4 Dihydroxyanthraquinone.
Sec. 1339. 7 Nitro naphth [1,2] oxadiazole 5-sulfonic.
Sec. 1340. 4-Chloro-α,α,α-trifluoro-o-toluidine.
Sec. 1341. 7-Amino-1,3-naphthalenesulfonic acid, monopotassium salt.
Sec. 1342. 2-Amino-4-chlorophenol.
Sec. 1343. 2,4-Diamino benzene sulfonic acid.
Sec. 1344. 2,5 Dichloro-4-(3-methyl-5-oxo-2 pyrazolin-1-yl) benzenesulfonic acid.
Sec. 1345. 7-Hydroxy 1,3-naphthalene disulfonic acid-dipotassium salt.
Sec. 1346. O-anisidine.
Sec. 1347. 1-Amino-2-bromo-4-hydroxyanthraquinone.
Sec. 1348. 2-Chloro-4-nitroaniline.
Sec. 1349. (1,3,3 · Trimethyl-indoline-2-ylidene) acetaldehyde.
Sec. 1350. 2,3 Dihydro 1,3,3 trimethyl-2-methylene-1h-indole.
Sec. 1351. 2[(4 Aminophenyl) sulfonyl] ethanol hydrogen sulfate ester.
Sec. 1352. 7-Anilino-4-hydroxy-2 naphthalene sulfonic acid.
Sec. 1353. 1,4-Diamino-2,3 dihydroanthraquinone.
Sec. 1354. Castor oil and its fractions.
Sec. 1355. 0,0-Dimethyl-s-[(4-oxo-1,2,3-benzotriazin-3-(4h)-yl)methyl] phosphorodithioate.
Sec. 1356. Suspension of duty on certain machines for use in the manufacture of wheels for bicycles and on certain bicycle parts.
Sec. 1357. L-alanyl – L-proline, also known as ala pro.
Sec. 1358. Tfa lys pro in free base and tosyl salt forms.
Sec. 1359. Certain timing apparatus.
Sec. 1360. Ciprofloxacin hydrochloride, ciprofloxacin, and nimodipine.
Sec. 1361. Certain furniture and seats.
Sec. 1362. Wicker products.
Sec. 1363. (6R-(6A,7B(Z)))-7(((2-Amino-4-thiazolyl)((carboxymethoxy) imino) acetyl) amino)-3-ethenyl-8-oxo-5-thia-1-azabicyclo(4.2.0) act-2-ene-2-carboxylic acid.
Sec. 1364. N-(4-(((2-Amino-5-formyl-1,4,5,6,7,8-hexahydro-4-oxo-6-pteridinyl) methyl)amino)benzoyl)-l-glutamic acid.
Sec. 1365. (1)3-Quinolinecarboxylic acid, 1-ethyl-6-fluoro-1,4-dihydro-4-oxo-7-(1-piperazinyl)-, also known as norfloxacin.
Sec. 1366. 2,2-Dimethylcyclopropylcarboxamide.
Sec. 1367. N-Amidino-3,5-diamino-6-chloropyrazinecarboxamide monohydrochloride dihydrate, also known as amiloride hydrochloride.
Sec. 1368. Chemical light activator blend.
Sec. 1369. Gripping narrow fabrics.
Sec. 1370. BPIP.
Sec. 1371. MBEP.
Sec. 1372. 2-Ethylanthraquinone.
Sec. 1373. Rhodamine 2C base.
Sec. 1374. Polymin P and Polymin P hydrochloride.
Sec. 1375. Polymin SNA 60.
Sec. 1376. Ornithine.
Sec. 1377. Teicoplanin.
Sec. 1378. Acetoacet-para-toluidide (AAPT).
Sec. 1379. Acetoacetsulfanilic acid, potassium salt (AA sulfanilic acid potassium salt).
Sec. 1380. 6-Methyluracil.
Sec. 1381. Ethyl 2-(2-aminothiazole-4-yl)-2-hydroxyiminoacetate (ATHAET).
Sec. 1382. Ethyl 2-(2-aminothiazole-4-yl)-2-methoxyiminoacetate (ATMAET).
Sec. 1383. 4,4'-Methylene-bis-(2,6-dimethylphenylcyanate).
Sec. 1384. 2,2'-Bis(4-cyanatophenyl-1,1,1,3,3,3-hexafluoropropane.
Sec. 1385. 4,4'-Thiodiphenyl cyanate.
Sec. 1386. 1,1-Ethylidene-bis-(phenyl-4-cyanate).
Sec. 1387. Hydrocarbon novolac cyanate ester.
Sec. 1388. 4,4'-Methylene-bis-(3-chloro-2,6-diethyl aniline).
Sec. 1389. 4,4'-Methylene-bis-(2,6-diisopropyl aniline).
Sec. 1390. L-Carnitine.
Sec. 1391. Diphenolic acid.
Sec. 1392. 2,6–HNA.
Sec. 1393. ADC-6.
Sec. 1394. Diflunisal.
Sec. 1395. Trifluoromethylaniline.
Sec. 1396. Tamoxifen citrate.
Sec. 1397. Fenofibrate.
Sec. 1398. 6-T-Butyl 2,4 xylenol.
Sec. 1399. 2,4-Diamino-6-phenyl-1,3,5-triazine.
Sec. 1400. Iopamidol.
Sec. 1401. Iohexol.
Sec. 1402. p-Hydroxybenzaldehyde.
Sec. 1403. Ioxaglate.
Sec. 1404. 7-Acetyl-1,1,3,4,4,6-hexamethyltetrahydronaphthalene.
Sec. 1405. Modeling pastes.
Sec. 1406. Mercuric oxide.
Sec. 1407. 2,3,6-Trimethylphenol (TMP).
Sec. 1408. Protective sports apparel.
Sec. 1409. 1,5 Naphthalene diisocyanate.
Sec. 1410. Self-folding telescopic shaft, collapsible umbrellas.
Sec. 1411. 1,6-Hexamethylene diisocyanate.
Sec. 1412. Certain in-line roller skate boots.
Sec. 1413. Certain veneer.
Sec. 1414. p-Tolualdehyde.
Sec. 1415. Diltiazem hydrochloride, and sustained release diltiazem hydrochloride.
Sec. 1416. Clentiazim.
Sec. 1417. Personal effects and equipment of participants and officials involved in the 1990 Goodwill Games.
Sec. 1418. Copper acetate monohydrate.
Sec. 1419. Parts of generators for use on aircraft.
Sec. 1420. Certain infant nursery monitors and intercoms.
Sec. 1421. Certain glass fibers.
Sec. 1422. Three-dimensional cameras.
Sec. 1423. Personal effects and equipment for World University Games.
Sec. 1424. Karate pants and belts.
Sec. 1425. Metallurgical fluorspar.
Sec. 1426. Certain piston engines.
Sec. 1427. Quizalofop-ethyl.
Sec. 1428. Certain insulated electrical conductors.
Sec. 1429. Diphenyldichlorosilane and phenyltrichlorosilane.
Sec. 1430. Theatrical, ballet, and operatic scenery, properties, and sets.
Sec. 1431. 4-Fluoro-3-phenoxy benzaldehyde.

PART 3—EFFECTIVE DATES

Sec. 1601. Effective dates.

Subtitle B—Miscellaneous Provisions

Sec. 1701. Certain forgings.
Sec. 1702. Bi-level rail passenger cars.
Sec. 1703. Certain extracorporeal shock wave lithotripter.
Sec. 1704. Foreign trade zones.
Sec. 1705. Certain entries of digital processing units.
Sec. 1706. Nuclear magnetic spectrometer.
Sec. 1707. Foreign repair of vessels.
Sec. 1708. Certain methanol entries.
Sec. 1709. Certain frozen vegetables.
Sec. 1710. Certain films and recordings.
Sec. 1711. Certain distilled spirits in foreign trade zones.
Sec. 1712. Reliquidation of certain entries and refund of antidumping duties.
Sec. 1713. Substitution of crude petroleum or petroleum derivatives.

TITLE II—CARIBBEAN BASIN ECONOMIC RECOVERY

Sec. 2001. Short title.
Sec. 2002. Congressional findings.
Sec. 2003. Repeal of termination date on duty-free treatment under the Act.
Sec. 2004. Worker rights.
Sec. 2005. Reports.
Sec. 2006. Increase in duty-free tourist allowances.
Sec. 2007. Duty-free treatment for articles assembled in beneficiary countries from components produced in the United States.
Sec. 2008. Conforming GSP amendment.
Sec. 2009. Pilot preclearance program.
Sec. 2010. Application of Act in Eastern Caribbean area.
Sec. 2011. Caribbean-Central American scholarship partnership.
Sec. 2012. Promotion of tourism.
Sec. 2013. Agricultural infrastructure support.

TITLE III—AUTHORIZATION OF APPROPRIATIONS FOR TRADE AGENCIES

Sec. 3001. Office of the United States Trade Representative.
Sec. 3002. United States International Trade Commission.
Sec. 3003. United States Customs Service.

TITLE IV—MISCELLANEOUS PROVISIONS

Sec. 4001. Technical amendments regarding nondiscriminatory trade treatment.
Sec. 4002. Customs user fees.
Sec. 4003. Drug paraphernalia.
Sec. 4004. Prohibition on the importation of certain articles originating in Burma.

TITLE I—TARIFF PROVISIONS

Subtitle A—Amendments to the Harmonized Tariff Schedule of the United States

SEC. 1001. REFERENCE.

Whenever in this subtitle an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section, chapter, subchapter, note, heading, subheading, or other provision, the reference shall be considered to be made to a section, chapter, subchapter, note, heading, subheading, or other provision of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007).

PART 1—PERMANENT CHANGES IN TARIFF TREATMENT

SEC. 1101. GLOVES, MITTENS, AND MITTS.

(a) ICE AND FIELD HOCKEY GLOVES.—

(1) Chapter 61 is amended by inserting in numerical sequence the following new subheading, with the article description having the same degree of indentation as the article description for subheading 6116.10.10:

"	6116.10.05	Ice hockey gloves and field hockey gloves	Free		25%	"

(2) Chapter 61 is amended by inserting in numerical sequence the following new subheading, with the article description having the same degree of indentation as the article description for subheading 6116.92.10:

"	6116.92.05	Ice hockey gloves and field hockey gloves	Free		45%	"

(3) Chapter 61 is amended by inserting in numerical sequence the following new subheading, with the article description having the same degree of indentation as the article description for subheading 6116.93.10:

"	6116.93.05	Ice hockey gloves and field hockey gloves	Free		45%	"

(4) Chapter 61 is amended by inserting in numerical sequence the following new subheading, with the article description having the same degree of indentation as the article description for subheading 6116.99.30:

"	6116.99.20	Ice hockey gloves and field hockey gloves	Free		45%	"

(5) Chapter 62 is amended by inserting in numerical sequence the following new subheading, with the article description having the same degree of indentation as the article description for subheading 6216.00.10:

"	6216.00.05	Ice hockey gloves and field hockey gloves	Free		25%	"

(6) Chapter 62 is amended by inserting in numerical sequence the following new subheading, with the article description having the same degree of indentation as the article description for subheading 6216.00.34:

"	6216.00.33	Ice hockey gloves and field hockey gloves	Free		45%	"

(7) Chapter 62 is amended by inserting in numerical sequence the following new subheading, with the article description having the same degree of indentation as the article description for subheading 6216.00.44:

"	6216.00.43	Ice hockey gloves and field hockey gloves	Free		45%	"

(b) OTHER SPORTS GLOVES.—The article descriptions in subheadings 6116.10.10, 6116.92.10, 6116.93.10, 6116.99.30, 6216.00.10, 6216.00.34 and 6216.00.44 are each amended to read as follows: "Other gloves, mittens, and mitts, principally designed for sports use, including ski and snowmobile gloves, mittens, and mitts".

SEC. 1102. CERTAIN CHIPPER KNIFE STEEL PRODUCTS.

(a) IN GENERAL.—Subchapter IV of chapter 72 is amended by striking out subheadings 7226.91.10 and 7226.91.30 Harmonized Tariff Schedule of the United States and inserting in lieu thereof the following new subheadings, with the article description for subheading 7226.91.05 having the same degree of indentation as subheading 7226.91.50:

"	7226.91.05	Of chipper knife steel	Free		34%	
		Other:				
	7226.91.10	Of a width of 300 mm or more	9.6%	Free (E, IL) 7.6% (CA)	29%	
	7226.91.30	Of a width of less than 300 mm	11.6%	Free (E, IL) 9.2% (CA)	34%	"

(b) STAGED RATE REDUCTION.—Any staged rate reduction of a rate of duty set forth in subheadings 7226.91.10 and 7226.91.30 of the Harmonized Tariff Schedule of the United States that was proclaimed by the President before the date of enactment of this Act and is scheduled to take effect after the date of enactment of this Act shall take effect as provided in that proclamation.

SEC. 1103. BICYCLES HAVING 26-INCH WHEELS.

Heading 8712.00 is amended—

(1) by striking out "65 cm" each place it appears and inserting in lieu thereof "63.5 cm"; and

(2) by striking out "4 cm" in subheading 8712.00.20 and inserting in lieu thereof "4.13 cm".

SEC. 1104. EDIBLE MOLASSES CONTAINING NONSUGAR SOLIDS.

Paragraphs (a)(i), (h)(i), and (ij) of Additional U.S. Note 3 to chapter 17 are each amended by striking out "1702.90.40,".

SEC. 1105. TOBACCO PROCESSED IN CARIBBEAN BASIN COUNTRY.

The Additional United States Notes for chapter 24 are amended by adding at the end thereof the following new note:

"5. For purposes of heading 2401, any tobacco grown in the United States, and any article of tobacco grown in the United States, that falls within any subheading of heading 2401 for which the rate of duty of 'Free' followed by the symbol 'E' appears in the special subcolumn of rate of duty column 1 and that—

"(a) has been processed, advanced in value, or improved in condition in a designated beneficiary country enumerated in general note 3(c)(v), and

"(b) is not processed, advanced in value, or improved in condition in any country other than such a designated beneficiary country or the United States,

shall, when imported directly from such a designated beneficiary country, be accorded duty-free entry as an eligible article for the purpose of the Caribbean Basin Economic Recovery Act.".

SEC. 1106. ARTICLES EXPORTED AND RETURNED.

The U.S. notes to subchapter II of chapter 98 are amended by adding at the end thereof the following new note:

"6. Notwithstanding the partial exemption from duties for the value of the metal product exported from the United States provided under subheading 9802.00.60, articles imported under subheading 9802.00.60 are subject to all other duties, and any other restrictions or limitations, imposed pursuant to title VII of the Tariff Act of 1930 (19 U.S.C. 1671, et seq.) or chapter 1 of title II, or chapter 1 of title III, of the Trade Act of 1974 (19 U.S.C. 2251, et seq., 19 U.S.C. 2411 et seq.).".

SEC. 1107. BROOMS.

Chapter 96 is amended—

(1) by inserting "wholly or in part" after "Whiskbrooms," in the superior article description for subheading 9603.10.10; and

(2) by inserting "wholly or in part" after "Other brooms," in the superior article description for subheading 9603.10.40.

SEC. 1108. FOLIAGE-TYPE ARTIFICIAL FLOWERS.

Subheading 6702.90.40 is amended by inserting "and foliage" after "Artificial flowers" in the article description.

PART 2—TEMPORARY CHANGES IN TARIFF TREATMENT

Subpart A—Existing Provisions

SEC. 1201. EXTENSION OF CERTAIN EXISTING PROVISIONS.

Each of the following headings is amended by striking out the date in the effective period column and inserting in lieu thereof "12/31/92":

(1) Heading 9902.08.07 (relating to fresh cantaloupes).
(2) Heading 9902.29.04 (relating to p-toluenesulfonyl chloride).
(3) Heading 9902.29.06 (relating to dicofol).
(4) Heading 9902.29.10 (relating to 6-hydroxy-2 naphthalenesulfonic acid and its sodium, potassium, and ammonium salts).
(5) Heading 9902.29.11 (relating to triethylene glycol dichloride).
(6) Heading 9902.29.13 (relating to 2,6-dichlorobenzaldehyde).
(7) Heading 9902.29.14 (relating to dinocap).
(8) Heading 9902.29.21 (relating to m-hydroxybenzoic acid).
(9) Heading 9902.29.22 (relating to d-6-methoxy-α-methyl-2-naphthaleneacetic acid and its sodium salt).
(10) Heading 9902.29.23 (relating to triphenyl phosphate).
(11) Heading 9902.29.24 (relating to 3-amino-3-methyl-1-butyne).
(12) Heading 9902.29.28 (relating to α,α,α,-trifluoro-o-toluidine).
(13) Heading 9902.29.30 (relating to 8-amino-1-naphthalenesulfonic acid and its salts).
(14) Heading 9902.29.31 (relating to 5-amino-2-(p-aminoanilino)benzenesulfonic acid).
(15) Heading 9902.29.33 (relating to 1-amino-8-hydroxy-3,6-naphthalenedisulfonic acid; and 4-amino-5-hydroxy-2,7-naphthalenedisulfonic acid, monosodium salt (H acid, monosodium salt)).
(16) Heading 9902.29.35 (relating to 6-amino-4-hydroxy-2-naphthalenesulfonic acid (gamma acid)).
(17) Heading 9902.29.38 (relating to 3,3'-dimethoxybenzidine (o-dianisidine) and its dihydrochloride).
(18) Heading 9902.29.40 (relating to 2-amino-5-nitrophenol).
(19) Heading 9902.29.43 (relating to 1-amino-2,4-dibromoanthraquinone).
(20) Heading 9902.29.44 (relating to 1-amino-4-bromo-2-anthraquinonesulfonic acid (bromamine acid) and its sodium salt).
(21) Heading 9902.29.47 (relating to 4-methoxyaniline-2-sulfonic acid).
(22) Heading 9902.29.49 (relating to benzethonium chloride).
(23) Heading 9902.29.51 (relating to N-(7-hydroxy-1-naphthyl)acetamide).
(24) Heading 9902.29.57 (relating to N,N-bis(2-cyanoethyl)aniline).
(25) Heading 9902.29.59 (relating to 2,2-bis(4-cyanatophenyl)propane).
(26) Heading 9902.29.60 (relating to triallate).
(27) Heading 9902.29.62 (relating to paraldehyde).
(28) Heading 9902.29.63 (relating to aminomethylphenylpyrazole).
(29) Heading 9902.29.64 (relating to amino-J-pyrazolone; methylphenylpyrazolone).
(30) Heading 9902.29.66 (relating to m-sulfamino-pyrazolone (m-sulfamidophenylmethylpyrazolone)).
(31) Heading 9902.29.67 (relating to 3-methyl-1-(p-tolyl)-2-pyrazolin-5-one (p-tolyl methyl pyrazolone)).
(32) Heading 9902.29.69 (relating to 3-methyl-5-pyrazolone).
(33) Heading 9902.29.71 (relating to barbituric acid).
(34) Heading 9902.29.74 (relating to terfenadone).
(35) Heading 9902.29.76 (relating to 2-n-octyl-4-isothiazolin-3-one and on mixtures of 2-n-octyl-4-isothiazolin-3-one and application adjuvants).
(36) Heading 9902.29.79 (relating to 2-amino-N-ethylbenzenesulfonanilide).
(37) Heading 9902.30.04 (relating to nicotine resin complex).
(38) Heading 9902.32.04 (relating to methylene blue).
(39) Heading 9902.36.06 (relating to metaldehyde).
(40) Heading 9902.38.06 (relating to mixtures of dinocap and application adjuvants).
(41) Heading 9902.38.07 (relating to mixtures of mancozeb and dinocap).
(42) Heading 9902.38.08 (relating to mixtures of maneb, zineb, mancozeb, and metiram).
(43) Heading 9902.38.10 (relating to mixtures of 5-chloro-2-methyl-4-isothiazolin-3-one, 2-methyl-4-isothiazolin-3-one, magnesium chloride, and stabilizers).
(44) Heading 9902.38.11 (relating to mixtures of dicofol and application adjuvants).
(45) Heading 9902.39.14 (relating to crosslinked polyvinylbenzyltrimethylammonium chloride).
(46) Heading 9902.40.11 (relating to bicycle tires, inner tubes, and rim strips).
(47) Heading 9902.51.01 (relating to certain wools).
(48) Heading 9902.61.00 (relating to certain knitwear fabricated in Guam).
(49) Heading 9902.70.13 (relating to certain kitchenware).
(50) Heading 9902.73.12 (relating to cable or inner wire for caliper brakes).
(51) Heading 9902.73.15 (relating to bicycle chains).
(52) Heading 9902.84.44 (relating to machines designed for heat-set, stretch texturing of continuous man-made fibers).
(53) Heading 9902.84.48 (relating to circular knitting machines and parts).
(54) Heading 9902.84.51 (relating to knitting needles).
(55) Heading 9902.85.12 (relating to generator lighting sets for bicycles).
(56) Heading 9902.87.14 (relating to caliper brakes).

SEC. 1202. CERTAIN HOSIERY KNITTING MACHINES.

Heading 9902.84.47 is amended—
(1) by striking out "12/31/90" and inserting in lieu thereof "12/31/92",
(2) by striking out "single cylinder fine gauge and all double cylinder" and inserting in lieu thereof "and parts thereof", and
(3) by striking out "or 8447.20.60" and inserting in lieu thereof ", 8447.20.60, or 8448.59.10".

SEC. 1203. PARTS AND ACCESSORIES OF COPYING MACHINES.

Heading 9902.90.90 is amended—
(1) by inserting "and accessories" after "Parts", and
(2) by striking out "12/31/90" and inserting in lieu thereof "12/31/92".

SEC. 1204. TOY JEWELRY, CERTAIN SMALL TOYS AND NOVELTY GOODS.

Heading 9902.71.13 is amended to read as follows:

"	9902.71.13	Toy jewelry provided for in subheading 7117.19.10, 7117.19.50, 7117.90.40 (except parts) or 7117.90.50 (except parts) valued not over 5¢ per piece; and articles (except parts) provided for in heading 9502, 9503, or 9504 or subheading 9505.90 (except balloons, marbles, dice, and diecast vehicles), valued not over 5¢ per unit	Free	No change	No change	On or before 12/31/92	"

SEC. 1205. JACQUARD CARDS.

(a) EXISTING SUSPENSION.—Heading 9902.48.23 is amended—
(1) by striking out "4823.90.85" in the article description and inserting in lieu thereof "3926.90.90, 4823.30.00, 4823.90.85,", and
(2) by striking "12/31/90" and inserting in lieu thereof "12/31/92".
(b) CARDS TO BE USED AS JACQUARD CARDS.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.39.27	Cards, not punched, suitable for use as, or in making, jacquard cards (provided for in subheading 3926.90.90, 4823.30.00, or 4823.90.85)	Free	No change	No change	On or before 12/31/92	"

SEC. 1206. C-AMINES.

Heading 9902.29.29 is repealed.

SEC. 1207. CORNED BEEF IN AIRTIGHT CONTAINERS.

Heading 9902.16.02 is amended—
(1) by striking out "3%" and inserting in lieu thereof "Free"; and
(2) by striking out "12/31/89" and inserting in lieu thereof "12/31/92".

SEC. 1208. MENTHOL FEEDSTOCKS.

Heading 9902.29.05 is amended—
(1) by striking out "20 percent" in the article description and inserting in lieu thereof "30 percent", and
(2) by striking out "12/31/90" and inserting in lieu thereof "12/31/92".

SEC. 1209. SURGICAL GOWNS AND DRAPES.

Heading 9902.62.10 is amended to read as follows:

"	9902.62.10	Spunlaced or bonded fiber fabric disposable gowns of manmade fibers for use in performing surgical procedures (provided for in subheading 6210.10.40) and spunlaced or bonded fiber fabric disposable surgical drapes of manmade fibers (provided for in subheading 6307.90.70)	5.6%	No change (E*, IL) 3.3% (CA)	26.5%	On or before 12/31/92, except that in the case of goods originating in the territory of Canada, the effective period is on or before 12/31/98	"

Subpart B—New Provisions

SEC. 1301. CALCIUM ACETYLSALICYLATE (CALCIUM CARBASPIRIN).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.07	Calcium acetylsalicylate (provided for in subheading 2918.22.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1302. BENDIOCARB.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.08	2,2-Dimethyl-1,3-benzodioxol-4-yl methylcarbamate (Bendiocarb) (provided for in subheading 2932.90.10)	Free	No change	No change	On or before 12/31/92	".

SEC. 1303. CERTAIN GLASS BULBS.

Chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.70.11	Monochrome glass envelopes with both (1) gray, tinted skirted faceplates, and (2) either a video display diagonal of 14 inches and under or a transmission level of 37% or less (provided for in subheading 7011.20.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1304. OCTADECYL ISOCYANATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.09	Octadecyl isocyanate (provided for in subheading 2929.10.40)	Free	No change	No change	On or before 12/31/92	".

SEC. 1305. MOLTEN-SALT-COOLED ACRYLIC ACID REACTORS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.84.19	Molten-salt-cooled acrylic acid reactors and their associated parts, accessories, and equipment, imported as an entirety (provided for in subheading 8419.89.50, 8419.90.30, or 8419.90.90)	Free	No change	No change	On or before 12/31/92	".

SEC. 1306. DIMETHYLBENZYLIDENE SORBITOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.10	Dimethylbenzylidene sorbitol (provided for in subheading 2932.90.41)	Free	No change	No change	On or before 12/31/92	".

SEC. 1307. 4,4'-ISOPROPYLIDENEDICYCLOHEXANOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.11	4,4'-Isopropylidenedicyclohexanol (provided for in subheading 2906.19.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1308. SULFACHLOROPYRIDAZINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.12	Sulfachloropyridazine (provided for in subheading 2935.00.39)	Free	No change	No change	On or before 12/31/90	".

SEC. 1309. THIOTHIAMINE HYDROCHLORIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.13	Thiothiamine hydrochloride (CAS No. 2443-50-7) (provided for in subheading 2934.10.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1310. PARAMINE ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.14	1,4-Diaminobenzene-2-sulfonic acid (CAS No. 88-45-9) (provided for in subheading 2921.59.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1311. SUCRALFATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new subheading:

"	9902.30.57	Sucralfate (provided for in subheading 2940.00.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1312. ANTHRAQUINONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.16	Anthraquinone (provided for in subheading 2914.61.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1313. THEOBROMINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.17	Theobromine (provided for in subheadings 2939.90.10 and 2939.90.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1314. CHLORHEXANONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.18	Chlorhexanone (provided for in subheading 2914.70.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1315. NAPHTHALIC ACID ANHYDRIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.19	Naphthalic acid anhydride (provided for in subheading 2917.39.10)	Free	No change	No change	On or before 12/31/92	".

SEC. 1316. K-ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.20	1-Amino-8-hydroxy-4, 6-naphthalene-disulfonic acid, monosodium salt (CAS No. 85294-32-2) (provided for in subheading 2922.21.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1317. BROENNER'S ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.21	2-Naphthylamine-6-sulfonic acid (CAS No. 93-00-5) (provided for in subheading 2921.45.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1318. D SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.22	2-Naphthylamine-1,5-disulfonic acid and the monosodium salt (CAS Nos. 117-62-4 and 19532-03-07) (provided for in subheading 2921.42.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1319. NEVILLE AND WINTER'S ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.23	1-Naphthol-4-sulfonic acid and the monosodium salt (CAS Nos. 84-87-7 and 6099-57-6) (provided for in subheading 2908.20.10)	Free	No change	No change	On or before 12/31/92	".

SEC. 1320. ANIS BASE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.24	3-Aminomethoxy-benzanilide (provided for in subheading 2924.29.25)	Free	No change	No change	On or before 12/31/92	".

SEC. 1321. NAPHTHOL AS TYPES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.25	3-Hydroxy-2-naphthanilide (CAS No. 92-77-3); 3-Hydroxy-2-naphtho-o-toluidide (CAS No. 135-61-5); 3-Hydroxy-2-naphtho-o-anisidide (CAS No. 135-62-6); 3-Hydroxy-2-naphtho-o-phenetidide (CAS No. 92-74-0); 3-Hydroxy-2-naphtho-4-chloro-2,5-dimethoxyanilide (CAS No. 4273-92-1); and N,N'-bis(acetoacetyl-o-toluidine) (CAS No. 91-96-3) (provided for in subheading 2924.29.14)	Free	No change	No change	On or before 12/31/92	".

SEC. 1322. CEFTAZIDIME TERTIARY BUTYL ESTER.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.60.10	(6R, 7R)-7-[(Z)-2-(2-Aminothiazol-4-yl)-2-[(2-tert-butoxycarbonyl)prop-2-oxyiminol acetamido]-3-(1-pyridinium-methyl)ceph-3-em-4-carboxylate (Ceftazidime tertiary butyl ester) (provided for in subheading 2934.90.25)	Free	No change	No change	On or before 6/30/92	".

SEC. 1323. CERTAIN PLASTIC WEB SHEETING.

Subchapter II of chapter 99 is amended—

(1) by adding at the end of the U.S. notes thereto the following new note:

"10. For purposes of heading 9902.56.03, the term 'nonwoven fiber sheet' means sheet comprising a highly uniform and random array of polyester fibers of 1.5 to 3.0 denier, thermally bonded and calendered into a smooth surface web having—

"(a) a thickness of 3.7 to 4.0 mils;

"(b) a basis weight of 2.5 oz. per sq. yd.;

"(c) a machine tensile strength of 30 lb. per sq. in. or greater;

"(d) a low cross-direction tensile (approximately ⅓ of MD tensile strength); and

"(e) a Frazier air permeability of 1.0 to 1.5 cfm per sq. ft."; and

(2) by inserting in numerical sequence the following new heading:

"	9902.56.03	Nonwoven fiber sheet (provided for in subheading 5603.00.90)	Free	No change	No change	On or before 12/31/92	".

SEC. 1324. MAGNETIC VIDEO TAPE RECORDINGS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.85.24	Video tape recordings of a width exceeding 6.5 mm but not exceeding 16 mm, in cassettes of United States origin as certified by the importers, and valued at not over $7.00 per pre-recorded cassette unit (provided for in subheading 8524.23.10).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1325. MIXED ORTHO/PARA TOLUENESULFONOMIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.26	Mixed ortho/para toluenesulfonamide (provided for in subheading 2935.00.47).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1326. 2,6-DICHLOROBENZONITRILE.

(a) IN GENERAL.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.27	2,6-Dichlorobenzonitrile (provided for in subheading 2926.90.10).....	Free	No change	No change	On or before 12/31/92	".

(b) WITH INERTS.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.38.13	Mixtures of 2,6-dichlorobenzonitrile (90%) and inerts (up to 10%) (provided for in subheading 3808.30.10).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1327. 1-[1-((4-CHLORO-2-(TRIFLUOROMETHYL)PHENYL) IMINO)-2-PROPOXYETHYL]-1-H-IMIDAZOLE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.28	1-[1-((4-Chloro-2-(trifluoromethyl)- phenyl)imino)-2-propoxyethyl]-1-H-imidazole (provided for in subheading 2933.29.30).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1328. CERTAIN CHRISTMAS ORNAMENTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.95.05	Christmas ornaments other than ornaments of glass or wood (provided for in subheading 9505.10.25).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1329. FROZEN CARROTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.07.10	Carrots, frozen (provided for in subheading 0710.80.70).....	2.2¢/kg	No change	No change	On or before 12/31/92	".

SEC. 1330. IMPACT LINE PRINTERS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.84.65	Impact line printers using band drive mechanisms and capable of printing speeds of not less than 1,300 lines per minute (provided for in subheading 8471.92.65).....	No change	No change	3.75%	On or before 12/31/92	".

SEC. 1331. AMINO ACETANILIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.29	4-Aminoacetanilide (CAS No. 122-80-5) (provided for in subheading 2924.29.45)	Free	No change	No change	On or before 12/31/92	".

SEC. 1332. 6 AMINO-2-NAPHTHENE SULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.30	6-Amino-2-naphthalenesulfonic acid (CAS No. 93-00-5) (provided for in subheading 2921.45.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1333. 8 AMINO-2 NAPHTHENE SULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.31	8-Amino-2-naphthalenesulfonic acid (CAS No. 119-28-8) (provided for in subheading 2921.45.20)	Free	No change	No change	On or before 12/31/92	".

SEC. 1334. 5 (AND 8) AMINO-2 NAPHTHALENE SULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.32	Mixtures of 5- and 8-amino-2-naphthalenesulfonic acid (CAS No. 119-28-8) (provided for in subheading 2921.45.30)	Free	No change	No change	On or before 12/31/92	".

SEC. 1335. 5 AMINO 2 NAPHTHALENE SULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.33	5-Amino-2-naphthalenesulfonic acid (CAS No. 119-79-9) (provided in subheading 2921.45.10)	Free	No change	No change	On or before 12/31/92	".

SEC. 1336. 1-NAPHTHYLAMINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.34	1-Naphthylamine (CAS No. 134-32-7) (provided for in subheading 2921.45.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1337. 4 AMINO-1-NAPHTHALENE SULFONIC ACID, SODIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.35	4-Amino-1-naphthalenesulfonic acid, sodium salt (CAS No. 130-13-2) (provided for in subheading 2921.45.20)	Free	No change	No change	On or before 12/31/92	".

SEC. 1338. 1,4 DIHYDROXYANTHRAQUINONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.36	1,4-Dihydroxy-anthraquinone (CAS No. 81-64-1) (provided for in subheading 2914.69.50).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1339. 7 NITRO NAPHTH [1,2] OXADIAZOLE 5-SULFONIC.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.37	7-Nitronaphth-[1,2] oxadiazole-5-sulfonic acid (CAS No. 84-91-3) (provided for in subheading 2934.90.06).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1340. 4-CHLORO-α-α-α-TRIFLUORO-O-TOLUIDINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.38	4-Chloro-α,α,α-trifluoro-o-toluidine (CAS No. 445-03-4) (provided for in subheading 2921.43.10).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1341. 7-AMINO-1,3-NAPHTHALENESULFONIC ACID, MONOPOTASSIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.39	7-Amino-1,3-naphthalenesulfonic acid, monopotassium salt (CAS No. 842-15-9) (provided for in subheading 2921.45.10).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1342. 2-AMINO-4-CHLOROPHENOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.40	2-Amino-4-chlorophenol (CAS No. 95-85-2) (provided for in subheading 2922.29.10).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1343. 2,4-DIAMINO BENZENE SULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.41	2,4-Diaminobenzene-sulfonic acid (CAS No. 88-63-1) (provided for in subheading 2921.50.51).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1344. 2,5 DICHLORO-4-(3-METHYL-5-OXO-2 PYRAZOLIN-1-YL) BENZENESULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.42	2,5-Dichloro-4-(3-methyl-5-oxo-2-pyrazolin-1-yl)-benzenesulfonic acid (CAS No. 84-57-1) (provided for in subheading 2933.19.424).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1345. 7-HYDROXY 1,3-NAPHTHALENE DISULFONIC ACID-DIPOTASSIUM SALT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.43	7-Hydroxy-1,3-naphthalene-disulfonic acid, dipotassium salt (CAS No. 842-18-2) (provided for in subheading 2908.20.50).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1346. O-ANISIDINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.44	o-Anisidine (CAS No. 90-04-0) (provided for in subheading 2922.22.10)	Free	No change	No change	On or before 12/31/92	".

SEC. 1347. 1-AMINO-2-BROMO-4-HYDROXYANTHRAQUINONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.45	1-Amino-2-bromo-4-hydroxy-anthraquinone (CAS No. 116-82-5) (provided for in subheading 2922.50.40)	Free	No change	No change	On or before 12/31/92	".

SEC. 1348. 2-CHLORO-4-NITROANILINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.46	2-Chloro-4-nitroaniline (CAS No. 121-87-9) (provided for in subheading 2921.42.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1349. (1,3,3 TRIMETHYL-INDOLINE-2-YLIDENE) ACETALDEHYDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.47	(1,3,3-Trimethyl-indoline-2-ylidene)-acetaldehyde (CAS No. 84-83-3) (provided for in subheading 2933.90.39)	Free	No change	No change	On or before 12/31/92	".

SEC. 1350. 2,3 DIHYDRO 1,3,3 TRIMETHYL-2-METHYLENE-1H-INDOLE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.48	1,3,3-Trimethyl-2-methyleneindoline (CAS No. 118-12-7) (provided for in subheading 2933.90.39)	Free	No change	No change	On or before 12/31/92	".

SEC. 1351. 2[(4 AMINOPHENYL) SULFONYL] ETHANOL HYDROGEN SULFATE ESTER.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.49	2[(4-Aminophenyl)-sulfonyl]ethanol, hydrogen sulfate ester (CAS No. 2494-89-5) (provided for in subheading 2930.90.20)	Free	No change	No change	On or before 12/31/92	".

SEC. 1352. 7-ANILINO-4-HYDROXY-2 NAPHTHALENE SULFONIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.50	7-Anilino-4-hydroxy-2-naphthalenesulfonic acid (CAS No. 119-40-4) (provided for in subheading 2922.29.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1353. 1,4-DIAMINO-2,3 DIHYDROANTHRAQUINONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.51	1,4-Diamino-2,3-dihydro-anthraquinone (CAS No. 81-63-0) (provided for in subheading 2922.30.30)	Free	No change	No change	On or before 12/31/92	".

SEC. 1354. CASTOR OIL AND ITS FRACTIONS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.15.15	Castor oil and its fractions (provided for in subheading 1515.30.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1355. 0,0-DIMETHYL-S-[(4-OXO-1,2,3-BENZOTRIAZIN-3-(4H)-YL)METHYL] PHOSPHORODITHIOATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.52	0,0-Dimethyl-S-[(4-oxo-1,2,3-benzotriazin-3-(4H)-yl)methyl] phosphorodithioate (provided for in subheading 2933.90.18)	Free	No change	No change	On or before 12/31/92	".

SEC. 1356. SUSPENSION OF DUTY ON CERTAIN MACHINES FOR USE IN THE MANUFACTURE OF WHEELS FOR BICYCLES AND ON CERTAIN BICYCLE PARTS.

(a) MACHINES.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.84.79	Wheelbuilding, wheeltruing, rim punching, tire fitting and similar machines for use in the manufacture of wheels for bicycles (provided for in subheading 8479.89.90)	Free	No change	No change	On or before 12/31/92	".

(b) CERTAIN PARTS.—Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new headings:

"	9902.87.15	Bicycle handlebar stems wholly of aluminum alloy, valued over $2.15 each (provided for in subheading 8714.99.90)	Free	No change	No change	On or before 12/31/92	
	9902.87.16	Bicycle handlebar stem rotor assemblies (provided for in subheading 8714.99.90)	Free	No change	No change	On or before 12/31/92	".

SEC. 1357. L-ALANYL - L-PROLINE, ALSO KNOWN AS ALA PRO.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.53	L-Alanyl-L-proline (provided for in subheading 2933.90.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1358. TFA LYS PRO IN FREE BASE AND TOSYL SALT FORMS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.54	Trifluoroacetyl-L-lysine-L-proline in free base and tosyl salt forms (provided for in subheadings 2922.49.50 and 2922.49.30, respectively)	Free	No change	No change	On or before 12/31/92	".

SEC. 1359. CERTAIN TIMING APPARATUS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.91.06	Apparatus for measuring, recording, or otherwise indicating intervals of time, with clock or watch movements, battery or AC powered and with opto-electronic display only (provided for in subheading 9106.90.80)	3.9% on the apparatus + 5.3% on the battery	No change	No change	On or before 12/31/92	".

SEC. 1360. CIPROFLOXACIN HYDROCHLORIDE, CIPROFLOXACIN, AND NIMODIPINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new headings:

"	9902.30.55	Nimodipine (provided for in subheading 2933.39.35)..	Free	No change	No change	On or before 12/31/92	

	9902.30.56	Ciprofloxacin and its hydrochloride salt (provided for in subheading 2933.59.27)	Free	No change	No change	On or before 12/31/92	".

SEC. 1361. CERTAIN FURNITURE AND SEATS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.94.01	Furniture, seats, and parts thereof, of cane, osier, bamboo or other similar materials, including rattan (provided for in subheading 9401.50.00, 9401.90.25, 9403.80.30, or 9403.90.25)	Free	No change	No change	On or before 12/31/92	".

SEC. 1362. WICKER PRODUCTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.46.02	Wicker products (provided for in subheading 4602.10.11, 4602.10.13, 4602.10.19, 4602.10.40, or 4602.10.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1363. (6R-(6A,7B(Z)))-7-(((2-AMINO-4-THIAZOLYL)((CARBOXY-METHOXY) IMINO) ACETYL) AMINO)-3-ETHENYL-8-OXO-5-THIA-1-AZABICYCLO(4.2.0) OCT-2-ENE-2-CARBOXYLIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.58	(6R-(6a,7B(z)))-7-(((2-Amino-4-thiazolyl)((carboxymethoxy) imino) acetyl) amino)-3-ethenyl-8-oxo-5-thia-1-azabicyclo(4.2.0)- oct-2-ene-2-carboxylic acid (provided for in subheading 2941.90.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1364. N-(4-(((2-AMINO-5-FORMYL-1,4,5,6,7,8-HEXAHYDRO-4-OXO-6-PTERIDINYL) METHYL)AMINO)BENZOYL)-L-GLUTAMIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.59	N-(4-(((2-Amino-5-formyl-1,4,5,6,7,8-hexahydro-4-oxo-6-pteridinyl) methyl)amino)benzoyl)-L-glutamic acid (provided for in subheading 2936.29.20)	Free	No change	No change	On or before 12/31/92	".

SEC. 1365. (1)3-QUINOLINECARBOXYLIC ACID, 1-ETHYL-6-FLUORO-1,4-DIHYDRO-4-OXO-7-(1-PIPERAZINYL)-, ALSO KNOWN AS NORFLOXACIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.60	1-Ethyl-6-fluoro-1,4-dihydro-4-oxo-7-(1-piperazinyl)-3-quinolinecarboxylic acid (Norfloxacin) (provided for in subheading 2933.59.27)	Free	No change	No change	On or before 12/31/92	".

SEC. 1366. 2,2-DIMETHYLCYCLOPROPYLCARBOXAMIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.61	2,2-Dimethylcyclopropyl-carboxamide (provided for in subheading 2924.29.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1367. N-AMIDINO-3,5-DIAMINO-6-CHLOROPYRAZINECARBOXAMIDE MONOHYDROCHLORIDE DIHYDRATE, ALSO KNOWN AS AMILORIDE HYDROCHLORIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.62	N-Amidino-3,5-diamino-6-chloropyrazinecarboxamide, monohydrochloride dihydrate (Amiloride hydrochloride) (provided for in subheading 2933.90.36)	Free	No change	No change	On or before 12/31/92	".

SEC. 1368. CHEMICAL LIGHT ACTIVATOR BLEND.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.63	Mixtures of dimethyl phthalate, t-butanol, hydrogen peroxide, and sodium salicylate (provided for in subheading 3823.90.29)	Free	No change	No change	On or before 12/31/92	".

SEC. 1369. GRIPPING NARROW FABRICS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.58.06	Fastener fabric tapes of man made fibers (provided for in subheading 5806.10.20)	7%	No change	No change	On or before 12/31/92	".

SEC. 1370. BPIP.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.64	N,N'-Bis(2,2,6,6-tetramethyl-4-piperadinyl)-1,6-hexanediamine (CAS No. 612-55-7) (provided for in subheading 2933.39.47)	Free	No change	No change	On or before 12/31/92	".

SEC. 1371. MBEP.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.65	Monobutyl-p-ethylphenol (provided for in subheading 2907.19.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1372. 2-ETHYLANTHRAQUINONE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.66	2-Ethylanthraquinone (provided for in subheading 2914.69.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1373. RHODAMINE 2C BASE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.67	Rhodamine 2C base (CAS No. 41382-37-0) (provided for in subheading 2932.90.45)	Free	No change	No change	On or before 12/31/92	".

SEC. 1374. POLYMIN P AND POLYMIN P HYDROCHLORIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.39.11	Polymin P and Polymin P hydrochloride (provided for in subheading 3911.90.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1375. POLYMIN SNA 60.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.39.12	Polymin SNA 60 (CAS No. 28825-79-8) (provided for in subheading 3911.90.30)	Free	No change	No change	On or before 12/31/92	".

SEC. 1376. ORNITHINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.68	L-Ornithine, ethyl ester (L-2,5-Diamino-pentanoic acid) (CAS No. 84772-29-2) (provided for in subheading 2922.49.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1377. TEICOPLANIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.69	Teicoplanin (provided for in subheading 3003.20.00 or 3004.20.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1378. ACETOACET-PARA-TOLUIDIDE (AAPT).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.70	Acetoacet-para-toluidide (provided for in subheading 2924.29.09)	Free	No change	No change	On or before 12/31/92	"

SEC. 1379. ACETOACETSULFANILIC ACID, POTASSIUM SALT (AA SULFANILIC ACID POTASSIUM SALT).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.71	Acetoacetsulfanilic acid, potassium salt (provided for in subheading 2924.29.40)	Free	No change	No change	On or before 12/31/92	"

SEC. 1380. 6-METHYLURACIL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.72	6-Methyluracil (provided for in subheading 2933.59.50)	Free	No change	No change	On or before 12/31/92	"

SEC. 1381. ETHYL 2-(2-AMINOTHIAZOLE-4-YL)-2-HYDROXYIMINO- ACETATE (ATHAET).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.73	Ethyl 2-(2-aminothiazole-4-yl)-2-hydroxyiminoacetate (provided for in subheading 2934.10.50)	Free	No change	No change	On or before 12/31/92	"

SEC. 1382. ETHYL 2-(2-AMINOTHIAZOLE-4-YL)-2-METHOXYIMINO- ACETATE (ATMAET).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.74	Ethyl 2-(2-aminothiazole-4-yl)-2-methoxyiminoacetate (provided for in subheading 2934.10.50)	Free	No change	No change	On or before 12/31/92	"

SEC. 1383. 4,4'-METHYLENE-BIS-(2,6-DIMETHYLPHENYLCYANATE).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.75	4,4'-Methylenebis-(2, 6-dimethylphenylcyanate) (provided for in subheading 2907.29.50)	Free	No change	No change	On or before 12/31/92	"

SEC. 1384. 2,2'-BIS(4-CYANATOPHENYL-1,1,1,3,3,3-HEXAFLUOROPROPANE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.76	2,2'-Bis(4-cyanatophenyl)-1,1,1,3,3,3-hexafluoropropane (provided for in subheading 2929.90.10)	Free	No change	No change	On or before 12/31/92	"

SEC. 1385. 4,4'-THIODIPHENYL CYANATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.77	4,4'-Thiodiphenyl cyanate (provided for in subheading 2930.90.20)	Free	No change	No change	On or before 12/31/92	"

SEC. 1386. 1,1-ETHYLIDENE-BIS-(PHENYL-4-CYANATE).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.78	1,1-Ethylidenebis-(phenyl-4-cyanate) (provided for in subheading 2929.90.10)	Free	No change	No change	On or before 12/31/92	"

SEC. 1387. HYDROCARBON NOVOLAC CYANATE ESTER.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.79	Hydrocarbon novolac cyanate ester (provided for in subheading 3911.90.30)	Free	No change	No change	On or before 12/31/92	"

SEC. 1388. 4,4'-METHYLENE-BIS-(3-CHLORO-2,6-DIETHYL ANILINE).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.80	4,4'-Methylenebis-(3-chloro-2,6-diethylaniline) (provided for in subheading 2921.42.30)	Free	No change	No change	On or before 12/31/92	".

SEC. 1389. 4,4'-METHYLENE-BIS-(2,6-DIISOPROPYL ANILINE).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.81	4,4'-Methylenebis-(2,6-diisopropyl-aniline) (provided for in subheading 2921.42.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1390. L-CARNITINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.82	L-Carnitine (provided for in subheading 2923.90.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1391. DIPHENOLIC ACID.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.83	4,4-Bis(4-hydroxyphenyl)pentanoic acid (CAS No. 126-00-1) (provided for in subheading 2918.29.40)	Free	No change	No change	On or before 12/31/92	".

SEC. 1392. 2,6-HNA.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.84	6-Hydroxy-2-naphthoic acid (provided for in subheading 2918.29.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1393. ADC-6.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.85	3-Amino-2-(1-hydroxyethyl)-pentanedioic acid, 5-methyl ester (provided for in subheading 2922.50.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1394. DIFLUNISAL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.86	2',4'-Difluoro-4-hydroxy-3-biphenylcarboxylic acid (Diflunisal) (provided for in subheading 2918.29.40)	Free	No change	No change	On or before 12/31/92	".

SEC. 1395. TRIFLUOROMETHYLANILINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.87	3-(Trifluoromethyl-aniline (CAS No. 98-16-8) (m-Aminobenzotrifluoride) (provided for in subheading 2921.43.50)	Free	No change	No change	On or before 12/31/90	".

SEC. 1396. TAMOXIFEN CITRATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.88	Tamoxifen citrate (provided for in subheading 2922.19.10)	Free	No change	No change	On or before 12/31/92	".

SEC. 1397. FENOFIBRATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.89	2-[4-(4-Chlorobenzoyl)phenoxy]-2-methylpropanoic acid, isopropyl ester					

		(Fenofibrate) (provided for in subheading 3004.90.60)	Free	No change	No change	On or before 12/31/92	".

SEC. 1398. 6-T-BUTYL 2,4 XYLENOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.90	6-t-Butyl-2,4-xylenol (provided for in subheading 2907.19.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1399. 2,4-DIAMINO-6-PHENYL-1,3,5-TRIAZINE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.91	2,4-Diamino-6-phenyl-1,3,5-triazine (provided for in subheading 2933.69.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1400. IOPAMIDOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.92	Iopamidol (provided for in subheading 2924.29.40)	Free	No change	No change	On or before 9/30/91	".

SEC. 1401. IOHEXOL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.93	N,N'-Bis(2,3-dihydroxypropyl)-5-[N-(2,3-dihydroxypropyl)-acetamido]-2,4,6-triiodoisophthalamide (Iohexol) (provided for in subheading 2924.29.40)	Free	No change	No change	On or before 9/30/91	".

SEC. 1402. p-HYDROXYBENZALDEHYDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.94	p-Hydroxybenzaldehyde (provided for in subheading 2912.49.20)	Free	No change	No change	On or before 12/31/92	".

SEC. 1403. IOXAGLATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.95	N-(2-Hydroxyethyl)-2,4,6-triiodo-5-[2-(2,4,6-triiodo-3-(N-methylacetamido)-5-(methylcarbamoyl)benzamido)acetamido]-isophthalamic acid (Ioxaglic acid) (provided for in subheading 2924.29.40)	Free	No change	No change	On or before 9/30/91	".

SEC. 1404. 7-ACETYL-1,1,3,4,4,6-HEXAMETHYLTETRAHYDRO-NAPHTHALENE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.96	7-Acetyl-1,1,3,4,4,6-hexamethyltetrahydronaphthalene (provided for in subheading 2914.30.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1405. MODELING PASTES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.34.07	Modeling pastes (provided for in subheading 3407.00.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1406. MERCURIC OXIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.28.25	Mercuric oxide (provided for in subheading 2825.90.60)	Free	No change	No change	On or before 12/31/92	".

SEC. 1407. 2,3,6-TRIMETHYLPHENOL (TMP).

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.97	2,3,6-Trimethylphenol (provided for in subheading 2907.29.30)	Free	No change	No change	On or before 12/31/92	".

SEC. 1408. PROTECTIVE SPORTS APPAREL.

Subchapter II of chapter 99 is amended—

(1) by adding at the end of the U.S. notes thereto the following:

"11. The general column 1 rate of duty for articles provided for under heading 9902.62.01 is a rate equal to the column 1 rate of duty that would have applied to such articles under the Tariff Schedules of the United States on the day before the effective date of this schedule."; and

(2) by inserting in numerical sequence the following new heading:

"	9902.62.01	Ice hockey pants, field hockey pants, and articles provided for under subheading 6201.93 or 6203.43 which because of their design, fabric, construction and special features provide protection to athlete participants against the hazards of a sport such as injury from blows, falls, flying objects, road burns, or fire	The rates of duty prescribed in U.S. note 11 to the subchapter	No change	No change	On or before 12/31/92	".

SEC. 1409. 1,5-NAPHTHALENE DIISOCYANATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.98	1,5-Naphthalene diisocyanate (provided for in subheading 2929.90.10)	Free	No change	Free	On or before 12/31/92	".

SEC. 1410. SELF-FOLDING TELESCOPIC SHAFT, COLLAPSIBLE UMBRELLAS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.66.01	Self-folding telescopic shaft, collapsible umbrellas chiefly used for protection against rain (provided for in subheading 6601.91.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1411. 1,6-HEXAMETHYLENE DIISOCYANATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.30.99	1,6-Hexamethylene diisocyanate (provided for in subheading 2929.10.50)	7.9%	No change (E,IL) Free (CA)	No change	On or before 12/31/92	".

SEC. 1412. CERTAIN IN-LINE ROLLER SKATE BOOTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.64.02	Skating boots (provided for in subheading 6402.19.10) actually used in the manufacture of in-line roller skates	Free	No change	No change	On or before 12/31/92	".

SEC. 1413. CERTAIN VENEER.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.44.21	Manmade or recomposed wood veneer not exceeding 6 mm in thickness, sliced from a block composed of wood veneer sheets produced from logs and flitches (provided for in subheading 4421.90.90)	Free	No change	No change	On or before 12/31/92	".

SEC. 1414. p-TOLUALDEHYDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.31.00	p-Tolualdehyde (provided for in subheading 2912.29.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1415. DILTIAZEM HYDROCHLORIDE, AND SUSTAINED RELEASE DILTIAZEM HYDROCHLORIDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.31.01	Diltiazem hydrochloride (provided for in subheading 2934.90.25, 3003.90.00, or 3004.90.60)	Free	No change	No change	On or before 12/31/92	".

SEC. 1416. CLENTIAZIN.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.31.04	(+)-cis-(2s, 3s)-3-(Acetoxy)-8-chloro-5-[2-(dimethylamino) ethyl]-2,3-dihydro-2-(4-methodxyphenyl)-1,5-benzothiazepin-4(5H) one maleate (provided for in subheading 2934.90.25)	Free	No change	No change	On or before 12/31/92	".

SEC. 1417. PERSONAL EFFECTS AND EQUIPMENT OF PARTICIPANTS AND OFFICIALS INVOLVED IN THE 1990 GOODWILL GAMES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.98.00	Personal effects of aliens who are participants in or officials of the 1990 Goodwill Games, or who are accredited members of delegations thereto, or who are members of the immediate families of any of the foregoing persons, or who are their servants; equipment for use in connection with such games, and other related articles as prescribed by the Secretary of the Treasury	Free		Free	On or before 9/30/90	".

SEC. 1418. COPPER ACETATE MONOHYDRATE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.31.05	Copper acetate monohydrate (provided for in subheading 2915.29.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1419. PARTS OF GENERATORS FOR USE ON AIRCRAFT.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.85.03	Parts of generators suitable for use on aircraft (provided for in subheading 8504.40.00 or 8525.20.20)	Free	No change	No change	On or before 12/31/92	."

SEC. 1420. CERTAIN INFANT NURSERY MONITORS AND INTERCOMS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new headings:

"	9902.85.25	Infant nursery intercommunication systems, each consisting in the same package of a pair of transceivers operating on frequencies from 49.82 to 49.90 mHz and an electrical adapter (provided for in subheading 8504.40.00 or 8525.20.20)	Free	No change	No change	On or before 12/31/92	
	9902.85.26	Infant nursery monitor systems, each consisting in the same package of a radio transmitter, an electrical adapter, and a radio receiver (provided for in subheading 8504.40.00, 8525.10.60, or 8527.39.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1421. CERTAIN GLASS FIBERS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new headings:

"	9902.70.19	Fiberglass rubber reinforcing cord or yarn made from electrically nonconductive continuous fiberglass filaments 9 microns in diameter or 10 microns in diameter and impregnated with resorcinol formaldehyde latex treatment for adhesion to polymeric compounds (provided for in subheading 7019.10.10, 7019.10.20, or 7019.10.60)	Free	No change	No change	On or before 12/31/92	

	9902.70.20	Fiberglass tire cord fabric woven from electrically nonconductive continuous fiberglass filaments 9 microns in diameter or 10 microns in diameter and impregnated with resorcinol formaldehyde latex treatment for adhesion to polymeric compounds (provided for in subheading 7019.20.10, 7019.20.20, or 7019.20.50)	Free	No change	No change	On or before 12/31/92	".

SEC. 1422. THREE-DIMENSIONAL CAMERAS.

Subchapter II of chapter 99 is amended by adding in numerical sequence the following new heading:

"	9902.90.06	Cameras incorporating 4 fixed lenses which together are capable of producing a 3-dimensional effect (provided for in subheading 9906.53.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1423. PERSONAL EFFECTS AND EQUIPMENT FOR WORLD UNIVERSITY GAMES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.98.03	Personal effects of aliens who are participants in, or officials of, the 1993 World University Games, who are accredited members of delegations thereto, who are members of the immediate families of any of the foregoing persons, or who are their servants; equipment for use in connection with such games, and such other related articles as may be prescribed by the Secretary of the Treasury	Free	No change	Free	On or before 9/30/93	".

SEC. 1424. KARATE PANTS AND BELTS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.62.04	Karate pants and karate belts (provided for in subheading 6203.42.40, 6203.43.40, 6204.62.40, 6204.63.35, or 6217.10.00)	8%	No change	No change	On or before 12/31/92	".

SEC. 1425. METALLURGICAL FLUORSPAR.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.25.29	Fluorspar containing by weight 97 percent or less of calcium fluoride (provided for in subheading 2529.21.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1426. CERTAIN PISTON ENGINES.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.84.07	Internal combustion piston-type engines, of a cylinder capacity exceeding 50 cc but not exceeding 1,000 cc (provided for in subheading 8407.32.20 or 8407.33.20), to be installed in vehicles specifically designed for traveling on snow, golf carts, nonamphibious all-terrain vehicles, and burden carriers, (provided for in subheading 8703.10.00, 8703.21.00, or 8704.31.00)	Free	No change	No change	On or before 12/31/92	".

SEC. 1427. QUIZALOFOP-ETHYL.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.31.06	2-[4-[(6-Chloro-2-quinoxalinyl)oxy]-phenoxy]propionic acid, ethyl ester (Quizalofop-ethyl) (provided for in subheading 2933.90.20)	Free	No change	No change	On or before 12/31/92	".

SEC. 1428. INSULATED WINDING WIRE CABLE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.85.44	Self-contained fluid filled submarine cable of 345 kilovolts (provided for in subheading 8544.60.40).....	Free	No change	No change	On or before 12/31/91	".

SEC. 1429. DIPHENYLDICHLOROSILANE AND PHENYLTRICHLOROSILANE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.31.07	Diphenyldichlorosilane and phenyltrichlorosilane (provided for in subheading 2931.00.40).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1430. THEATRICAL, BALLET, AND OPERATIC SCENERY, PROPERTIES, AND SETS.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.44.22	Theatrical, ballet, and operatic scenery and properties, including sets (provided for in subheading 4421.90.90, 5907.00.10, 5907.00.90, 9701.10.00, 9706.00.00, or 9813.00.65).....	Free	No change	No change	On or before 12/31/92	".

SEC. 1431. 4-FLUORO-3-PHENOXY BENZALDEHYDE.

Subchapter II of chapter 99 is amended by inserting in numerical sequence the following new heading:

"	9902.31.08	4-Fluoro-3-phenoxy benzaldehyde (provided for in subheading 2913.00.10).....	Free	No change	No change	On or before 12/31/92	".

PART 3—EFFECTIVE DATES

SEC. 1601. EFFECTIVE DATES.

(a) IN GENERAL.—Except as otherwise provided in this section, the amendments made by this subtitle shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after October 1, 1990.

(b) RETROACTIVE APPLICATION FOR CERTAIN LIQUIDATIONS AND RELIQUIDATIONS.—

(1) Notwithstanding section 514 of the Tariff Act of 1930 or any other provision of law, upon proper request filed with the appropriate customs officer after September 30, 1990, and before April 1, 1991, any entry—

(A) which was made after the applicable date and before October 1, 1990, and

(B) with respect to which there would have been no duty, or a lesser duty, if any amendment made by section 1102, 1103, 1108, 1201(53), 1203, 1207, 1305, 1324, 1325, 1329, 1330, 1359, 1369, 1411, 1412, 1419, 1426, or 1430 applied to such entry,

shall be liquidated or reliquidated as though such amendment applied to such entry.

(2) For purposes of this section—

(A) The term "applicable date" means—

(i) if the amendment described in paragraph (1)(B) is made by section 1412, April 30, 1986,

(ii) if such amendment is made by section 1324, December 31, 1987,

(iii) if such amendment is made by section 1330, October 1, 1988,

(iv) if such amendment is made by section 1102, 1103, 1108, 1203, 1325, 1329, 1359, 1369, 1411, 1419, or 1426, December 31, 1988,

(v) if such amendment is made by section 1305, July 1, 1989,

(vi) if such amendment is made by section 1201(53) or 1207, December 31, 1989, and

(vii) if such amendment is made by section 1430, January 31, 1990.

(B) The term "entry" includes any withdrawal from warehouse.

(c) BROOMS.—The amendments made by section 1107 shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the date that is 15 days after the date of enactment of this Act.

Subtitle B—Miscellaneous Provisions

SEC. 1701. CERTAIN FORGINGS.

Notwithstanding sections 304 and 514 of the Tariff Act of 1930 or any other provision of law, the Secretary of the Treasury, within 180 days after the date of the enactment of this Act, shall, upon request filed with the appropriate customs officer, reliquidate entries numbered 85414397-7, 85414495-0, 85414647-9, 85414649-5, 85414983-2, 85414995-5, 85415031-3, 85415122-8, 85415244-7, 85415496-6, 85415619-7, 85415683-8, and 85415828-9, filed at the Port of Portland, Oregon, and, upon such reliquidation, shall refund the additional marking duties that were collected upon such entries pursuant to such section 304.

SEC. 1702. BI-LEVEL RAIL PASSENGER CARS.

Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, the Secretary of the Treasury shall admit free of duty each bi-level rail passenger car that was—

(1) entered after March 14, 1988, and before January 1, 1989, and classified under item 690.15 of the Tariff Schedules of the United States; and

(2) designed for, and is for the use of, the Department of Transportation of the State of Florida.

If the liquidation of the entry of any such rail car has become final before the date of the enactment of this Act, the entry shall, notwithstanding any other provision of law, be reliquidated in accordance with the provisions of this Act and any duties paid with respect to such entry shall be refunded.

SEC. 1703. CERTAIN EXTRACORPOREAL SHOCK WAVE LITHOTRIPTER.

Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, upon request filed with the appropriate customs officer within 180 days after the date of enactment of this Act, entry numbered 86-707943-6, dated November 10, 1985, shall be reliquidated as duty-free and any duties paid with respect to such entry shall be refunded.

SEC. 1704. FOREIGN TRADE ZONES.

Section 3(b) of the Act of June 18, 1934 (19 U.S.C. 81c(b)), is amended by striking out "before January 1, 1991" and inserting in lieu thereof "on or before December 31, 1992".

SEC. 1705. CERTAIN ENTRIES OF DIGITAL PROCESSING UNITS.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 or any other provision of law, upon proper request filed with the appropriate customs officer within 180 days after the date of the enactment of this Act, any entry of a processing unit that—

(1) was entered under item 676.15 or 676.54 of the Tariff Schedules of the United States;

(2) would not, if classified under item 675.15, have been subject to temporary duties under item 945.83 or 945.84 of the Appendix to such Schedules; and

(3) was made after January 16, 1986, and before July 2, 1987;

shall be liquidated or reliquidated as free of duty and the Secretary of the Treasury shall refund any duties paid with respect to such entry.

(b) PROCESSING UNIT.—For purposes of this section, the term "processing unit" means a digital processing unit for an automated data processing machine, unhoused, consisting of a printed circuit (single or multiple) with one or more electronic integrated circuits or other semiconductor devices mounted directly thereon.

SEC. 1706. NUCLEAR MAGNETIC SPECTROMETER.

The Secretary of the Treasury shall admit free of duty a Phillips Medical Systems 4 tesla nuclear magnetic resonance (NMR) spectrometer for the use of the University of Alabama at Birmingham. If the liquidation

of the entry of the spectrometer becomes final before the date of the enactment of this Act, the Secretary of the Treasury, notwithstanding any other provisions of law, shall—

(1) within 15 days after such date, reliquidate the entry in accordance with the provisions of this Act, and

(2) at the time of such reliquidation, make the appropriate refund of any duty paid with respect to the entry.

SEC. 1707. FOREIGN REPAIR OF VESSELS.

(a) IN GENERAL.—Section 466 of the Tariff Act of 1930 (19 U.S.C. 1466) is amended by adding at the end thereof the following new subsection:

"(h) The duty imposed by subsection (a) of this section shall not apply to—

"(1) the cost of any equipment, or any part of equipment, purchased for, or the repair parts or materials to be used, or the expense of repairs made in a foreign country with respect to, LASH (Lighter Aboard Ship) barges documented under the laws of the United States and utilized as cargo containers, or

"(2) the cost of spare repair parts or materials (other than nets or nettings) which the owner or master of the vessel certifies are intended for use aboard a cargo vessel, documented under the laws of the United States and engaged in the foreign or coasting trade, for installation or use on such vessel, as needed, in the United States, at sea, or in a foreign country, but only if duty is paid under appropriate commodity classifications of the Harmonized Tariff Schedule of the United States upon first entry into the United States of each such spare part purchased in, or imported from, a foreign country.".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to—

(1) any entry made before the date of enactment of this Act that is not liquidated on the date of enactment of this Act, and

(2) any entry made—

(A) on or after the date of enactment of this Act, and

(B) on or before December 31, 1992.

SEC. 1708. CERTAIN METHANOL ENTRIES.

Notwithstanding section 514 or 520 of the Tariff Act of 1930 or any other provision of law, the Secretary of the Treasury shall—

(1) reliquidate as free of duty—

(A) Entry No. 85322102-3, dated June 21, 1985, and

(B) Entry No. 85603168-9, dated September 20, 1985,

made at New York, New York, that consists of methanol, and

(2) refund any duties paid with respect to such entries,

if the appropriate certification of actual use for such entries is submitted to the appropriate customs officer by no later than the date that is 180 days after the date of enactment of this Act.

SEC. 1709. CERTAIN FROZEN VEGETABLES.

Notwithstanding section 514 of the Tariff Act of 1930 or any other provision of law, upon request filed with the appropriate customs officer within 180 days after the date of enactment of this Act, the Secretary of the Treasury shall—

(1) liquidate or reliquidate as free of duty any entry, or withdrawal from warehouse for consumption, made after December 31, 1989, and before May 1, 1990, of—

(A) cut and frozen green beans (provided for in subheading 0710.22.40 of the Harmonized Tariff Schedule of the United States), or

(B) frozen and off the cob whole kernel sweet corn (provided for in subheading 0710.40.00 of such Schedule),

that is the product of a foreign country to which nondiscriminatory (most-favored-nation) trade treatment applies, and

(2) refund any duties paid with respect to such entry or withdrawal.

SEC. 1710. CERTAIN FILMS AND RECORDINGS.

Notwithstanding section 514 of the Tariff Act of 1930 or any other provision of law, upon request filed with the appropriate customs officer within 180 days of the date of enactment of this Act, any entry, or withdrawal from warehouse for consumption, of any article described in items 960.50 through 960.70 of the Appendix to the Tariff Schedules of the United States (as in effect on August 11, 1985) which was made after August 11, 1985, and before January 1, 1987, shall be liquidated or reliquidated as though such entry or withdrawal had been made on August 11, 1985 and the Secretary of the Treasury shall make the appropriate refund of any duties paid with respect to such entry or withdrawal.

SEC. 1711. CERTAIN DISTILLED SPIRITS IN FOREIGN TRADE ZONES.

Subsection (c) of section 3 of the Act of June 18, 1934 (48 Stat. 999, chapter 590; 19 U.S.C. 81c(c)) is amended—

(1) by striking out "domestic" before "denatured distilled spirits",

(2) by inserting "which have been withdrawn free of tax from a distilled spirits plant (within the meaning of section 5002(a)(1) of the Internal Revenue Code of 1986)" after "distilled spirits",

(3) by striking out "Notwithstanding" and inserting in lieu thereof "(1) Notwithstanding",

(4) by adding at the end thereof the following new paragraph:

"(2) Notwithstanding the provisions of the fifth proviso of subsection (a), distilled spirits which have been removed from a distilled spirits plant (as defined in section 5002(a)(1) of the Internal Revenue Code of 1986) upon payment or determination of tax may be used in the manufacture of production of medicines, medicinal preparation, food products, flavors, or flavoring extracts, which are unfit for beverage purposes, in a zone. Such products will be eligible for drawback under the internal revenue laws under the same conditions applicable to similar manufacturing or production operations occurring in customs territory.".

SEC. 1712. RELIQUIDATION OF CERTAIN ENTRIES AND REFUND OF ANTIDUMPING DUTIES.

(a) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law—

(1) the entries listed in subsection (b) shall be reliquidated within 180 days after the date of enactment of this Act,

(2) the importer of record of the entries shall not be liable for antidumping duties, and

(3) if any antidumping duties have been paid on the entries, either through liquidation or compromise under section 617 of the Tariff Act of 1930 (19 U.S.C. 1617), the Secretary of the Treasury shall refund the antidumping duties within 180 days after the date of enactment of this Act.

(b) APPLICABLE ENTRIES.—The entries referred to in subsection (a) are the following entries made at the port of New Orleans, Louisiana:

Entry Number	Date of Entry
74-222089	May 7, 1974.
74-225275	June 17, 1974.
76-237223	July 9, 1976.
76-247178	October 1, 1976.
79-251251	September 11, 1979.
80-223851	October 9, 1979.
80-224447	November 27, 1979.
80-224448	November 27, 1979.
80-225842	April 29, 1980.
80-225843	April 29, 1980.
80-225844	April 29, 1980.
80-225845	April 29, 1980.
80-226742	August 13, 1980.
80-226743	August 13, 1980.

SEC. 1713. SUBSTITUTION OF CRUDE PETROLEUM OR PETROLEUM DERIVATIVES.

(a) IN GENERAL.—

(1) Section 313 of the Tariff Act of 1930 (19 U.S.C. 1313) is amended by adding at the end thereof the following new subsection:

"(p)(1) When the articles manufactured or produced under subsection (a) or (b), or duty paid imported articles, are stored in common storage with other articles of the same kind and quality that were otherwise manufactured or produced, drawback shall be paid on the articles withdrawn for export from such common storage (regardless of the source or origination of the articles withdrawn) if—

"(A) inventory records on a monthly basis (not daily or transaction by transaction) demonstrate sufficient quantities of imported duty-paid articles, or articles manufactured or produced under subsection (a) or (b), in the common storage against which such withdrawal shall be designated;

"(B) the drawback paid does not exceed the amount of drawback that would be payable hereunder had all of the articles withdrawn from common storage been imported and duty-paid, or manufactured or produced under subsection (a) or (b); and

"(C) certificates of delivery, or certificates of manufacture and delivery, establishing the drawback eligibility of the imported duty-paid articles, or articles manufactured or produced under subsection (a) or (b), when required, are filed with the drawback entry.

"(2) For purposes of this section, the term 'common storage' includes all articles of the same kind and quality stored in an area regardless of the number of bins, tanks, or other containers utilized.".

(2) The amendment made by this subsection shall apply to all drawback entries which were liquidated, under protest or in litigation, in accordance with C.S.D. 88-1, or relevant predecessor decision letter versions thereof, and shall be reliquidated in accordance with such amendment.

(b) DRAWBACK ON SUPPLIES.—Subsection (b) of section 309 of the Tariff Act of 1930 (19 U.S.C. 1309) is amended by inserting "imported articles," after "foreign-trade zone,".

TITLE II—CARIBBEAN BASIN ECONOMIC RECOVERY

SEC. 2001. SHORT TITLE.

This title may be cited as the "Caribbean Basin Economic Recovery Expansion Act of 1990".

SEC. 2002. CONGRESSIONAL FINDINGS.

The Congress finds that—

(1) a stable political and economic climate in the Caribbean region is necessary for the development of the countries in that region and for the security and economic interests of the United States;

(2) the Caribbean Basin Economic Recovery Act was enacted in 1983 to assist in the achievement of such a climate by stimulating the development of the export potential of the region; and

(3) the commitment of the United States to the successful development of the region, as evidenced by the enactment of the Caribbe-

an Basin Economic Recovery Act, should be reaffirmed, and further strengthened, by amending that Act to improve its operation.

SEC. 2003. REPEAL OF TERMINATION DATE ON DUTY-FREE TREATMENT UNDER THE ACT.

Section 218(b) of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2706(b)) is repealed.

SEC. 2004. WORKER RIGHTS.

Section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702) is amended—

(1) by striking out "and" after the semicolon at the end of subsection (b)(5);

(2) by striking out the period at the end of subsection (b)(6) and inserting "; and";

(3) by adding at the end of subsection (b) the following new paragraph:

"(7) if such country has not or is not taking steps to afford internationally recognized worker rights (as defined in section 502(a)(4) of the Trade Act of 1974) to workers in the country (including any designated zone in that country).";

(4) by amending the last sentence in subsection (b) by striking out "and (5)" and inserting "(5), and (7)"; and

(5) by amending subsection (c)(8) to read as follows:

"(8) whether or not such country has taken or is taking steps to afford to workers in that country (including any designated zone in that country) internationally recognized worker rights.".

SEC. 2005. REPORTS.

Section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702) is amended by adding at the end thereof the following new subsection:

"(f) On or before October 1, 1993, and the close of each 3-year period thereafter, the President shall submit to the Congress a complete report regarding the operation of this title.".

SEC. 2006. INCREASE IN DUTY-FREE TOURIST ALLOWANCES.

(a) DUTY-FREE ALLOWANCE FOR RETURNING RESIDENTS.—Subchapter IV of chapter 98 of the Harmonized Tariff Schedule of the United States is amended—

(1) by inserting the following new note at the end of the notes to such subchapter:

"4. As used in subheadings 9804.00.70 and 9804.00.72, the term 'beneficiary country' means a country listed in general note 3(c)(v)(A).";

(2) by striking out "subheading 9804.00.65 or 9804.00.70" and all that follows thereafter in the superior article description to subheadings 9804.00.65 and 9804.00.70 and inserting "subheadings 9804.00.65, 9804.00.70, and 9804.00.72 within 30 days preceding his arrival, and claims exemption under only one of such items on his arrival.";

(3) by striking out "$800" in subheading 9804.00.70 and inserting "$1,200";

(4) by inserting "or up to $600 of which have been acquired in one or more beneficiary countries" before the parenthetical matter in subheading 9804.00.70; and

(5) by inserting after subheading 9804.00.70 the following new subheading with the article description for the new subheading having the same degree of indentation as subheading 9804.00.70:

"	9804.00.72	Articles whether or not accompanying a person, not over $600 in aggregate fair market value in the country of acquisition, including— (a) but only in the case of an individual who has attained the age of 21, not more than 1 liter of alcoholic beverages or not more than 2 liters if at least one liter is the product of one or more beneficiary countries, and (b) not more than 200 cigarettes, and not more than 100 cigars, if such person arrives directly from a beneficiary country, not more than $400 of which shall have been acquired elsewhere than in beneficiary countries (but this item does not permit the entry of articles not accompanying a person which were acquired elsewhere than in beneficiary countries)	Free	Free	."

(b) EFFECTIVE DATE.—The amendments made by subsection (a) apply with respect to residents of the United States who depart from the United States on or after the 15th day after the date of the enactment of this Act.

SEC. 2007. DUTY-FREE TREATMENT FOR ARTICLES ASSEMBLED IN BENEFICIARY COUNTRIES FROM COMPONENTS PRODUCED IN THE UNITED STATES.

(a) IN GENERAL.—U.S. Note 2 of subchapter II of chapter 98 of the Harmonized Tariff Schedule of the United States is amended—

(1) by striking out "2. Any" and inserting "2. (a) Except as provided in paragraph (b), any"; and

(2) by adding at the end thereof the following new paragraph:

"(b) No article (except an article listed in section 213(b) of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2703(b)) may be treated as a foreign article, or as subject to duty, if—

"(i) the article is—

"(A) assembled in whole of fabricated components that are a product of the United States, or

"(B) processed in whole of ingredients (other than water) that are a product of the United States,

in a beneficiary country; and

"(ii) neither the fabricated components or ingredients, after exportation from the United States, nor the article itself, before importation into the United States, enters the commerce of any foreign country other than a beneficiary country.

As used in this paragraph, the term 'beneficiary country' means a country listed in general note 3(c)(V)(A).".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) apply with respect to goods assembled or processed abroad that are entered on or after October 1, 1990.

SEC. 2008. CONFORMING GSP AMENDMENT.

Section 503(b) of the Trade Act of 1974 (19 U.S.C. 2463(b)) is amended to read as follows:

"(b)(1) The duty free treatment provided under section 501 shall apply to any eligible article which is the growth, product, or manufacture of a beneficiary developing country if—

"(A) that article is imported directly from a beneficiary developing country into the customs territory of the United States; and

"(B) the sum of—

"(i) the cost or value of the materials produced in the beneficiary developing country or any 2 or more countries which are members of the same association of countries which is treated as one country under section 502(a)(3), plus

"(ii) the direct costs of processing operations performed in such beneficiary developing country or such member countries,

is not less than 35 percent of the appraised value of such article at the time of its entry into the customs territory of the United States.

"(2) The Secretary of the Treasury, after consulting with the United States Trade Representative, shall prescribe such regulations as may be necessary to carry out this subsection, including, but not limited to, regulations providing that, in order to be eligible for duty-free treatment under this title, an article must be wholly the growth, product, or manufacture of a beneficiary developing country, or must be a new or different article of commerce which has been grown, produced, or manufactured in the beneficiary developing country; but no article or material of a beneficiary developing country shall be eligible for such treatment by virtue of having merely undergone—

"(A) simple combining or packaging operations, or

"(B) mere dilution with water or mere dilution with another substance that does not materially alter the characteristics of the article.".

SEC. 2009. PILOT PRECLEARANCE PROGRAM.

(a) ESTABLISHMENT OF PROGRAM.—Subject to subsection (b), the Commissioner of Customs shall carry out, during fiscal years 1991 and 1992, preclearance operations at a facility of the United States Customs Service in a country within the Caribbean Basin which the Commissioner of Customs considers appropriate for testing the extent to which the availability of preclearance operations can assist in the development of tourism.

(b) RESTRICTIONS REGARDING PROGRAM.—

(1) The Commissioner of Customs may not consider a country within the Caribbean Basin to be appropriate for the testing referred to in subsection (a)—

(A) if preclearance operations are currently carried out by the United States Customs Service in that country; or

(B) unless immigration preinspection operations are currently carried out in that country with respect to individuals traveling to the United States.

(2) Preclearance operations may not be commenced in the country selected for testing under subsection (a) unless the Commissioner of Customs and the Commissioner of Immigration and Naturalization jointly certify that—

(A) there exists a bilateral agreement between the United States Government and the government of such country which protects the interests of the United States and affords diplomatic protection to United

States employees working at the preclearance location;

(B) the facilities at the preclearance location conform to Federal Inspection Services standards and are suitable for the duties to be performed therein;

(C) there is adequate security around the structure used for the reception of international arrivals;

(D) the government of such country grants the United States Customs Service and the United States Immigration and Naturalization Service appropriate search, seizure, and arrest authority; and

(E) United States employees and their families will not be subject to fear of reprisal, acts of terrorism, and threats of intimidation.

(c) REPORT.—As soon as practicable after September 30, 1992, the Commissioner of Customs shall submit to the Congress a report regarding the preclearance operations program carried out under subsection (a). The report shall include—

(1) a summary of the preclearance operations, including the number of individuals processed, any administrative problems encountered, and cost of the operations;

(2) an evaluation of the extent to which the preclearance operations contributed to—

(A) the stimulation of the tourism industry of the country concerned, and

(B) expedited customs processing at United States ports of entry;

(3) the opinion of the Commissioner of Customs regarding the efficacy of extending preclearance operations to other countries within the Caribbean Basin that are developing tourism industries, and if the opinion is affirmative, the identity of those countries to which such operations should be extended and the estimated costs and results of such extensions; and

(4) such other matters that the Commissioner of Customs considers relevant.

SEC. 2010. APPLICATION OF ACT IN EASTERN CARIBBEAN AREA.

It is the sense of the Congress that there should be undertaken special efforts in order to improve the ability of the Organization of Eastern Caribbean States countries and Belize to benefit from the Caribbean Basin Economic Recovery Act.

SEC. 2011. CARIBBEAN-CENTRAL AMERICAN SCHOLARSHIP PARTNERSHIP.

(a) ESTABLISHMENT OF SCHOLARSHIP PROGRAM.—The Administrator of the Agency for International Development shall establish and administer a program of scholarship assistance, in cooperation with State governments, universities, community colleges, and businesses, to provide scholarships to enable students from eligible countries in the Caribbean and Central America to study in the United States.

(b) GRANTS TO STATES.—In carrying out this section, the Administrator may make grants to States to provide scholarship assistance for undergraduate degree programs and for training programs of one year or longer in study areas related to the critical development needs of the students' respective countries.

(c) CONSULTATION WITH STATES.—The Administrator shall consult with the participating States with regard to the educational opportunities available within each State and on the assignment of scholarship recipients.

(d) FEDERAL SHARE.—The Federal share for each year for which a State receives payments under this section shall be not less than 50 percent.

(e) NON-FEDERAL SHARE.—The non-Federal share of payments under this section may be in cash, including the waiver of tuition or the offering of in-State tuition or housing waivers or subsidies, or in-kind fairly evaluated, including the provision of books or supplies.

(f) FORGIVENESS OF SCHOLARSHIP ASSISTANCE.—The obligation of any recipient to reimburse any entity for any or all scholarship assistance provided under this section shall be forgiven upon the recipient's prompt return to his or her country of domicile for a period which is at least one year longer than the period spent studying in the United States with scholarship assistance.

(g) PRIVATE SECTOR PARTICIPATION.—To the maximum extent practicable, each participating State shall enlist the assistance of the private sector to enable the State to meet the non-Federal share of payments under this section. Wherever appropriate, each participating State shall encourage the private sector to offer internships or other opportunities consistent with the purposes of this section to students receiving scholarships under this section.

(h) FUNDING.—Any funds used in carrying out this section shall be derived from funds allocated for Latin American and Caribbean regional programs under chapter 4 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2346 and following; relating to the economic support fund).

(i) DEFINITIONS.—As used in this section—

(1) The term "eligible country" means any country—

(A) which is receiving assistance under chapter 1 of part I of the Foreign Assistance Act of 1961 (22 U.S.C. 2151 and following; relating to development assistance) or chapter 4 of part II of that Act (22 U.S.C. 2346 and following; relating to the economic support fund); and

(B) which is designated by the President as a beneficiary country pursuant to the Caribbean Basin Economic Recovery Act.

(2) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

SEC. 2012. PROMOTION OF TOURISM.

(a) CONGRESSIONAL FINDING.—The Congress finds that the tourism industry must be recognized as a central element in the economic development and political stability of the Caribbean Basin region because of the potential that the industry has for increasing employment and foreign exchange earnings, establishing important linkages with other related sectors, and having a positive complementary effect on trade with the United States.

(b) FEDERAL AGENCY PRIORITY.—It is the sense of the Congress that increased tourism and related activities should be developed in the Caribbean Basin region as a central part of the Caribbean Basin Initiative program and, to that end, the appropriate agencies of the United States Government should assign a high priority to projects that promote the tourism industry in the Caribbean Basin.

(c) STUDY.—The Secretary of Commerce shall complete the study begun in 1986 regarding tourism development strategies for the Caribbean Basin region. The study shall include—

(1) information on the mutual benefits received by the United States and the Caribbean Basin economies as a result of tourist activity in the area; and

(2) proposals for developing increased linkages between the tourism industry and local industries in the region such as the agro-business.

SEC. 2013. AGRICULTURAL INFRASTRUCTURE SUPPORT.

It is the sense of Congress that in order to facilitate trade with, and the economic development of, the countries designated as beneficiary countries under the Caribbean Basin Economic Recovery Act, the Secretary of Agriculture should, in consultation with the Agribusiness Promotion Council, coordinate with the Agency for International Development the development of programs to encourage improvements in the transportation and cargo handling infrastructure in these countries for the purpose of improving agricultural trade between these countries and the United States. Such programs should focus on improving distribution of agricultural commodities and products in these countries, and the phytosanitary institutions, quarantine capabilities, and pesticide regulations of these countries regarding agricultural commodities and products.

TITLE III—AUTHORIZATION OF APPROPRIATIONS FOR TRADE AGENCIES

SEC. 3001. OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE.

(a) IN GENERAL.—

(1) Subparagraph (A) of section 141(g)(1) of the Trade Act of 1974 (19 U.S.C. 2171(g)(1)(A)) is amended to read as follows:

"(A) There are authorized to be appropriated for the purpose of carrying out the functions of the Office—

"(i) $21,200,000 for fiscal year 1991, and

"(ii) $19,027,000 for fiscal year 1992.".

(2) Subparagraph (B) of section 141(g)(1) of the Trade Act of 1974 is amended—

(A) by striking out "for fiscal year 1990" and inserting in lieu thereof "for each fiscal year", and

(B) by striking out "$89,000" in clause (i) and inserting in lieu thereof "$98,000".

(b) PANELS AND COMMITTEES UNDER CANADA FREE-TRADE AGREEMENT—Paragraph (1) of section 406(b) of the United States-Canada Free-Trade Agreement Implementation Act of 1988 (19 U.S.C. 2112, note) is amended to read as follows:

"(1) There are authorized to be appropriated to the Office of the United States Trade Representative—

"(A) $2,050,000 for fiscal year 1991, and

"(B) $2,050,000 for fiscal year 1992,

to pay during each of such fiscal years the United States share of the expenses of binational panels and extraordinary challenge committees convened pursuant to chapter 19 of the Agreement.".

SEC. 3002. UNITED STATES INTERNATIONAL TRADE COMMISSION.

Paragraph (2) of section 330(e) of the Tariff Act of 1930 (19 U.S.C. 1330(e)(2)) is amended to read as follows:

"(2)(A) There are authorized to be appropriated to the Commission for necessary expenses (including the rental of conference rooms in the District of Columbia and elsewhere)—

"(i) $42,430,000 for fiscal year 1991, and

"(ii) $46,673,000 for fiscal year 1992.

"(B) Of the amounts authorized to be appropriated under subparagraph (A) for each fiscal year, $2,500 may be used, subject to approval by the Chairman of the Commission, for reception and entertainment expenses.

"(C) No part of any sum that is appropriated under the authority of subparagraph (A) may be used by the Commission for the making of any special study, investigation, or report that is requested by any agency of the executive branch, unless that agency reimburses the Commission for the cost thereof.".

SEC. 3003. UNITED STATES CUSTOMS SERVICE.

Subsection (b) of section 301 of the Customs Procedural Reform and Simplification Act of 1978 (19 U.S.C. 2075(b)(1)) is amended—

"(b) AUTHORIZATION OF APPROPRIATIONS.—

"(1) There are authorized to be appropriated for the salaries and expenses of the United States Customs Service that are incurred in noncommercial operations (other than the air interdiction program)—

"(A) $521,882,000 for fiscal year 1991, and

"(B) $547,958,000 for fiscal year 1992.

"(2) There are authorized to be appropriated from the Customs User Fee Account for the salaries and expenses of the United States Customs Service that are incurred in commercial operations—

"(A) $671,645,000 for fiscal year 1991, and

"(B) $705,569,000 for fiscal year 1992.

"(3) There are authorized to be appropriated for the operation (including salaries and expenses) and maintenance of the air interdiction program of the United States Customs Service—

"(A) $143,047,000 for fiscal year 1991, and

"(B) $163,047,000 for fiscal year 1992.".

TITLE IV—MISCELLANEOUS PROVISIONS

SEC. 4001. TECHNICAL AMENDMENTS REGARDING NONDISCRIMINATORY TRADE TREATMENT.

(a) WAIVER AUTHORITY.—

(1) Paragraph (5) of section 402(d) of the Trade Act of 1974 (19 U.S.C. 2432(d)(5)) is amended—

(A) by striking out "the waiver authority granted by subsection (c) has been extended under paragraph (3) or (4) for any county for the 12-month period referred to in such paragraphs, and",

(B) by striking out "such authority will" in the first sentence thereof and inserting in lieu thereof "the waiver authority granted under subsection (c) will",

(C) by striking out "60-day period" each place it appears and inserting in lieu thereof "105-day period",

(D) by striking out ", either the House of Representatives or the Senate adopts, by an affirmative vote of a majority of the Members present and voting in that House and under the procedures set forth in section 153, a resolution" and inserting in lieu thereof "a joint resolution described in section 153(a) is enacted into law,",

(E) by striking out "adoption by either House" each place it appears and inserting in lieu thereof "enactment", and

(F) by striking out "a resolution" each place it appears and inserting in lieu thereof "a joint resolution".

(2) Subsection (d) of section 402 the Trade Act of 1974 (19 U.S.C. 2432(d)), as amended by paragraph (1), is amended—

(A) by striking out paragraphs (1), (2), (3), and (4),

(B) by redesignating subparagraphs (A), (B), and (C) of paragraph (5) as paragraphs (1), (2), and (3), respectively, and

(C) by striking out "(5) If" and inserting in lieu thereof "If".

(3) Subsection (a) of section 153 of the Trade Act of 1974 (19 U.S.C. 2193(a)) is amended to read as follows:

"(a) CONTENTS OF RESOLUTION.—For purposes of this section, the term 'resolution' means only a joint resolution of the two Houses of Congress, the matter after the resolving clause of which is as follows: 'That the Congress does not approve the extension of the authority contained in section 402(c) of the Trade Act of 1974 recommended by the President to the Congress on _____ with respect to _____.', with the first blank space being filled with the appropriate date, and the second blank space being filled with the names of those countries, if any, with respect to which such extension of authority is not approved, and with the clause beginning with 'with respect to' being omitted if the extension of the authority is not approved with respect to any country.".

(4) Subsection (b) of section 153 of the Trade Act of 1974 (19 U.S.C. 2193(b)) is amended—

(A) by striking out ", and, in the case of a resolution related to section 402(d)(4), 20 calendar days shall be substituted for 30 days" in paragraph (2),

(B) by striking out "an except clause, in the case of a resolution described in subsection (a)(1), or" in paragraph (3),

(C) by striking out ", in the case of a resolution described in subsection (a)(2)" in paragraph (3),

(D) by striking out "an except clause, in the case of a resolution described in subsection (a)(1), or" in paragraph (4), and

(E) by striking out ", in the case of a resolution described in subsection (a)(2)" in paragraph (4).

(5) Subsection (c) of section 153 of the Trade Act of 1974 (19 U.S.C. 2193) is amended by striking out "in subsection (a)(1)" and inserting in lieu thereof "in subsection (a)".

(b) BILATERAL COMMERCIAL AGREEMENTS.—

(1) Subsection (c) of section 405 of the Trade Act of 1974 (19 U.S.C. 2435(c)) is amended to read as follows:

"(c) An agreement referred to in subsection (a), and a proclamation referred to in section 404(a) implementing such agreement, shall take effect only if a joint resolution described in section 151(b)(3) that approves of the agreement referred to in subsection (a) is enacted into law.".

(2) Section 151 of the Trade Act of 1974 (19 U.S.C. 2191(b)) is amended—

(A) by inserting "or resolution" after "revenue bill" in subsection (b)(2),

(B) by inserting ", or approval resolution," in subsection (b)(2) after "implementing bill",

(C) by striking out "concurrent" in subsection (b)(3) and inserting in lieu thereof "joint",

(D) by striking out "revenue bill" each place it appears in subsection (e)(2) and inserting in lieu thereof "revenue bill or resolution", and

(E) by striking out "such bill" each place it appears in subsection (e)(2) and inserting in lieu thereof "such bill or resolution".

(3) Subsection (c) of section 407 of the Trade Act of 1974 (19 U.S.C. 2437(c)) is amended—

(A) by striking out paragraphs (1) and (2) and inserting in lieu thereof the following new paragraph:

"(1) In the case of a document referred to in subsection (a), the proclamation set forth in the document may become effective and the agreement set forth in the document may enter into force and effect only if a joint resolution described in section 151(b)(3) that approves of the extension of nondiscriminatory treatment to the products of the country concerned is enacted into law.", and

(B) by redesignating paragraph (3) as paragraph (2).

(c) COMPLIANCE REPORTS.—

(1) Paragraph (2) of section 407(c) of the Trade Act of 1974 (19 U.S.C. 2437(c)(2)), as redesignated by subsection (b)(3)(B) of this section, is amended—

(A) by striking out "the 90-day period" and inserting in lieu thereof "the 135-day period",

(B) by striking out "either the House of Representatives or the Senate adopts, by an affirmative vote of a majority of those present and voting in that House, a resolution of disapproval (under the procedures set forth in section 152)" and inserting in lieu thereof "a joint resolution described in section 152(a)(1)(B) is enacted into law that disapproves", and

(C) by striking out "the adoption" and inserting in lieu thereof "the enactment".

(2) Subparagraph (B) of section 152(a)(1) of the Trade Act of 1974 (19 U.S.C. 2192(a)(1)(B)) is amended to read as follows:

"(B) a joint resolution of the two Houses of Congress, the matter after the resolving clause of which is as follows: 'That the Congress does not approve _____ transmitted to the Congress on _____.', with the first blank space being filled in accordance with paragraph (2), and the second blank space being filled with the appropriate date.".

(3) Paragraph (2) of section 152(a) of the Trade Act of 1974 (19 U.S.C. 2192(a)(2)) is amended—

(A) by adding "and" at the end of subparagraph (A),

(B) by striking out "407(c)(3)" in subparagraph (C) and inserting in lieu thereof "407(c)(2)",

(C) by striking out subparagraph (B),

(D) by redesignating subparagraph (C) as subparagraph (B).

(4) Subsection (f) of section 152 of the Trade Act of 1974 (19 U.S.C. 2192(f)) is amended to read as follows:

"(f) FINAL PASSAGE IN THE SENATE.—A resolution that has passed the House of Representatives shall, when received in the Senate, be placed on the calendar. The procedures in the Senate with respect to a resolution introduced in the Senate that concerns the same matter as the resolution that passed the House of Representatives shall be the same as if no resolution had been received from the House of Representatives, but the vote on final passage in the Senate shall be on the resolution that passed the House of Representatives.".

(5) Subsection (b) of section 154 of the Trade Act of 1974 (194 U.S.C. 2194(b)) is amended—

(A) by striking out "407(c)(2) and 407(c)(3)" and inserting in lieu thereof "and 407(c)(2)",

(B) by striking out "such sections" and inserting in lieu thereof "section 203(c) and the 135-day period referred to in section 407(c)(2).".

SEC. 4002. CUSTOMS USER FEES.

(a) MERCHANDISE PROCESSING FEE.—

(1) Subsection (a) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)) is amended by striking out paragraphs (9) and (10) and inserting in lieu thereof the following:

"(9) For the processing of any merchandise that is informally entered—

"(A) $14 if the entry is manual, and

"(B) $11 if the entry is automated.

"(10) For the processing of any merchandise that is formally entered, or withdrawn from warehouse for consumption, during any fiscal year, a fee in an amount equal to 0.15 percent ad valorem.

(2) Paragraph (8) of section 13031(b) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(b)(8)) is amended—

(A) by striking out "be based" in subparagraph (A)(ii) and inserting in lieu thereof "except as otherwise provided in this paragraph, be based",

(B) by striking out "and" at the end of subparagraph (A)(iii),

(C) by striking out the period at the end of

subparagraph (A)(iv) and inserting in lieu thereof "; and",

(D) by inserting after clause (iv) of subparagraph (A) the following new clause:

"(v) in the case of agricultural products of the United States that are processed and packed in a foreign trade zone, be applied only to the value of material used to make the container for such merchandise, if such merchandise is subject to entry and the container is of a kind normally used for packing such merchandise.",

(E) by redesignating subparagraphs (A) and (B) as subparagraphs (D) and (E), and

(F) by inserting before subparagraph (D), as redesignated by this paragraph, the following new subparagraphs:

"(A) The fee charged under subsection (a)(10)—

"(i) shall not exceed—

"(I) $403 for each manual entry, or

"(II) $400 for each automated entry, and

"(ii) shall not be less than—

"(I) $23 for each manual entry, or

"(II) $20 for each automated entry.

"(B) No fee may be charged under paragraph (9) or (10) of subsection (a) for the processing of any article that is—

"(i) provided for under any item in chapter 98 of the Harmonized Tariff Schedule of the United States, except subheading 9802.00.60 or 9802.00.80,

"(ii) a product of an insular possession of the United States, or

"(iii) a product of any country listed in subdivision (c)(ii)(B) or (c)(v) of general note 3 to such Schedule.

"(C) For purposes of applying paragraphs (9) and (10) of subsection (a), expenses incurred in conducting commercial operations do not include costs incurred in—

"(i) air passenger processing,

"(ii) export control, or

"(iii) international affairs."

(3) Paragraph (10) of section 13031(b) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(b)(10)) is amended—

(A) by striking out "under subsection (a)(10)" and inserting in lieu thereof "under paragraph (9) or (10) of subsection (a)", and

(B) by striking out the last sentence thereof.

(b) DISPOSITION OF FEES.—

(1) Subsection (f) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)) is amended—

(A) by striking out "All Funds" in paragraph (2) and inserting in lieu thereof "Except as otherwise provided in this subsection, all funds",

(B) by redesignating paragraph (4) as paragraph (5), and

(C) by inserting after paragraph (3) the following new paragraph.

"(4) No funds may be expended from the Customs User Fee Account, and no reimbursement made under paragraph (3), for the costs incurred in providing any service which is exempt from the fee.".

(2) Paragraph (3) of section 13031(f) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)) is amended to read as follows:

"(3)(A) The Secretary of the Treasury, in accordance with section 524 of the Tariff Act of 1930 and without regard to apportionment or any other administrative practice or limitation, shall directly reimburse, from the fees collected under subsection (a) (other than paragraph (9) or (10) of subsection (a)), each appropriation for the amount paid out of that appropriation for the costs incurred by the Secretary—

"(i) in providing—

"(I) inspectional overtime services, and

"(II) all preclearance services,

for which the recipients of such services are not required to reimburse the Secretary of the Treasury, and

"(ii) to the extent funds remain available to make reimbursements under clause (i), in providing such additional personnel and equipment (distributed on a basis proportionate to the fees collected under subsection (a), other than paragraph (9) or (10) of subsection (a)), and in paying such other necessary expenses, as may be necessary to provide service to those persons paying such fees.

"(B) Reimbursement under this paragraph shall be made at least quarterly. To the extent necessary, reimbursement of appropriations under this paragraph may be made on the basis of estimates made by the Secretary of the Treasury and adjustments shall be made in subsequent reimbursements to the extent that the estimates were in excess of, or less than, the amounts required to be reimbursed.

"(C) At the close of each fiscal year, the Secretary of the Treasury shall submit a report to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives summarizing the expenditures for which reimbursement has been provided under subparagraph (A)(ii).".

(c) EXTENSION OF FEES.—Paragraph (3) of section 13031(j) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(j)(3)) is amended by striking out "1990" and inserting in lieu thereof "1991".

(d) AGGREGATION OF MERCHANDISE PROCESSING FEES.—

(1) Notwithstanding any provision of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c), in the case of entries of merchandise made under the temporary monthly entry programs established by the Commissioner of Customs before July 1, 1989, for the purpose of testing entry processing improvements, the fee charged under section 13031(a)(10) of the Consolidated Omnibus Budget Reconciliation Act of 1985 for each day's importations at each port by the same importer from the same exporter shall be the lesser of—

(A) $400, or

(B) the amount determined by applying the ad valorem rate determined in such section 13031(a)(10) to the aggregate value of each day's importations at each port by the same importer from the same exporter.

(2) The fees described in paragraph (1) that are payable under the program described in paragraph (1) shall be paid with each monthly consumption entry. Interest shall accrue on the fees paid monthly in accordance with section 6621 of the Internal Revenue Code of 1986.

(e) EFFECTIVE DATE.—The amendments made by this section, and the provisions of this section, shall take effect on October 1, 1990.

SEC. 4003. DRUG PARAPHERNALIA.

(a) STATISTICAL ANNOTATIONS.—The Secretary of the Treasury, the Secretary of Commerce, and the United States International Trade Commission shall take actions under section 484(e) of the Tariff Act of 1930 (19 U.S.C. 1484(e)) to implement the recommendations of the Commission regarding additional statistical annotations that were made in the report of the Commission on Investigation 332-277, which was submitted to the Committee on Finance of the Senate in September 1989.

(b) ADMINISTRATION.—

(1) Section 1822 of the Mail Order Drug Paraphernalia Control Act (21 U.S.C. 857) is amended by adding at the end thereof the following new subsection:

"(g)(1) The Commissioner of Customs shall prescribe guidelines for use in determining whether articles intended for importation or exportation are to be considered drug paraphernalia.

"(2) Prior to prescribing the final form of the guidelines under paragraph (1), the Commissioner of Customs shall hold a public hearing on the preliminary form of the guidelines.".

(2) The guidelines that the Commissioner of Customs is required to prescribe under section 1822(g) of the Mail Order Drug Paraphernalia Control Act, as amended by paragraph (1), shall be prescribed by no later than the date that is 6 months after the date of enactment of this Act.

(c) REPORT.—By no later than the date that is 1 year after the date of enactment of this Act, the Commissioner of Customs shall submit to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives a report on the operational response of the United States Customs Service to the recommendations contained in the report of the United States Trade Commission described in subsection (a). The report submitted by the Commissioner of Customs under this subsection shall address the effectiveness of the United States Customs Service in monitoring and seizing drug paraphernalia, including crack bags, vials, and pipes.

SEC. 4004. PROHIBITION ON THE IMPORTATION OF CERTAIN ARTICLES ORIGINATING IN BURMA.

(a) IN GENERAL.—After the date of enactment of this Act—

(1) teak, and any other tropical timber, that is cut in Burma,

(2) any product that contains teak, or any other tropical timber, cut in Burma,

(3) any fish or other aquatic animal taken from the territorial waters of Burma, and

(4) any product containing any fish or other aquatic animal taken from the territorial waters of Burma,

may not be imported into the United States or into any territory or possession of the United States.

(b) ENFORCEMENT.—

(1) The Secretary of the Treasury shall prescribe such regulations as may be necessary to carry out the provisions of this section.

(2) The regulations prescribed under paragraph (1) shall—

(A) require any importer of teak, of any other tropical timber, or of any product containing teak or any other tropical timber, to submit to the Secretary of the Treasury at the time of the importation of such teak, timber, or product into the United States, or into any territory or possession of the United States, a statement certifying the origin of the teak or other tropical timber, and

(B) require any importer of—

(i) fish or other aquatic animals, or

(ii) any product containing any fish or other aquatic animal,

that is imported from, or has passed through, Burma (or any foreign country whose nationals are allowed to fish in the territorial waters of Burma by a treaty or agreement between Burma and the foreign country or such nationals) to submit to the Secretary of the Treasury at the time of the importation of such fish, aquatic animal, or product into the United States, or into any territory or possession of the United States, a statement certifying the territorial waters

from which the fish or aquatic animal was taken.

(c) COMPLIANCE WITH GATT.—The provisions of this section shall not apply if the President submits to the Congress a written statement certifying that the provisions of this section violate the obligations of the United States under the General Agreement on Tariffs and Trade.

Amend the title so as to read: "An Act to make miscellaneous and technical changes to various trade laws.".

Mr. BENTSEN. Mr. President, we now have before the Senate a miscellaneous trade bill. This bill is largely comprised of noncontroversial but needed changes in our trade laws. It reflects the work of 57 Members of the Senate. It was reported from the Finance Committee without opposition.

Last September, the House presented us with a package of trade provisions in the budget reconciliation bill. We opposed acting on those provisions because we had not had a chance to view them in the Finance Committee, to publicize what they were, to get a public reaction, and to get the various trading interests to react and tell us how the provisions affected the economy of our country. So we insisted that all trade measures be dropped from the reconciliation bill, and they were.

We did agree to consider those matters this year and to make a best effort to move that bill by March 31, 1990. We made that conference agreement public. Therefore, everyone in the trade community has been aware since the end of the reconciliation conference last fall that the subjects in this bill would be considered early this year.

In carrying out this reconciliation agreement, the Finance Committee was careful to solicit the views of the administration, the Members of the Senate—I think that is proven by the fact we have the work of 57 of them in it—and the public. We held 2 periods for written comments on over 200 miscellaneous tariff bills. We held hearings on the other provisions of the bill. We got detailed, unbiased reports from the trade experts at the U.S. International Trade Commission.

None of the provisions on this bill, or the amendments that I am aware of, is so controversial that we cannot dispose of the controversy with agreements to debate and vote on amendments. Frankly, I do not expect many such amendments because the committee process has been so complete. Furthermore, if we go beyond the subject matter of this bill, it is clear we will in one way or another kill this bill. Dozens of industries across the country depend on these provisions coming into law this year. So I urge Senators not to offer nongermane amendments, and to vote against them if they are offered in the interest of getting a bill enacted into law this year.

Moreover, I would point out to Senators that since people have known about our March 31 objective for this bill since last fall, we will be skeptical about bills offered here for the first time. When and if the Senate passes this bill, I expect an early conference with the House. There will not be much time, either now or after the Senate acts, to evaluate the effects of new provisions that we have not had a chance to study in committee.

Now I want to describe the provisions of the bill.

MISCELLANEOUS TARIFF PROVISIONS

Miscellaneous tariff provisions in title I account for the bulk of the measures in this bill. In most cases, these bills fall into one of three classes:

CORRECTING ERRORS IN THE HARMONIZED SYSTEM

First, there are bills to correct errors in converting to the harmonized system of tariff nomenclature, which was adopted in the Trade Act of 1988 and put into effect on January 1, 1989. The harmonized system created internationally uniform categories of products for customs purposes. It was the result of 10 years of painstaking negotiations to assure the conversion from our old tariff schedules was unbiased. We were one of the last countries to adopt a harmonized system. However, mistakes were made. Over the last year, private industry has identified a number of such oversights, which this bill would correct some of those errors.

PRIVATE RELIEF PROVISIONS

The second general category of miscellaneous tariff provisions on this bill is private relief provisions, which generally prevent an unfair application of the customs laws. For example, the bill would allow the University of Alabama Medical School to buy a complicated piece of research equipment duty free, because it is not available in this country. The changes correct an unfairness or help U.S. producers if no U.S. interest is hurt.

DUTY SUSPENSIONS

The third category of miscellaneous trade provisions is temporary duty suspensions. For the most part, they relate to articles that are not produced in this country. Their aim is to make U.S. companies more competitive by reducing their costs on products that are not available for purchase within our country.

Some of these are new suspensions. Others are extensions of suspensions that expire this year. In both cases, we have asked for written comment from the public on bills introduced in the Senate through December. We had a further comment period in February, and we published a list of all the bills adopted by the committee on March 1 of this year.

Many of the original bills were changed with the agreement of the sponsor to make them noncontroversial.

Members have gone out of their way to try to assure the passage of this bill in a timely manner. Hours of negotiations have gone into these provisions. That process involved the Senators, their staffs, the committee, the administration, and private sector organization.

TRADE ACT TECHNICAL CORRECTIONS RELATING TO THE COMMUNIST COUNTRY TRADE

The second general subject matter addressed by this bill relates to the congressional role in U.S. trade policy toward Communist countries. This policy is controlled by title IV of the Trade Act of 1974. That contains two significant provisions. First, it prohibits its most favored nation, or MFN, treatment for countries that have limits or tight controls on emigration of their people and, second, it prevents the President from proclaiming MFN, or most favored nation treatment, for such a country unless he first negotiates a trade agreement with the country concerned and then gets U.S. congressional approval of that agreement.

Today these provisions face their biggest job to date because we are talking about trade liberalization with the Soviet Union and Eastern Europe. We need to have these provisions fully in effect, both to assure that the Soviets carry through on their emigration policy and to assure our businessmen that the United States Government will work to give them a fighting chance in Soviet trade. None of that will happen unless title IV of the 1974 law is put in working order, and right now, that is in serious doubt.

The reason is that Congress' authority under title IV is exercised through use of legislative vetoes. Since the 1974 provisions were enacted, the Supreme Court decided that some legislative vetoes are just not constitutional. Many in the administration have extrapolated from the Supreme Court decision that the procedures under the 1974 act are unconstitutional.

Quite frankly, I think most of the procedures in the 1974 act are constitutional, but I see no point in debating legislative vetoes in the Senate. An issue of constitutionality can only be resolved in the courts, and that is the last place I want the trade policy of the United States to be formulated. That is why I am convinced that we should change the procedure.

If we do not, every decision to give MFN to Eatern European countries and the Soviet Union will be vulnerable to litigation. These lawsuits would at least disrupt sensitive relations with those countries, some of them hanging on the brink, some of them trying to go to democratic forms of government and having a very difficult time adjusting their economy and desperately needing trade with the United States. So it is just not worth the chance of letting those lawsuits get started.

Last Thursday, the United States signed a trade agreement with Czechoslovakia. That agreement clearly calls for congressional approval. The President has indicated he is going to sign a trade agreement with the Soviet Union several weeks from now, at the

Bush-Gorbachev summit. Therefore, we have to get these provisions enacted into law quickly. Provisions in the bill are acceptable to the House. They are not opposed by the administration.

The other provisions of this bill are important, too, and I just want to take a few minutes to describe them.

This bill will put the Caribbean Basin Initiative on a permanent footing, and that is something that needs to be done. Under the current law, the program will expire in 1995. The Senator from Texas was the first Democrat to cosponsor the Caribbean Basin Initiative when it was proposed by President Reagan. This program provides the richest benefit for developing countries of any of our trade programs. It is three times as rich a program as the generalized system of preferences.

CBI countries get duty-free access to the U.S. market except for a handful of products. They are not required to make any tariff concessions in return.

The program is beginning to pay benefits. The development of nontraditional industries in the Caribbean is progressing, and the trade with the region is increasing, which it desperately needs.

The recent liberalization of Panama and Nicaragua underscores the importance of this program because we can show the people of that region that we are not only sympathetic with that struggle, but we are going to do those things that we think will be helpful to implement the change to a democratic form of government.

The most important provision in this section of the bill makes that CBI program permanent. In effect, it provides zero rates of duty indefinitely to those countries. In that way, it will promote investment in the region. It assures investors that access to the U.S. market, the biggest market in the world, will continue on a permanent basis.

But when we try to go beyond the provisions in this bill, we begin to run into difficulties. I am afraid we will kill what we have if we open up the sectors that are currently excluded from CBI benefits and, therefore, I reluctantly oppose such amendments unless they can be adopted without opposition.

The next provision I want to mention is title II, the authorization of appropriations for trade agencies. The agencies concerned are the most important in trade. We are talking about the U.S. Customs Service, the Office of the U.S. Trade Representative, and the U.S. International Trade Commission.

It is remarkable that fewer than 20,000 Government employees are employed by the agency that deals with two of the most profound problems our country faces, and that is the trade deficit—where we have moved from the No. 1 creditor nation in the world to the No. 1 debtor nation in the world—and then one of the most dire threats facing the country—the drug war. These are the frontline troops of the U.S. Customs Service.

Throughout the Reagan administration, we were in a constant confrontation with the Customs Commissioner. However, the office of Customs Commissioner became the subject of confirmation by the Senate in 1989, and I must say that the current Commissioner is making a real effort to improve communication with the Congress and balance customs' commercial and law enforcement missions.

The President's budget this year still proposed to reduce the staffing of the Customs Service by over 1,000 people of a work force of about 15,000, and we have been running into this each year. The theory of the reduction is that the Customs should pay for the Gramm-Rudman-Hollings sequester and the recent pay raise by attrition and a hiring freeze.

That makes no sense to us on the Finance Committee, because let us just remember this is an agency that raises 18 times as much revenue as its appropriation, even though U.S. rates of customs duties are amongst the lowest in the world.

In the committee, we took all of the President's suggestions for improving the efficiency of the U.S. Customs Service, but we also restored all the cuts made by the Office of Management and Budget. Moreover, we moved to a 2-year authorization of appropriations for the Customs Service. Under the current 1-year authorization, the Customs Service has faced annual threats of staff cuts from the administration, leaving Customs hesitant to hire new staff even if adequate funds are later appropriated by Congress. If we give them a 2-year authorization, that ought to enable the Customs Commissioner to do a little long-range planning and help morale.

I am well aware that there are some Senators who are concerned about losing control over the Customs Service in a 2-year cycle, so let me lay those concerns to rest. I want it understood that we will have Customs oversight hearings next spring in the Finance Committee, even if the 2-year cycle on legislation is enacted. We could then report any necessary legislation or even report a replacement authorization. Meanwhile, the Appropriations Committees, the Office of Management and Budget, and the Customs Commissioner, who deserves our support, will have the benefit of our guidance and the freedom to plan for the next 2 fiscal years.

As to the authorizations for the U.S. Trade Representative and the U.S. International Trade Commission, I will only say that these two tiny agencies, less than 700 employees between the 2 of them, are at the very center of our trade regulation and trade negotiation processes. We are proposing to authorize $70 million for the two of them, and I promise you it is a bargain at that price.

Mr. President, this is a complicated bill. It has taken a long time to put it together, but I have done everything I can to assure that it is not a controversial bill in any major way. It has taken hearings and meetings between the private sector and Senators and staff of the committee to put something together that would pass and take effect and do the job that has to be done. It makes changes which are urgently needed, but we have tried to make those changes in a way which brings about a consensus in the Senate.

There may be some Senators who are tempted to propose highly controversial measures as amendments to this bill, I have discussed this possibility with the majority leader and the minority leader, and they have both assured me of their support in moving to table such amendments. Highly controversial amendments will only casue this bill to die, and I cannot believe that a bill that has the work of 57 Senators on its should be killed for the sake of a political issue.

Mr. President, I urge the Senate to enact this bill.

Mr. HOLLINGS. Mr. President, if the distinguished chairman will yield, as he well knows, we have S. 2411, the textile apparel and footwear bill. It does have 55 cosponsors. We are very fortunate in having it cosponsored by both the majority leader and minority leader. It is a given that we can pass that bill and should pass it. It is practically the same bill we enacted in the past several years only to be vetoed.

Now we have put a provision in, one relative to the CBI. We really are just as supportive, more so than some, of the Caribbean Basin Initiative. We wanted to make sure there would not be any rollback on CBI trade and that any additional allocations of textile trade to the Caribbean Basin Initiative under globalization of importers be allowed. We have that, and it is ready to go.

Necessarily, with 55 cosponsors and trying to keep them all together, there are some who say, wait a minute, this is a wonderful opportunity; after all, in the Senate, you do not get a trade bill up very often because under the Constitution those bill affecting tariffs, revenue measures, must originate in the House of Representatives. There are those who say: let us get down there and put on an amendment.

I want to accommodate, as do we all, the distinguished chairman of the Finance Committee. He has led the way on the Caribbean Basin Initiative. This is an important bill. We would like to have an understanding that we can get a prompt hearing and action

by the committee to report out the bill.

Mr. BENTSEN. I must say I supported, if I recall, the last such bill the chairman of the Commerce Committee presented to us.

I appreciate his accommodation on this one. I would be delighted to assure him that we will give him an early hearing on this bill.

Mr. HOLLLINGS. I appreciate that very much. I think that will suffice. We will go along with the distinguished chairman's request not to offer an amendment at this time unless some others come with theirs, because we already have special provisions for textiles in the Caribbean Basin Initiative.

I thank the distinguished Senator.

The PRESIDING OFFICER. Who seeks recognition?

Mr. BENTSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that I may address the Senate for 6 minutes as if in morning business.

The PRESIDING OFFICER. Is there objection?

If there is no objection, the Senator is recognized for 6 minutes to proceed as if in morning business.

Mr. GRASSLEY. I thank the Chair.

(The remarks of Mr. GRASSLEY pertaining to the introduction of S. 2465 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER (Mr. BRYAN). The Senator from Washington is recognized.

IN RECOGNITION OF EARTH DAY

Mr. ADAMS. Mr. President, I would like to take a few moments to reflect on an important occasion to be celebrated by our Nation this weekend: the anniversary of Earth Day.

Twenty years ago, a Senator from Wisconsin set in motion a very important trend. The Senator was Gaylord Nelson. The event was Earth Day.

I was a Member of the House of Representatives on that first Earth Day and recall it very well. In 1970, we were beginning to see the problems that humanity was causing in its frenzied pursuit of economic progress. Our air was becoming hazy; our water was becoming polluted; and species of plants and animals were reaching extinction. We could see the end of many natural resources that we once thought were endless.

Gaylord Nelson's purpose in establishing Earth Day was to bring these environmental concerns to the attention of the public and their elected representatives. Two decades later, it is now time to measure our progress. My feelings on this anniversary are very mixed. In some ways we have made tremendous progress. In other ways we have failed to live up to our goals.

Our achievements are considerable. In 1970, the Environmental Protection Agency was established to safeguard our environment. Since 1970, Congress has passed the Clean Air Act, the Clean Water Act, the Safe Drinking Water Act, the Marine Mammal Protection Act, the Coastal Zone Management Act, the Endangered Species Act, the National Forest Management Act, the Resource Conservation and Recovery Act, Superfund legislation and multiple wilderness acts among other environmental initiatives.

As a nation, we have learned a number of lessons over the past two decades. The first one is that environmental laws and regulations can work. Today's cars only emit 25 percent as much pollution as the 1970 models. Areas such as Lake Erie and Lake Washington in my own State suffered from severe pollution in 1970. Today, those lakes are much healthier as a result of major cleanup efforts. Twenty years ago we were worried that the bald eagle, the symbol of our Nation, would become extinct. Today, under the guidance of the National Fish and Wildlife Service, this species is regaining its health.

In my own State we have taken a number of steps forward since that first Earth Day. In 1972, downtown Seattle violated Federal carbon monoxide standards 112 days a year. Today that standard is violated only 1 or 2 days. In 1970, Washington State had only 1 million acres of federally designated wilderness. Today that total has increased to 4.25 million acres. Two decades ago, sulfur dioxide from a Tacoma copper smelter severely polluted the air of surrounding communities, threatening the health of many residents. In 1984, that smelter closed down and local agencies indicate that local citizens are better off as a result. One of our greatest successes involves recycling. In my own native city of Seattle, we are proud of the progress made in the recycling effort. Recently, "NBC Nightly News" aired a story noting that Seattle has acquired the nickname of "Recycling City America" for the commitment its residents have made to recycling their trash. And it is not just Seattle. Spokane, Olympia, and Clark County are embarking on ambitious recycling programs to keep our landfills from being overloaded.

On an individual level, public education about the environment has encouraged significant lifestyle changes. We now realize that the garbage we create does not disappear; it remains a part of our planet. We realize that the exhaust from our cars causes much of the haze which settles over our cities. We recognize that those conveniences of modern society, such as styrofoam, ultimately create atmospheric problems. Recognition of these problems has required lifestyle changes in the way we dispose of our trash, the way we travel and the way we heat our homes. Many people are now involved in recycling programs. Large cities now require vehicle emissions tests. More citizens are informed consumers who protest the excessive use of environmentally damaging packaging materials.

In spite of the progress over the past 20 years, we have a long way to go. Today, we recycle only 10 percent of the garbage that we produce. Our air is dirtier than it was in 1970. We have toxins in our soil, water, and food. We have problems with indoor air pollution. Our forests and species' habitats are being destroyed. And we have many new problems such as global warming that we never anticipated years ago.

In addition, during the past two decades we have failed to heed loud warning signs and we have suffered a number of environmental catastrophes as a result. A case in point is oilspill prevention; 20 years ago, we knew that one of the best ways to prevent oilspills was to require oil tankers with double hulls. We have yet to act on that knowledge. Both the oil companies and the Coast Guard have fiercely resisted efforts to mandate this structural improvement. As a result, countless gallons of oil have needlessly spilled into our oceans and waterways. For example, the Coast Guard has estimated that if the *Exxon Valdez* had been equipped with a double hull, between 25 and 60 percent less oil would have spilled into the Prince William Sound.

The pending oilspill liability legislation gives us a chance to finally require double hulls. I am involved in that fight, and I hope we will win it. But the fact remains that because of oil industry greed and agency inaction, we have failed for 20 years to take measures that would have protected our marine environments from irreparable harm. That is a terrible tragedy.

Another example that comes immediately to mind is the clean air bill the Senate recently passed. I was a Member of the House of Representatives when the original Clean Air Act was adopted. That act gave us great hope. Unfortunately, it did not live up to our expectations. After many years Congress returned recently to this issue with revisions to strengthen the act. In my home State of Washington, we are facing the problem of air pollution on a daily basis. We still experience our share of beautiful blue-sky days, but those days have dwindled be-

39-059 O-91-46 (Pt. 5)

cause of automobile pollution problems and temperature inversions. The Washington State Department of Ecology tells me that over the past 10 years, the number of vehicle miles traveled in our State has increased by 73 percent. As growth continues at an accelerated rate in our State, this problem may become worse and worse. It is my hope that the measures we recently passed in the Senate will help resolve some of these pollution problems. I recognize the solutions we require in this legislation involve big economic sacrifices. But my conclusion is that no price is too high to pay to reach these goals for our environment and the health and well-being of all Americans.

These are just a few examples of our successes and failures. Today, we are facing some very difficult challenges as we approach the 21st century. Fortunately, we are all much better informed about the significance of our environment as indicated by recent surveys. Poll after poll shows that the environment ranks right near the top of the Nation's agenda. Nearly half the people in our Nation believe that the environment is worse today than it was 5 years ago. In fact, citizens now rank the environment, along with Soviet aggression and economic competition with the Japanese, as a serious threat to America's security.

I believe that during the next few years we will be making some decisions that will have large impacts on the future of the United States. Some of those decisions will be very painful. But the fact is that we must now fix the problems we have created over the past 100 years. As human beings, we dominate the world; yet we also rely on a healthy planet for our own survival. If we do not make some of those tough choices, we ultimately jeopardize our own existence. Above all, I believe that we must increase our respect for the integrity of our planet and interfere as little as possible with the world ecosystem.

In conclusion, I would like to quote from Senator Gaylord Nelson's remarks on the first Earth Day.

(W)inning the environmental war is a whole lot tougher challenge by far than winning any other war in the history of man. . . . Our goal is an environment of decency, quality, and mutual respect for all other human creatures and for all other living creatures.

I believe that his words are just as true today as they were 20 years ago. The anniversary of Earth Day is a significant milestone in our country's history and another reminder of the promise made to the American people in 1970. I look forward optimistically to celebrating Earth Day 2010 and a future where the protection of the environment will not be a controversial issue but a way of life.

Mr. President, I yield the floor.

Mr. PRYOR. Mr. President, I see no one else at this time seeking recognition to speak on the pending business. I understand the distinguished Senator from Wisconsin is seeking recognition, perhaps, to speak as in morning business. We have no objection.

Mr. KASTEN. Mr. President, I ask unanimous consent to proceed as in morning business for approximately 4 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator is recognized.

HANDS OFF LITHUANIA

Mr. KASTEN. Mr. President, I rise today to address a question of the highest importance for the future of East-West relations. The Government of the Soviet Union is following a collision course in Lithuania—and we in the West cannot remain indifferent to the course they have chosen.

Since the time of Peter the Great, the Russians have viewed the Baltic area as an essential window to the West. In addition to providing the ice-free naval ports that the Russians require, this Western opening also serves as a medium of communication—a place where the democratic values of the West can reach out to the people of the East.

President Gorbachev has some important choices to make. Does he want those ice-free ports badly enough to slam shut this window to the West?

I think that Gorbachev does not understand the true sentiment of Western public opinion on this issue—and that he may be about to make a serious miscalculation, with extremely grave consequences for us and for the whole world.

Gorbachev has stated publicly that he is ruling out the option of military force in Lithuania—because he believes that this statement will cause the West to acquiesce in the continued Soviet occupation of Lithuania.

Gorbachev is gambling that the West will accept a rather unusual definition of the word "force." Under this definition, a half century of illegal armed occupation does not constitute force. Under this definition, the unauthorized overflights of hostile fighter aircraft and helicopters over an occupied capital do not constitute force. Under this definition, the confiscation of weapons from an unwilling populace does not constitute force. Under this definition, the impressment into the armed service of citizens of a subject country does not constitute force.

Mr. President, in each of these cases, let us ask ourselves a simple question: If this act were committed against the United States, would we consider it an act of force?

The answer is clear. All of these acts are hostile. They are acts of force. They are acts of war.

President Gorbachev knows this. But he is gambling that we will ignore it. And every time the West turns a blind eye to one of these actions, he will be emboldened to go an extra step, and then another, and then another—until the freedom forces in Lithuania are completely wiped out by the central government.

It is the duty of the Western Allies to make Gorbachev understand what exactly his choices are. We must help Gorbachev leave the path of confrontation—by telling him in plain terms which Soviet actions will not be tolerated by the West.

Many Balts consider a push for independence to be the only way they can survive as identifiable peoples. Since the secret protocol to the Nazi-Soviet nonaggression pact of 1939 that placed all three Baltic States into the Soviet sphere of influence, the Soviets have tried to absorb Lithuanians into Russia. This policy began with massive deportations and the immigration of non-Baltic people from the rest of the Soviet Union, and it continues today.

Shall Lithuania be free? This question ought to be determined on the basis of popular sovereignty—a free and fair plebiscite of the people of Lithuania. This is the way of peace.

The other path that is tempting Gorbachev is the path of provocation. All of the hostile acts Moscow has committed are part of a single pattern. The Soviets are waging a war of nerves against Lithuania. They are trying to provoke violence by the Lithuanians in order to provide a pretext for a full, brutal repression of the independence movement.

The West must leave no doubt as to how it will respond to this challenge. If the Soviet Union succeeds in provoking the Lithuanians to this tragic course of action, the West must be clear about the price the Soviets will have to pay.

Today, I am calling on President Bush to send the following message to the Soviet Union: Unless you turn back from this course—the path of provocation—we will try to block your participation in GATT and the Eastern European Development Bank. We will refuse you the trade credits you seek, as well as the low tariffs you would enjoy through most-favored-nation trade status.

And we will cancel the upcoming summit.

President Gorbachev needs to pull back from the course of confrontation. That means no full-scale military operation to overthrow the Lithuanian Government. It also means no imposition of direct Presidential rule on Lithuania.

It also means backing off the threat of an economic embargo of Lithuania. This embargo would be an act of economic warfare—and that would not be acceptable to the peace-loving nations of the West.

Let Gorbachev choose: Hands off Lithuania—or get kicked out of the Bank that can finance a Russian economic recovery. Hands off Lithuania—or we will scrap the summit. Hands off Lithuania—or you can kiss those trade preferences goodbye.

Mr. President, the cold war was won not just by the firmness of the West but also by the clarity of our purpose. Brezhnev, Andropov, and Chernenko could not have had any doubt where the West stood on the question of freedom versus communism.

Let us remove the doubt from the mind of President Gorbachev. Mr. Gorbachev, Lithuania is not a sideshow for us here in the West. It is the main drama. If you do not believe in glasnost and perestroika on the shores of the Baltic, it will be plain to us that we cannot trust your commitment to them anywhere.

Please consider wisely—before you rush to judgment, and make a decision that the whole world would regret.

FAVORED-NATION STATUS FOR HUNGARY

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER. The Senator from Oregon [Mr. PACKWOOD] is recognized.

Mr. PACKWOOD. Are we in morning business or not in morning business?

The PRESIDING OFFICER. We are not, except by unanimous consent.

Mr. PACKWOOD. So there is no time limit at the moment?

The PRESIDING OFFICER. That is my understanding. The Senator is correct.

Mr. PACKWOOD. I thank the Chair.

Mr. President, the bill we are considering today, although entitled "Miscellaneous and Technical Changes to Various Trade Laws," contains some very important provisions.

First, the bill makes several changes to the Jackson-Vanik amendment relating to the one-House/two-House veto and the issues of constitutionality we have had.

We will change the law so there is no question but what the resolutions which will be passed by the House and Senate and sent to the President for veto are constitutional, and that problem is cured. It is an important problem. The bill cures it.

The bill also contains budget authorizations for the International Trade Commission, the U.S. Customs Service, and the U.S. Trade Representatives Office.

Additionally, the bill contains over 100 miscellaneous tariff bills which temporarily suspend or reduce the tariffs on products not produced in the United States.

Mr. President, the very heart of this bill is to revisit the Caribbean Basin Initiative. The centerpiece of the 1983 Caribbean Basin Initiative was in essence a one-way free trade area in which the United States would grant to Caribbean countries duty-free access to the U.S. market. The program was designed to further the economic development and political stability of the participating Caribbean countries which in the long term was in the best interests of the United States as well.

Now, after 6 years of operation, we are being asked to revisit the Caribbean Basin Initiative program. While there has been some progress under the CBI, particularly in the increase of nontraditional imports and new investment, the benefits under the program have not provided the economic growth originally anticipated. In fact, since the program has gone into effect, total U.S. imports from the Caribbean Basin Initiative countries have declined about 30 percent, largely as a result of the decrease in petroleum imports. While the CBI program is intended to provide nonreciprocal trade benefits to the Caribbean Basin, the irony is that the program has worked the other way. Since the program's inception, U.S. export to the Caribbean have actually increased and the United States is currently running a trade surplus with the region of approximately $1.4 billion. In addition, most of these Caribbean countries have exceedingly high unemployment and heavy debt burdens. For example, Jamaica and the Dominican Republic, two of the larger CBI countries, have unemployment rates exceeding 20 percent. Jamaica's external debt exceeds $4.3 billion, while the Dominican Republic debt is just over $3.9 billion. And let us not forget the recent history of political and social unrest in all of the region—Panama, Haiti, Nicaragua, and El Salvador.

Keeping our original goal in mind, to provide economic and political stability to this region, we must ask ourselves what we can do to fine tune the CBI program to further help this region. The administration and the Caribbean countries have made numerous recommendations on how to fix the program so that it meets our original intentions. These include: One, eliminating the 1995 expiration date and making the CBI program permanent; and two, providing duty reductions on presently excluded products.

Most agree that at a minimum providing a permanent extension of the CBI program is noncontroversial and will provide significant benefits to the area because it will give investors in the region business certainty. That is the easier question, the permanent extension.

The harder question is whether we can provide duty reductions in the previously excluded products such as textiles, footwear, and petroleum. These products were previously excluded from the original CBI because they were import sensitive. While the CBI bill which passed the Ways and Means Committee last year had duty reductions in most of the previously excluded products, by the time the bill got to the House floor the various domestic industries had managed to have the provisions removed. As a result, the House CBI bill currently does not contain any duty reductions on any previously exempted products. Now the Senate is faced with the same issue of how to boost up the CBI package. With the exception of the permanent extension of the program, there is, frankly, very little in this bill which will provide significant benefits to the Caribbean. All attempts to boost the package in the Finance Committee were defeated as a result of the usual protectionist domestic interests, so as we consider floor amendments to boost the CBI package I would like my colleagues to keep a couple of points in mind. We talk a lot about supporting the fragile and struggling democracies in the Caribbean. The reality is there is not going to be a lot of U.S. foreign aid for Caribbean countries. That is a debate which is going on in this country right now, as to who should receive what little foreign aid we give. Our foreign aid package over the years has been shrinking and shrinking as we try to extend it further and further. So let us not hold out false hope to the Caribbean. There will not be extensive foreign aid.

That being so, let us focus on what the United States has been saying for years, that the kind of economic growth which supports democracies has to come mainly from increased trade, not aid. Providing the CBI with new and meaningful trade opportunities helps to break the dependence of foreign aid because it allows these countries to help themselves. It will create incentives to establish new industries and thereby diversify their traditional exports and create new jobs. As nations create new opportunities for their citizens, the greater the chance these countries will become politically and economically stable which contributes to the United States and regional security.

But I cannot deliver the message any clearer than the Caribbean countries themselves. As the Prime Minister of St. Lucia, the Right Honorable John Compton, said:

> What we in this region are seeking are not "handouts" but rather a "hand up," an opportunity to earn a living. Not food aid, but access to markets for our products; not mere promises and polite rhetoric but policies fairly administered without the bureaucratic pitfalls and administrative hurdles which so often obstruct the lofty goals approved by governments. The promises of CBI should not be the Trials of Tantalus, always receding from our thirsty lips; but rather should be a door of opportunity through

which men and women of enterprise can freely enter in search of a better and fuller life. * * * Our friends in the U.S. Congress and in the administration should assure that notwithstanding the dramatic events in Eastern Europe and Central America, we in this region, while not being "headlined," should not be sidelined to languish in a state of underdevelopment.

Mr. President, I will be offering some amendments, maybe more than one, involving trade in shoes, textiles, and other areas. I hope the Senate will join in passing these amendments to give Caribbean countries the help they really need, not a handout, not money, but an opportunity to compete so that they can help themselves. These are critical countries, in most cases led by very able men and women, and we should not stand in the way of giving them a chance to earn their own keep and at the same time enhance our own security.

I thank the Chair.

Mr. PRYOR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PRYOR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRYOR. Mr. President, seeing no other speakers on the pending business, I ask unanimous consent that I may be allowed to speak for not to exceed 6 minutes as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator may proceed.

ASPJ HEARING PLANNED

Mr. PRYOR. Mr. President, we all remember the Divad. It was the Army's $4.5 billion antiaircraft gun that did not work. As we all know, the Pentagon tried to build it anyway.

In 2 weeks I will hold a hearing on what may be another Divad. In dollar terms, by last summer it was $9 billion, twice as big as the Divad. In effectiveness terms it may be even worse than Divad. Nonetheless, in the midst of a defense cutback, we have begun producing the system.

What is this mystery weapon that we are about to spend $9 billion for?

It is the airborne self protection jammer or ASPJ. It is supposed to permit our jet fighters to jam enemy radar. The ASPJ does not look like much, it is contained in small black boxes, but it is extremely complex, very expensive, and more importantly it does not work.

The upcoming hearing that I will chair will review the results of investigations on the ASPJ by the Pentagon inspector general and the General Accounting Office. We will also look at ASPJ test results and the acquisition system that allowed ASPJ production to begin in the first place.

This hearing is also in response to troubling correspondence I have received from the Pentagon. Please allow me to explain.

Recently I received a letter about the ASPJ from the Pentagon's so-called acquisition czar, Under Secretary Betti. He was responding to a letter I had sent Secretary Cheney 4 months ago.

My letter had asked Secretary Cheney some difficult questions about ASPJ. You see, Mr. President, I had documents in which some of Secretary Cheney's top executives stated that the $9 billion ASPJ had failed to meet preproduction criteria and recommended terminating the program. Why then, I asked the Secretary, did his top executives turn around and vote to spend half a billion dollars to begin producing the ASPJ?

This smelled a little fishy to me and I honestly wanted Secretary Cheney's side of the story. He is a good Secretary of Defense. He is a man of good will. He is a man of common sense. But the response I received 4 months later smelled even fishier.

It says "The decision to initiate low rate ASPJ production was a difficult one." That, Mr. President, is the understatement of the year. Dishing out over $400 million to start building a 14-year-old, over budget, past schedule product that has flunked almost every test is not something to be proud of. No wonder it was a difficult decision.

Mr. Betti's letter acknowledges some risks in the production gamble but assures me that the risks are being minimized. That still does not explain why production was permitted despite failed production criteria.

Finally, the letter reassures me that before the Pentagon decides next September to build more of these duds, further testing will be conducted on the ASPJ production models to "assure that technical deficiencies have been corrected."

Now, how many times have we in the past decade, or actually the past two decades, heard that:

Oh, yes, there are deficiencies, there are problems in the system, but let us go ahead and produce a few hundred million or a couple 3 billion dollars' worth of them and as we produce them we will correct the system.

Many, many times on many weapons systems, Mr. President, we have heard this same excuse.

Mr. President, Secretary Betti's letter is inadequate. Either he thinks Congress is gullible or he is unaware of what is going on in the ASPJ Program.

According to the GAO, by this fall, when the next production decision is made, the only tests that will have been performed are production qualification tests. These limited tests are conducted by the defense contractors in Maryland and New Jersey. In effect, once again, the students will be grading their own exams.

The truth is that true laboratory testing on the ASPJ will not begin until this November, 2 months after Secretary Betti's next production decision.

The truth is that vital operational or field testing will not begin until late 1991 and will not end early 1992, a year and a half after Secretary Betti's decision to produce.

This is not the testing that Congress has requested and it is not the testing that represents good management, nor good weapons.

Mr. President, I am not the only person who disagrees with Secretary Betti's view. According to a Defense Week article, the Pentagon's top testing official, the Director of Operational Test and Evaluation, thinks testing on the ASPJ is inadequate to justify a production decision this fall.

The testing director should be complimented for taking a stand on this highly politicized weapon program, once again a weapon that is flunking its tests.

Secretary Betti is only fooling himself if he thinks his letter will satisfy concerns about this jammer when Congress is being forced to slash other weapon systems that have already proven to be effective.

Production of the ASPJ is going to waste billions of dollars. Worse yet, it could lead to putting faulty radar jammers into American jet fighters, risking American lives and missions.

I know many of my colleagues are eager to hear what has gone wrong with this program. We are particularly looking forward to hearing from Deputy Secretary Atwood, who is personally aware of the ASPJ situation.

Mr. President, I want to make clear that I am not opposed to radar jammers. I am, however, going to work harder than ever, to ensure that we do not waste precious dollars on defense projects until they have proven to work.

Mr. President, I ask unanimous consent that the Defense Week article I referred to be printed in the RECORD following my statement.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Defense Week, Apr. 16, 1990]

DUNCAN VETOES NAVY PLAN TO BUY ASPJ

(By Tony Capaccio)

The Pentagon's director of operational testing has rejected a Navy plan to buy more than one-quarter of its new jammers before completing tests that will determine whether the system works as designed, according to internal documents.

The Navy wanted to buy between 158 and 231 of the jammers for up to $3 million apiece before operational tests are scheduled to be completed in April 1992, according to information provided by the service and gleaned from program documents.

In April 1989, initial Navy operational

tests concluded the jammer was "marginally operationally effective" in confounding enemy missile radars and only "marginally operationally suitable" for fielding because it falls far short of its reliability goals.

The Navy eventually intends to buy 770 Airborne Self Protection jammers (ASPJ), a 14-year-old joint Air Force/Navy program the Air Force dropped from its proposed fiscal 1991 budget. The service cited schedule delays and cost problems. The Air Force was to have bought 1,450 of the 2,220 jammers in the program.

The Navy's plan has drawn fire from the Pentagon's new director of operational testing, Robert Duncan. Duncan criticized the plan in a March 29 memo to Duane Andrews, assistant defense secretary for command, control and communications. Andrews had asked Duncan and other Pentagon offices for comments on the program. Duncan's memo was obtained last week by *Defense Week.*

Duncan's critique comes when the jammer program is under investigation by the Pentagon's inspector general and Sen. David Pryor (D-Ark.), who plans to hold hearings next month on the system. The IG report is nearly complete, according to a government source.

Duncan's view is important because it marks the strongest stance he has taken against a weapons system since assuming office last year.

Duncan was joined in his criticism of the program by Robert Croteau, director of the tactical air division for the assistant defense secretary for program analysis. Croteau, according to a Pentagon source, questioned whether the pricey jammers could be adequately tested to demonstrate if they can defeat the latest radars and future electronic warfare devices.

The Navy last summer was given approval by the Pentagon's Defense Acquisition Board (DAB) to buy the first 104 jammers, or Lot 1 of the contract, in order to conduct further operational testing. But a recent program schedule indicates the Navy will seek permission from the DAB this summer to buy up to another 127 jammers before the tests are completed.

Duncan wrote that the Lot 1 contract was "more than sufficient" to provide the jammers necessary to complete operational testing in April 1992. Naval Air Systems Command spokeswoman Sue Supak said last week the tests are schedule to begin in August 1991.

"The ASPJ's inability to meet established cost, performance and reliability criteria does not justify going beyond Lot 1," Duncan wrote. Duncan said his position was consistent with that taken last summer by his office when the DAB gave its approval to the Navy to buy the first jammers.

"We should not continue to Lot 2 and Lot 3 production units until ASPJ has demonstrated in operational test and evaluation that it is effective and suitable," Duncan wrote.

Supak said it was against the command's general policy to comment on Internal Navy communications.

The Pentagon said Duncan's memo was one of several Andrews received on the issue. "It is being evaluated by Mr. Andrew's staff along with nine other responses which offer a variety of opinions and recommendations. It is but one factor in formulating an office position with regard to future ASPJ actions," the Pentagon said.

The jammer has substantial progress to make before it meets its reliability goals, according to test results contained in an April 1989 report by the Navy's Operational Test and Evaluation Force. The jammer is produced by a team of ITT Avionics and Westinghouse Electronic Systems Group.

The jammer is required to have a 33 hours mean-time-between-failure, but it broke down during the initial operational tests after 19 hours. Similarly, the jammer's built-in test equipment is supposed to isolate faults at a 90-percent rate. But to date, it has correctly identified problems only 29 percent of the time.

According to the Navy's statement, 158 jammers would be bought prior to the completion of operational testing. But a recent program schedule indicates that another 73 jammers could be bought before the tests are completed. The Navy was not able by press time to clear up the discrepancy.

Major weapons systems such as the jammer are required by law to undergo rigorous operational testing before they can be mass produced. But in several instances over the last three years, the services have tried to skirt the law by producing large amounts of a weapons system under the guise of so-called low-rate production.

The Pentagon has fielded at least three other major electronic warfare devices since 1985 that have either not completed operational testing or performed below par. These devices are the AN/ALQ-131 Block II, ANM/ALQ-161 and AN/ALQ-184, said Duncan in his office's 1989 annual report, which was released last week.

Mr. PRYOR. Madam President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER (Ms. MIKULSKI). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SPECTER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Madam President, I further ask unanimous consent that I may proceed as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

LATIN AMERICA

Mr. SPECTER. Madam President, I take the floor today, the first day that we are in legislative session after the recess, to comment about the pending foreign aid bills for Nicaragua and Panama because of my concern about the urgency of action by the Congress so that those foreign aid bills may be signed into law and funding may be appropriated for Nicaragua and Panama.

I will summarize my remarks briefly on the floor today, and I ask unanimous consent that my prepared statement be printed immediately following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SPECTER. Madam President, Nicaragua is especially in need of urgent attention because the new administration of President-elect Chamorro will take office next Wednesday, April 25, and we, the United States, has an enormous stake in what will happen in the future in Nicaragua.

Of course, we have an enormous stake in what will happen in many parts of the world, but a special stake in Nicaragua, as that country has been engulfed in civil war for the past decade, and as so many controversial matters have been presented in this body in the past decade involving the Sandinistas and the Contras. And happily, Mrs. Chamorro's coalition has been elected, and there is an opportunity for a new day in Nicaragua.

That country is badly in need of U.S. aid. The President has submitted an aid package for some $300 million, which this Senator believes ought to be acted on promptly and ought to be supported.

In Nicaragua, I had a chance to talk to President-elect Chamorro and found her to be a vibrant, energetic woman with a proposal for Nicaragua's future. She has a detailed program as to how she plans to use the foreign aid. She is prepared to give an accounting, and there are many problems which have to be tackled for which U.S. aid is indispensable.

The issue of the disbanding of the Contras is a key part in terms of having an orderly transition of power from Daniel Ortega and the Sandinistas to the newly elected government. It was a marvelous victory for democracy that President-elect Chamorro was elected, and it is very important that the transition occur. It is a very good sign that Mr. Ortega is prepared to yield the power, but there is going to have to be financial support.

The Sandinistas and Daniel Ortega and others will have a point for contention if the United States does not move with some dispatch in providing this monetary aid. So there are very forceful reasons why actions should be taken promptly by the Senate, and this package ought to be enacted.

Madam President, a similar situation is present in Panama. There we had an opportunity to talk to the new President Endara, who has vision and a program for Panama's future. President Bush has submitted a foreign aid package of $470 million. The House has enacted a package of $420 million. It would be my hope that the Senate would support the full $470 million because Panama is in need of this assistance. It is not necessary to recount the recent history in Panama—what has happened there with General Noriega and his dictatorship, with the election of President Endara—but we ought to proceed promptly to provide assistance to that newly formed government.

One factor is worth comment, and that is the brutality of the so-called Noriega "Dignity Battalions." That is what they are referred to as. You wonder why they got their name when you hear what they did. But on May

10, after the election, President Endara and Vice President Ford and others were riding on the back of a truck. President Endara was hit across the head and severely wounded, knocked unconscious, fortunately taken to his car and avoided further injury. Vice President Ford was attacked and was grabbed on his right shoulder with a metal bar. His tendons on his right shoulder and arm were ripped out; he sustained 22 stitches across the top of his head and 9 stitches under his eye. Fortunately, he was not killed. That is the kind of brutality which the newly elected President and Vice President faced, demonstrative of their courage in taking on these tough new jobs. We ought to be giving them our support and on a very prompt basis.

Madam President, we also stopped in El Salvador because it seems likely that there will be amendments offered to the foreign aid now being advanced to El Salvador. We discussed at length with our Embassy officials, including the distinguished Ambassador Mr. William Walker, human rights generally, and the number of cases pending with some particularity on the murder case involving the Jesuit priests. That is only one matter, among many matters of human rights concerns.

We had an opportunity to talk to Judge Zamora, who is the trial judge in that case, and also to the President Judge of the Supreme Court, Justice Gutierrez. Before proceeding to have any discussion with the judges, I wanted to be sure that we would not be violating any principles of Salvadoran law or any defendants' rights. The judges assured me we could talk in sufficient generality so that that would not be a problem. There is a very intensive investigation which is being undertaken. There are many witnesses who have been interviewed. There are many documents which have been examined. There are many ballistics tests which have been made, and that investigation is going forward.

There is a potential problem arising under Salvadoran law, as we were told, about an indicted defendant testifying against another indicted defendant in the same case. The President Judge of the Supreme Court explained that Salvadoran law is different from United States law where, as a matter of plea bargain, sometimes a lesser defendant will testify. But even under Salvadoran law, there may be some flexibility if the case is not strong or if the indicted defendant is not central to the issues, so that we will have to await developments on that matter. My impression was that Judge Zamora and President Judge Gutierrez were proceeding with diligence, but there is obviously an interest in seeing to it that there is a verdict and a conclusion in that case.

In 1983, Madam President, I had occasion to go to El Salvador under somewhat analogous circumstances when the case involving the murders of the four American nuns was being brought to trial. I offered an amendment limiting foreign aid to some 30 percent until a verdict was reached in that case. It may be appropriate to have some condition on our aid to the conclusion of the case involving the Jesuit priests and perhaps conditions on the broader reforms in the judicial systems and conditions as to human rights generally in El Salvador.

Madam President, we also visited Chile and Argentina. Those are countries which have relatively newly elected governments and where there is a real opportunity for democracy to flourish. Both countries have significant problems. Argentina, especially, is troubled by hyperinflation.

There is one matter in Chile which deserves some special comment beyond the details in the prepared statement which will be annexed at the conclusion of these comments. That relates to the Letelier case involving the 1976 car bombing on the streets of downtown Washington, DC, where Orlando Letelier, a former Chilean Ambassador to the United States, was assassinated and his American coworker, Ronni Moffit, was similarly murdered. The Chilean Government has refused over the years to cooperate in that case. There are some recent signs that the newly elected government is willing to act to bring the defendants—certain high-ranking former officers of the Chilean Government—to justice in that case.

I am concerned, Madam President, as to how the case will be handled because of my view that the appropriate procedure is to try that case in Washington, DC, which is the general rule to have a trial where the crime occurred. We were advised that under Chilean law, once extradition has been declined, which was the fact in this case, that a new extradition order cannot be obtained. My own view is that that legal judgment should be checked out very carefully to see if there are any grounds upon which we could insist that the defendants be brought to Washington, DC, for trial.

Madam President, when you deal with an act of international terrorism, we ought not to forget or to ease up on the matter simply because some substantial period of time has passed, as in this case since 1976. It was worth noting that within the past 10 days, a codefendant in that case, a fugitive, was apprehended in Florida and is being returned to Washington, DC, for trial. But terrorism is something we have to pursue regardless of how much time passes. Murder is one offense on which there is no statute of limitations, and those defendants ought to be brought to justice. The best way to bring them to justice is to bring them to the United States for trial.

Within a few feet from where this Chamber is located, Madam President, we had an assassin's bomb, back in 1983; November 7, I believe. The bomb ripped out the entire Republican Cloakroom on a Monday night. We were scheduled to be in session on that occasion and had Senator Baker, the majority leader, not recessed the Senate, given the Monday night football game and the way the Senators crowd around in the Cloakroom watching that game, there would have been a catastrophe of enormous proportions directly affecting the Senate of the United States. We know what has happened in our own environs with the security measures springing up around the Capitol so that when we think about this act of terrorism on the streets of Washington, DC, in 1976, we ought to remember it vividly, and we ought to move as vigorously as we can to see that those defendants are brought to justice. The best place for that to occur is in the Federal courts here in Washington, DC.

Madam President, we also had a brief stop in Paraguay and had a chance to meet the relatively newly elected President Rodriquez, who is a man of determination and, I think, compassion for his people, upsetting a longstanding dictatorship which had existed in Paraguay. There are many ways in which we can be of help to Paraguay, as well as to Argentina and Chile, in the war against drugs, which I think is likely to engulf those countries in a greater way as pressure on Colombia, Bolivia, and Peru pushes the activities and the drug lords into other countries, like Argentina, Chile, and Paraguay.

Madam President, I note that other Senators are on the floor seeking recognition. I will conclude these remarks with the comment that we face a unique opportunity in the Western Hemisphere with democracy breaking out all over. Except for Cuba and Haiti, all of the Western Hemisphere, all of Latin America, now enjoys democratic forms of government. There are many problems which face a number of these countries, and I think by carefully crafted assistance from the United States, we can be a great help in promoting these democracies.

EXHIBIT 1

STATEMENT ON LATIN AMERICA TRIP

I would like to share with my colleagues and constituents some observations on my trip to Latin America over the Easter recess. The first focus of attention was on Nicaragua and Panama since the Appropriations Committee, on which I serve, and the full Senate are scheduled to consider foreign aid to those countries immediately on our return. A stop was also made in El Salvador, because it is likely that amendments will be offered on our aid to that country in view of the controversies on human rights and the pending criminal case arising from the murders of the six Jesuit priests.

Following our Central America stops, we traveled on to Chile and Argentina to examine human rights, commercial and intelligence issues with special attention on the Letelier case which will be key to the future of United States-Chilean relations. Since many government offices were closed in Argentina in advance of Good Friday, we left a day early in order to add an overnight stop in Paraguay which was on the way back where we met the recently elected President Andres Rodriguez.

Latin America is experiencing a unique period in its history where all the nations, except Cuba and Haiti, are enjoying the prospects of democratic governments. This poses an opportunity and a challenge for United States foreign policy to try to nurture incipient Latin democracies at a time when there is new competition in Eastern Europe for our limited foreign aid resources.

An examination of conditions in Nicaragua and Panama and discussions with many people in those countries including Nicaraguan President-elect Violetta Chamorro and Panamanian President Endara convinced me that Congress should act immediately to approve President Bush's foreign aid request for both of those countries. The situation is especially urgent in Nicaragua where Mrs. Chamorro is scheduled to be inaugurated on April 25. All eyes in that country, and for that matter the entire region, will be focused on how the United States supports the newly elected government.

Nicaragua continues to suffer from a decade of civil war. The United States has an enormous stake in the success of the Chamorro government. Delays on our part will give the Sandinistas a political opportunity to argue the unreliability of U.S. support and will weaken the chances for success of the Chamorro government.

President-elect Chamorro is a vibrant, energetic leader who is anxious to institute significant reforms in Nicaragua providing she has the means to do so. In our meeting, she specified her plans to make good use of the $300 million in U.S. aid and to give an accounting for how it is spent. A major challenge will be the reintegration of the Contras into Nicaraguan society and its economy.

We emphasized to Mrs. Chamorro our concerns about weapons flowing from Nicaragua to El Salvador's insurgents and candidly stated that the United States did not want to trade one Central American war for another. Since recent statements from her aides had raised a question about her plans on retaining Humberto Ortega as the head of the Nicaraguan Army, I expressed my own opinion that it would be much preferable to make a clean sweep and oust him from both positions of Defense Minister and Army Commander, recognizing it was her decision. Later that day, Friday, April 6, the announcement was made that General Ortega would not command the Nicaraguan Army in the new government.

We noted a spirit of real optimism about Nicaragua's future in meetings with Nicaraguan businessmen, journalists, prospective officials in the new government, and United States Embassy officials. The arrival of U.S. aid in advance of, or at least simultaneously with, the inauguration of President Chamorro would significantly promote the prospects of success for the new government.

I long have been interested in the internationalization of efforts to combat terrorism and drug trafficking, and have proposed the creation of a multilateral strike force and an international criminal court. I raised these proposals at meetings during this trip. The Prime Minister of Jamaica, Michael Manley, has proposed the formation of a multilateral strike force to assist governments in targeting, pursuing, and apprehending international criminals. In December 1989, the Prime Minister testified before the Senate Judiciary Committee in support of this concept, stating that a number of countries are interested in participating in such a force. The Senate expressed its support on September 28, 1989, when it adopted by a vote of 95 to 5 my amendment to the fiscal year 1990 Defense appropriations bill providing for the use of Defense Department drug interdiction funds to support U.S. participation in a multinational drug strike force.

Discussions on this trip also addressed the establishment of an international criminal court. In 1986, the Senate adopted my amendment to the Omnibus Diplomatic Security and Antiterrorism Act which was signed into law, calling on the President to initiate negotiations on establishing an international tribunal for prosecuting terrorists. This concept was broadened in 1988 in the Anti-drug Abuse Act to include prosecution of international drug traffickers and other criminals.

In Panama, we met with President Guillermo Endara and Vice President Guillermo Ford. President Endara is an energetic, charming leader, who is determined to make democracy succeed after the Noriega dictatorship. The President articulated Panama's urgent need for the $470 million aid package currently pending in the Senate. He emphasized that the Panamanian people want democracy to work, have very high spirits, and are working hard to reconstruct the economy. The President told me that U.S. aid will be used for rebuilding the infrastructure, supporting private enterprise, and creating new jobs. He stated that the government commercial bank has an overdraft of approximately $950 million, and therefore the government must restore the bank's assets while decreasing government spending.

In our discussion of efforts to establish an international strike force, President Endara stated it was an "excellent idea" in principle. While he indicated that the details of such a force would have to be determined in light of sensitivities toward sovereignty and intervention, nevertheless, he indicated that under appropriate treaties a multilateral strike force would be a "perfect" way to fight drugs. Similarly, President Endara expressed support for the creation of an international criminal court. He expressed optimism that working through international agreements, such a court could be the answer for effective prosecution of international drug traffickers and terrorists.

On the issue of drugs generally, President Endara contrasted his administration to the Noriega regime by stressing the difference between a government that opposes, rather than supports, drug traffickers. He pointed out that Noriega was a very strong dictator who exercised power throughout the country through para-military and defense forces. The President also explained that Noriega had complete control over the judiciary and often influenced legislators on how they should vote. President Endara stated emphatically that his government will do all that it can to fight drug trafficking and money laundering.

When it became evident that President Endara's ticket had won by a 3 to 1 margin, the Noriega regime nullified those elections. During our meeting, President Endara detailed the vicious attack by Noriega's "Dignity Battalions" on himself and Vice President Ford on May 10, 1989. He described how he and his Vice Presidents rode through the streets of Panama City on the top of a pickup truck when they met resistance from the Police. The President told us that the truck was blocked and he was hit on the head with a lead pipe, knocking him unconscious. Fortunately, his bodyguards carried him to a side street where he escaped additional harm. He said that while Vice President Calderon escaped the violence, Vice President Ford attempted to return to his car when he was brutally beaten and his bodyguard was killed. Discussing this with the Vice President Ford, he told us how he required 9 stitches on the left side of this face, 22 stitches on his head, and suffered damage to the tendons on his right shoulder and arm. While America was shocked by the vivid image on the nightly news of that brutal assault, Vice President Ford stated that he suffered from amnesia and could not remember the violent attack when he first saw the TV replay.

In meetings with Deane Hinton, United States Ambassador to Panama, and Gen. Maxwell Thurman, commander in chief of the U.S. Southern Command, they asserted that Panama is desperately awaiting United States aid. The Ambassador and the general

felt confident that the Panamanian economy could handle this assistance, which is vital to provide an economic jump start. General Thurman stressed the importance of improving our anti-drug effort in Panama and other South American countries because he believes that as we move against the drug traffickers in Colombia, Bolivia, and Peru, they are likely to respond by moving their operations to other Latin American countries. General Thurman was interested and generally receptive to the concepts I raised regarding the establishment of an international strike force and an international criminal court.

Our meetings in El Salvador focused on human rights and several pending criminal prosecutions including the Jesuit priests case. On November 16, 1989, six Jesuit priests, including the rector and vice rector of the Central American University, were killed along with two witnesses. News reports that day contained United States Ambassador William Walker's denunciation of this act of barbarity and El Salvadoran President Cristiani's promise of an immediate investigation.

On January 13, 1990, President Cristiani announced that Army Col. Guillermo Alfredo Benavides, two lieutenants, a sublieutenant and five soldiers had been arrested in the killings and would be turned over to the courts for prosecution. Additional reports on January 16 indicated that the two lieutenants had accused the colonel of ordering them to carry out the assassination, and on January 19 Judge Ricardo Zamora of the fourth penal court ruled that there was sufficient evidence and charged the soldiers with premeditated murder.

The judge's 21-page ruling summarized the testimony provided by the defendants to a military honor commission, and held that, based on the soliders' statements and his command of the area where the murders occurred, Colonel Benavides is considered the immediate author of the order to carry out the killings.

We discussed the legal procedures and status of this case at length with Judge Zamora and the President of the Salvadoran Supreme Court, Dr. Mauricio Gutierrez. I prefaced my remarks by stating my concern not to violate any judicial rules or defendants' rights with questions on a pending case. Both judges stated a discussion could be held in sufficient generality to be appropriate under Salvadoran law.

Justice Gutierrez stated that the case currently is in the "instructional stage," after probable cause has been found and the court proceeds with the collection and determination of the evidence.

Judge Zamora elaborated that thus far, the court has received testimony from 125 witnesses, evidence from nine organizations, lists of military personnel on duty during the night of the killings, ballistics tests and other legal evidence. Judge Zamora also advised that the defendants' attorney had raised the issue, currently under judicial review, of whether jurisdiction lies with him or with the presiding judge in the jurisdiction where the murders occurred. In response to my question as to who decides this issue, Judge Zamora said that he would and has asked for the views and opinions of the Attorney General's office in this matter.

Regarding the status of the court's investigation, Judge Zamora advised that he currently is reviewing extrajudicial materials and is ruling on their admissibility. Justice Gutierrez cautioned that if a deadline is set, for example 4 to 6 months before the case is brought to a jury, a misimpression may arise that the court avoided hearing from certain witnesses or considering other evidence out of undue haste.

Both judges emphasized that the court is going to "great lengths" in this case. For example, Judge Zamora stated that Father Jose Maria Tojeira, leader of the Jesuits in Central America, met with Jesuits from the United States and then sent a letter to the court requesting that the court obtain the names of the military officers who served on the honor commission which initially reviewed the case. Although the court was not obligated to grant this request, in an effort to conduct a thorough investigation and meet the Jesuits' concerns, it obtained the list from President Cristiani and called the commission members as witnesses to give statements.

There is cause for concern about an apparent provision of Salvadoran law under which one person indicted for a crime may not provide competent evidence against another person indicted for the same crime. In response to my questioning of this so-called co-defendant rule, Justice Gutierrez indicated that, unlike in the United States where charges can be dropped in return for a defendant's testifying, in El Salvador charges cannot be dropped if there is real evidence the accused was involved in the crime. Thus, although Colonel Benavides allegedly gave the orders for the killings, a defense could be raised under Salvadoran law that bars the testimony against him from the lieutenants who were also implicated in the crime.

However, we were advised that if there is a degree of doubt regarding the participation or involvement of a defendant in the crime, or if that defendant's role is considered minimal, the ultimate decision is within the judge's discretion on dismissing the charges so that the ex-defendant can then testify against his superiors. Thus, this is an open question in the case.

We also discussed the Jesuit priests case with Dr. German Arnoldo Alvarez, Deputy Attorney General for Human Rights, and Col. Manuel Rivas of the Special Investigative Unit [SIU]. Reports indicated that the SIU, established in 1984 and funded by the United States to assist El Salvador in solving its major crimes, was responsible for initially requesting that the army unit suspected of including those responsible for the killings be confined to a military garrison during the initial investigation.

During our meeting, I expressed the importance of moving the investigation ahead in a forceful and vigorous way. Dr. Alvarez assured that all resources of the Human Rights Department are dedicated to this case. In response to my question on what more could be done, Colonel Rivas stated that the SIU currently was working on ballistic tests of the weapons from the military garrison at issue and Dr. Alvarez recommended presentation to the court of more evidence and testimony from additional witnesses. Both officials assured us that they were doing everything possible toward disposition of this important case.

I was impressed with the approach that Salvadoran officials, including the judges, are taking with the case involving the murder of the Jesuit priests.

Our meeting with Ambassador Walker included a review of other human rights cases: the 1990 shooting deaths of four American churchwomen near San Salvador, the 1981 Sheraton case in which AFL-CIO land-reform advisors were assassinated in the San Salvador Sheraton Hotel coffee shop, the 1988 shooting of 10 residents of the village of San Sebastian and other human rights cases. Ambassador Walker and other United States Embassy officials are working diligently on promoting human rights in El Salvador and bringing to justice defendants in the pending cases with special emphasis on the case involving the Jesuit priests.

As my colleagues may recall, I offered an amendment to the fiscal year 1984 appropriations bill, which was enacted to withhold 30 percent of United States military assistance to El Salvador until the National Guardsmen charged with murder in the deaths of the four United States churchwomen were brought to trial and a verdict was obtained. A similar approach may be appropriate for the case involving the murders of the Jesuit priests.

The following year during Appropriations Committee consideration of foreign aid, I offered an amendment with stiffer conditions requiring El Salvador to establish a special investigative prosecuting unit to expedite bringing alleged death squad members to justice. Under this amendment, 50 percent of the aid would have been withheld until the President certified, 60 days after the establishment of the prosecution unit, that the unit was

working. That amendment was not adopted. Beyond conditioning aid on obtaining a verdict in a specific case, it may be advisable to impose broader conditions on improving El Salvador investigative, prosecution and judicial systems.

In our continuing inquiry on the human rights situation in El Salvador, we also met with representatives of church groups, and missionaries who work directly with refugees. Father Dick Howard, the director of the Jesuit Refugee Services in El Salvador, is originally from San Francisco and will have served in that country for 3 years this July. Father Howard commented about an illustrative case involving a man who was picked up by the national police solely because he works with nuns in aiding refugees. Father Howard stated that such incidents are repeated many times regarding victims who have no real connection with the insurgent FMLN. He told of beatings and torture and frequent disappearances.

We also talked to Mr. Roger Schraeding, a Pittsburgh native, who has worked with refugees in El Salvador for 3 years. Mr. Schraeding corroborated much of Father Howard's accounts.

In addition, we interviewed Mr. Bill Stennett, who has worked in El Salvador for 13 years. He currently operates a literature ministry, providing hymnals, tapes, books, and other religious materials throughout the country. He stressed how important it is not to give the appearance of being associated with either side in the war. All three men questioned the wisdom of military aid, but supported economic aid provided it was conditional on improvement of human rights in El Salvador.

Obviously, much improvement is needed on human rights in El Salvador. We should support U.N. efforts to achieve a cease fire which could be a significant step forward in improving all conditions in El Salvador including human rights. In the interim, we should consider conditioning United States aid on specific tangible steps to be taken in El Salvador such as vigorous prosecution of human rights violations including the case involving the murders of the Jesuit priests. Additional proposals are worth considering to improve the El Salvador judicial system by revising the penal code and separating the police from the military.

We later met in Santiago, Chile, with United States Ambassador Charles Gillespie, cabinet ministers, lawyers, and trade and human rights representatives. After 17 years of military rule under Gen. Augusto Pinochet, the newly elected democratic government of President Patricio Aylwin provides a great opportunity for improving United States-Chile relations and expanding cooperation in many areas such as resolving the Letelier case, fighting drugs, expanding trade and protecting human rights.

During meetings with Government officials, I stressed the importance of a just resolution of the Letelier case. On September 21, 1976, a car bomb exploded in downtown Washington killing the driver, Orlando Letelier, a former Chilean Ambassador to the United States, and his American coworker, Ms. Ronni Moffit. That was the first political assassination in Washington, DC since President Lincoln and the first assassination ever of a foreign official in the city's history. One of those involved in the crime, Michael Townley, an American who admitted for working for the Chilean secret police, in 1978 he agreed to plead guilty to conspiracy and to serve as a Government witness.

Townley's testimony led to the indictment of three Chilean military officers, including Gen. Manuel Contreras Sepulveda, the former head of the Chilean secret police. Until very recently, the Chilean Government has refused to cooperate with the United States in any way in bringing these individuals to trial. Four Cubans also were indicted on murder and conspiracy charges. Although two of the Cubans were initially convicted, those convictions were overturned in May 1982, and the other two Cubans were fugitives. A few days ago, one fugitive, Jose Dionisio Suarez y Esquivel, was arrested by the FBI in St. Petersburg, FL, and will be transferred to Washington, DC, for trial.

The Letelier case long has been an impediment to United States-Chilean relations as evidenced by a stern statement issued by the State Department in October 1987 criticizing the Chilean Government's adamant refusal "to act in bringing those guilty of this heinous crime to justice."

We were told that since the Chilean Supreme Court denied the extradition request, under Chilean law the court cannot reconsider extradition. I believe a careful review should be made of that legal conclusion. The senior Government officials uniformly expressed interest in resolving this case in the context of prosecution in Chile.

Further proceedings in Chile will require complex proceedings which could be terminated by adverse Chilean court rulings. I expressed the view to Chilean officials that the defendants should be extradited to the United States for trial in Washington, DC, in accordance with the norm that the matter should be tried in the jurisdiction where the crime occurred. It is obviously a very complex matter, with extensive political overtones. All factors considered, it is my judgment that all legal avenues should be pursued to extradite the defendants for trial in Washington, DC.

Regarding the issue of drugs, we met with Alfredo Segundo Nunez, the inspector general of the Carabineros—national police—Haracio Toro, the chief of investigations for the civil police. We discussed the contribution of the FBI in training the Carabineros. General Nunez explained that when the United States-trained officers return to Chile, they are assigned to special roles and are instrumental in helping foster their new relationship with the civilian Government. Reciprocal training by the FBI of Carabineros and vice versa seems highly desirable.

General Nunez and Chief Toro assured us of Chile's determination to fight the special problems of drugs and terrorism. Defense Minister Rojas also described his positive meeting with Gen. Maxwell Thurman on the serious problem of drugs and cooperative efforts to fight drug trafficking. Minister Rojas stated that Chile is exercising more control over exports and air traffic, is cooperating with the DEA, and is acting in a "preventive way" to protect the financial system from money laundering by the Colombians. The importance of the United States assisting Chile in this antidrug effort is similar to our interest in assisting Panama. As the drug traffickers in Colombia, Bolivia, and Peru are squeezed by law enforcement agents, they appear to be moving their operations to other countries such as Chile, Argentina, and Paraguay.

Chilean officials also expressed an interest in proposals to establish an international strike force and an international criminal court. Minister Cimma advised that he would support Jamaican Prime Minister Manley's proposal "with no hesitation whatsoever." Regarding an international court, Minister Cimma indicated it was a "great approach," and he would broaden its jurisdiction to include the defense of human rights and democracy.

The importance of the United States as Chile's main agricultural trading partner was reflected in our meetings with Finance Minister Alejandro Foxley and Ronald Bown, the president of the Chilean Fruit Exporters Association. This issue is of special importance to Pennsylvania since 70 percent of Chilean fruit exports pass through the Philadelphia and Delaware River ports. Minister Foxley expressed concern that the limited access of Chile to the United States market may be reduced even more by efforts of the California growers. Mr. Bown reiterated the concern that California growers are pushing for marketing orders to block Chilean imports and to keep the store shelves empty to raise prices for the United State consumer. It is obvious that Chilean fruit imports into the United States should be encouraged.

We also discussed the grape contamination case of March 1989 and efforts currently underway to investigate and determine the facts in that case. In

light of the October 1989 memorandum of understanding signed by Chile and the United States implementing procedures to ensure the safety of fruit and the statements made during our meetings, I am optimistic that such trade can be safely expanded in the future.

In another trade matter, Minister Foxley expressed his concern regarding United States trade laws which impose penalties against countries such as Chile in which domestic companies produce generic drugs without patents. I countered that the United States has a justified interest in protecting its patents and explained that in the United States we place a very high value on protecting property interests because of the high research costs in developing patentable products.

In our discussions regarding human rights, we were encouraged by the restructuring of the security forces and Interior Minister Krauss' actions to assume control over Chilean police authorities. The minister assured us that he is working for a solution to human rights and the status of political prisoners. We also met with Mr. Steve Anderson, a United States citizen, of the Chilean Information Network, who stated the broad support among human rights organizations in Chile for S. 1629, the Torture Victims Protection Act, which is pending in the Judiciary Committee.

From Chile, we traveled to Argentina where we met senior Government officials and legislators to discuss the economy, drugs and nuclear proliferation. In all of our meetings, the constant theme was the negative effect that hyperinflation was having on all aspects of Argentine Government and society.

In our meetings with U.S. Ambassador Terence Todman and Manuel Solarnet, the former Treasury Minister and currently an economic adviser, we learned how public sector salaries have been slashed in half, how the Government is moving to privatize many of its holdings, and how all segments of society are suffering in this unusual economic situation.

Argentina appears to be unfairly prohibited from receiving international military education training [IMET] funds because its 1986 per capita income was $1 above the statutory limit. In light of the anticipated drop in Argentina's per capita income because the hyperinflation rate in 1989, an amendment should be passed to correct this inequity.

We also met with Argentine legislators, representing the House and Senate and a broad spectrum of political parties. We had a spirited exchange of views on a wide range of issues, including the economy, drugs, human rights, and the role of the armed forces in the drug war.

We discussed the drug issue at length with Interior Minister Mera Figueroa; Dr. Alberto Lestelle, the Secretary for the Prevention of Drug Abuse and Control of Narcotics Trafficking; Defense Minister Humberto Romero and Acting Foreign Minister Carlos Ortiz deRozas. Argentina established a secretariat to fight drug trafficking and a national command to patrol its borders. In addition, the Interior Minister is forming an executive committee of security organizations and police forces to centralize civilian control. The Argentines soon will unveil an ambitious proposal to install a communications system and computer data center for information sharing with the United States and Latin American countries to fight drugs.

Defense Minister Romero advised that while the Government is aggressively attacking the problem of drug trafficking, nevertheless, the economic problem limits the role of the armed forces. For example, of their six C-130 transport planes which carry supplies to the border patrol fighting drugs, only two are operational for a lack of spare parts. The United States can play a valuable role in assisting the Argentine antidrug efforts at this critical time by providing assistance through training Argentine officers in the United States and supplying urgently needed spare parts.

The Argentines were generally supportive of an international strike force. Minister Figueroa stated that he would raise the subject with President Carlos Menem and expressed the Government's general philosophy "to support every international force aimed at common peace and well-being." Defense Minister Romero emphatically stated that his country is "absolutely ready to support any international effort to eradicate this problem." Minister Figueroa also expressed his personal support for an international criminal court developed through the United Nations, and Minister deRozas cited the International Court of Justice and the International Court for Human Rights as precedents for possible Argentine support and participation.

During our meeting with Defense Minister Romero, we discussed the problem of nuclear proliferation. I asked about Argentina's reported move toward nuclear weapons, and Minister Romero firmly denied that Argentina was developing weapons, citing that country's long tradition and its sound management of nuclear technology. Minister Romero agreed with efforts to limit the proliferation of weapons, and stated that Argentina remains solely interested in nuclear power and nuclear medicine, not nuclear weapons.

In Paraguay, we had a very productive meeting with its relatively newly elected president, Andres Rodriguez who ousted Gen. Alfredo Stroessner after 35 years of dictatorship in a coup staged on February 2-3, 1989. Shortly thereafter on May 1, General Rodriguez was elected President.

Under Stroessner, Paraguay was considered a pariah in the international community. Torture, murder, and use of "electric showers" were reportedly prevalent under the Stroessner regime. While the United States is providing $124,000 in AID funds and limited training to military officers, the United States can play an expanded role to facilitate the development of democracy by supporting President Rodriguez's efforts to remove the military from politics and to fight drugs.

President Rodriguez is a friendly and enthusiastic leader who appears deeply committed to improving conditions for Paraguay's poor and developing democratic institutions for that country. He emphasized his commitment to helping the campesinos, the poorest sector of society. He stressed that for the people's believe in democracy, the Government must address four vital areas: Health, education, low cost housing and settlements for the campesinos. President Rodriguez stated that his Government has "decidedly declared a total war against narco-traffickers." He stated that he was favorably disposed toward the creation of an international strike force to fight drugs.

En route back to the United States, we stopped for fuel in Lima, Peru, which provided an opportunity for an Embassy briefing. We heard a progress report on U.S. efforts under way on interdiction, including the destruction of laboratories and processing facilities. Field operations have been enhanced by the increase in the number of helicopters which are used for eradication by transporting workers to destroy coca crops. We were updated on the results of $35 million in United States aid provided to the Peruvian Army for narcotics work. Considerable progress appears to have been made on the war on drugs since our visit to Peru in September 1988; but United States efforts are in mid-stream and much more needs to be done.

The countries we visited in Central and South America are facing historic opportunities for the development of democracy, yet simultaneously are threatened by the serious problems of drugs, limited economic development, inflation and the underlying threat posed by the military. The United States has a unique opportunity to promote democracy by timely and carefully crafted assistance.

First and foremost on that list would be action by the Senate on the foreign aid packages for Nicaragua and Panama. I thank the Chair and yield the floor.

Mr. BENTSEN. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. ROTH. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FAVORED-NATION STATUS FOR HUNGARY

The Senate continued with the consideration of the bill.

AMENDMENT NO. 1463

(Purpose: To change the tariff classification of Agglomerate marble floor tiles)

Mr. ROTH. Madam President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Delaware [Mr. ROTH] proposes an amendment numbered 1463.

Mr. ROTH. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 71, after line 12, insert the following new section:

SEC. . AGGLOMERATE MARBLE FLOOR TILES.

(a) RECLASSIFICATION.—Chapter 68 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by striking out subheading 6810.19.10 and inserting the following new subheadings with the article desciptions for such subheadings having the same degree of indentation as the article description for subheading 6804.22.60:

	"Floor and wall tiles:			
6810.19.12	Agglomerate marble tiles..	4.9%...	Free (A, E, IL) 4.7% (CA).	40%
6810.19.14	Other.....	21%....	Free (A, E, IL) 16.8% (CA).	55%"

(b) EFFECTIVE DATE.—

(1) GENERAL RULE.—The amendments made by subsection (a) shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after October 1, 1990.

(2) RELIQUIDATION.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law to the contrary, upon a request filed with the appropriate customs officer after September 30, 1990 and before April 1, 1991, any entry or withdrawal from warehouse for consumption of goods to which the amendment made by this section applies and that was made—

(A) after December 31, 1988; and

(B) before October 1, 1990;

and with respect to which there would have been a lower duty if the amendment made by this section had applied to such entry or withdrawal, shall be liquidated or reliquidated as though such entry or withdrawal had occurred on October 1, 1990.

Mr. ROTH. Madam President, the objective of this amendment is to take care of an unintended consequence of the U.S. conversion to the harmonized system, a system which caused the tariff on agglomerate marble tiles to increase to 21 percent, nearly four times higher than its prior tariff rate. This amendment remedies this unfair tariff conversion by creating a new tariff subcategory for marble chip floor tiles. It brings the tariff rate in line with its historical level. It would also reliquidate the amount of higher duties paid since we implemented the harmonized system on January 1, 1989. The provisions of this amendment are similar to a bill introduced in the House.

The administration originally opposed the House bill, which prevented it from being included in the miscellaneous tariff package that passed the House last year. The administration has since agreed to withdraw its objection. Its decision is based on the "unanticipated" increase in the tariff rate on agglomerated marble tiles as a result of harmonized system. This decision has been communicated from the general counsel of the USTR based on the administration's changed position.

I urge my colleagues to support adoption of this amendment to help rectify an unfair tariff classification problem.

Mr. BENTSEN. Madam President, this amendment would correct one of the problems that arose regarding imports of marble floor tile when we converted to the harmonized tariff system. Although the provision has not been the subject of public discussion before the Finance Committee, it has been through the House before. The administration at one time did oppose it but I understand it has withdrawn any objection to it.

I am willing to accept it on this side with the understanding that if it becomes controversial within conference, we may be forced to drop it. I know of no objection to it.

Mr. PACKWOOD. Madam President, I can assure the Senate the administration does not oppose this amendment. It is a fair amendment. When we harmonized the system, the tariffs on these items went up unintentionally to around 21 percent. They used to be roughly between 5.3 and 8.5 percent. The amendment is a good amendment and should be adopted.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Delaware.

The amendment (No. 1463) was agreed to.

Mr. ROTH. I move to reconsider the vote by which the amendment was agreed to.

Mr. BENTSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BENTSEN. Madam President, I urge my colleagues, if they have amendments to bring before the Senate, to do so now. We would like to consider several amendments yet this afternoon and this evening and have some rollcall votes, and in turn, if possible, try to finish up this bill tomorrow. Otherwise, we have no votes on Monday and that means we have to delay it until Tuesday. So if Senators will come over with their amendments, it would be most helpful.

Mr. ROTH. Madam President, I would like to ask the distinguished chairman whether we could agree to a half-hour time limit on my amendment No. 1464, 15 minutes to a side.

Mr. BENTSEN. I say to the distinguished Senator that I have no objection as manager of the bill. I know of no objection on this side. I urge Senators who are listening or their staffs to please advise us of that as quickly as possible.

Mr. PACKWOOD. Madam President, I say on this side so far no Senators have contacted me to indicate that they have objections to a time limit on this or other amendments. There may be some. Nobody has said anything to me yet.

The PRESIDING OFFICER. Without objection, the Senator's request is agreed to.

Mr BENTSEN. If the Senator will withhold for a moment, would that include second-degree amendments?

Mr. ROTH. That would exclude any second-degree amendments.

AMENDMENT NO. 1464

(Purpose: To provide administrative procedures for noncontroversial tariff suspensions)

Mr. ROTH. Madam President, I send the amendment to the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Delaware [Mr. ROTH], for himself, Mr. BRADLEY, Mr. LAUTENBERG, and Mr. LOTT, proposes an amendment numbered 1464.

Mr. ROTH. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, insert the following new title:

TITLE V—ADMINISTRATIVE PROCEDURES FOR NONCONTROVERSIAL TARIFF SUSPENSIONS

SEC. 5001. INITIATION OF INVESTIGATIONS.

(a) PETITIONS.—

(1) Any person who—

(A) uses an article in the production of a product in the United States,

(B) imports an article into the United States, or

(C) distributes an article in the United States,

may file with the United States International Trade Commission (hereafter referred to in this Act as the "Commission") a petition requesting the President to issue a proclamation under section 5003(a) that suspends the duty imposed on such article by any chapter of the Hamonized Tariff Schedule of the United States other than chapter 98 or 99, if the rate of duty applicable to such article is provided in rate of duty column 1.

(2) Any person who—

(A) produces in the United States—

(i) any article for which a duty is suspend-

ed by reason or a proclamation issued under section 5003(a),

(ii) any other article like, or directly competitive with, such article, or

(iii) any other article which is like, or directly competitive with, a product that is produced in the United States by means of a process which uses such article as a significant raw material or component,

(B) has—

(i) the capacity, and

(ii) the bona fide intent, to produce such article, or any other article like, or directly competitive with, such article in the United States in significant quantities,

may file with the Commission a petition requesting the President to issue a proclamation under section 5003(b) that reinstates such duty.

(3) The Commission shall not accept a petition under paragraph (1) or (2) for the suspension or reinstatement of a duty on an article before the date that is 1 year after the date on which a bill is introduced in the House of Representatives or the Senate that would, if enacted, effect such suspension or reinstatement.

(4) Each petition filed under paragraph (1) or (2) shall contain—

(A) sufficient information (including a precisely defined article description) to enable the Commission to determine whether an investigation into the suspension or reinstatement of the duty is justified;

(B) sufficient information for the Commission to make a determination under section 5002(a); and

(C) such other information as the Commission may require.

(5)(A) Not later than the date that is 15 days after the date on which a petition is filed with the Commission under paragraph (1) or (2), the Commission shall determine whether the information provided in the petition is sufficient to justify an investigation under section 5002.

(B) If the determination made under subparagraph (A) is affirmative, the Commission shall—

(i) transmit a copy of the petition to the United States Trade Representative,

(ii) initiate an investigation under section 5002 of the suspension or reinstatement of the duty requested in the petition, and

(iii) publish in the Federal Register notice of—

(I) the initiation of such investigation, and

(II) the opportunity for public comment on such suspension or reinstatement of the duty.

(C) If the determination made under subparagraph (A) is negative, the Commission shall dismiss the petition and notify the petitioner of the basis on which such negative determination was made.

(b) PRESIDENTIAL REQUEST OR SELF-INITIATION.—

(1) Upon request of the President, or upon the initiative of the Commission, the Commission shall initiate an investigation under section 5002 of the reinstatement of any duty that has been suspended by any previous proclamation issued under section 5003(a).

(2) Upon initiating an investigation under section 5002 by the authority of paragraph (1), the Commission shall—

(A) transmit to the United States Trade Representative a written statement describing the article and duty that are the subject of such investigation and all information available to the Commission regarding justification of the reinstatement of such duty on such article, and

(B) publish in the Federal Register notice of—

(i) such investigation, and

(ii) the opportunity for public comment on such suspension or reinstatement of the duty.

SEC. 5002. INVESTIGATIONS BY THE COMMISSION.

(a) IN GENERAL.—If the determination made under section 5001(a)(5)(A) is affirmative or section 5001(b)(1) applies, the Commission shall conduct an investigation to determine—

(1) whether the article that is the subject of the petition filed under section 5001(a), or of the notice published under section 5001(b)(2)(B), is produced in the United States,

(2) whether any other article which is like, or directly competitive with, such article is produced in the United States,

(3) whether any other article is produced in the United States which is like, or directly competitive with, a product that is produced in the United States by means of a process which uses (or could use) such article as a significant raw material or component,

(4) whether any person has—

(A) the capacity, and

(B) the bona fide intent,

to produce such article, or any other article like, or directly competitive with, such article in the United States in significant quantities,

(5) whether any person who—

(A) produces in the United States—

(i) such article,

(ii) any other article like, or directly competitive with, such article, or

(iii) any other article described in paragraph (3), or

(B) is described in paragraph (4), objects to a suspension of the duty imposed on such article by any chapter of the Harmonized Tariff Schedule of the United States other than chapter 98 or 99,

(6) whether any person not described in paragraph (4) or (5)(A) objects to that suspension of duty on such article,

(7) whether any quotas or other import restrictions are imposed by Federal law on such article,

(8) whether any international agreements to which the United States is a party affect trade in such article or in any other article like, or directly competitive with, such article,

(9) whether such article, or any article like, or directly competitive with, such article, is, or has been, the subject of any investigation during the preceding 5 years under—

(A) title VII of the Tariff Act of 1930 (19 U.S.C. 1671 et seq.) or section 303 of the Tariff Act of 1930 (19 U.S.C. 1303),

(B) section 337 of the Tariff Act of 1930 (19 U.S.C. 1337),

(C) chapter 1 of title II of the Trade Act of 1974 (19 U.S.C. 2251 et seq.),

(D) chapter 1 of title III of the Trade Act of 1974 (19 U.S.C. 2411 et seq.), or

(E) section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862),

(10) the aggregate value of such articles imported into the United States during the calendar year preceding the calendar year in which such determination is made,

(11) the aggregate value of such articles consumed in the United States during the calendar year preceding the calendar year in which such determination is made,

(12) the principal uses of such article in the United States,

(13) the duties that are imposed by Federal law on such article and the rates of such duties, and

(14) the aggregate amount of Federal revenue derived from the duties imposed by Federal law on such article during the fiscal year preceding the fiscal year in which such determination is made.

(b) PUBLIC COMMENTS.—During the course of any investigation conducted under this section, the Commission shall provide an opportunity for any person to submit written statements regarding the subject of the investigation and, upon request and after reasonable public notice, shall hold a hearing for the oral presentation of views on the subject of the investigation.

(c) REPORTS.—

(1) Not later than the date that is 75 days after the date on which an investigation under this section is initiated, the Commission shall—

(A) complete a preliminary report on the investigation conducted under subsection (a),

(B) publish a summary of the preliminary report in the Federal Register,

(C) provide a copy of the preliminary report to the petitioner, and

(D) make the preliminary report available for public inspection.

(2) On the date that is 30 days after the date on which a summary of the preliminary report on the investigation conducted under this section is published in the Federal Register, the Commission shall submit to the President a final report on the investigation. Such report shall include—

(A) the determinations made under subsection (a),

(B) a summary of comments received by the Commission regarding such investigation, including comments on the preliminary report completed under paragraph (1), and

(C) a copy of the transcript of any hearings held in the course of such investigation.

(d) DETERMINATIONS NOT SUBJECT TO JUDICIAL REVIEW.—The determinations made by the Commission under subsection 9(a) shall not be reviewable in any court.

SEC. 5003. ACTION BY THE PRESIDENT.

(a) SUSPENSION OF DUTIES.—

(1) During the 30-day period beginning on the date on which the Commission submits to the President under section 5002(c)(2) a final report on an investigation concerning the suspension of duties on an article, the President may issue a proclamation that suspends the duty imposed on such article by any chapter of the Harmonized Tariff Schedule of the United States other than chapter 98 or 99 if the President determines that—

(A) no person has a valid objection to such a suspension, and

(B) the sum of—

(i) the aggregate amount of Federal revenue derived from the duty imposed on such article by any chapter of the Harmonized Tariff Schedule of the United States other than chapter 98 or 99 during the fiscal year in which such determination is made, and

(ii) the aggregate amount of Federal revenue derived during such preceding fiscal year from all the duties imposed on all articles that are the subject of a previous proclamation issued under this paragraph during the calendar year in which such determination is made,

does not exceed $100,000,000.

(2) The President may not issue a proclamation under paragraph (1) that suspends the duty imposed by the Harmonized Tariff Schedule of the United States on any article to which the rate of duty provided in rate of duty column 2 applies.

(3) In determining whether to issue a proclamation under paragraph (1), the President may take into account—

(A) the effect such a proclamation would

have on the bargaining position of the United States in any continuing, planned, or prospective negotiations with any foreign country,

(B) the effect such a proclamation would have on the revenue of the United States,

(C) foreign policy considerations, and

(D) any other factors the President considers appropriate.

(4) If the President does not issue a proclamation under paragraph (1) with respect to any article that is the subject of a report submitted under section 5002(c)(2) during the 30-day period described in paragraph (1), the President shall publish in the Federal Register the reasons why the President is unable, or has declined, to issue such a proclamation.

(5) The duration of the suspension of duties provided in a proclamation issued under paragraph (1) shall not exceed 3 years. Such suspension may be extended by a proclamation issued under paragraph (1) with respect to subsequent investigations conducted under section 5002 for a period not to exceed 3 years for each such proclamation.

(b) REINSTATEMENT OF DUTIES.—

(1) During the 30-day period beginning on the date on which the Commission submits to the President under section 5002(c)(2) a final report on an investigation concerning the reinstatement of duty on an article that has been suspended by a proclamation issued under subsection (a), the President shall—

(A) determine whether any person has a valid objection to such suspension, and

(B) if the determination made under subparagraph (A) is affirmative, issue a proclamation that reinstates the duty which would be in effect if such suspension had not been made.

(2) The President shall publish in the Federal Register any negative determination made under paragraph (1)(A).

(c) DETERMINATIONS NOT SUBJECT TO REVIEW.—Any determination made by the President under this section shall be final and shall not be reviewable in any court.

SEC. 5004. ALTERNATIVE SCHEDULES.

The President may, by proclamation, establish—

(1) an annual deadline for the filing of petitions under section 5001(a) with respect to which—

(A) the Commission will be required to make determinations under sections 5001(a)(5) and 5002 during the calendar year, and

(B) the President will be required to make determinations under section 5003 during the calendar year, and

(2) a schedule for taking other actions under sections 5001, 5002, and 5003 that may differ from any time requirements set forth in such sections.

SEC. 5005. EFFECTIVE DATE.

The provisions of this Act shall take effect on October 1, 1991.

Mr. ROTH. Madam President, no one can deny the exciting changes that are taking place in the world today. Dynamics that were not dreamed of only a year ago are opening up a global community that if addressed properly will be as promising and more progressive than any other time in history.

Of course as all change comes with challenge, it's not unusual that there should be concern about America's evolving role in the global economic community. For so long, now, we have been the undisputed champions in every possible realm—educationally, economically, socially, spiritually and militarily. Like the first Governor of America, Governor Winthrop of Massachusetts, said as he stood on the Arbella—America has become that shining city on a hill.

And quite frankly, Madam President, we still are. As the British magazine, the Economist, recently reported:

A combination of economic size and military strength gives America a truly global reach. * * * The ignorance of facts is startling. In a recent poll 48 percent of Americans thought that Japan's economy is bigger than America's. Actually, it is barely half the size, $2.8 trillion compared with $5.2 trillion. Adjusted to reflect real purchasing power, Americans have an average income seven percent higher than that of their nearest large rivals. * * * As for Japan's legendary productivity, it has indeed been growing faster than America's. But the average Japanese worker still takes one hour to produce what his American counterpart can off in just 31 minutes.

So what, American pessimists reply: the fact is that America's share of the gross world product has plummeted from 50 percent in the late 1940s to around 23 percent today. That is true, but misleading. In the late 1940s most of Asia's and Europe's industry was bombed-out rubble. The American share of the global economy is just five percentage points lower than 25 years ago, and 60 years ago. America's economy has weaknesses, no doubt; but it is a giant with a cold, not a pigmy with cancer.

In terms of geopolitics, the American position is even stronger. * * * All this reflects a simple truth: America is still number one.

Madam President, I ask unanimous consent that the Economic article, entitled: "Yes, you are the superpower," be printed in the CONGRESSIONAL RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Economist, Feb. 24, 1990]

YES, YOU ARE THE SUPERPOWER

With the cameras whirring in Europe and the surpluses piling up in Japan, Americans are feeling left out of things. Gone is the confidence of the Reagan days, the sense of knowing that whatever America did mattered hugely to the world. Now, particularly in Washington, many Americans seem to think that theirs is just a large country, stuck between dull old Canada and noisy Mexico. This American variety is dangerous because it ignores facts and thus leaps to wrong conclusions.

The ignorance of facts is startling. In a recent poll 48% of Americans thought that Japan's economy is bigger than America's. Actually, it is barely half the size, $2.8 trillion compared with $5.2 trillion. Adjusted to reflect real purchasing power, Americans have an average income 7% higher than that of their nearest large rivals, who are not the Japanese but those dull Canadians. As for Japan's legendary productivity, it has indeed been growing faster than America's. But the average Japanese worker still takes one hour to produce what his American counterpart can rattle off in just 31 minutes.

So what, American pessimists reply: the fact is that America's share of gross world product has plummeted from 50% in the late 1940s to around 23% today. That is true, but misleading. In the late 1940s most of Asia's and Europe's industry was bombed-out rubble. The American share of the global economy is just five percentage points lower than 25 years ago, and 60 years ago. America's economy has weaknesses, no doubt; but it is a giant with a cold, not a pigmy with cancer.

In terms of geopolitics, the American position is even stronger. Militarily, Americans used to think of themselves as just a step or two ahead of the Russians. Now, though the Soviet military machine still has a vast stock of nuclear weapons, its might looks less impressive by the day. It could not beat the raggedy Afghans, and its next big challenge seems certain to be within its own borders, keeping intact the Soviet Disunion. That change of emphasis leaves American forces out on their own.

PRE-MILLENNIAL TENSION

A combination of economic size and military strength gives America a truly global reach. No other outsider could have taken the lead in keeping the oil tankers sailing through the Gulf, or acted as diplomatic midwife to the new Namibia. In Europe itself Americans have just shown that, by coming down on the German side, they can hasten the reunification of Germany whatever the reservations of its neighbours.

All this reflects a simple truth: America is still number one. Its dominance may be declining a little, because Japan's economy is catching up and several countries are now political powers in their region. But only the United States has the complete mixture of economic, military and diplomatic powers to qualify as a superpower. The more interesting, semi-philosophical question is this: what, in the closing years of the millennium, does a superpower do with its power?

The short answer has been true of every power in every era: that it will do only those things that serve its interests, albeit sometimes indirectly. But because a global power has a global presence—in investment and trade, and also through indefinable things like its political and cultural influence—American interests very much include stability and prosperity throughout the world.

From this comes part of a semi-philosophical answer, and at first it seems like motherhood: America's role is to help other countries do things that will make the world a safer, richer place. But that platitudinous goal becomes challenging when applied to specific countries and circumstances. For instance, Japan in the next few years: it has had no foreign policy worth the name until recently, but is now forging one with great speed. Only America can ensure that Japan is not tempted, because of western neglect and hauteur, to build an economic and perhaps military zone of its own in Asia (see next article). Or the Middle East: the United States may not be able to banish fear between Arab and Jew, but only it can make the two sides see the sense, indeed the inevitability, of a compromise. Its task is to nudge Israel into concessions on the occupied territories while insisting that, in return, Arab governments should discard the men with guns.

The most awkward challenge will be Europe, because America's power there is bound to decline as some of its troops are withdrawn. Even if Russia subsides into introspection, the American task will still be demanding: to encourage German self-esteem while reassuring the French and the British—and the East Europeans—that a strong and united Germany is not a monster stalking the continent. The best way to pull off that trick is to keep NATO alive, and a sizeable number of American troops on European soil.

In short, in various parts of the world America must swap its strategy of containing an enemy to one of encouraging allies. The new approach will require patience, just as the old one did. The prize, though less decisive, is no less appealing: a world in which America does not have to fight wars in order to defend its values and further its interests.

Then there are the truly global issues, on which America is best placed to give a lead. The environment is one such issue. Nobody knows how green mankind must become to ensure its own future; but what is clear is that no government will take the nasty medicine of, eg, higher taxes on coal if it things that others will keep spewing out the gases that may warm the world in 30 years' time. America can use its power—and its example—to promote market-based measures that do not rely on draconian and unenforceable bans.

The same is true of foreign trade and investment. The whole postwar multilateral trading system depends on a shared belief that nobody is cheating and therefore nobody else needs to. America, as the world's largest exporter, has a massive interest in open markets; and American consumers every day show their keenness to buy what they want from wherever they choose. As for foreign investment, American firms have almost $350 billion invested abroad (and that is measured by book value; the market value is much more), giving the United States the largest stake in a liberal regime for foreign ownership. Whenever America itself starts weakening the system that its companies and consumers like, it gives others the pretext to do so.

For—and this is the last bit of semi-philosophy—a modern superpower must be a place that lesser fry admire, even envy. The past 12 months have seen the triumph of western ideals, of democracy and market capitalism. One of the main reasons for that triumph was that, in the postwar decades, America lived up to its ideals while Marxist beliefs turned to venal realty. America-at-home has to stay a land of opportunity and openness, the better to ensure that the rest of the world keeps going that way. Over to you, Superman.

Mr. ROTH. Madam President, now this moral shot in the arm brings me to my thesis: America must adopt the right kinds of policies to remain on the leading edge of the emerging global community. The policies that rise from this floor must be policies that allow for our country's growth. Because while we are still the superpower, the competition is better prepared than ever before.

Last June, Senator BRADLEY and I introduced S. 1169, as a way to promote our Nation's competitiveness. It establishes a process for allowing temporary, noncontroversial duty suspension requests to move along an administrative track if Congress fails to take action on them within a 12-month timeframe. In a nutshell, this process is needed to give our businesses and industries and equal advantage in the global marketplace when they have to import an item which is not produced in the United States to distribute or use in their manufacturing.

As you know, temporary duty suspensions involving imports which do not compete with domestic products directly impact the competitiveness of U.S. industry. By allowing for duty suspensions that are not opposed here at home, the cost decreases on the raw materials, on the final product and in the marketplace. This helps us remain competitive.

Unfortunately, as the law stands now, these temporary noncontroversial duty suspensions must be acted on solely by Congress. And far too often—with its legislative calendar filled—Congress does not act on needed suspensions in a timely and predictable manner. At times, even the most noncontroversial bills have been jammed up here on the Hill for 4 years.

This is no way to increase our global competitiveness.

Consequently, Senators BRADLEY, LAUTENBERG, LOTT, and I offer this provision as an amendment to H.R. 1594. It is similar to a bill that overwhelmingly passed the Senate in 1987—when efforts to defeat it failed 88 to 9. However, it has been revised to address some of the few concerns that were raised. The major change has been to assure the primary role of Congress in this area. This amendment does not undermine nor diminish Congress' authority to enact duty suspensions, but only provides an administrative procedure for temporary noncontroversial duty suspensions of Congress fails to act on a suspension request within 1 year. The authority granted to the administration is limited to truly noncontroversial duty suspensions and would only be used should Congress fail to act in a timely and predictable manner.

Under this amendment, Congress would still have authority under the Constitution to pass or change any duty suspension, and this amendment does not preclude Members of Congress from introducing or acting upon duty suspension bills.

The narrow authority that is granted to the President under this amendment is granted because it is in our national interest to do so. This is not something new. Indeed we already grant authority to the administration to reduce or eliminate tariffs in other areas. For example, we have given the administration tariff-cutting authority in the Uruguay round and under the generalized system of preferences.

There is no private sector opposition to this amendment. Rather, it is strongly supported by industries which regularly go through the uncertain process of tariff suspensions by legislation. They seek a regularized process so that business planning can occur.

I urge your support for this amendment which will benefit U.S. industry, enhance U.S. competitiveness and provide long-term benefits—to help our business remain strong and viable well into the next century.

Mr. BENTSEN. Madam President, will the sponsor of the amendment yield 3 minutes?

Mr. ROTH. I am happy to yield 3 minutes.

Mr. BENTSEN. Madam President, the amendment offered by the Senator from Delaware would establish an administrative procedure for suspending import tariffs in limited circumstances. Essentially, the amendment would give private parties the opportunity to petition the President if legislation to suspend an import tariff has been before the Congress for 1 year, and Congress has failed to act. The amendment grants the President the authority to proclaim the tariff suspension, but only after a thorough investigation by the International Trade Commission to determine whether the suspension is controversial. The President's authority would be limited to suspensions where there is no valid objection.

The amendment also limits the potential revenue loss that may result from proclaimed duty suspensions. The total value of imports covered by these suspensions could not exceed $100 million per year. Furthermore, Federal revenues from the duties lost by reason of such suspensions may not be more than 0.01 percent of total Federal outlays in the preceding year.

The bill before the Senate today contains 194 temporary duty suspensions. These suspensions are of vital importance to the companies that have requested them. They involve, in most instances, the importation of articles that are not produced in the United States. Their purpose is to help U.S. companies compete successfully, both in the United States and in the international marketplace.

The problem is that the legislative process is not always efficient in handling these temporary suspensions. Congress last passed duty suspension legislation as part of the 1988 Trade Act. Prior to the 1988 Trade Act, it had been 4 years since the Congress passed any duty suspension legislation.

We must recognize that our failure to act on these duty suspensions harms the competitiveness of U.S. manufacturers. In some cases, delay in the legislative process has caused severe economic hardship for U.S. companies.

This amendment does not preempt the congressional process. It just complements it. Duty suspensions will continue to come to the Congress first. If they are controversial, only the Congress will have the power to act on them. But if they are not controversial, if their only effect is to make a U.S. manufacturer more competitive, and if the Congress does not respond to that purpose in a timely manner, then the President would be empowered to provide the needed tariff relief.

I urge my colleagues to support the amendment.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. I, too, regard it as good legislation. I know the argument

can be made that this somehow limits the power of the Ways and Means Committee or the Finance Committee because we are giving away to an administrative agency the power to do what we otherwise do by legislation.

The chairman is right. We are very often tardy, and so many of these are important to some industries. They are often opposed by only a very small number of people, yet they get held up. I think this process would unblock what has been an unjustifiable roadblock.

I encourage support for the amendment.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. Madam President, we are under a time limit, are we not?

The PRESIDING OFFICER. The Senator is correct.

Mr. PACKWOOD. I suggest the absence of a quorum and ask that it be charged equally against each side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BUMPERS. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Madam President, I ask unanimous consent that the present amendment be set aside for not to exceed 5 minutes, and that I be permitted to make a statement on an unrelated subject during that 5-minute period.

The PRESIDING OFFICER. Is there objection?

Mr. BENTSEN. The manager of the bill has no objection, as long as this statement will be carried after the discussion on this amendment in the RECORD.

The PRESIDING OFFICER (Mr. LAUTENBERG). Without objection, it is so ordered.

The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, who is yielding time to those in opposition?

The PRESIDING OFFICER. The Senator in opposition to the amendment?

Mr. HEINZ. Yes.

The PRESIDING OFFICER. The Senator from Pennsylvania would be controlling the time in his own right.

Mr. HEINZ. Mr. President, I yield myself 5 minutes.

Mr. BENTSEN. Mr. President, the Senator would be controlling the time in opposition. I think he is the only one appearing in opposition.

Mr. HEINZ. At this time.

Mr. BENTSEN. At this time.

Mr. HEINZ. Mr. President, I rise in opposition to the Roth amendment basically as a matter of principle because this amendment conveys legislative authority to the President that he need not have and that in this Senator's judgment he should not have.

As I understand the argument of the Senator from Delaware in favor of his amendment, his point of view is that we do not do a very good job passing these miscellaneous tariff bills, that it takes a while, not all of them get passed, the controversial ones drop by the side, and the Congress is really the wrong place to do this work.

Mr. President, I think that is a deeply flawed argument, and I might add that it is a deeply troubling one if you apply it to the Federal budget, or the fact that it has taken us over 12 years to legislate, if we are lucky, on clean air, or nearly as long to make an improvement in the minimum wage. The list of all the things Congress does not do well is endless, and if the criteria that we want to adopt in this body is that if we do not do our job the way somebody thinks we ought to do it, we should just pass the buck to the President; well, then we are not going to need to be here very much, because I cannot think of too many things where we do a timely and excellent job.

In the case of the Roth amendment we are dealing with authorities that deal with interstate and foreign commerce and taxation. The Constitution specifically confers to Congress the power to regulate interstate and foreign commerce and the power to regulate taxation. But in conferring, as this amendment would do, the power to suspend tariffs to the executive branch, we confer on them the power to regulate both foreign commerce and the taxation of imports.

Mr. President, I think that is a bad principle. I understand that there have been attempts since this amendment last was before us, in 1987, to improve it. There are some public notice safeguards built in, and there is an attempt to try to get all the objections on the record.

But it has been my experience as a member of the Finance Committee for nearly 12 years now that there is only one thing that really drives all the objections and points of view out of the woodwork.

And that is a legislative markup. When we marked up the bill that is before us now, we did not know about all the objections to all these provisions until, in some cases, just a few hours before markup.

As they say, I guess, execution—in this case the execution of a law—wonderfully concentrates a person's mind. And in the case of opponents, it has done that.

There is something we can do in the legislative process, however, that the executive branch cannot, whether or not it can drive all these objections out in some kind of strung-out administrative proceeding. We can fashion a legislative compromise. When we have a dozen or two dozen or more noncontroversial bills that everybody wants passed, and there are one or two controversial measures that people oppose, in fact the legislative process often brings opposing points of view together, and the result is a compromise.

The Senator from Arkansas, [Mr. PRYOR] and other Senators, had a disagreement a few years ago on an issue involving the duty suspension on watch parts. The issue was whether or not watch parts should be allowed to come in from non-U.S. territories duty free. Many of our watch parts come from U.S. dependencies like the Virgin Islands.

The result of the legislative process was that a compromise was reached and a result occurred. That could never happen if this had been left to the executive branch, because they do not have the power to strike that kind of compromise.

In TV tubes, we had a similar experience. And in issue after issue where there have been controversies, what has forced their resolution has been the legislative process.

The PRESIDING OFFICER. The Senator has spoken for 5 minutes.

Mr. HEINZ. Mr. President, I yield myself an additional minute.

The PRESIDING OFFICER. The Senator has an additional minute.

Mr. HEINZ. Mr. President, we ought to be cautious of delivering to the bureaucratic process in the executive branch any powers that are constitutionally ours, and particularly so with any powers where we know we can do the job.

I would argue that we do this job better than the executive branch ever could, because on the tough ones, we get answers, not procrastination.

And I would add that we set a dangerous precedent not only for big issues like the budget, but on minor ones, such as all the private bills that get referred to the Judiciary Committee. Some of them may not have merit, but a lot of them do have merit and a lot of them pass, and they pass because they have merit.

The PRESIDING OFFICER. The Senator has used his additional minute. There are 3 minutes remaining.

Mr. HEINZ. Mr. President, I will take 30 more seconds and I will reserve the remainder of my time.

Are we to surrender that authority to the executive branch, as well? Mr. President, I think the precedent that we would set would be a poor one not just for the jurisdiction of the Finance Committee, but those of many other committees as well. So for that reason I urge defeat of the Roth amendment.

I reserve the remainder of the time.

Mr. ROTH. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Three minutes and five seconds.

Mr. ROTH. I yield myself 2 minutes.

Mr. President, I would point out that the authority being delegated under this proposal is very limited indeed. There are set forth in the proposal the standards that must be met.

It is important to understand that Congress still has authority, as is provided under the Constitution, to pass

or change any duty suspension. This proposal does not preclude Members of Congress from introducing duty suspension bills.

As I have already emphasized, this administrative procedure can only be used 12 months after a bill has been pending before Congress. As I say, the authority is limited. There are explicit procedures to follow. There is precedent.

Congress has in the past delegated authority to the executive branch to cut tariffs and to implement other congressional trade policy goals. For example, under the generalized system of preferences, the President can suspend tariffs under certain conditions.

Finally, let me point out, Mr. President, the administrative procedures would provide greater opportunity for comment, for public comment, and a more visible, noncontroversial tariff suspension process than under the congressional system.

The ITC must provide full notice and comment periods during the course of its investigation, and must hold hearings as well. Notice of any investigation and any findings is required to be placed in the Federal Register. Most, if not all, companies regularly scan the Federal Register to become aware of new Government regulations and other Federal decisions affecting company operations.

Mr. President, I reserve the remainder of my time and I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. HEINZ. Mr. President, I see no further speakers on the floor. I am prepared to yield back the time on this side.

Mr. ROTH. I am prepared to yield back the time on my side.

The PRESIDING OFFICER. All time is yielded back.

Mr. ROTH. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the amendment of the Senator from Delaware.

The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Oklahoma [Mr. BOREN], the Senator from North Dakota [Mr. BURDICK], the Senator from Arizona [Mr. DECONCINI], the Senator from Georgia [Mr. FOWLER], the Senator from Hawaii [Mr. INOUYE] are necessarily absent.

Mr. SIMPSON. I announce that the Senator from New Hampshire [Mr. HUMPHREY] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 90, nays 3, as follows:

[Rollcall Vote No. 58 Leg.]

YEAS—90

Adams	Gorton	Metzenbaum
Armstrong	Graham, Florida	Mikulski
Baucus	Gramm, Texas	Mitchell
Bentsen	Grassley	Moynihan
Biden	Harkin	Murkowski
Bingaman	Hatch	Nickles
Bond	Hatfield	Nunn
Boschwitz	Heflin	Packwood
Bradley	Helms	Pell
Breaux	Hollings	Pressler
Bryan	Jeffords	Pryor
Bumpers	Johnston	Reid
Burns	Kassebaum	Riegle
Byrd	Kasten	Robb
Chafee	Kennedy	Rockefeller
Coats	Kerrey, Nebraska	Roth
Cochran	Kerry, Massachusetts	Rudman
Cohen	Kohl	Sanford
Conrad	Lautenberg	Sarbanes
Cranston	Leahy	Sasser
D'Amato	Levin	Shelby

Dixon	Lott	Simpson
Dodd	Lugar	Specter
Dole	Mack	Stevens
Domenici	McCain	Symms
Exon	McClure	Thurmond
Ford	McConnell	Wallop
Garn	Metzenbaum	Warner
Glenn	Mikulski	Wilson
Gore	Mitchell	Wirth

NAYS—3

Danforth	Durenberger	Heinz

NOT VOTING—6

Boren	DeConcini	Humphrey
Burdick	Fowler	Inouye

So the amendment (No. 1464) was agreed to.

Mr. ROTH. I move to reconsider the vote by which the amendment was agreed to.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TWENTIETH ANNIVERSARY OF EARTH DAY

(The following remarks of Mr. BUMPERS occurred earlier and, by unanimous consent, appear at this point in the RECORD:)

Mr. BUMPERS. Madam President, I want to take a moment to join with my colleagues who have and will be making statements commemorating the 20th anniversary of Earth Day, which we will celebrate officially on Sunday, April 22.

Earth Day was a massive grassroots demonstration of public concern for the environment, and it has been immensely successful. Politicians all over the country responded with environmental initiatives that became some of the key public laws protecting the environment today.

Twenty years ago, I was running in a crowded primary field for the governorship of Arkansas. One of the pledges I made to the people of the State in that campaign was to improve the quality of our State park system, which could only be described then as an unmitigated disaster. I could not have recommended more than one park for an overnight stay by a guest in our State. My State parks initiative enjoyed wide support, and we were fortunate in getting several million dollars in Federal matching grant money in the land and water conservation fund—which incidentally, was a farsighted legislation that predated Earth Day—to help pay the bills for that park improvement.

My successors continued and improved on the parks, and today our park system in Arkansas is one of the finest in the Nation. We take great pride in being called The Natural State, because of our relatively clean air, free flowing streams and scenic beauty.

In 1975, I came to the Senate and joined the Committee on Interior and Insular Affairs, later changed to the Energy and Natural Resources Committee. The hot issue then was the energy crisis, and we were right in the middle of it. Today we are more aware than ever that energy policy and environmental policy are intertwined, but that is not what I want to speak about now.

The Interior Committee was then, and continues to be, very involved in our public lands. Some great conservationists served on that committee—Scoop Jackson; Gaylord Nelson to whom we are indebted for Earth day; Lee Metcalf; Frank Church—and I consider myself fortunate to have learned from them about the importance of our public lands and resources.

Our systems of national parks, wild and scenic rivers, trails, wildlife refuges and wilderness areas are, I believe, one of the most enduring manifestations of the American public's concern for the environment and our love of nature.

Last year we celebrated the 25th anniversary of the Wilderness Act—legislation that declared it to be the "policy of Congress to secure for the American people of present and future generations, the benefits of an enduring resource of wilderness." The act defined wilderness "as an area where the earth and its community of life are untrammeled by man, where man himself is a visitor who does not remain."

Today, the national wilderness preservation system totals over 90 million acres in 474 separate units. It includes glaciers and sand dunes, mountains and valleys, wetlands and deserts, forests and shorelines, the most beautiful, spectacular and diverse examples of wild country ever protected by any nation. There are some who question the value of wilderness preservation to man—"What use is it to me?" The great Western writer Wallace Stegner provided one answer to that question:

> Save a piece of country like that intact, and it does not matter in the slightest that only a few people every year will go into it. That is precisely its value. Roads would be a desecration, crowds would ruin it. But those who haven't the strength or youth to go into it and live can simply sit and look. They can look two hundred miles * * * they can also look as deeply into themselves as anywhere I know.
>
> These are some of the things wilderness can do for us. That is the reason we need to

put into effect, for its preservation, some other principle than the principles of exploitation or "usefulness" or even recreation. We simply need that wild country available to us, even if we do no more than drive to its edge and look in. For it can be a means of reassuring ourselves of our sanity as creatures, a part of the geography of hope.

I have been privileged to serve as chairman or ranking minority member of the Public Lands, National Parks and Forests Subcommittee since 1978. In that position, I have learned that probably the areas best loved by the American public are our national parks and that the National Park Service is our most popular agency.

During the 20 years since Earth Day, the parks system has been expanded and improved in many areas. The most dramatic expansion of the system in that time occurred when president Carter signed the Alaska National Interest Lands Conservation Act in 1980, essentially doubling the size of the National Park System, and vastly increasing the Wilderness, Refuge and Wild and Scenic Rivers Systems, as well.

Today there are 79.8 million acres of land within the National Park System, with 355 units located in 49 States and the District of Columbia. Last year, over 350 million people visited these magnificent areas. Yet, because parks are established both for conservation of park resources and for the enjoyment of the visitor, the Park Service must often balance competing interests in park management. Moreover, simply setting aside areas as national parks does not guarantee their protection forever. As we enter the decade of the 1990's we need to recognize that our parks are subject to increasing pressures from many sources. As the National Parks and Conservation Association has written in "To Preserve Unimpaired: The Challenge of Protecting Park Resources":

Though parks are conceived as islands of natural beauty or historical "time capsules," it is increasingly clear that they are no longer islands, and never really were. Hundreds of parks have inadequate boundaries. Wilderness, which once buffered many parks, has retreated. Critical habitat outside parks is pushing out native species. Our "effluent" society has announced its presence in parks with atmospheric and water-borne contaminants. * * * The insulation that undeveloped rural land provided many historic sites and battlefields is evaporating in whirlwinds of urban sprawl. * * * Meanwhile, a nation in search of itself continues to revere the national park system, arriving each year in record numbers.

Concern for our national parks and wilderness areas is but one aspect of the growing environmental ethic we will be celebrating and strengthening on Earth Day 1990. In our efforts to protect natural areas within the United States we have learned about ecosystems and the connections between all living things within those ecosystems. We are now beginning to see that we live in a global ecosystem and that many environmental concerns transcend local and national boundaries.

This we know: the earth does not belong to man, man belongs to the earth. All things are connected like the blood that unites us all. Man did not weave the web of life, he is merely a strand in it. Whatever he does to the web, he does to himself.

In the 1850's, Chief Seattle wrote these prophetic words to Isaac Stevens, Governor of the Territory of Washington.

It has taken us too long to fully comprehend the wisdom of those words, let us not now lose sight of their meaning.

AMENDMENT NO. 1482

(Purpose: To temporarily increase the duty on ethyl tertiary butyl ether)

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Kansas [Mr. DOLE], for himself and Mr. GRASSLEY, proposes an amendment numbered 1482.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, add the following:

SEC. . ETHYL TERTIARY BUTYL ETHER.

(a) IN GENERAL.—Subchapter I of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new heading:

"9901.00.52	Ethyl tertiary butyl ether (provided for in subheading 2909.19.10) and any mixture containing ethyl tertiary butyl ether.	6.66¢/liter...	No change (A, E, IL) 5.29¢/liter (CA).	6.66¢/liter...	On or before 12/13/92 or the date before 12/31/92 on which Treasury regulation §1.40–1 is withdrawn or declared invalid".

(b) STAGED RATE REDUCTION.—Any staged rate reduction of a rate of duty set forth in heading 9901.00.50 of the Harmonized Tariff Schedule of the United States that was proclaimed by the President before the date of enactment of this Act and would otherwise take effect after the date of enactment of this Act shall also apply to the corresponding rates of duty set forth in subheading 9901.00.52 of such Schedule.

(c) EFFECTIVE DATE.—The amendment made by this section shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the date that is 15 days after the date of enactment of this Act.

Mr. DOLE. Mr. President, on behalf of Senator GRASSLEY and myself, I am offering an amendment to impose a tariff of 6.66 cents per liter on imported ETBE. This tariff will exactly offset the benefit of the blender's credit for alcohol fuels which the Treasury has announced will be received when the ETBE is later mixed with gasoline within the United States. Thus, this tariff has the same function and operation as the existing tariff on imported ethanol.

This amendment does not assume the validity of the Treasury regulation which includes ETBE under the blender's credit. If that regulation is ever withdrawn or declared invalid, this tariff will not apply.

ETBE is not currently manufactured outside of the United States. However, now that ETBE has been designated for eligibility under the blender's credit, there is concern that excess European wine will be converted into ETBE in order to penetrate the United States market duty-free. This amendment is only intended to prevent foreign interests from taking advantage of a tax incentive which was designed, among other things, to encourage domestic production.

Mr. President, it is my understanding the amendment has been cleared on both sides.

Mr. BENTSEN. Mr. President, this amendment would replace the tax credit given by an import tax. If they did not do that, they would be manufacturing ETBE overseas.

Mr. DOLE. This is correct.

Mr. BENTSEN. I see no objection to the amendment. I know of no objection on this side.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 1482) was agreed to.

Mr. BENTSEN. I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1483

(Purpose: To amend Section 553 of the Tariff Act of 1950 to permit transportation through the United States of lottery materials produced in Canada)

Mr. DOLE. Mr. President, I send another amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 1483.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place add:

That section 553 of the Tariff Act of 1930 (19 U.S.C. 1553) is further amended—

(a) by redesignating the text of such section as subsection (a) of such section; and

(b) by adding at the end thereof the following new subsection:

"(b) Notwithstanding subsection (a), the

entry for transportation in bond through the United States of any lottery ticket, printed paper that may be used as a lottery ticket, or any advertisement of any lottery, that is printed in Canada, shall be permitted without appraisement or the payment of duties under such regulations as the Secretary of the Treasury may prescribe, except that such regulations shall not permit the transportation of lottery materials in the personal baggage of a traveler.

This amendment shall be effective fifteen days after the date of enactment of this Act.

Mr. DOLE. Mr. President, this is another amendment that has been cleared on both sides. I will try to explain it very quickly.

Mr. President, although lotteries are now lawful in almost half of the U.S. States and the export of lottery tickets is no longer prohibited, U.S. Customs law currently prohibits the transit through the United States of lottery tickets printed abroad. This law creates unnecessary and unreasonable interference for Canadian printers who wish to ship lottery tickets across the United States to take advantage of sales opportunities in Mexico and other markets.

This legislation amends the Customs law to permit the in bond transit of lottery tickets through the United States. It does not permit the importation of these tickets into the U.S. market. The amendment is supported in principal by both the Treasury Department and the U.S. Trade Representative.

All we do is amend the customs law to make this possible. I know of no objection to the amendment.

Mr. BENTSEN. Mr. President, I think it is a good amendment. I know of no objection. I think it is a worthy amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from Kansas.

The amendment (No. 1483) was agreed to.

Mr. BENTSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1484

Mr. BIDEN. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Delaware [Mr. BIDEN] proposes an amendment numbered 1484.

Mr. BIDEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 85, after line 12, insert the following new section:

SEC. 2014. EXTENSION OF TRADE BENEFITS TO THE ANDEAN REGION.

(a) FINDINGS.—The Congress finds that:

(1) United States antinarcotics policy places a high priority on assisting the nations of the Andean region of South America, the source of 100 percent of the world's supply of cocaine;

(2) The President and Congress have recognized that United States trade and economic policies play an important role in the overall United States antidrug strategy in the Andes.

(3) The extension of special trade preferences for articles from the Andean region would help revitalize the national economies of the Andes and further United States antinarcotics policy in the region.

(b) SENSE OF CONGRESS.—The Congress urges the President to:

(1) Review the merits of extending the benefits provided under the Caribbean Basin Economic Recovery Act to the Andean region.

(2) Continue to explore additional mechanisms to expand trade opportunities for the Andean region, and report to Congress in a regular and timely fashion on the result on this review.

Mr. BIDEN. Mr. President, I will not take much of the Senate's time with this amendment.

The amendment I offer is very simple: It asks the President to consider a proposal—which has been advanced by myself and others—to extend the benefits under the Caribbean Basin Initiative to the Andean region of South America.

As all of my colleagues are aware, the countries of the Andean region are now at the center of U.S. international drug policy. We have made a conscious decision to make the Andean region—the source of 100 percent of the world's supply of cocaine—a high priority in our drug strategy.

Although the drug strategy that I have put forward takes a somewhat different approach than the President's does with respect to the so-called Andean plan, we both agree that all routes to reducing cocaine production must be explored.

That means, as I see it, that we must use every weapon—including trade and economic policies—in the international drug effort.

However, the administration's approach to the economic side of the drug war, thus far, is lacking in some respects.

To his credit, last November, President Bush announced a new trade initiative for the Andean countries. The proposal contained some useful ideas, including the expansion of benefits under the generalized system of preferences [GSP] and technical assistance to help the Andean countries increase their exports to the United States.

But to be perfectly honest, the proposal was very, very modest. It is not likely to do much for the Andean countries; it will not create the sort of economic alternatives needed to lure Andean peasants away from the cocaine trade.

The fact is that the nations of the Andes have become literally hooked on dollars generated by drug trafficking. In Bolivia and Peru, the profits generated by the drug lords rival those produced by legal exports.

If we are going to make a serious dent in the drug problem in the Andes—among many other things—we must do more to open our markets to goods from the region.

Three months ago, I released a comprehensive drug strategy in which I proposed that we expand the trade benefits available for the coca-producing nations of South America.

One approach I suggested was extending the CBI—which we are extending in the bill before us—to Bolivia, Colombia, and Peru.

This is not the whole answer to the drug problem—or even to the Andean economic problems. But I do believe that this is one important part of the solution.

That is why I would like the administration to consider this idea, and give my proposal some thought.

That is all my amendment does—it urges the administration to consider extending the CBI to the Andean countries.

And then, after everyone involved has a chance to look at it, we can come back with a bipartisan, comprehensive approach to use trade incentives to reduce cocaine production.

This is our ultimate goal—seeing cocaine output reduced—and I know it is shared by my colleagues on both sides of the aisle.

In particular, I would like to recognize the involvement of Senators NUNN and LEIBERMAN in this area. They have been at the forefront of the effort to develop trade policies that enhance our antinarcotics policy.

Speaking with at least the staffs of the managers of both sides of the bill and the manager on one side, the Republican side, I understand there is no objection to this amendment. That is as much an inquiry as it is a statement.

Mr. BAUCUS. Mr. President, the inquiry is correct. The statement is correct. The inquiry is also correct in the sense that we have examined the amendment on this side. We think it is a perfectly proper sense-of-the-Senate resolution.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator in Delaware.

The amendment (No. 1484) was agreed to.

Mr. BIDEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1485

(Purpose: To suspend temporarily the duty on certain paper products)

Mr. CRANSTON. Mr. President, I rise to offer an amendment, which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from California [Mr. CRANSTON] proposes an amendment numbered 1485.

Mr. CRANSTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 59, before line 1, insert at the end of title I, subtitle A, part II, subpart B:

"9902.48.18	Toilet paper, of cellulose webbing or webs of cellulose fibers, in rolls of a width exceeding 15cm (Provided for in Subheading 4818.10.00)	3.5%	No change	No change	On or before 12/31/92.
"9902.48.19	Handkerchiefs, cleansing or facial tissues or towels, all the foregoing of cellulose webbing or webs of cellulose fibers, in rolls of a width exceeding 15cm (Provided for in Subheading 4818.20.00)	3.5%	No change	No change	On or before 12/31/92.

Mr. CRANSTON. This amendment allows for a temporary suspension of import duty on certain paper products. I believe the measure has been cleared by both sides, so I will just take a moment to outline it.

When the United States converted to the harmonized system in 1989, an oversight led to the reclassification at a higher tariff rate of certain products imported by a California company. The International Trade Commission was not aware of trade in these products. Last year Congressman STARK introduced legislation to correct this oversight.

At the request of Congressman STARK's office and the California company, I introduced S. 2192, a revised version of the bill which was narrowed to address concerns raised by two domestic companies. The amendment I now offer narrows S. 2192 even further to meet objections raised by the administration to the original proposal.

As you see, Mr. President, the amendment is truly the product of compromise and consensus. I urge my colleagues to support this noncontroversial amendment.

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, the amendment offered by the Senator from California attempts to correct a tariff problem on certain paper products and detergents that resulted from conversion to the harmonized tariff system. The amendment was not offered in time for public hearings in the committee.

I am aware of any problems or controversy that might arise on this amendment. On the other hand, if it turns out in conference that the amendment becomes controversial, on behalf of the manager of the bill, I am authorized to say that the conferees may at that point then drop the amendment. If, on the other hand, it turns out the amendment is not controversial, we maintain the position of the Senate in urging the House conferees to adopt the amendment. With that proviso, Mr. President, we are willing to accept the amendment at this point.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. DURENBERGER. Mr. President, there is no objection on the Republican side to the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California.

The amendment (No. 1485) was agreed to.

Mr. CRANSTON. I move to reconsider the vote.

Mr. BAUCUS. I move to lay that on the table.

The motion to lay on the table was agreed to.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. WIRTH). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCAIN. Mr. President, I ask unanimous consent to address the Senate for 10 minutes as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator is recognized for 10 minutes.

LEGISLATIVE LINE-ITEM VETO

Mr. McCAIN. Mr. President, last November 9 my friend from Indiana, Senator COATS, and I offered an amendment to the transportation appropriations bill which would have given the President line-item veto authority over spending bills.

Even though we were not successful that day, we are here again today because we believe it is vitally important to taxpayers throughout our Nation that we adopt our amendment, the legislative line-item veto.

This is an especially important time to bring this issue up because Monday was the deadline by which every American taxpayer had to file his or her taxes.

Sunday was the day that Congress was to have completed action on the budget resolution for the next fiscal year.

While the taxpayers are forced by law to comply with the April deadline for the payment of taxes and many taxpayers have just sent their checks in to the IRS, the Congress has done nothing and is not held accountable at all.

We have not completed the budget resolution for 1991. We have not even begun it.

While the taxpayers have struggled to beat their IRS deadline, we sit here and think of ways to spend money in the upcoming supplemental appropriations bill and how to get rid of Gramm-Rudman constraints in budget reform.

This is no way for we, the elected representatives of hard-working taxpayers, to conduct this Nation's fiscal affairs.

No private company could behave this way without dire consequences—State legislatures do not—and families cannot.

Why cannot the American taxpayer expect Congress to set a budget and stick to it?

I think the answer is very simply because there is no mechanism to require Congress to assume responsibility in this sham of a budget process.

We need to grant the President with line-item veto power—we need a line-item veto to hold the Congress accountable.

Most of all, we need a line-item veto that will ensure that the taxpayers' dollars are not squandered on special interest sometimes described as pork.

Our legislative line-item veto bill will do all that. Very simply, our bill gives the President two opportunities every year to strikeout wasteful spending. First, he can line item veto out pork-barrel extravagence 20 days after signing a spending bill.

Second, in case the President misses wasteful spending the first time around, he can submit rescissions with his budget proposal in the beginning of the year.

In either case, Congress has 20 days to decide whether to overturn those line-item vetoes or accept them. If

Congress feels the spending is justified, we adopt a joint resolution disapproving the rescissions. If Congress, does not act, the waste the President has identified is erased—and the taxpayer's money is saved. Anyone looking out for the taxpayer's pocketbook should vigorously support this proven pork-buster tool.

Let me remind my colleagues that, in spite of the fact that it is already April—a third of the year has gone by—the average American taxpayer is still working for the Government.

On Monday, the well-respected Tax Foundation announced that Tax Freedom Day will be on May 5 this year.

Tax Freedom Day is the first day millions of average taxpayers will stop working to pay the government taxes—and start working for themselves.

Let me rephrase that: In 1990, the average American taxpayer will work from January 1 until May 5 to pay Federal, State, and local tax collectors.

He will have to pay his taxes before he starts working for himself.

Federal taxes claim nearly 2 hours of the average American's working day.

Despite the fact that over 70 percent of these taxpayers support giving the President a line-item veto, we have yet to give that budget slashing tool—the most effective budget tool to fight lavish congressional pork-barrel spending.

Since Congress rewrote the budget process in 1974, Federal budget deficits have ballooned from $6.1 billion to over $221 billion.

Even though our deficits are again below $150 billion they are still four times higher as a percentage of our GNP as they were in 1974.

This trend of profligate spending clearly indicates that the current budget process lets us pick the taxpayers' pockets to play pork-barrel politics and we never have to answer for our actions.

Unfortunately, we need the line-item veto to make us accountable.

We need to be able to tell taxpayers that they are sending their hard-earned dollars to the IRS on tax day for good reason.

Without the line-item veto, we cannot do that.

Mr. President, it is time we adopt a budget tool that will help force us back in line, that will force us to spend the taxpayer's money prudently, that will fix effectively a budget process that is sadly broken down.

We can give the President the line-item veto with a simple change in law—not a constitutional amendment.

The Coats-McCain legislative line-item veto, though simple, would allow the President to force Congress to think twice before spending money on special interests.

The legislative line-item veto has the full and strong support of President Bush. It has 34 Senate cosponsors. It has 43 Senators on record in favor of it. Forty-three Senators are on record in favor of this bill.

Over 40 members of the Coalition for Fiscal Responsibility [Cofire] have also voiced their support for our measure. This is significant because Cofire is staunchly opposed to tax increases and the bulk of its membership regards the legislative line-item veto as one means of avoiding a tax increase:

Mr. President, our current rescission process is utterly defunct because Congress doesn't have to take any action to disapprove rescissions. It need only ignore them in order to ensure the money is spent.

Congress approved only 6 proposed rescissions out of 162 rescissions between 1986 and 1989—Congress OK'd only $179 million in budget rescissions out of a total of $16 billion requested—even though we have wasted plenty on pork during that time.

The legislative line-item veto ensures that Congress would still have the final decisionmaking authority, but there is no valid reason to deny the President the ability to review each piece of our spending bills, the same authority 43 Governors out of 50 in America have.

Requiring the President to consider entire appropriations bills on a "take it or leave it" basis is so unbalanced that it leads to certain abuse.

What is wrong with requiring the Congress to vote on these rescissions on their own merits if a President chooses to veto them?

If Congress thinks it is essential to spend money on sonar catfish counters or programs to count house pets in Ventura County, we can still do it. We have just got to be honest about it.

And that is the issue. Congress must be honest with the taxpayers.

We need to be accountable.

The legislative line-item veto will help the President eliminate unnecessary spending without disrupting the balance of power and makes us accountable.

Monday was tax day. May 5 will be Tax Free Day. These are reminders that we owe Americans a commitment to make our Federal budget accountable and efficient.

I urge each Member of this body to join the 43 Senators who are already on record, in support of the legislative line-item veto and make this pledge.

I ask unanimous consent to have a letter from the U.S. Chamber of Commerce supporting the line item veto printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. CHAMBER OF COMMERCE,
Washington, DC, April 16, 1990.

Hon. JOHN MCCAIN,
U.S. Senate,
Washington, DC.

DEAR SENATOR MCCAIN: Finding solutions to the problem of the federal deficit without increasing taxes on the American people remains one of the highest priorities of the U.S. Chamber of Commerce. The Chamber is committed to supporting solutions that help to curtail the rate of growth of federal spending and believes that your and Senator Coats' bill, S. 1553, the "Legislative Line-Item Veto Act of 1989," is a major step toward reducing wasteful spending and restoring discipline to the budget process. Your aggressive leadership on this issue is greatly appreciated.

Your proposal, which the Chamber strongly supports, will do much to restore fiscal responsibility by amending the 1974 Budget Act to change the procedure for considering Presidential requests for spending rescissions. Currently, to effect a rescission, Congress must approve by joint resolution within 45 days a request to rescind appropriations; by not acting, Congress disapproves a request. Your bill would simply allow the President to submit rescission proposals along with his annual budget; the rescissions would become effective unless Congress within 20 days by joint resolution dis-

approves them. Similarly, under S. 1553, the President could make cuts in appropriations bills signed into law within 20 days of signing, and Congress must disapprove the President's action within 20 days if it is to prevent the cuts from being made.

Line-item veto authority is not a partisan issue and has widespread support. In a 1989 Gallup Poll, 70 percent of the participants indicated support for a Presidential line-item veto. Presidents Ford, Carter, and Reagan proposed a total of $34 billion in rescissions that Congress rejected by inaction. The evidence is unambiguous that the present rules under which Congress and the President operate bias the federal budget process toward excessive spending. Enacting a legislative line-item veto such as that contained in your legislation would be a responsible step toward rectifying this imbalance in the budget process and would help to reestablish fiscal discipline within the federal government.

On November 9, 1989, you attempted to have your legislation passed by the full Senate. The Chamber considered this vote of great importance and included it in "How They Voted," its system of rating votes of members of Congress. If you offer your proposal again, the Chamber will again urge the full Senate to vote in favor of it.

Sincerely,

DONALD J. KROES.

Mr. McCAIN. Mr. President, finally the system is broken. It needs to be repaired. We need to go about giving the President of the United States one tool to bring about fiscal sanity in this insane process of which we are a part.

I also express my deep appreciation to my friend from Indiana, Senator COATS, who has again assumed the leadership role on this issue. I am very grateful for his commitment and hard work on this issue.

Mr. President, I yield back the remainder of my time.

THE COATS-MCCAIN LINE-ITEM VETO

Mr. KASTEN. Mr. President, there are not too many politicians out there who will say publicly that they oppose fiscal responsibility. As a matter of fact, you can count on just about any politician for glowing rhetoric about balanced budgets and the need to bring the Federal deficit under control.

But when push comes to shove, many in Congress prefer to stick with the spending habits to which they have grown so accustomed to.

That is why I am pleased to join Senators COATS and MCCAIN in pushing a plan to smoke out the big spenders. Next month, every single U.S. Senator will have to put himself or herself on the record: Are you for or against a fiscally responsible Federal budget? And will you take the actions necessary to back up your commitment?

This issue carries immense implications for our Nation's future—consequences far beyond the green-eyeshade technicalities of the Federal budget. The Federal Government spends 21.8 percent of America's gross national product [GNP]. In effect, it takes over one-fifth of America's wealth out of the economy every year.

That is money taken out of the productive economy of workers, savers, investors, and business people—and turned over to the Federal Government to do with as it sees fit.

This drag on the economy can be measured by a quick look at the excessively high tax bill which the average American has to pay each year. Tax Freedom Day—the day a taxpayer has worked long enough to support the government for that year and can get to work on supporting himself and his family—fell on May 4 last year. That means last year just to pay Congress' bills. In essence, the combined cost of government in the United States is costing taxpayers one-third of their annual work effort.

This is bad news for America's future—because Americans know that individual work effort is the source of economic growth and national prosperity. If we continue to allow government to seize this much capital, we and our children will end up paying dearly for it in terms of future productivity.

So how did it get this bad? Easy—in Washington, the big spenders in Congress have the power, and the forces of fiscal responsibility and restraint do not.

Look what happened to President Reagan. He came to office more dedicated to restraining Federal spending and taxation than any U.S. President in modern times. In 1980, Tax Freedom Day came on May 1. Reagan's best efforts succeeded only in moving Tax Freedom Day back from May 1 to April 28. And by the end of the decade, the tax increasers in Congress had brought the date up from April 28 to May 4.

Here is a popular President trying to bring some common sense to the budget—and he ends up losing ground. The Federal debt has now reached more than $3 trillion—for the first time in history. That adds up to a total debt burden of $12,000 per person.

Mr. President, there is something very seriously wrong with the process that built up this monstrous debt. I have been in the Senate for 9 years now, and every day I see what the problem is. Well-organized special interest groups control the purse strings. And the President—elected by and responsible to all the people—have very little to say about it.

This system is just not working. Everybody has some favorite examples of congressional spending waste—here are a few of my own:

Resource management related to arctic goose activity: $400,000.

A study of prostitution houses in Peru: $92,000.

The Washington, DC, lottery and charitable games enterprise fund: $8 million.

Research on the uses of fish oil: $1.3 million.

Mooring docks in Pago Pago: $12,000.

Research on maple syrup: $100,000.

Clearly, the problem here is not a lack of resources. After all, Congress is coming up with enough tax revenue to fund all these programs. What Congress does lack is the common sense to admit that the U.S. taxpayer should not have to pay for everything that everybody wants. Taxpayers expect their elected representatives to set priorities—to allocate taxpayer dollars to help meet the most important challenges facing our country.

But Congress is failing. It is not setting priorities. Congress is asking Americans to work 2 hours every day just to pay their taxes—and then throwing their money away in a special interest spending frenzy.

There is a solution. We have to strengthen the hand of the President—by giving him a legislative line-item veto.

Next month, we are going to bring this idea to an important test on the floor of the U.S. Senate. Senators COATS and MCCAIN are going to offer an amendment to give the President line-item veto authority. Senators are going to have to stand up and face the people on this issue.

A vote for this measure is a vote to cut the deficit.

A vote against it is a vote for bigger deficits, more spending—and yes, even more taxes on U.S. working families.

Here is how the legislative line-item veto would work: The Congress sends the President a spending bill with thousands of specific provisions. And the President—instead of having to accept or reject the whole bill—can eliminate or reduce funding for any single spending program he disagrees with. Our line-item veto proposal would also give the President the authority to submit spending cuts when he submits his own budget every January. In each case, the President's veto will take effect unless both Houses of Congress vote to override his objections within 20 days.

If the big spenders think their pet programs are so necessary, let them try to put together a majority to override the veto. They couldn't—because none of these programs could stand up to scrutiny on their own. They are like toothpicks. If you take them one by one, you can snap them—but if you bind them together by the hundred, they are tough as nails.

We need to let the President take these programs one by one. And to exercise the judgment and the intelligence that the American people expect of their national leaders.

Some constitutional scholars think the President already has an inherent line-item veto authority. I agree—because when the Founding Fathers wrote the Constitution they could not have imagined a congressional omnibus bill amounting to literally thousands of pages covering many thou-

sands of different and unconnected issues.

They gave the President the right to veto individual pieces of legislation. They never expected that he would face a $1.4 trillion congressional budget—and have to take it or leave it.

I think the President ought to try to exercise this inherent line-item authority right now. Let the courts decide.

I think we can win this important Senate vote on the line-item veto. Because all over America, people are fed up with congressional waste followed by tax increases followed by more waste and more tax increases. Just a few weeks ago the Senate Budget Committee chairman unveiled his solution to the deficit problem—a $73 billion tax increase.

Mr. President, we have traveled that road before. It leads to even higher deficits and higher taxes. There is no substitute for commonsense fiscal responsibility—and every U.S. Senator will have an opportunity this month to vote to put our budget on the right track.

Others can say: Let us raise taxes. I say: Let the clerk call the roll—yea or nay on the line-item veto.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. COATS. Mr. President, I join my colleagues from Arizona in indicating to our fellow colleagues here that we intend to move forward again this year with the legislative line-item veto proposal.

Just a few short months ago, Senator MCCAIN and I stood in this Chamber and exhorted our fellow Senators to help us pass a very important bill, one that has the support of over 70 percent of the American people. We had a good debate, lively debate, with many Senators speaking nobly and eloquently about the imperative need for the measure.

We fought long and hard. We fell a few votes short. Three of our cosponsors were absent on that day on a motion to waive the Budget Act, which would have required 60 votes.

I vowed then and Senator MCCAIN vowed then, and we repeat now, the legislative line-item veto will be back.

Senator MCCAIN and I stand here today with our 32 cosponsors, planning to offer the legislative line-item vote. Just days after the infamous 15th day of April, when every working American must fork over their hard-earned dollars to Uncle Sam. We thought it good to remind this body that S. 1553 is an idea whose time has more than come. The incredible spiraling budget deficit is not a mysterious dinner guest that none of us invited to the party, it is a visitor of our own making, a skulking symbol of our profligate and heedless spending.

While many interesting budget plans have been put forth by both parties over the last few months, and the columnists have worked themselves into a lather urging we in Congress to just get it over with and pass a big tax hike, the various deadlines contained in the budget law pass unheralded by any congressional action. I am not here to blame anyone for this bleak situation, I am here to offer a solution to at least part of our fiscal woe.

If we can implement S. 1553, we will begin to chip away at a big part of the reason we have such a monstrous deficit. No longer will we all be able to tuck a favorite line item in massive appropriation bills and hope no one notices. No longer will we be able to point an accusing finger at the other body, the President, or anyone else while the spending ticks higher and higher. No longer will taxpayers grumble about the ridiculous chunk of change they must offer up to the tax collector with only a very vague idea about where those dollars go.

Our line-item veto will enable us to look ourselves in the mirror of budget truth and honestly say that we know we have done all we can to trim needless pork from spending bills. Our bill simply says that if we stick gratuitous pork in appropriations bills, the President can say no to the pork and yes to the necessary expenditure. Congress in turn, if it wants to, can say, yes, we as a body, yes, we want that Belgian endive research program; yes, we want that catfish farm; yes, we want that soybean and lentil study. If we are willing to stand here on the floor of the Senate, debate the item on its merits, and vote up or down on it, then that is the way it ought to be. But it should not be tucked away as small line item in a large appropriation bill in the hope that no one will notice it. That is all our bill will do—open up what is now a behind-the-scenes process and force institutional accountability.

Last year some of the arguments against the bill by our esteemed colleagues indicate that while the legislative line-item veto was a good idea, this was not the day or the appropriate legislative vehicle on which to enact it. Others simply feel this bill will give the Executive too much of our cherished power as spender of the public purse. Others just assume that line item-veto will not pass the procedural hurdles thrown in its way, and, thus, it is better not to rock the spending boat lest we make some of our States' projects scapegoats for our hubris.

Well, this Senator was impressed by the stamina and courage shown by some Senators on another issue many said would never pass the Senate—clean air. I am heartened by that example of an elusive legislative goal becoming reality. This Senator refuses to give up this particular fight. Senator MCCAIN and I and our colleagues will see this to the end, and will be here on the floor as many times as it takes, asking for recorded votes and insisting that the media and the so-called inside-the-beltway elite recognize what the American people already know—that raising taxes is not the answer to our deficit, but cutting spending is.

Mr. President, I yield the floor.

Mr. BURNS. Mr. President, I heartily endorse the words of the Senator from Indiana and the Senator from Arizona.

I generally assume that many Americans are like me and mailed their taxes in at the last minute, and that the pain of parting with that money—hard-earned money at that—is still fresh in their minds. I also assume that if they just mailed their taxes, they are again like me in that they owed money. Only people who get refunds mail their tax returns in early. I have done that also.

That is why I chose today to talk about how we in Congress can help relieve this annual pain for many people.

It is my responsibility as a representative of the people of Montana—yes, all Americans too—and as someone who finds excessive taxes just as hard to pay as the next person, to make sure that taxpayers' money is wisely spent. It is for this reason that I am a cosponsor and a strong advocate of S. 1553, the Legislative Line-Item Veto Act of 1989.

It is no secret that Congress lacks the willpower to reduce wasteful spending of "pork." Every Senator and Representative feels compelled to "bring home the bacon." Since there are 535 of us, that adds up to a lot of bacon.

The legislative line-item veto is a tool that the President, and the Congress, can rely on to trim the fat.

As the Wall Street Journal put in an editorial endorsing this bill on October 19, 1989, and I quote:

> The Members could still try to serve their constituents with special-interest goodies, but the police—in the form of the President—would be there with a straitjacket if they really get crazy, as they do now.

The legislation would allow a President to identify spending items which he determines to be wasteful and to notify Congress that he is eliminating or reducing them unless Congress acts to disapprove his action. As the law currently stands, the President can propose rescissions—either reductions or eliminations of items congressionally appropriated—but the rescission is implemented only if approved by Congress.

By not acting, Congress has failed to act far more often than it has acted. In fact, Congress has failed to act 96 percent of the time since 1986.

Many people have opposed the legislative line-item veto claiming that it

shifts too much power to the executive branch and that the President would use that power to punish those of the opposite party. In my judgment, that is nonsense.

The American people are just as much the President's constituents as they are ours. He has an interest in providing for the common good, while being somewhat removed the direct political pressure of specific constituencies. This helps him deal more fairly and objectively with wasteful spending.

I also want to point out—the way Congress currently operates is a departure from history and from the current practice of 43 of 50 States in the Union. Up until about 15 years ago when Congress changed the law, every President since Thomas Jefferson had the ability to impound or refuse to spend money appropriated by Congress.

For example, President Kennedy used impoundments to reduce projected congressional spending by 6 percent during his administration; President Johnson used impoundments to reduce spending 5.4 percent during his administration.

As I stated before, 43 of 50 Governors, including Montana's Governor, currently have some form of line-item veto power. This coupled with a balanced budget requirement in all of those States is the reason that most States manage to balance their budgets while Congress continues to run up huge deficits. Our national debt is now $3 trillion.

As I travel around the country the national debt is the No. 1 topic on a lot of people's minds. That amount cannot even be imagined by some people. In fact, the interest on the national debt is the second or third largest expenditure that this Government makes. What we could not do with that money in the area of housing and helping those people of the unfortunate kind.

Now, there are many ways to bring the Federal deficit under control so that we can begin ridding ourselves of this huge national debt. The legislative line-item veto is just one of those ways. It is not a cure-all, but it certainly is a start and a step in the right direction. I think that, if nothing else, most Americans could be persuaded to support S. 1553 if they realized that they work full time until mid-May, working men and women now work until mid-May paying taxes of one kind or another. I do not think it is fair. This Senator is going to fight to rid our working men and women of this Nation this yoke they have around their necks. If the fight goes on, let it go on. But I think this is one of the tools that we can use to bring that deficit down. The legislative line-item veto will fix part of that.

Mr. President, I yield the remainder of my time. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, speaking on the same subject as that of the distinguished Senators from Arizona and Indiana, and feeling that perhaps my best contribution to the subject of the enhanced rescission or line-item veto might be to remind my fellow Members of the Senate of the position of my close friend and distinguished colleague and predecessor Senator Dan Evans, I have come to the floor this evening.

Senator Evans spent 12 years as Governor of Washington State, and during that time as the possessor of a rather broad authority to exercise a line-item veto. As a consequence, he was a strong and distinguished supporter of the line-item-veto concept, which he felt did not undermine the appropriate division of powers between the legislative and the executive and at the same time gave him an ability to control spending, which was of great importance and great assistance to the State of Washington and to its people.

As a consequence, since Senator Evans has, of course, since retired, I ask unanimous consent that the RECORD reprint his statements respectively of October 2, 1984, January 28, 1987, and July 31, 1987, on previous debates of the nature of that which is taking place here at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Congressional Record, Oct. 2, 1984]

LINE-ITEM VETO

Mr. EVANS. Mr. President, I rise to associate myself with the Senator from Georgia in speaking on the editorial in the Washington Post of several days ago regarding the line-item veto. It is an issue whose time has come. I hope that we will yet have an opportunity in this session to debate, to vote, and to allow this Senate to indicate its will on the question of a line-item veto. Given that opportunity, I have no question in my mind that a majority of this body would vote in favor of a line-item veto.

I particularly would like to refer to that editorial and to the misconceptions which it may give to some of our colleagues. The very idea that somehow enrolling clerks would be endowed with unusual new authority simply cannot stand the light of day and the facts as they exist.

Mr. President, the Members of Congress retain the ultimate authority to determine the structure of a bill. An item is determined by the structure of the appropriations bill passed by Congress. The United States Code gives direction as to a numbered section saying that each section of a bill shall be numbered, and shall contain as nearly as may be, a single proposition. The Clerk of the House and the Secretary of the Senate currently share the responsibility to review bills and ensure accuracy with what was passed by Congress. Direction is then provided to the enrolling clerks.

I think these three points indicate pretty clearly that no greatly increased authority or discretion will be delegated outside the current delegations made by this body.

The editorial also suggested that the line-item veto wouldn't actually do much to cut the deficit" and that interest groups with weak constituencies would suffer at the hands of powerful lobbies. Interest groups with weak constituencies already suffer at the hands of Congress and there is no indication that such groups would do worse at the hand of the President. As the only nationally elected representative, he might even be more protective. The line-item veto will do nothing to cut the deficit unless it is passed. If it works, even modestly, it probably should be extended to tax expenditures and perhaps even authorization measures. Instead of wringing our hands over huge deficits, and second-guessing how a President might use this authority, let's try it. The result might be surprising.

If the line-item veto is adopted for fiscal year 1985 and we assume a 1-percent cut of all spending per year, the total savings over the next 5 years could be $174 billion, with a reduction in the fiscal year 1989 deficit of $65 billion. If we assume a 2 percent cut in just discretionary spending per year, the total 5-year savings would still be $99 billion. The fiscal year 1989 spending reduction would be $37 billion. These savings are not insignificant.

The line-item veto is a low risk/high reward proposition; as a low risk, the legislation includes a 2-year expiration clause. If it doesn't work, it will die on its own. If we try it and it does work, the potential reward is great by allowing a President the opportunity of using this one tool, together with others, to bring our huge budget deficit under control. Even if it has only a small effect as a spending control tool, then Congress could continue such a proposal, on a 2-year basis, so that Congress would always retain ultimate control over abuse of the authority.

This line-item veto authority is one important tool in the budget process to help curb our growing Federal deficit and control Government spending. There's no question we need as many tools as we can get. The President has a more restricted veto authority than almost any other chief executive in the United States. The absurd extreme of the current practice would be to present the President with a comprehensive trillion-dollar appropriations act loaded with extra substantive legislation and say, "Take it or leave it." Our constitutional drafters had no such thoughts in mind. I do not see this proposal as increasing the authority of the President, as some suggest, but as an even-handed budget control that gives the President a chance to initiate action, with opportunity for Congress to deny it.

What I find most disturbing is the fact that we, in Congress, dump on the President's desk huge trainloads of pork attached to vital pieces of legislation. We make it almost impossible for the President to veto what is frivolous without crippling the operations of Government. When he signs such legislation, he also must accept a whole

series of expenditures which could not stand on their own merits.

This line-item veto proposal is not a "cheap election-year gimmick." It is an effort to provide the President with one of the tools necessary to sculpture a responsible and controlled Federal budget.

[From the Congressional Record, Jan. 28, 1987]

By Mr. Evans (for himself, Mr. Humphrey, Mr. Boren, Mr. Proxmire, Mr. Dole, Mr. Thurmond, Mr. Hollings, Mr. D'Amato, Mr. Danforth, Mr. Bond, Mr. Lugar, Mr. Nickles, Mr. Hecht, Mr. McCain, Mr. Boschwitz, Mr. Zorinsky, Mr. Roth, Mr. Garn, Mr. Helms, Mr. Stevens, Mr. Murkowski, Mr. McConnell, Mr. Trible, Mr. Symms, Mr. Warner, Mr. Simpson, Mr. Gramm, Mr. Chafee, Mr. Wallop, and Mrs. Kassebaum):

S. 402. A bill to provide that during a 2-year period each item of any joint resolution making continuing appropriations that is agreed to by both Houses of the Congress in the same form shall be enrolled as a separate joint resolution for presentation to the President; to the Committee on Rules and Administration.

LINE-ITEM VETO

Mr. Evans. Mr. President, I send a bill to the desk on behalf of myself, Mr. Humphrey, and 28 other cosponsors, and ask for its appropriate referral.

The Presiding Officer. The bill will be received and appropriately referred.

Mr. Evans. Mr. President, I introduce today a bill to give the President a line-item veto.

I was gratified that the President in his State of the Union Address last night once again asked for this power from the Congress.

It seems to me that our actions last year more clearly than at any year in recent history or perhaps in the history of the Congress itself proved that the President really does need this tool to help control spending.

We for years have operated under a system that calls for 13 separate appropriations bills giving both to the Congress and ultimately the President an opportunity to examine each of these bills and in turn, if the President finds it necessary, to veto one or several of those and send them back to Congress. That can be done without undue harm to the immediate operations of our Government.

Last year, however, Congress contrived to bring all of these appropriations acts together into a single continuing resolution. Some would call it really the approach of a consolidated appropriations act, which may, in fact, be desirable at some time if done appropriately.

But when that is accomplished, Congress presents the President with, in fact, no opportunity for a veto. I believe we have discovered a way to keep the President from his constitutional right of veto.

No President would veto an appropriations act containing all of the appropriations of the Government, for it would then call for an immediate cessation of all governmental operations, until such time as the differences between the Senate, the House, and the President were ameliorated.

Our forefathers could not have contemplated such a ridiculous state of affairs.

Thus, Mr. President, if we are going to work toward a more consolidated appropriations act, we ought to even the scales, as our forefathers would have appropriately suggested, by giving the President an opportunity for a line-item veto.

This proposal is very similar to the one introduced by Senator Mattingly of Georgia during the 99th Congress, which I was proud to cosponsor. It is a bill for a 2-year trial period. It cannot be carried beyond that period without reratification by the Congress. So it is a low-risk proposition. It is a trial period.

It gives us a chance to see if this really, in fact, will help. But we have added a new element. This time, it would apply only to those appropriations bills which have been combined. If Congress, as it is supposed to do, passes separate appropriations bills, they would not be subject to this line-item veto and the President could examine each of the 13 independently and separately. If Congress, in the other hand, decides it is more convenient, or, for whatever purposes, wants to weld them together, then to the degree we weld them together, the President would have an opportunity for a line-item veto.

I think it has two potential benefits, Mr. President. One, it would redress the imbalance which occurs when Congress wraps things together and prevents the President from exercising his veto. Second, it might have the even more desirable result of causing us to abandon the practice of continuing resolutions and combining of appropriations and, instead, present them to the President one by one, separately, and allow him to act on them as a single unit.

Finally, Mr. President, let me say that as Governor of Washington, I had a strong line-item veto, as other States had. Some say it is really not comparable, that this Government, at this level, is different from the individual State governments. It is different all right. We are nowhere near as competent when it comes to budgetmaking and appropriations. We come nowhere near as close as States to do balancing their budgets and operating in a fiscally responsible manner. And I certainly believe, Mr. President, that no State—no State—would suggest that a Governor should be forced to deal with a comprehensive, unified State appropriations act without being given the chance to comment upon it through veto of single items. Nor would Congress act in that manner should we go ahead with the line-item veto at this time.

I believe we have a somewhat modified proposal which has substantial benefits over the one of last year. It gives us a chance to try things and may well prove to be a better rein on our own acts than on any acts of the President.

[From the Congressional Record, July 31, 1987]

Mr. Evans. Mr. President, let me be brief. I know it is late on Friday afternoon but this is, in my view, an important amendment and one which ought to be enthusiastically adopted by this Senate and all of its Members.

There has been much talk about item veto and I know there is considerable concern about item veto, but I think we have come to a point, especially during the last year, where we lumped all 13 of the traditional appropriations bills together in one massive continuing resolution and sent to the President $580 billion worth of spending. In doing so we have virtually eliminated the responsible use of the veto by a Chief Executive.

No one, either this one or future Presidents, could afford to engage in a veto knowing that the Government of the United States would literally come to a halt if he exercised that veto. This amendment is very simple. I would introduce it as the Individual Appropriations Act. It achieves not a dramatic difference from how we now do business but, in effect, takes us back to the traditions we have had in the Senate over many years.

We have 13 subcommittees in the Appropriations Committee. We have 13 separate titles which come forward. This bill would require that any continuing resolution, or any attempt by the Congress to put those 13 bills or any number of them together, would then be separated back into their original titles before being presented to the President.

In essence, it would divide continuing resolutions into separate titles where each title is identified as a regular appropriations bill.

This amendment identifies those as the 13 appropriations bills we are most familiar with.

It would require that any general provisions of a continuing resolution would be contained in the appropriate title so there would be no separate title for general provisions. It retains the constitutionally mandated two-thirds veto override by both Houses of Congress. It includes a 2-year sunset clause.

So this gives us a chance to try something which, in my view, is nothing more or less than taking us back to the traditional balance we have enjoyed over many, many years in this Congress between the Congress and the Chief Executive.

There may be arguments against a line item veto, but I do not believe that those arguments hold in this case against the dividing of bills into their individual titles.

There was an argument, for instance, that the line item veto would give too much authority to an enrolling clerk. This clearly would not be the case where the individual titles are readily identifiable and separable and, in fact, commonly are separated.

Those who suggest that a continuing resolution leverages the President I suppose would object to this proposal. I do not think it is a question of leveraging a President or giving undue power or authority to one branch or another of our Government but merely restoring a balance which has existed traditionally and which I think ought to be reinstituted.

Mr. President, I think this would be a challenge to a President who has long sought a line item veto saying, "All right, here is an opportunity for you." It would retain an even balance, but it would retain the protection of broad legislation contained in each one of these titles for those Members who are concerned that an individual item that they are deeply interested in, might be picked out of an appropriations bill by a President who enjoyed full line item authority.

Mr. President, I shall take no more time other than to answer any questions that there might be. I think it is a simple and straightforward amendment. It deserves to be on this bill which contains many similar proposals for making our whole budget and appropriations process a little more understandable, a little more straightforward.

* * * * *

Mr. Evans. I thank the Chair. I fear that this Chamber has been flooded with red herrings this afternoon. We have heard about all of the problems and difficulties of the current system and what might happen under this rather simple proposal. Frankly, I am astounded, I am amazed to hear my

colleague from Oregon say that the Enrolling Clerk made a big error and it had to be corrected. That can happen no matter what our rules are or how we choose to put our bills together.

I suggest, Mr. President, that things are broke, as the Senator from Oklahoma has said. And one of the reasons they are broke is because we have engaged in this penchant for putting everything into one huge pot. They are not any more really continuing resolutions. It is more accurate to say that they are omnibus appropriations bills. Last year it is my understanding—and I do not serve on the Appropriations Committee, but I follow it pretty carefully—we passed most of the appropriations bills separately in the Senate, they passed virtually all of them in the House, and the conference committees joined together and reached agreement in each of their separate categories and then the decision was made to wrap all of those together along with the ones which had not been finished. It was done deliberately to make that an omnibus appropriations bill. I cannot think of any stronger argument for reseparating them than the deliberateness of that concept, that suddenly now we should have an omnibus appropriation which for all practical purposes eliminates the constitutional veto authority of a President.

Just consider: Almost $600 billion and a good amount of other legislation hooked aboard, facing the President on the eve of a new fiscal year. He cannot veto it. There is no way the President can use his constitutional veto under those circumstances.

The question has been brought up about the extraordinary power of an enrolling clerk. Well, if this amendment is adopted, as I hope it will be, and if it bcomes law, as I hope it will be, then it is up to the Appropriations Committees on both sides to be careful enough to do the job well: to identify clearly what each title is: if necessary, to give a number to each title and say, "When this bill is presented to the President, this will be the number for the military construction proposal." That is easy enough to do.

You can draft what you want in those bills as they are passed by the Senate and by the House clearly and carefully enough so that the enrolling clerk would have no task further than to put them into 13 parts. I think that is precisely what we ought to be doing.

It is bad to give unusual power to someone not elected, and I fear that is what we are doing now by creating such an extraordinarily large and complex bill that we cannot hope to follow all its elements. We do make mistakes. The very best of people make mistakes. But we tend to make more mistakes as we get something more and more complex.

If we could separately take each one of these items, each one of the appropriations bills, as we once did, adequately go through the conference committee on a military construction bill, on the legislative appropriations bill—for Heaven's sakes, on the District of Columbia bill, which certainly should not be too difficult—and on each of the other bills as they come along. Certainly, there are two or three which are of extraordinary difficulty and complexity. I understand full well that the foreign operations bill, the defense authorization bill, and the Health and Human Services side of the bill are going to be complex. But far better to deal with them separately and independently than wrapping them all together in a highly complex continuing resolution.

Mr. President, this is not a complex bill. I do not believe it is an unconstitutional bill. I believe it is worth trying as a small step back toward fiscal sanity. The Judges across the street will make the determination as to whether it is constitutional or unconstitutional, as they often do. But it is worth trying. It is worth trying, if even for only 1 year we end up doing what we once did.

All this is restoring the balance to take us back to the traditions we had in 13 separate bills. I think it would be refreshing and worthwhile. I would hope that each of those 13 bills would be brought to the floor of the Senate and dealt with separately, so that we could analyze each one in its own framework rather than facing, as we have this last year, a huge and enormous continuing resolution which no Member of the Senate outside of the Appropriations Committee—and I suspect many inside the Appropriations Committee—know from cover to cover.

We may not know bills from cover to cover if we deal with them separately, but at least we have a chance, and that is all we are asking for in the Senate—a chance to analyze and understand what we are doing, so that we can represent our people and this country better. This is a small step in that direction. It is not overly complex, and I hope it will be adopted by this body and make part of our procedure for just the next 2 years.

This has a sunset clause in it. It is a low-risk trial to see if we can do something better than we are doing today.

I urge the adoption of the amendment.

Mr. GORTON. I thank the distinguished Presiding Officer. I simply wish to summarize by saying that Senator Evans had a peculiar insight into the actual impact that this bill would create in the Government of the United States by reason of his service as chief executive and I commend his remarks and his position to my fellow Members.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. BOSCHWITZ. Mr. President, I also rise to speak in favor of the position of the Senator from Arizona regarding the line-item veto. I commend my friend from the State of Washington for entering into the RECORD, once again, the statements of Senator Dan Evans, who was previously the Governor of the State of Washington, and so had experience with the line-item veto. Because of this experience, he also had a sense of the appropriate division of power between the executive and the legislative branches, and knew that the line-item veto did not unduly invade that appropriate division. I do not believe it does either.

We, in Congress, now blame the President for the budget deficit, yet spending is a result of the way we legislate and appropriate funds. Not a penny's worth of spending occurs unless we approve it here in this body, yet it is the President who must bear the brunt of the deficit, not us. We like to shift the blame and, indeed, do so with considerable vigor and effect. But, after the President submits a budget to the Congress, his job really is done. The President's budget is not adopted as a bill. The budget is not a piece of legislation that can be signed. A piece of legislation that can be signed, after all, can be vetoed. The budget is not subject to a veto. After the President submits his budget his part in the program is finished and the Congress must then go forward and adopt a budget.

As I have stated, the budget, when adopted, does not require the signature of the President of the United States and, as a result of that, is not subject to a veto. Since it is not subject to a veto, it is unfair to blame the President for the deficit because deficit spending originates here in Congress. And we should bear the principal blame for the size of the deficit, even for the very existence of a deficit.

Granting the President a line-item veto would change a good deal of that. Not only would the President be able to take certain provisions out of the spending bills that we submit to him—and certainly that would give the President some additional sway with respect to the Congress—not only could he do that, but he could then control the outlays of the Federal Government to a far greater extent than he does now. But, when he has tried to do that, we in Congress quickly find a way to close the loopholes.

Some years ago Presidents were able to find an alternative to the line item veto but we closed that avenue of approach for Presidents as well. This line-item veto would give the President the power to take out of some of the bills that we send him, the smaller types of spending that cumulatively add much to the deficit, much to the bureaucracy, and much to the size of government.

It is not unusual for the President to get a bill of 400 or 500 pages on his desk to sign. Indeed, it is almost unusual for him not to receive a bill of that length.

We can recall President Reagan at one of his State of the union addresses, holding up a continuing resolution that was a couple thousand pages long. He also had with him a reconciliation bill, which was a couple of thousand pages long as well. And he said he was not going to sign one of those again. And I do not blame him. It was a bill that would have been a marvelous subject for line-item veto. It was a bill that could have been brought down to size in this name.

Perhaps the most appealing thing, to me, about a line-item veto is the amount of work here in the Senate that would not be necessary, that would not occur, if the President had this power. If he had such a line-item veto, the effort of every Member of the House, all 435 of them, and every Member of the Senate, all 100 of

them—including me— to get a special provision in for his or her constituency would, perhaps, not be necessary. If the President had the line-item veto, much of the scurrying around that occurs here would not be necessary because, in the event an unnecessary program were passed, it clearly would be taken out of the bill by the President.

In addition to that, the thousands of letters that circulate in the Senate, the hundreds of meetings that occur, the sheer volume of the staff and the shear volume of the material that we generate here would all be minimized. All of this would be reduced substantially. So the line-item veto produces more than just savings; it is more than just an element of control.

Indeed, in my judgment, it would simplify the entire process of legislation. It would make the business of the Senate and the House much clearer. It would give Members of both bodies more of an opportunity to deal with the legislation and the major issues that we have to deal with around here and not be involved in getting a few dollars here, a few dollars there, seeing a Senator, seeing a Congressman, seeing a supplicant of one form or another who wants to get a little piece of the action.

When we have a budget of $1.2 trillion, or $1,200 billion, it is very easy to lose a few dollars here and there. In the Budget Committee, if a figure is $50 million or less, we round it out to zero. In the real world, that is a remarkable sum. But, yet, here in the Senate if it is $50 million or less, we do not think it is that important an item, even though it could have been the lifetime product of many communities an extraordinary amount of money.

In any event, Mr. President, the idea of rounding out $50 million to zero always surprises my constituents and always gets a little chuckle from the audience when I talk about it. But it is true. So when a Senator or when a Congressman or when a constituent comes and wants a few hundred thousand dollars, or wants $2 or $3 million, this is hardly worth a bother. This is something that one gives to the staff to handle, not considered worthy of deliberations in the Senator's office.

That is the scope of the amount of money that we handle; a million dollars being just a small fraction of the whole. That is why we lost a sense of reality, of what working men and women in this country have to deal with. That is why I support the idea of a line item veto, so that bills will not be thousands of pages long. So that the legislative process will be made more efficient. So that the enormity of the staff might not be needed in this place. So that we could get business done in a more expedited manner.

Mr. President, those are the reasons why I support the idea of a line-item veto. Because I support the idea of streamlining the Congress and the idea of balancing the budget and bringing our affairs into order. There is no question that one of the most meaningful and useful ways to achieve that end would be by adopting an amendment giving the power of a line-item veto to the President.

Mr. THURMOND. Will the distinguished Senator yield?

Mr. BOSCHWITZ. I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President I associate myself with the remarks of the able Senator from Minnesota on the line-item veto. As Governor of South Carolina, I had that power, and I exercised it and saved the people of my State considerable money.

The President can do the same thing. Forty-three Governors have that power today, yet the President of the United States does not have it. There is no question in my mind that matters get into appropriations bills that should not be there. Sometimes it is log rolling, sometimes it is oversight, sometimes it is duplication and sometimes it is for various other reasons. I think it would be very helpful if the President had that power. In my opinion, if the President had that power, actually I believe we could save billions of dollars to the taxpayers. I hope we can pass legislation to that effect.

There are two things that I have stated we ought to do. One is to pass a constitutional amendment to mandate a balanced budget, mandate it in such a way so that Congress cannot spend more than it takes in. If Congress wants to spend more than revenues, then they have increase taxes to do it and then the people back home can pass on the wisdom of that action. The next thing is a line-item veto. This is very important.

If we pass these two pieces of legislation, it will do more than anything I know to help keep the budget balanced, once we get it balanced. I hope Congress this year will see fit to pass both of these measures.

In 1984, I offered a constitutional amendment to mandate a balanced budget; it passed the Judiciary Committee; it passed the Senate. It went to the House, but the leaders over there at that time killed it. They evidently did not want to stop the spending. I introduced this bill again earlier in this session of Congress. It is in the Judiciary Committee now, and Senator SIMON of Illinois is interested in this legislation. We hope to bring it out of committee this year.

We ought to pass this constitutional amendment to mandate a balanced budget. We ought to pass the line-item veto. Those two things will be helpful in properly handling the fiscal problems of this country.

Mr. BENTSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FAVORED NATION STATUS FOR HUNGARY

The Senate continued with the consideration of the bill.

Mr. PACKWOOD. Mr. President, I ask unanimous consent on this bill to propose an amendment involving log exports to be considered with a 1-hour time limitation, time to be equally divided by both sides.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. BENTSEN. Mr. President, I know of no objection on this side.

The PRESIDING OFFICER. The Chair hears none and it is so ordered.

Mr. MITCHELL. Mr. President, for the information of Senators, I have consulted with the managers of the bill and with the distinguished Republican leader. There do not appear to be any other amendments which will require votes that can be scheduled this evening.

Accordingly, there will be no further rollcall votes today. The managers advise me that they expect a full day tomorrow; that there will be, I do not know the number, but several amendments which will require votes, and so Senators should be aware of the fact that there will be rollcall votes tomorrow.

We are going to continue to proceed with respect to this bill. It is my hope that we could complete action on the bill tomorrow, if that is possible, and the managers have assured me they will do their best to work toward that end. That will, of course, require the cooperation of Senators in being available to offer their amendments tomorrow morning.

Mr. THURMOND. Will the distinguished Senator yield?

Mr. MITCHELL. Certainly.

Mr. THURMOND. I have an amendment accepted on both sides. There is one little change in the drafting. If I could take that up at this time, I would like to do it if there is no objection.

Mr. BENTSEN. Mr. President, we have not seen the amendment on this side. It has not been accepted on this side.

Mr. THURMOND. The Senator's staff member worked with my staff.

Mr. BENTSEN. I have no knowledge of that. I will have to see the amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

AMENDMENT NO. 1486

(Purpose: To extend the temporary duty suspension on tetraamino biphenyl)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND] proposes an amendment numbered 1486.

On page 17, between lines 21 and 22, insert:

( ) Heading 9902.29.27 (relating to tetraamino biphenyl).

Mr. THURMOND. Mr. President, I rise today to propose this amendment to H.R. 1594 which will continue the duty suspension on the chemical tetra amino biphenyl, known was TAB. TAB is an essential raw material used in the production of a high performance fiber called PBI. PBI is a unique heat and chemical resistant fiber that can be used as a suitable replacement for asbestos. PBI has a wide range of thermal protective applications such as flight suits and garments for firefighters, boiler tenders, as well as refinery workers.

Mr. President, in the 98th and 100th Congress, I introduced similar legislation to apply duty-free treatment to TAB. This bill was ultimately incorporated into the Omnibus Tariff and Trade Act of 1984 and the Omnibus Trade Act of 1988. The current duty suspension for this chemical expires December 31, 1990.

Officials at the International Trade Commission have informed me that there is still no domestic producer of TAB. I want to repeat that. There is no domestic producer of TAB. Thus the temporary suspension of duty on this chemical will not cause injury to any U.S. manufacturer of the product.

Mr. President, suspending the duty on this chemical will benefit the consumer by stabilizing the cost of manufacturing the end use products. Further, this suspension should allow domestic producers to maintain and improve their ability to compete internationally.

We have three plants I believe in my State that are interested in this, and it is very important to the economy of South Carolina that this amendment be agreed to.

I hope the Senate will see fit to adopt it expeditiously.

Mr. BENTSEN. Mr. President, I have examined the amendment as the manager of the bill on this side, and it appears to be a good amendment. I have no objection on this side.

Mr. DURENBERGER. Mr. President, there are no objections to this amendment on the Republican side. We recommend its adoption.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 1486) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BENTSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. THURMOND. Mr. President, I wish to extend my appreciation to the mangers of the bill.

AMENDMENT NO. 1487

(Purpose: To extend trade benefits to Nicaragua)

Mr. DODD. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Connecticut [Mr. DODD] proposes an amendment numbered 1487.

Mr. DODD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill add the following new section:

"SEC. . Trade Benefits for Nicaragua. Notwithstanding any other provisions of law, the President is authorized to designate Nicaragua as a beneficiary development country for the purposes of title V of the Trade Act of 1974, as amended, and as a beneficiary country under the Caribbean Basin Economic Recovery Act, and any such designation may remain effective for the duration of the calendar year 1990."

Mr. DODD. Mr. President, this is an amendment which I have discussed with the manager, the staff, as well as the ranking minority member. It is a very simple, straightforward amendment. It merely clears away certain administrative difficulties which would impede the President and the administration in their efforts to fully restore trade relations with Nicaragua, the new government of Mrs. Chamorro. Very specifically, the amendment will allow the President to confer GSP and Caribbean Basin Initiative trade benefits on Nicaragua for the remainder of this year notwithstanding any other provision of law.

As a background, Mr. President, this is the identical language that was included in the administration's emergency assistance package for Nicaragua. I note the administration is anxious that this amendment be adopted, or that language be included in the legislation. It would have been included but for a jurisdictional question that had been raised when the matter was brought up on the assistance package.

This is the proper vehicle for it to be attached, and while we are providing foreign aid assistance to the tune of some $300 million—of course, depending on what the Appropriations Committee recommends—I think all of us agree that in the long term the economic well-being of Nicaragua as well as other countries in the region will depend upon trade relations. While aid will go to the poor and housing needs of the country, this amendment is designed to help the business sector in Nicaragua to get on its feet. So that is the rationale for it.

I appreciate the patience of my colleague from Texas and the ranking minority member as well for going over this amendment with us.

Mr. BENTSEN. Mr. President, what this does, it overrides the normal statutes that apply for GSP and CBI, and gives the President the authority to designate Nicaragua for those benefits immediately. I support it. I think the amazing revolution that has taken place and the success of democracy there and the leadership of Mrs. Chamorro certainly deserves this kind of encouragement, and so I enthusiastically support the amendment.

Mr. DODD. I thank the Senator.

Mr. DURENBERGER. Mr. President, there is no objection on the Republican side, and I am also authorized to indicate that the administration does support the amendment as well, and we recommend its adoption.

The PRESIDING OFFICER (Mr. SANFORD). If there is no further discussion, the question is on agreeing to the amendment.

The amendment (No. 1487) was agreed to.

Mr. BENTSEN. I move to reconsider the vote by which the amendment was agreed to.

Mr. DODD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1488

(Purpose: To temporarily suspend the duty on metal oxide varistors)

Mr. MACK. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Florida [Mr. MACK], for himself and Mr. GRAHAM, proposes an amendment numbered 1488.

Mr. MACK. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 71, after line 12, insert the following new section:

SEC. . METAL OXIDE VARISTORS.

(a) IN GENERAL.—Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new heading:

"9902.85.33	Metal oxide varistors (provided for in subheading 8533.40.00, 8541.10.00, or 8541.50.00)	Free	No change	No change	On or before 12/31/92".

(b) EFFECTIVE DATE.—

(1) GENERAL RULE.—The amendment made by this section shall apply with respect to goods entered, or withdrawn from warehouse for consumption, on or after October 1, 1990.

(2) RELIQUIDATION.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, upon a request filed with the appropriate customs officer after September 30, 1990, and before April 1, 1991, any entry, or withdrawal from warehouse for consumption, of an article to which the amendment made by this section applies that was made—

(A) after December 31, 1988, and

(B) before October 1, 1990,

and with respect to which there would have been a lower duty if the amendment made by this section had applied to such entry or withdrawal, shall be liquidated or reliquidated as though such entry or withdrawal had occurred on October 1, 1990.

Mr. MACK. Mr. President, we are offering an amendment today to the miscellaneous tariff legislation to suspend the duty on metal oxide varistors. Before we made the transition to the harmonized tariff schedule, these metal oxide varistors entered the United States duty free.

Under the new system, this same product is subject to a 6-percent duty even though they are not produced domestically. My amendment will correct this inequity by returning this product to its duty-free status. It is my understanding that my amendment has been agreed to by both sides pending the approval of the administration. I would appreciate my colleagues' support on this amendment.

Mr. BENTSEN. Mr. President, I know of no objection to the amendment on this side, and I am pleased to support it. I urge its adoption.

Mr. DURENBERGER. Mr. President, there is no objection on the Republican side either.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 1488) was agreed to.

Mr. BENTSEN. I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1489

(Purpose: To exempt intransit rail cars from user fees)

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Minnesota [Mr. DURENBERGER] proposes an amendment numbered 1489.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 102, after line 11, insert the following new subsection:

(e) RAILROAD CARS.—Subparagraph (B) of section 13031(b)(1) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(b)(1)(B) is amended to read as follows:

"(B) the arrival of any railroad car the journey of which originates and terminates in the same country, but only if no passengers board or disembark from the train and no cargo is loaded or unloaded from such car while the car is within any country other than the country in which such car originates and terminates; or".

On page 102, line 12, strike "(e)" and insert "(f)".

Mr. DURENBERGER. Mr President, I believe this amendment has been cleared on both sides.

Mr. President, currently there is a customs user fee that is imposed on railroad cars arriving at ports of entry into the United States. However, current law exempts railroad cars that are "in transit"—that is railroad cars that originated in the United States, crossed over into Canada, and returned to the United States.

Recently, the Customs Service notified the railroads that it is interpreting current law to require the collection of user fees on railroad cars regardless of the "in transit" nature of their travels. As a result, Customs wants to collect fees on cars that originate in the United States, travel into Canada, and are brought back into the United States without any cargo being loaded or unloaded from the cars. Customs believes that if a single car is added or dropped off of a train or if a locomotive is switched out, a user fee will be assessed on all cars on the train, regardless of the "in transit" nature of any car's journey.

Mr. President, the current Customs interpretation virtually eliminates the application of the in-transit exemption. Railroads almost always add and drop cars as trains travel from origin to destination.

It seems to this Senator that only those cars that are dropped or added should be subject to the user fee, not the cars that are merely in-transit. That is what this amendment does.

Mr. BENTSEN. Mr. President, we have examined the amendment on this side. I see no objection to it. I think it is an equitable amendment and support it.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Minnesota.

The amendment (No. 1489) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BENTSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CUSTOMS PRECLEARANCE

Mr. SYMMS. Mr. President, I wonder if I might engage my friend from Delaware in a brief colloquy on one of the provisions in this bill.

Mr. ROTH. I would be delighted to engage in a colloquy on this subject.

Mr. SYMMS. As my colleague is well aware, section 2009 of this bill requires that the Customs Service establish a Customs preclearance center in the Caribbean for 2 years as a test, in order to determine if such a center will have a beneficial impact on the economies of countries in the region. I would certainly expect that such a center would have a dramatic impact on tourism in the Caribbean, since getting in and out of crowded Customs facilities in the United States is probably the worst aspect of travel to the Caribbean.

Based on our committee discussion, I understand that my friend from Delaware had a particular country in mind for this center. Is that correct?

Mr. ROTH. I would like to thank my friend for his question, and note that I agree with him on his analysis of the importance of such a center. In response to his question, while the bill language does not specify any particular country, although it must be a country where the Customs Service does not now have such operations, I did have a country in mind.

In the Senate Finance Committee markup of this bill, I indicated my desire to have Jamaica established as the site of the equipment, and no opposition was expressed to my proposal. I believe that the center would have the most beneficial impact if established in Jamaica. That country is co-

operating with us greatly in the war on drugs, and needs strong U.S. support. Jamaica presents a challenge as a test case—given its size and the strength of the tourism industry—but I believe that it would be the perfect test case, and a far more valid one than one of the smaller countries in the region.

The only reason I did not offer this as an amendment was to avoid cluttering up the bill. I believe strongly, however, that unless there are clear and substantial reasons not to do so, the Commissioner of Customs should establish the preclearance station in Jamaica, and I intend to work with Customs to see that this occurs.

Mr. SYMMS. I would like to add my support to my colleague's statement. Jamaica has cooperated very closely with the United States, and is important to our national interests. I too strongly support putting the Customs center in Jamaica, and I will assist my colleague in his effort to ensure that this occurs.

Mr. ROTH. I thank my friend from Idaho for his support for this position and for this important bill.

SECTION 1103—26-INCH WHEEL BICYCLES

Mr. KASTEN. Mr. President, section 1003 of the bill before us contains the language of S. 1504, my bill to correct a mathematical error made during the conversion to the harmonized tariff system [HTS]. This error in converting inches to centimeters doubles the tariff rate on 26-inch bicycles, adversely affecting one of my corporate constituents, a company with over 400 employees in Wisconsin. Conversion to the HTS was intended to be revenue-neutral. Under section 1003, 26-inch bicycles will be subject to the same rate of duty as they were before conversion to HTS.

Mr. President, the U.S. Trade Representative has acknowledged that an error was made, and has no objection to this technical correction.

I thank the managers of the bill and their fine staffs for their assistance on this matter of importance to my State.

Mr. BENTSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRAHAM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAHAM. Mr. President, I ask unanimous consent to be allowed to proceed as if in morning business for 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

CUBA

Mr. GRAHAM. Mr. President, at a time when democracy and a heightened concern for human rights are sweeping the globe, Fidel Castro's Cuba stands out as one of the world's remaining bastions of oppression.

In the face of growing isolation, Castro has recently renewed his harsh crackdown on Cuba's human rights community, arresting nine members of the Pro-Human Rights Party. They were rounded up during early-morning raids on March 12 and charged with belonging to a counterrevolutionary organization.

Their real crime, however, is that each of them in some way cooperated with the United Nations in its first ever investigation of human rights in 1988. They were among a group of 20 to 30 human rights activists who attempted to do so.

For their efforts, each has been hounded by authorities ever since. Virtually all have been jailed. And their families continue to be terrorized by Castro's block organizations.

Last month's crackdown saw Castro put into play all of his assorted tools of oppression. For along with the arrests of the nine activists, Castro set loose mobs to harass those he did not pick up.

Among them was Sebastian Arcos and his brother Gustavo, leaders of the Cuban Committee for Human Rights. A crowd of 300, including uniformed members of the Interior Ministry, surrounded the Arcos home, thoroughly terrorizing family members over several days.

Castro's 31-year rule is replete with ironies. This latest episode is no exception. Gustavo was one of Castro's earliest followers, and fought alongside him throughout the revolution.

Gustavo, his brother Sebastian and many others continue to pay a steep price for their efforts to focus world attention on Castro's human rights violations.

Their sacrifice, thankfully, has not been in vain. In large part because of their testimony, the United Nations has approved resolutions in each of the last 2 years expressing concern over Castro's human rights record.

In fact, the resolution passed on March 6 of this year in Geneva called on the Government of Cuba to honor its repeated guarantees that it would not subject to reprisals, detention, or negative consequences of any nature whatsoever those who cooperated with U.N. human rights investigators.

The resolution calls on U.N. Secretary General Perez de Cuellar to continue to pressure Castro in this regard and to make known the results of his efforts at next year's meeting.

Another year is a long time to wait, particularly when lives are at stake. I urge the Members of the U.N. Human Rights Commission not to wait. Rather, they should call on the Secretary General, at least informally, to report fully as soon as possible as to recent actions within Cuba.

Mr. President, my remarks would not be complete unless I recognized the courageous work of Armando Valladares, our U.S. representative to the U.N. Human Rights Commission.

Due largely to his leadership, the world has finally become aware of the gross human rights violations that have taken place in Cuba under Fidel Castro. Armando knows of those abuses through personal experience. He himself was a prisoner in Castro's jails for 22 years.

His release in 1982 came about as a result of an international campaign of protest. He knows the values of such international pressure.

Armando deserves the gratitude of all Americans and all free citizens of the world for the many sacrifices he has made in behalf of the cause of human rights.

Mr. President, I ask unanimous consent to have printed in the RECORD an April 12 article from the Washington Post regarding the recent crackdown in Cuba, along with a copy of the resolution approved by the U.N. Human Rights Commission on April 6 of this year.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 12, 1990]

CUBA CURBS RIGHTS MOVEMENT

(By Lee Hockstader)

HAVANA.—As Cuba braces for an era of economic austerity, President Fidel Castro is moving to stifle internal dissent and has all but crushed the island's fledgling human rights movement.

The repression, which has been intensifying for more than a year, follows a brief and unprecedented flowering of the Cuban human rights movement, which was tolerated for much of 1987 and 1988 by the authorities.

Today, however, human-rights activity has almost ceased to exist in Cuba. The few activists not in prison are harassed by government-organized mobs, deprived of jobs in their chosen fields or threatened by security agents.

Castro and other officials regularly refer to the activists as "worms" and "cockroaches" with "hairy ears" and have warned that Cuba's treason laws may be rewritten to cover those who question the regime's commitment to civil liberties.

In a speech last month, Castro's brother Raul, the defense minister, issued a warning to any who would question the regime: "The counter-revolutionaries and the anti-social elements . . . must be warned that to serve at this hour as the laughing stocks of imperialism is equal to becoming the greatest traitors in Cuban history."

"The formula is simple," said Ricardo Alvarez San Pedro, an economist who is a member of the Cuban Commission on Human Rights and National Reconciliation, one of the few remaining active human-rights groups.

"When we have a more rigid economic and social [situation], the government tries to maintain a hard line toward any nongovernmental organization."

The crackdown coincides with the collapse of Communist rule in Eastern Europe, a development that Castro has denounced. Cuba's already sluggish economy is widely expected to suffer as its trading partners in Eastern Europe shift to free-market principles. Castro is warning Cubans to prepare for a drastic austerity program during what he promises will be "years of trial."

Human-rights activists here say Castro is determined not to allow the seeds of a democratic movement to take root in Cuba.

The Polish Solidarity union "and all those groups in Eastern Europe started as very small groups," said Herardo Sanchez, a commission member. "Maybe that's why they're harassing us."

Moreover, according to Frank Calzon of Freedom House, a New York-based organization that monitors civil liberties worldwide, the steady democratization of Latin America has contributed to Castro's crackdown. "Cubans have always seen themselves as part of Latin America," he said in an interview. "They see a plebiscite in Chile. In Argentina, the generals forced out of power. . . . And, finally, the elections in Nicaragua, which were a tremendous setback. Castro's seeing these things happen, and he's decided not to take any risks."

At least 29 Cubans who were human-rights monitors are now in prison, according to Mary Jane Canejo, a researcher on Cuba for the Americas Watch human-rights organization. Dozens more have been detained and released this year, Cuban human-rights figures say. They add that Cuba holds at least 200 political prisoners, despite releases in recent years.

Last month, about 300 people, including uniformed members of the Interior Ministry, gathered in front of the house of Sebastian Arcos, a leader of the Cuban Committee for Human Rights, where they shouted "Down with the worms!"

Another target of derision by mobs has been Sebastian Arcos' brother Gustavo, a human-rights activist who fought alongside Castro in a celebrated 1953 attack on an army installation that marked the beginning of the Cuban revolution.

Earlier this year, a young man who shouted an anti-Castro slogan at a boxing match was hauled off by police and so badly beaten that he was hospitalized.

Enrique Lopez Oliva, a history professor at the University of Havana who in 1987 began publishing Cuba's only independent newsletter, "Religion in Cuba," had to suspend it last year after his authorization to use U.S. dollars was revoked and he could not purchase equipment.

"What they're doing is very effective," said an intellectual who considers himself a barely tolerated dissident. "No one can talk. No one can meet. Any form of protest is brutally surpressed."

At the same time, the Cuban armed forces under Raul Castro, who is thought to represent the most hard-line currents in the Cuban leadership, have expanded their already pervasive influence. For the first time, top officers are in charge of the block-by-block organizational tool, the Committees for the Defense of the Revolution, as well as the Transportation Ministry.

In addition, 200 armed forces officers were shifted last year to the Interior Ministry, which oversees the security apparatus, following an anti-corruption purge in the ministry.

Some analysts see evidence of Castro's impulse to impose strict military discipline during difficult times. "It's not just his brother, it's that he trusts the military as such," said a Western diplomat.

One indication of the harsher human-rights climate, as well as the island's deteriorating economy, is that a record number of Cubans are fleeing by boat to Florida.

Last year, 398 Cubans reached to the Florida coast, a figure more than four times higher than the 1988 total, according to the U.S. Immigration and Naturalization Service. So far this year, more than 100 have arrived by boat, raft, inner tube and, in one celebrated incident his winter, by windsurfing.

Diplomats and human-rights activists say conditions here started to deteriorate when the U.N. Human Rights Commission in Geneva voted March 5 to approve a U.S.-sponsored resolution calling for continued scrutiny of human rights on the island.

Cuba's leaders reacted bitterly to the vote and promised to ignore it. A week later, nine members of the Pro-Human Rights Party were arrested. This week, the nine were formally charged with belonging to a "counter-revolutionary organization" that was trying to change Cuba's socialist government and constitution and acting on behalf of the United States.

Seven of them had written a letter to the U.S. delegation to the Human Rights Commission in Geneva commending it on the resolution on Cuba.

Wayne S. Smith, former head of the U.S. Interest Section in Havana, attributes the human-rights crackdown in large part to Washington's policy of pressing and isolating Castro—a policy reaffirmed in the early days of the Bush administration by Secretary of State James A. Baker III.

"With the door slammed in their faces, part of the incentive in continuing the positive movement in human rights has disappeared," said Smith, a professor at The Johns Hopkins School of Advanced International Studies in Washington. "As long as we're going ahead with TV Marti, and the U.S. appears to have adopted a policy of pressure toward Cuba, I'm not optimistic that things will improve."

TV Marti, named for 19th-century Cuban national hero Jose Marti, is a U.S. government station that began test broadcasts last month beamed at Cuba. The signal has been blocked by Cuba, but the tests are continuing.

In the small community of human-rights activists still active, many say that pressure from Washington, often at the behest of Cuban exiles in Miami, has been a cause of Castro's severe policy.

"If there were a relaxation of relations with the U.S. and no talk of war or blockade or invasion or aggression or TV Marti, there'd be no arguments left for the Cuban government," said San Pedro, the economist and human-rights activist.

San Pedro, 53, who worked in a state-run international finance concern until last year, was fired in September. He said he was told that his political attitude was the cause. He now sustains himself by tutoring high school students in math and physics.

THE COMMISSION ON HUMAN RIGHTS

Recalling the reports of the mission to Cuba (E/CN.4/1989/46), in accordance with its decision 1988/106 of 10 March 1988;

Aware that this report contains questions and issues which have not been fully addressed, as well as testimony from hundreds of individuals concerning the question of human rights in Cuba;

Recalling also its decision 1989/113 of 9 March 1989, which requested the Secretary-General to maintain contacts with the Government of Cuba on the issues and questions contained in the report;

Noting the letter of the Secretary-General to the Chairman of the Commission, dated January 29, 1990, in which he informed the Commission that he has been maintaining ongoing contacts, both written and oral, with the Government of Cuba on this matter;

Expressing appreciation to the Secretary General for his efforts in support of respect for human rights and fundamental freedoms;

Concerned by reports that witnesses who testified before the Commission's working group have since been subject to arrest, harassment, or other forms of reprisals by the Government of Cuba;

Aware of its responsibility to defend and support those who have put their faith in this body and its representatives in promoting and protecting human rights and fundamental freedoms;

1. Calls upon the Government of Cuba to honor its repeated guarantees to the representatives of the Commission who visited Cuba pursuant to decision 1900/100 that individuals who attempted to present information to these representatives would not be subject to reprisals, detention, or negative consequences of any nature whatsoever;

2. Calls upon the Government of Cuba to provide a response under this agenda item to the Commission at its 47th session to the unanswered questions put to the Cuban authorities by representatives of this Commission (annex XVI of E/CN.4/1909/46) and to the Documents in Annex III of the same report;

3. Welcomes the willingness of the Secretary General to put himself at the disposal of the Commission regarding his ongoing contacts with the Government of Cuba, as expressed in his letter to the Chairman of January 29, 1990, and requests that he provide under this agenda item the results of those contacts to the 47th session.

March 1, 1990.

Mr. LOTT addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. LOTT. Mr. President, I ask unanimous consent that I may proceed as in morning business for 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

COATS-McCAIN LINE-ITEM VETO INITIATIVE

Mr. LOTT. Mr. President, I join with my other colleagues here tonight who have already addressed the issue of and expressed their support for the Coats-McCain line-item veto initiative.

I think this is something that is long overdue and something that I have found that the Mississippi people and Americans I have talked to all over this country support. They are attracted to the line-item veto idea.

While I was home during the Easter recess period, I went all over my own State of Mississippi and talked to a lot of different groups, and I asked them

what issues concerned them the most and what they thought the solutions might be. To my surprise, quite frankly, along with drugs and crime, people all over my State said they are still very much concerned about the Federal budget deficit, and they want to know what the Congress is going to do about it this year.

They asked a lot of questions about the Gramm-Rudman-Hollings process and how that works, and would there be a sequester or could we avoid that this year. They did not understand why Congress would not address the deficit problem without having to resort to a sequester.

When I asked, "What do you want to do about it?", then it really got interesting. I always ask, "Well, what about taxes? Do you think maybe we should look at the Tax Code? Would you be willing to go with more taxes, even in certain areas?", and I would specify the areas we might consider.

The answer came back universally, "No, that is not the answer." The people understand that the problem with the Federal budget deficit is not that we do not have enough revenue. It is that we are spending too much money in a number of areas. When I asked about the idea of the line-item veto, they responded universally, "That is clearly something that we support and we think would work."

The people understand, and in more than 40 States, their Governors have the line-item veto and use that veto very effectively. It helps the States and, frankly, I think it helps the State legislatures to know that that potential threat is hanging out there.

As a matter of fact, I note that the States had a cumulative surplus of some $9 billion last year, while we had a deficit at the Federal level of, I guess, $150 billion.

I think that the line-item veto and constitutional requirements in many States that they must have a balanced budget work, and the line-item veto helps. These States do their job. Even in a very poor State like my own of Mississippi, every year they live within their means. They do not spend more than they take in. In fact, they usually have a little cushion they leave in place.

In States all over this Nation, Governors have a line-item veto. I think it is long past due time for us to have it at the Federal level.

I have colleagues on both sides of the aisle who say, no, that would disrupt the balance between executive and legislative branches; the Presidents would use it as sort of a blackmail or intimidation against the Congress not to put certain things in the spending bills.

I think that sounds like a great idea. It would help us all to resist the temptation to do just that, put things in there that really should not be. Some examples have been cited of projects funded in the past, and on every list you can probably put something that would affect every Senator's State in this body.

But when you have things like $3.4 million to perform research on new methods of producing tailored clothing; $1 million earmarked in the defense budget for Japanese beetle suppression in the Azores; $8 million to continue to fund the District of Columbia lottery and charitable games enterprise fund, including 124 positions, 30 more than in 1988, you have to worry. And, the list goes on.

Mr. President, I ask unanimous consent that I be able to have this list printed in the RECORD at this point.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

$3.4 million to perform research on new methods of producing tailored clothing;

A $26 million increase in the Pentagon's purchase of anthracite coal when DOD already owns a 4-year supply of anthracite coal and will need 45 new acres of land on which to store the new purchase. This appropriation, by the way, was made against the wishes of the Pentagon;

$1 million earmarked in the defense budget for Japanese beetle suppression in the Azores;

$8 million to continue to fund the District of Columbia lottery and charitable games enterprise fund, including 124 positions—30 more than in 1988;

And finally, one-half million dollars to bring foreign politicians to the United States to study the workings of Congress. I assume they are not our allies. Certainly we would not impose this particular process on our friends.

Mr. LOTT. I think it would be helpful for the President to have this opportunity. Would it by itself solve the deficit problem? Probably not. Is it one tool that Presidents should be able to use? I think so.

I supported the line-item veto when I first came to Congress as a Member of the House in 1973, and I have supported it during Republican administrations and Democratic administrations. It is not something I want just for President Bush or his predecessor.

I am willing to take my chances that some future President who might be of the other party or who would have a different philosophical persuasion than I have would use it carefully. It could be a very precision-type instrument that could take things out that we just do not need and save us, in the process, billions of dollars.

As the saying goes, those small millions, $1 million here and $3 million there, could add up to real money.

So I urge my colleagues to look over this concept again. We are going to have an opportunity to vote on the Coats-McCain line-item veto this year, probably more than once. I certainly support the concept, and I urge my colleagues to join in that effort.

Thank you, Mr. President.

FAVORED-NATION STATUS FOR HUNGARY

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Mr. President, what is the regular order?

The PRESIDING OFFICER. The committee substitute to H.R. 1594.

AMENDMENT NO. 1490

(Purpose: To encourage greater sales of U.S. products and to further the integration of production between the United States and the CBI beneficiary countries)

Mr. KERRY. Mr. President, I send an amendment to the desk which has been cleared by both sides, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts [Mr. KERRY] proposes an amendment numbered 1490.

Mr. KERRY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 75, line 5, after "assembled" insert "or processed".

On page 75, line 7, after "components" insert "or materials".

On page 75, line 21, after "components" insert "or materials".

On page 76, line 5, after "components" insert ", materials".

Mr. KERRY. Mr. President, my amendment is simple and straightforward. It involves adding only five words to section 2007 of H.R. 1594. Section 2007 deals with duty-free treatment for articles assembled in CBI beneficiary countries from components produced in the United States.

My amendment would allow such duty-free treatment for articles, or materials, produced in the United States, but which also are processed in the beneficiary countries as well.

This amendment is addressed to the particular requirements of high-technology companies and those companies which produce such things as health devices. These companies have production requirements which are unlike those companies who produce components in the United States, send the components to the beneficiary countries for assembly, and then return the end product directly to the United States for sale here. In the case of high-technology companies which produce electronic equipment or health devices, the product requires extensive processing as the final stage in the manufacturing process.

There are high-technology companies, some of them in my State, who

have responded to the urging of this administration and the previous administration to take advantage of CBI and invest in the Caribbean. However, Customs has ruled that under existing law, since the end product is not assembled or substantially transformed in the beneficiary country, the end product is not eligible for CBI duty-free treatment when it is returned to the United States.

Because of this problem, many companies in my State which produce high-technology products such as electronic equipment, or health devices, would invest in processing facilities in CBI beneficiary countries if it were not for the problems posed by Customs' interpretation of existing law. My amendment remedies this problem.

This amendment is designed to protect jobs in the United States while responding to a major foreign policy initiative of our Government—investing in the Caribbean and Central America to create the jobs necessary to begin bringing stability to that region of the world. The high-technology industry in the United States has been one of the hardest hit by foreign competition—often unfair foreign competition. If this provision were enacted into law, it would place many of our high-technology firms in a much more competitive position internationally. If not, I can assure my colleagues, that based upon discussions I have had with businessmen in my State, the Japanese will virtually take over completely the production of many high-technology products.

Mr. President, I am not aware of any opposition within the administration to this amendment. I think it makes good domestic policy and I think it makes good foreign policy.

The report accompanying H.R. 1233, the House-passed version of CBI II, stated that the provisions of the legislation were intended to provide an incentive for assembly and processing facilities in the Caribbean when only U.S. components or ingredients are used. The report stated further that section 113 of the House-passed bill, which is identical to section 2007 of H.R. 1594, was to encourage greater sales of U.S. products and further integration of production between the United States and the Caribbean.

Unfortunately, according to Customs, unless the amendment I am proposing is adopted, this goal will not be achieved. Therefore, I am hopeful the distinguished managers of the bill will accept my amendment.

Mr. President, this is a simple amendment that deals with the question of the treatment of those products which are not assembled or substantially transformed in beneficiary countries of the CBI, but adversely treated by Customs under the current interpretation of the law. By virtue of this amendment, which is very simple, it simply adds five words to the current section of H.R. 1594, this would permit certain high-technology companies to be able to invest in the CBI countries, maintain jobs in this country, advance the concepts of the CBI, and simultaneously be able to be competitive in the world in these high technologies.

It has been, as I say, cleared by both sides as well as by the administration, and I hope the Senate will agree to it.

Mr. GRAHAM addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. GRAHAM. Mr. President, I have been authorized by the chairman of the Finance Committee to indicate that the committee has no objection to this amendment.

CBI PROCESSING OF U.S. MATERIALS

Mr. BENTSEN. Mr. President, the amendment offered by the Senator from Massachusetts expands on a provision that is currently in the bill regarding duty-free treatment for articles assembled in CBI countries from U.S. components. This amendment would clarify that the amendment covers U.S. materials that are processed in CBI countries. That provision only applies to products eligible for duty-free treatment under the CBI and was not controversial in the committee.

It is my understanding that the administration does not object to the provision, and I know of no Senator that objects. Therefore, I am willing to accept the provision, on the understanding that if controversy arises in the conference, I would be inclined to drop the amendment.

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I have examined the amendment, and I have conferred with the staff of the minority and Senator PACKWOOD's staff. It is my understanding there is no objection from those quarters.

I have no objection to the amendment, and I urge its adoption by our colleagues.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts.

The amendment (No. 1490) was agreed to.

Mr. KERRY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRAHAM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KERRY. Mr. President, I yield the floor.

Mr. GRAHAM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRAHAM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT RECEIVED DURING RECESS

Under the authority of the order of the Senate of January 3, 1989, the Secretary of the Senate, on April 18, 1990, during the recess of the Senate, received a message from the President of the United States transmitting sundry nominations and a treaty, which were referred to the appropriate committees.

(The nominations received on April 18, 1990, are printed in today's RECORD at the end of the Senate proceedings.)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REVISED DEFERRALS OF CERTAIN BUDGET AUTHORITY—MESSAGE FROM THE PRESIDENT—PM 107

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which, pursuant to the order of January 30, 1975, as modified on April 18, 1986, was referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Armed Services, the Committee on Finance, and the Committee on Foreign Relations:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report three revised deferrals of budget authority now totaling $2,097,533,159.

The deferrals affect programs in Funds Appropriated to the President and the Departments of Defense and Health and Human Services. The de-

tails of the deferrals are contained in the attached report.

GEORGE BUSH.

THE WHITE HOUSE, *April 18, 1990.*

ANNUAL REPORT OF THE NATIONAL ENDOWMENT FOR THE HUMANITIES—MESSAGE FROM THE PRESIDENT—PM108

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with the provisions of the National Foundation on the Arts and Humanities Act of 1965, as amended (20 U.S.C. 959(b)), I am pleased to transmit herewith the 24th Annual Report of the National Endowment for the Humanities for fiscal year 1989.

GEORGE BUSH.

THE WHITE HOUSE, *April 18, 1990.*

MESSAGE FROM THE HOUSE RECEIVED DURING RECESS

Under the authority of the order of the Senate of January 3, 1989, the Secretary of the Senate, on April 18, 1990, during the recess of the Senate, received a message from the House of Representatives announcing that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 2015. An act to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965.

The message also announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 271. Concurrent resolution expressing the sense of the Congress that the President should make the release of Americans held hostage in Lebanon a high priority and should accelerate efforts to this end; and

H. Con. Res. 289 Concurrent resolution in support of the right of the Lithuanian people to independence.

The message further announced that the House has agreed to the following resolution:

H. Res. 377. Resolution relating to the death of the Honorable Spark M. Matsunaga, a Senator from the State of Hawaii.

ENROLLED BILLS SIGNED

The message also announced that the Speaker has signed the following enrolled bills:

S. 1096. An act to provide for the use and distribution of funds awarded the Seminole Indians in dockets 73, 151, and 73-A of the Indian Claims Commission; and

H.R. 2334. An act to designate the Post Office located at 300 East Ninth Street in Austin, Texas, as the "Homer Thornberry Judicial Building."

The enrolled bills were subsequently signed on today, April 19, 1990, by the Acting President pro tempore [Mr. LIEBERMAN].

MESSAGES FROM THE HOUSE

At 1:10 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 242. Joint resolution designating the week of April 22 through April 28, 1990, as "National Crime Victims' Rights Week."

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 1236. An act to establish evidentiary standards for Federal civil antitrust claims based on resale price fixing.

ENROLLED JOINT RESOLUTION SIGNED

The message further announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 242. Joint resolution designating the week of April 22 through April 28, 1990, as "National Crime Victims Rights Week."

The enrolled joint resolution was subsequently signed by the Acting President pro tempore [Mr. LIEBERMAN].

At 5:58 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following joint resolution, with amendments, in which it requests the concurrence of the Senate:

S.J. Res. 153. Joint resolution designating the third week on May 1990 as "National Tourism Week."

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1236. An act to establish evidentiary standards for Federal civil antitrust claims based on resale price fixing; to the Committee on the Judiciary.

H.R. 2015. An act to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965; to the Committee on Environment and Public Works.

The following concurrent resolutions were read, and referred as indicated:

H. Con. Res. 271. Concurrent resolution expressing the sense of the Congress that the President should make the release of Americans held hostage in Lebanon a high priority and should accelerate efforts to this end; to the Committee on Foreign Relations.

H. Con. Res. 289. Concurrent resolution in support of the right of the Lithuanian people to independence; to the Committee on Foreign Relations.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, April 19, 1990, he had presented to the President of the United States the following enrolled bill:

S. 1096. An act to provide for the use and distribution of funds awarded the Seminole Indians in dockets 73, 151, and 73-A of the Indian Claims Commission.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources, without amendment:

S. 2466. A bill to amend title XXI of the Public Health Service Act to provide for the establishment of an atmospheric nuclear testing compensation program, and for other purposes (Rept. No. 101-264).

By Mr. BIDEN, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 198. A bill to amend title 17, United States Code, the Copyright Act to protect certain computer programs (Rept. No. 101-265).

By Mr. BIDEN, from the Committee on the Judiciary, with an amendment in the nature of a substitute and an amendment to the title:

S. 459. A bill to amend title 35, United States Code, and the National Aeronautics and Space Act of 1958, with respect to the use of inventions in outer space (Rept. No. 101-266).

By Mr. BIDEN, from the Committee on the Judiciary, without amendment:

H.R. 1622. A bill to amend title 17, United States Code, to change the fee schedule of the Copyright Office, and to make certain technical amendments (Rept. No. 101-267).

By Mr. BIDEN, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 1271. A bill to amend title 17, United States Code, to change the fee schedule of the Copyright Office, and to make certain technical amendments (Rept. No. 101-267).

By Mr. BIDEN, from the Committee on the Judiciary, without amendment:

H.R. 3046. A bill to reduce the number of commissioners on the Copyright Royalty Tribunal, to change the salary classification rates for members of the Copyright Tribunal and the U.S. Parole Commission and for the Deputy and Assistant Commissioners of Patents and Trademarks, and for other purposes (Rept. No. 101-268).

By Mr. BIDEN, from the Committee on the Judiciary, with an amendment in the nature of a substitute.

S. 1272. A bill to amend chapter 8 of title 17, United States Code, to reduce the number of Commissioners on the Copyright Royalty Tribunal, to provide for lapsed terms of such Commissioners, and for other purposes (Rept. No. 101-268).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. CRANSTON (by request):

S. 2454. A bill to amend title 38, United States Code, to increase the estate limits for certain incompetent institutionalized veterans, and for other purposes; to the Committee on Veterans' Affairs.

S. 2455. A bill to amend title 38, United States Code, to provide for recovery by the United States of the cost of medical care and services furnished for a nonservice-connected disability, and for other purposes; to the Committee on Verterans' Affairs.

S. 2456. A bill to amend title 38, United States Code, to extend expiring laws authorizing the Department of Veterans' Affairs to contract for needed care, to revise VA authority to furnish outpatient dental care, and for other purposes; to the Committee on Veterans' Affairs.

S. 2457. A bill to amend title 38, United States Code, to revise the copayment formulas for those nonservice-connected veterans with the means to contribute toward the cost of their care; to the Committee on Veterans' Affairs.

S. 2458 A bill to amend title 38, United States Code, to improve the pay system for registered nurses employed by the Veterans Health Services and Research Administration, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. BENTSEN (for himself, Mr. CHAFEE, Mr. RIEGLE, Mr. MITCHELL, Mr. MOYNIHAN, Mr. DURENBERGER, Mr. ROCKEFELLER, Mr. BRADLEY, Mr. DASCHLE, and Mr. PRYOR):

S. 2459. A bill to amend title XIX of the Social Security Act to provide improved delivery of health care services to low-income children by extending Medicaid coverage to certain low-income children, and for other purposes; to the Committee on Finance.

By Mr. PELL (by request):

S. 2460. A bill to authorize appropriations for the African Development Foundation, and for other puposes; to the Committee on Foreign Relations.

By Mr. KENNEDY:

S. 2461. A bill to reauthorize appropriations to provide for and improve the drug treatment waiting period reduction grant program under the Public Health Service Act, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. WIRTH (for himself and Mr. HEINZ):

S. 2462. A bill to amend the Solid Waste Disposal Act to require producers and importers of tires to recycle a certain percentage of scrap tires each year, to require the Administrator of the Environmental Protection Agency to establish a recycling credit system for carrying out such recycling requirement, to establish a management and tracking system for such tires, and for other purposes; to the Committee on Environment and Public Works.

By Mr. FOWLER (for himself, Mr. HEFLIN, Mr. PRYOR, Mr. HELMS, Mr. MCCONNELL, Mr. HOLLINGS, Mr. SARBANES, and Mr. COCHRAN):

S. 2463. A bill to reaffirm the importance of State and private forestry, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. REID (for himself and Mr. BRYAN):

S. 2464. A bill to establish the Red Rock Canyon National Conservation Area; to the Committee on Energy and Natural Resources.

By Mr. GRASSLEY (for himself, Mr. HEFLIN, Mr. HATCH, Mr. HUMPHREY, Mr. BIDEN, Mr. SPECTER, Mr. SIMON, Mr. LEVIN, Mr. LIEBERMAN, Mr. MURKOWSKI, and Mr. DECONCINI):

S. 2465. A bill to provide a new civil cause of action in Federal law for acts of international terrorism that provides extraterritorial jurisdiction over terrorist acts abroad against U.S. nationals; to the Committee on the Judiciary.

By Mr. HATCH:

S. 2466. A bill to amend title XXI of the Public Health Service Act to provide for the establishment of an atmospheric nuclear testing compensation program, and for other purposes; from the Committee on Labor and Human Resources; placed on the calendar.

By Mr. ARMSTRONG (for himself, Mr. HELMS, and Mr. SYMMS):

S. 2467. A bill to amend the Internal Revenue Code of 1986 to provide civil damages for certain careless collection actions; to the Committee on Finance.

By Mr. BREAUX:

S. 2468. A bill to amend the Solid Waste Disposal Act to provide for State management of solid waste, to reduce and regulate the interstate transportation of solid wastes, and for other purposes; to the Committee on Environment and Public Works.

By Mr. CHAFEE (by request):

S. 2469. A bill to provide for the conservation and development of water and related resources, to authorize the U.S. Army Corps of Engineers to construct various projects for improvements to rivers and harbors of the United States, and for other purposes; to the Committee on Environment and Public Works.

S. 2470. A bill to provide for increased revenues for the maintenance of commercial harbors by the Army Corps of Engineers, and for other purposes; to the Committee on Finance.

By Mr. FORD (for himself and Mr. LEAHY):

S. 2471. A bill to provide for a study of the National School Lunch Program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. PELL (by request):

S. 2472. A bill to establish a senior executive service in the Library of Congress; to the Committee on Rules and Administration.

By Mr. FOWLER (for himself and Mr. NUNN):

S. 2473. A bill to extend and revise the price support and related programs for the 1991 through 1995 crops of peanuts, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DASCHLE (for himself, Mr. PRESSLER, and Mr. WIRTH):

S. 2474. A bill to authorize an exchange of lands in South Dakota and Colorado; to the Committee on Energy and Natural Resources.

By Mr. LOTT (for himself and Mr. COCHRAN):

S. 2475. A bill to provide for the acquisition of the William Johnson House and its addition to the Natchez National Historical Park, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. LEAHY (for himself, Mr. HUMPHREY, and Mr. KOHL):

S. 2476. A bill to amend title 18 of the United States Code to clarify and expand legal prohibitions against computer abuse; to the Committee on the Judiciary.

By Mr. PELL:

S. 2477. A bill to establish an Office of Recycling Research and Information in the Department of Commerce, to require research on the recycling of scrap automotive tires, and for other purposes; to the Committee on Environment and Public Works.

By Mr. BRADLEY:

S. 2478. A bill to provide for the extension of a Medicaid respite demonstration project; to the Committee on Finance.

By Mr. SIMON:

S.J. Res. 289. Joint resolution to designate October 1990 as "Polish American Heritage Month"; to the Committee on the Judiciary.

By Mr. ARMSTRONG (for himself and Mr. GLENN):

S.J. Res. 290. Joint resolution to designate the week of July 22 through 28, 1990, as the "National Week of Recognition and Remembrance for Those Who Served in the Korean War"; to the Committee on the Judiciary.

By Mr. HATCH:

S.J. Res. 291. Joint resolution designating the week of October 14, 1990, as "National Standards Week"; to the Committee on the Judiciary.

By Mr. PELL:

S.J. Res. 292. Joint resolution to designate the year 1991 as the "Year of the Lifetime Reader"; to the Committee on the Judiciary.

By Mr. RIEGLE (for himself, Mr. LEVIN, Mr. GORE, Mr. BURDICK, Mr. DECONCINI, Mr. GLENN, Mr. LAUTENBERG, Mr. METZENBAUM, Mr. CRANSTON, Mr. BENTSEN, Mr. KERRY, Mr. ROCKEFELLER, Mr. DIXON, Mr. BOREN, Mr. ADAMS, Mr. HOLLINGS, Mr. GRAHAM, Mr. LIEBERMAN, Mr. D'AMATO, Mr. CHAFEE, Mr. WILSON, Mr. DOMENICI, Mr. MCCLURE, Mr. BOSCHWITZ, Mr. HATCH, Mr. MURKOWSKI, Mr. DURENBERGER, Mr. THURMOND, Mr. JEFFORDS, and Mr. COATS):

S.J. Res. 293. Joint resolution to designate November 6, 1990, as "National Philanthropy Day"; to the Committee on the Judiciary.

By Mr. PELL (for himself, Mr. KENNEDY, Mrs. KASSEBAUM, Mr. METZENBAUM, Mr. COCHRAN, Mr. HATCH, Mr. DODD, Mr. JEFFORDS, Mr. SIMON, Mr. THURMOND, Ms. MIKULSKI, Mr. COATS, Mr. ADAMS, and Mr. DURENBERGER):

S.J. Res. 294. Joint resolution to designate May 4, 1990, as "Department of Education Day"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. SIMON (for himself, Mr. HUMPHREY, Mr. PELL, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. CRANSTON, Mr. HELMS, and Mr. MITCHELL):

S. Res. 272. Resolution expressing the sense of the Senate regarding the famine in Sudan; to the Committee on Foreign Relations.

By Mr. HATFIELD:

S. Con. Res. 122. Concurrent resolution to establish an Albert Einstein Congressional Fellowship Program; to the Committee on Rules and Administration.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CRANSTON (by request):

S. 2454. A bill to amend title 38, United States Code, to increase the estate limits for certain incompetent institutionalized veterans, and for other purposes, to the Committee on Veterans' Affairs.

VETERANS' PROGRAMS IMPROVEMENT ACT OF 1990

Mr. CRANSTON. Mr. President, as chairman of the Veterans' Affairs Committee, I have today introduced, by request, S. 2454, the proposed Veterans' Programs Improvement Act of 1990. The Secretary of Veterans Affairs submitted this legislation by letter dated April 10, 1990, to the President of the Senate.

My introduction of this measure is in keeping with the policy which I have adopted of generally introducing—so that there will be specific bills to which my colleagues and others may direct their attention and comments—all administration-proposed draft legislation referred to the Veterans' Affairs Committee. Thus, I reserve the right to support or oppose the provisions of, as well as any amendment to, this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point, together with the April 10, 1990, transmittal letter and enclosed section-by-section analysis.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2454

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Veterans' Programs Improvement Act of 1990."

SEC. 2. Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

SEC. 3. Section 3203(b)(1)(A) is amended—

(a) by striking out "$1,500" and inserting in lieu thereof "$4,500"; and

(b) by striking out "$500" and inserting in lieu thereof "$1,500".

SEC. 4. Section 312(c)(3) is amended by striking out all after "radiation-risk activity" and inserting in lieu thereof a period (".").

SEC. 5. Section 3203(a)(1) is amended—

(a) in subparagraph (A), by striking out "third" and inserting in lieu thereof "twelfth";

(b) in subparagraph (B), by striking out "third" and inserting in lieu thereof "twelfth"; and

(c) by adding at the end thereof the following new subparagraph:

"(E) Upon discharge, the amount which would be payable but for subparagraph (A), (B), or (C) of this paragraph shall be paid to the veteran in a lump sum; *Provided, however,* That in no event may such sum exceed the amount of $10,000; and provided further that, pursuant to regulations to be provided by the Secretary, such amount may be made available to such veteran prior to discharge for the sole purpose of facilitating placement of such veteran outside the institution."

THE SECRETARY OF VETERANS AFFAIRS,
Washington, DC, April 10, 1990.

Hon. DAN QUAYLE,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: There is transmitted herewith a draft bill "To amend title 38, United States Code, to increase the estate limits for certain incompetent institutionalized veterans, and for other purposes." I request that this bill be referred to the appropriate committee for prompt consideration and enactment.

The bill has three substantive provisions which would: (1) increase the estate limits for certain incompetent institutionalized veterans; (2) lengthen the presumptive period for service connection for leukemia incurred by participants in certain radiation-risk activities; and (3) liberalize pension-reduction rules for certain veterans in nursing homes and domiciliaries.

INCREASE IN ESTATE LIMITS

Section 3 of the draft bill would increase the estate limits for certain incompetent institutionalized veterans.

Currently, section 3203(b)(1)(A) of title 38, United States Code, requires the Department of Veterans Affairs (VA) to suspend disability compensation or pension payments or emergency officers' retirement pay when a veteran, who has neither spouse nor child and is being furnished hospital treatment or institutional or domiciliary care without charge or otherwise by the United States, or any political subdivision thereof, is rated incompetent by VA, and the veterans' estate from any source equal or exceeds $1,500. The suspension lasts until the estate is reduced to $500.

Section 3 would amend 38 U.S.C. §3203(b)(1)(A) to raise the upper estate limit to $4,500, or approximately three months' benefits at the 100-percent service-connected rate, and raise the lower limit to $1,500, or approximately one month's benefits at the 100-percent service-connected rate.

The "$1,500 rule," as it has come to be known, was enacted to prevent the accumulation of large estates of Federal benefits which would be inherited by persons who had no original entitlement to those benefits during the veteran's lifetime. The current limits are no longer realistic in terms of today's economics or administrative processing. When it was enacted in 1933, the $1,500 estate limitation represented the accumulation of a year or more of benefits. At today's 100-percent service-connected rate, the limit represents only about one month's benefits.

Because of the types of disabilities that result in incompetency ratings, many veterans who are potentially subject to the $1,500 rule are in and out of hospitals and other institutions on a regular basis. Their stays may last a few days or several weeks. Each stay must be reported to the VA regional office of jurisdiction so that a determination can be made by an adjudicator as to whether the veteran's award should be adjusted. The current value of the veteran's estate must be verified by an estate analyst through review of available records or by direct contact with the veteran's fiduciary. In many instances notification that the veteran was institutionalized and notice of verification of the size of the estate may not reach the adjudicator for award adjustment in a timely fashion. Since the payment of one month's benefits at the 100-percent rate will in all likelihood put the veteran over the current income limit, award action will be required to suspend further payments while the veteran is institutionalized. By the time that notification is received and award action taken, more than one month's benefits will have been paid and an overpayment created.

If the veteran continues to be institutionalized, the debt must be collected from the estate. On occasion, a fiduciary will challenge in court the propriety of the debt. Even if VA prevails in court, an administrative cost to the Department and the veteran is incurred. If the veteran is released from institutionalization and the award is reinstated, the debt is collected from the running award. However, in many areas of the country, particularly those where the cost of living is high, it may be difficult for the veterans to reenter the community with limited or no assets as a result of VA's attempt to collect the debt from either the estate or the running award. Further, in many cases, awards are alternately suspended and resumed every other month, compounding the volume of transactions and the potential for overpayments.

Elevating the estate limititation to $4,500 will create an administrative buffer which will decrease the number of award transactions, provide more timely administrative processing thereby decreasing the number of overpayment actions, provide for a reasonable economic base to facilitate the veteran's reentry to the community after institutionalization, and still keep at a relatively low level the value of the estate subject to distribution to remote heirs.

While it would be possible to employ an adjusted benefit rate to deal with this problem—as is done in the case of certain veterans without dependents who are in nursing homes or domiciliaries for more than three months—VA has concluded that such an approach would not be appropriate in this instance. The purpose of the $1,500 rule is to prevent the accumulation of estates composed of Federal benefits that potentially will be inherited by persons who had no original entitlement to those benefits. The estate limitation has nothing to do with the financial needs of the veteran, although it is assumed that the financial needs of a government-institutionalized, incompetent veteran without dependents are greatly reduced. Merely reducing the rate at which funds accumulate would still permit the accumulation of sizable estates in cases of lengthy institutionalization.

As a further protection against the unwarranted accumulation of estates, VA is forwarding under separate cover another draft bill "To amend title 38, United States Code, to limit the amount of funds held by fiduciaries of incompetent veterans subject to inheritance by nondependent heirs." That bill would implement the recommendations made in the VA Inspector General's 1988 report on payments to incompetent veterans. This proposal would limit the amount of accumulated veterans' service-connected compensation payments which could be inherited by nondependent heirs of incompetent veterans by providing that whenever the estate of such a veteran exceeds $25,000, no further payments of compensation will be made until the estate is reduced to

$10,000. Together, these measures would provide both realistic estate limits to institutionalized incompetent veterans and generally limit estate accumulation among incompetent veterans who have no dependent heirs.

Based upon a recent sampling of ten percent of VA's regional offices, we estimate that each month approximately 588 incompetent veterans have their benefits suspended or resumed as a result of the $1,500 rule. Many of these actions result in overpayments and collection actions. We believe that raising the estate-valuation limitations as proposed in section 3 will significantly reduce the number of transactions, overpayments, and collection actions currently attributable to the $1,500 rule. While we are unable to accurately predict whether the administrative savings would fully offset the additional benefit costs associated with this proposal, we believe the proposals more than justified on the grounds that the current limitations are patently unrealistic and are burdensome both to the veterans affected and to VA.

LENGTHENING OF PRESUMPTIVE PERIOD FOR LEUKEMIA

Section 4 of the draft bill would amend 38 U.S.C. § 312(c)(3), regarding presumptive periods for service connection of diseases associated with participation in radiation-risk activities, so that the period in which leukemia must become manifest would be increased from 30 to 40 years.

Current law, 38 U.S.C. § 312(c)(3), provides a presumption of service connection for certain diseases which become manifest to a degree of 10 percent or more within 40 years of participation in a "radiation-risk activity." The term "radiation-risk activity" refers to onsite participation in a nuclear weapons test or certain service in Japan during World War II. In the case of leukemia, however, the condition must have become manifest within 30 years of participation.

A claimant may also seek disability compensation based upon service connection under VA regulations promulgated under the Veterans' Dioxin and Radiation Exposure Compensation Standards Act, Public Law No. 98-542. Those regulations originally provided in 38 C.F.R. § 3.311b(b)(4)(i) that, in order for leukemia to be considered radiogenic, it must become manifest within 30 years of exposure. However, as the result of revised data based on the Life Span Study of the Japanese atomic bomb survivors which showed leukemia arising later in life than originally determined, the Veterans' Advisory Committee on Environmental Hazards has recommended that the time restriction for the manifestation of leukemia be deleted. VA has amended its regulations to incorporate this recommendation. *See* 54 Fed. Reg. 42,802 (1989).

Amendment of 38 U.S.C. § 312(c)(3) as contemplated in the draft bill would eliminate the 30-year manifestation period for leukemia and bring the manifestation period for that disease in line with those for other diseases covered by section 312(c). In the interest of consistency, VA believes that 38 U.S.C. § 312 should be amended to delete the requirement that leukemia become manifest within 30 years of exposure to radiation in order to warrant presumptive service connection. However, because section 312(c) creates presumptions, whereas section 3.311b of VA's regulations merely identifies diseases which may be considered radiogenic, the same open-ended manifestation period now used in the regulation for leukemia need not be incorporated in the statute.

We estimate the benefit cost of section 4 to be less than $1 million in any year. The administrative cost would be less than $100,000 in any year.

LIBERALIZATION OF PENSION REDUCTION PROVISIONS

Section 5 of the draft bill would liberalize pension-reduction provisions applicable to certain veterans without dependents by extending the time period before reduction takes place and permitting payment of withheld benefits upon discharge.

Under current law (38 U.S.C. § 3203(a)), as amended by Section 111 Public Law No. 101-237, disability pension is subject to reduction when a veteran without spouse or child is provided certain institutional care at VA expense. Specifically, when a veteran pensioner without spouse or child is furnished domiciliary or nursing home care by VA, pension may not exceed $90 monthly commencing with the first day of the fourth calendar month following the month of admission for such care. If such a veteran is furnished hospital treatment by VA, pension is not reduced. Upon authorized release from care, payments are resumed from the date of discharge. The veteran is not entitled to payment of the amounts that were withheld.

The reduction provision was originally enacted based on the assumption that, in the case of a veteran without dependents, his or her needs are substantially met by the bed and board received from VA. These provisions, however, have been criticized for many years. Even though institutionalized, the single veteran may have continuing obligations—such as payments on a house, furniture, or an automobile—which often cannot be met while receiving reduced benefits. Thus the current system often leaves a veteran with the difficult choice of remaining in the nursing home or domiciliary until able to function independently, and losing home and personal possessions, or of leaving the institution prematurely in order to meet continuing obligations. If the veteran remains long enough for the reduction to go into effect, the institutional stay may be unnecessarily prolonged since it is difficult to place the veteran back in the community when he or she lacks funds for a security deposit and other expenses.

VA does not believe that abolishing reductions for pensioners in domiciliaries and nursing homes would remedy the basic problems, since there are veterans who are maintained at VA expense for extended periods. However, VA believes that if hardship and unnecessary institutionalization are to be avoided, reductions should be reserved for veterans who will receive extended care from VA for the foreseeable future. We believe that a reduction taking effect upon the expiration of 12 months following admission would serve this purpose.

Further, VA believes that, in the situation where, due to lengthy institutionalization, a veteran's benefits are reduced, the law should be amended to provide that benefits withheld be released upon discharge, as is currently done with old-law pensioners reduced after 6 months. This money would then be available to reestablish the veteran in the community. We know that social workers at VA institutions often find it difficult to place veterans unless there is money available prior to discharge for expenses such as security deposits and first months' rent. To alleviate such problems, section 5 of the draft bill provides that the money withheld may be made available prior to discharge for the sole purpose of facilitating placement outside the institution.

There is concern that in some cases the potentially large sums of withheld benefits which could be released by VA under this proposal would exceed the needs of the veteran and only serve to increase estates which may eventually pass to remote heirs. Section 5 addresses this concern by limiting to $10,000 the maximum amount of withheld benefits which could be released.

Enactment of section 5 would result in an annual cost increase as follows:

Benefit costs

Fiscal year:	*Millions*
1991	$9.0
1992	8.9
1993	8.8
1994	8.7
1995	8.6
Five year total	44.0

The Office of Management and Budget advises that there is no objection from the standpoint of the Administration's program to the submission of this legislative proposal to the Congress.

Sincerely yours,

EDWARD J. DERWINSKI.

Enclosure.

SECTION-BY-SECTION ANALYSIS OF THE VETERANS' PROGRAMS IMPROVEMENT ACT OF 1990

Section 1 establishes the "Veterans' Programs Improvement Act of 1990" as the short title.

Section 2 proves that all references in the bill to an amendment to or repeal of a section or provision shall be considered to be to or of title 38, United States Code, unless otherwise specified.

Section 3 amends 38 U.S.C. § 3203(b)(1)(A) by replacing the amounts "$1,500" and "$500" with "$4,500" and "$1,500", respectively. This amendment would raise the estate limits which apply to certain incompetent institutionalized veterans. Under current law, where an incompetent veteran having neither spouse nor child is being furnished hospital treatment or institutional or domiciliary care at government expense, payments of VA pension or compensation or of emergency officers' retirement pay are suspended when the veteran's estate equals or exceeds $1,500. The suspension continues until the estate is reduced to $500. This amendment would raise those limits to $4,500 and $1,500, respectively.

Section 4 amends 38 U.S.C. § 312(c)(3), relating to diseases associated with participation in tests of nuclear weapons, by striking everything following the phrase "radiation-risk activity" and inserting in lieu thereof a period. As a result of this amendment, leukemia, in order to be considered associated with a radiation-risk activity, must become manifest within 40 years after participation in the activity, rather than the 30 years specified in current law.

Section 5 liberalizes pension-reduction provisions for certain veterans in VA nursing homes and domiciliaries. This section amends 38 U.S.C. § 3203(a)(1) to provide that: (a) no pension in excess of $90 per month could be paid to a veteran having neither spouse nor child who is being furnished domiciliary or nursing home care by VA after the end of the twelfth full calendar month following the month of admission; and (b), upon discharge, the amount which would be payable but for this reduction shall be paid to the veteran in a lump

sum; provided, however, that in no event may such sum exceed the amount of $10,000; and provided further, that, pursuant to regulations to be prescribed by the Secretary, such amounts may be made available to such veteran prior to discharge for the sole purpose of facilitating placement of such veteran outside the institution.

By Mr. CRANSTON (by request):

S. 2455. A bill to amend title 38, United States Code, to provide for recovery by the United States of the cost of medical care and services furnished for a non-service-connected disability, and for other purposes; to the Committee on Veterans' Affairs.

MEDICAL CARE COST RECOVERY AMENDMENTS OF 1990

Mr. CRANSTON. Mr. President, as chairman of the Veterans' Affairs Committee, I have today introduced, by request, S. 2455, the proposed Medical Care Cost Recovery Amendment of 1990. The Secretary of Veterans Affairs submitted this legislation by letter dated April 3, 1990, to the President of the Senate.

My introduction of this measure is in keeping with the policy which I have adopted of generally introducing—so that there will be specific bills to which my colleagues and others may direct their attention and comments—all administration-proposed draft legislation referred to the Veterans' Affairs Committee. Thus, I reserve the right to support or oppose the provisions of, as well as any amendment to, this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point, together with the April 3, 1990, transmittal letter and enclosed section-by-section analysis.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2455

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) This Act may be cited as the "Medical Care Cost Recovery Amendments of 1990".

(b) Except as otherwise specifically provided, whenever in this Act an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

SEC. 2. Subsection 629(a)(2)(D) is amended to read as follows: "(D) that is incurred by a veteran who is entitled to care (or payment of the expense of care) under a health-plan contract.".

SEC. 3. Subsection 629(c)(2)(B) is amended by striking out "in accordance with the prevailing rates at which the third party makes payments under comparable health-plan contracts with", and inserting in lieu thereof "if provided by".

SEC. 4. Subsection 629(g) is amended to read as follows:

"(g)(1) There is established in the Treasury of the United States a separate fund to be known as the Department of Veterans Affairs Third Party Medical Recoveries Fund (hereafter referred to in this section as the "Fund"). The Fund shall be established with collections from third party medical care cost recovery activities and be available to the Secretary, to the extent provided for in advance in appropriations acts, for necessary expenses for the identification, billing, and collection of the cost of care and services furnished under this chapter. Such necessary expenses shall include personnel and administrative costs (including costs of equipment, computer hardware and software, word processing and telecommunications equipment, supplies and furniture, and personnel training and travel), the costs of any contract for identification, billing, or collection services, and any other necessary expenses. The Fund shall also be available to reimburse the Secretary for such services and utilities, including light, water, and heat, as the Secretary may furnish for its activities. Reasonable charges, to be determined by the Secretary, shall be paid by the Fund for the services and utilities so furnished.

"(2) The Secretary may transfer to the Fund in Fiscal Year 1991 from the Medical Care Appropriation such full-time equivalent employees (not to exceed 500 full-time equivalent employees) as have heretofore been devoted to third party medical recovery activities and funded from the Medical Care Appropriation, and sufficient funds to pay the first-year salaries of such employees and related costs (not to exceed $18,600,000).

"(3) By January 1 of each year, there shall be deposited into the Treasury of the United States as miscellaneous receipts an amount equal to the greater of the unappropriated or unobligated balance remaining in the Fund at the close of the prior fiscal year.".

SEC. 5. Subsection 629(i)(1)(A) is amended by adding at the end thereof the following new sentence:

"For purposes of this section, such term includes a Medicare supplemental insurance policy as defined in section 1882(g) of the Social Security Act (42 U.S.C. 1395ss(g)), and with respect to such a policy, Department of Veterans Affairs medical facilities and personnel shall be deemed Medicare-participating providers, and medical services covered by such a policy and furnished by the Department of Veterans Affairs shall be deemed Medicare-covered services.".

SEC. 6. This bill shall take effect on October 1, 1990.

THE SECRETARY OF VETERANS AFFAIRS,
Washington, DC, April 3, 1990.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: Enclosed is a draft bill "To amend title 38, United States Code, to provide for recovery by the United States of the cost of medical care and services furnished for a nonservice-connected disability, and for other purposes."

The measure would permit VA to recover from health insurers the cost of care furnished to a service-connected veteran for treatment of a nonservice-connected disability. Current law limits recoveries to health plan contracts of veterans with no service-connected disabilities.

Under the provisions of 38 U.S.C. § 629, the United States may recover from crime victims' programs, automobile reparations insurance, workers compensation laws, and health insurance plans, the cost of medical care furnished by the Department of Veterans Affairs. Except with respect to health insurance, recoveries may be had from each of these sources, as well as from tort feasors pursuant to the Federal Medical Care Recovery Act, 42 U.S.C. §§ 2651-2653, for the reasonable cost of care furnished for a nonservice-connected disability, whether or not the veteran also has a service-connected disability. The proposal would, therefore, make VA's third party medical care cost recovery program more consistent.

Where a veteran has paid premiums for health care coverage, it is only reasonable that the Government should recover its cost of care from the insurer when the veteran receives the care in a VA facility. This is especially so when, as would be the case, the recovery by the United States has no measurable impact on the veteran.

The proposal would also create a Third Party Medical Recoveries Fund ("the Fund"), to be separate and apart from the Medical Care Account. Amounts collected from third parties would be deposited in the Fund. The costs of identification, billing and collecting, currently funded from the Medical Care Appropriation, would be defrayed instead out of the collections deposited in the Fund, whether such costs were incurred in the use of VA or a contractor's services. Annually, the excess of collections over the lesser of the amount appropriated to or obligated by the Fund would be deposited in the Treasury as miscellaneous receipts.

This provision is designed to remove the current disincentive to vigorous pursuit of these collections because, while recoveries are paid into the Treasury, the VA's cost of collection must come from one of its appropriation accounts, usually the Medical Care Account. The amendment will provide VA the flexibility to choose to contract for services or utilize its own personnel, whichever is more efficient.

The Fund would be initially staffed and funded with up to 500 FTEE and $18.6 million transferred from the Medical Care Account, representing resources currently devoted to third party medical care cost recovery. In addition, the President's Budget has requested that an additional 300 FTEE be added to the program in Fiscal Year 1991. These additional resources are expected to cost $6.4 million, and would be defrayed from collections deposited into the Fund.

The proposal would also clarify the amount of an insurer's liability to VA for the reasonable cost of care furnished for a nonservice-connected disability. Some insurers have insisted on discounting VA's medical care charges without reference to the cost of similar care in the community. As currently drafted, the statute permits the insurer to make payments for care based upon reasonable cost as determined by the Secretary or in accordance with "the prevailing rates at which the third party makes payments under comparable health-plan contracts" with non-Federal facilities in the geographic area. The intent of this provision was to permit the insurer to pay the usual and customary cost of care rather than the VA determined charge when, for example, the cost in the particular medical community was lower, for example, the cost in the particular medical community was lower than the VA charges. The amendment would clearly indicate the insurer's option to pay either the VA determined charges or the amount usually and customarily paid for similar medical services in the community.

Another provision of the draft bill would clarify VA's authority to collect from Medicare supplemental (medigap) insurance policies. Section 629 excludes from the definition of "health-plan contract" the Medicare and Medicaid programs, and VA, therefore, does not submit bills to either program. While many medigap insurers reimburse VA, a number of insurers have taken the position that, because VA may not collect from Medicare, there is no liability on medigap policies. The amendment will make it clear that such policies are, indeed, liable to reimburse VA as if the care had been furnished by a private Medicare provider.

We estimate that enactment of Sections 3 and 5 of the draft bill would have an insignificant impact on recoveries and administrative costs. Enactment of Section 2 of the proposal would result in increased recoveries estimated at $111,570,000 in the first year and $597,033,000 over the first 5 years, with administrative costs to be absorbed within the total resources available for billing and collection activity as provided for the Third Party Medical Recoveries Fund. We estimate that enactment of Section 4 of the draft bill, establishing the Fund, together with approval of the President's Budget request for additional resources, would result in increased recoveries in the first year of $254 million, and $682 million over the first 5 years, with first-year and 5-year increased costs of $6.4 million and $34.2 million, respectively.

The Office of Management and Budget advises that there is no objection to the submission of the proposal to the Congress, and that its enactment would be in accord with the program of the President.

Sincerely yours,

EDWARD J. DERWINSKI.

Enclosures.

SECTION-BY-SECTION ANALYSIS

Section 1(a) of the draft bill states the bill's title: "Medical Care Cost Recovery Amendments of 1990".

Section 1(b) of the draft bill states that except as otherwise specifically provided, whenever in this Act an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

Section 2 of the bill would amend section 629(a)(2)(D) to provide for third-party reimbursement of the United States for the cost of health care and services furnished a service-connected disabled veteran by the Department of Veterans Affairs for treatment of a nonservice-connected disability. The present law applies to a nonservice-connected disability that is incurred by a veteran who is entitled to care under a health-plan contract and who does not have a service-connected disability.

Section 3 of the bill would clarify language in section 629(c)(2)(B) specifying the amount of an insurer's liability to VA for the reasonable cost of medical care or treatment furnished to a veteran who has no service-connected disabilities. As currently drafted, the statute permits the insurer to make payments for care based upon reasonable cost as determined by the Secretary or in accordance with "the prevailing rates at which the third party makes payments under comparable health-plan contracts" with non-Federal facilities in the geographic area. The intent of this provision was to permit the insurer to pay the usual and customary cost of care rather than the VA determined charges when, for example, the cost in the particular medical community was lower than the VA charges. Some insurers, however, have cited this provision as authority to discount the VA determined charges by a percentage as is often done in agreements between Blue Cross and Blue Shield plans and so-called participating or member hospitals. This practice is being employed even where the VA determined charges are less than the usual and customary charge in the private sector (GAO has reported that VA's national per diem rates understate the actual cost of VA care. See Opportunities to Increase VA's Medical Care Cost Recoveries, GAO/HRD-84-31, Feb. 13, 1984). In addition, a number of Blue Cross and Blue Shield plans have insisted that VA agree to discount its charges as a condition to granting VA medical centers member or participating hospital status. While VA medical centers will continue to endeavor to become participating providers with the various Blue Cross and Blue Shield plans, this should have no effect on VA's recovery under the statute. According to the Blue Cross and Blue Shield Association, more than 95 percent of acute care hospitals in the United States are Blue Cross member hospitals (Plain Talk, Blue Cross and Blue Shield Association, 1987). Member hospitals are generally paid a higher percentage of their charges than nonmember hospitals, in accordance with the subscriber's plan. Indeed, in some states, bills from nonmember hospitals are not honored at all. Such provisions in Blue Cross or other insurance plans amount to exclusionary clauses which are prohibited by the statute. The statute provides the insurer with the choice of making payment at the VA determined rate, or, in the alternative, the amount usually and customarily paid for similar services in the community. The alternative amount should be based upon what Blue Cross or other insurer customarily pays to its member hospitals, whether or not the VA medical center has entered into an agreement. This is the approach taken by Empire Blue Cross of New York, as well as a number of other insurers.

Section 4 of the bill would amend section 629(g) to provide for a Third Party Medical Recoveries Fund and would authorize the Department to retain its costs of identification, billing and collection incurred by contracting out from collection services or by utilizing the services of VA employees, to the extent authorized in annual appropriations acts. The Fund may pay the cost of contractors' services, not only for collecting amounts owed the Government, but also for identifying new cases and generating bills for the appropriate third parties. Thus, the limitations on authority to contract under the Debt Collection Act of 1982, as set out in 64 Comp. Gen. 366, are not applicable.

Section 5 of the bill would clarify the VA's authority to collect from Medicare supplemental insurance (medigap) policies. Section 19013 of Public Law 99-272, which reenacted 38 U.S.C. § 629, gave VA authority to collect from health care plans the cost of medical care furnished to veterans with no service-connected disabilities. The Medicare and Medicaid programs, however, were explicitely excluded from the definition of health-plan contract, there being no useful purpose in moving Federal funds from one program to another. Medigap plans are offered to individuals who are eligible for Medicare, and provide reinbursement for the costs of care for which payment may be made under Medicare but which are not reimbursable by reason of deductibles, coinsurance amounts, or other limitations imposed by the Medicare law. While many insurers who offer these plans reimburse VA, a number of insurers have taken the position that, because VA may not collect from Medicare, there is no liability on medigap policies.

The specific reference to Medicare supplemental plans added by the bill is designed to allay any doubts as to whether medigap plans are required to reimburse VA under the program. For purposes of the recovery provisions in section 629, medigap insurers must treat VA medical centers and personnel as if they were non-Federal hospitals and health care providers participating in the Medicare program. The medigap insurer must reimburse VA as if the claim had been previously submitted to and processed under Medicare. If the insurer is unable to determine its liability from the VA bill, it may instead make payment in an amount it can demonstrate to the satisfaction of the Secretary it would pay for the care and services if they had been furnished by a non-Federal Medicare provider.

Section 6 of the bill would make the amendments effective on October 1, 1990.

By Mr. CRANSTON (by request):

S. 2456. A bill to amend title 38, United States Code, to extend expiring laws authorizing the Department of Veterans Affairs to contract for needed care, to revise VA authority to furnish outpatient dental care, and for other purposes; to the Committee on Veterans' Affairs.

VETERANS' MEDICAL CARE AMENDMENTS OF 1990

Mr. CRANSTON. Mr. President, as chairman of the Veterans' Affairs Committee, I have today introduced, by request, S. 2456, the proposed Veterans' Medical Care Amendments of 1990. The Secretary of Veterans Affairs submitted this legislation by letter dated April 3, 1990, to the President of the Senate.

My introduction of this measure is in keeping with the policy which I have adopted of generally introducing—so that there will be specific bills to which my colleagues and others may direct their attention and comments—all administration-proposed draft legislation referred to the Veterans' Affairs Committee. Thus, I reserve the right to support or oppose the provisions of, as well as any amendment to, this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point, together with the April 3, 1990, transmittal letter and enclosed analysis of the bill.

There being no objection, the material was ordered to be printed in the Record, as follows:

S. 2456

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That (a) this Act may be cited as the "Veterans' Medical Care Amendments of 1990".

(b) Except as otherwise expressly provided, whenever in this Act an amendment is expressed in terms of an amendment to a

section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

SEC. 2. Section 111(b)(1) is amended by striking "if, with respect to any fiscal year, the Administrator exercises the authority under this section to make any payments, the Administrator shall" and inserting in lieu thereof "the Secretary may".

SEC. 3. (a) Section 612(b)(1) is amended—

(1) by amending subparagraph (C) by striking", or of a former prisoner of war";

(2) by amending subparagraph (F) to read as follows:

"(F) from which a veteran who is a former prisoner of war is suffering;";

(3) by striking out the period at the end of subparagraph (G) and

(4) by adding at the end the following new subparagraphs:

"(H) from which a veteran of World War I is suffering; or

(I) medically necessary in preparation for hospital admission or for a veteran otherwise receiving care or services under this chapter.".

(b) Section 612(b)(3) is amended—

(1) by striking "$500" and inserting in lieu thereof "$1,000"; and

(2) by adding at the end the following: "The Secretary may periodically review the cost of dental care to determine whether the dollar ceiling contained in this clause remains appropriate to carry out the purposes of this provision, and may adjust that ceiling, as the Secretary determines necessary.".

SEC. 4. Section 620A is amended by striking subsections (e) and (f) and redesignating subsection (g) as subsection (e).

SEC. 5. (a) Sections 632(a) and 632(b)(1) are each amended by striking "September 30, 1990" and inserting in lieu thereof "September 30, 1995".

(b) Section 632(b)(1) is amended by striking "$1,000,000" and inserting in lieu thereof "$500,000".

(c) Section 632(b)(1) is further amended by inserting before the period", of which the first $50,000 of appropriated funds shall be used for the specific purpose of educating and training of personnel of the Veterans Memorial Medical Center".

SEC. 6. Section 4209(c) is amended as follows:

(a) by amendment paragraph (2) to read as follows:

"(2) may convert space furnished under clause (1) of this subsection for use as the child care center without reimbursement;".

(b) by inserting after paragraph (2) the following:

"(3) may provide, on a reimbursable basis, other items necessary for the operation of the center, including furniture, office machines and equipment, and telephone service, except that the Secretary may furnish basic telephone service and surplus furniture and equipment without reimbursement;.

(c) by redesignating paragraphs (3), (4), and (5) as (4), (5), and (6), respectively.

THE SECRETARY OF VETERANS AFFAIRS,
Washington, DC, April 3, 1990.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

Dear Mr. President: There is transmitted herewith, a draft bill "To amend title 38, United States Code, to extend expiring laws authorizing the Department of Veterans Affairs to contract for needed care, to revise VA authority to furnish outpatient dental care, and for other purposes." We request that it be referred to the appropriate committee for prompt consideration and enactment.

The draft bill's major objective is the improvement of VA health care. Among its provisions, the bill would eliminate obstacles to VA's meeting veterans' medical needs.

OUTPATIENT DENTAL CARE

The draft bill contains a number of provisions extending VA outpatient dental care to veterans. First, the proposed bill would enable VA to provide limited outpatient dental services in preparation for surgery and other procedures which could be compromised by dental infection. For example, current law authorizes VA to provide outpatient medical services needed to prepare for a patient's hospital admission, but a statutory limitation on the provision of outpatient dental care precludes VA from furnishing medically-required pre-admission dental procedures. Thus, under existing law, VA must hospitalize patients to be able to perform limited dental work which is medically-needed. Enactment of this provision would reduce the period of hospitalization for such patients and thus avoid costs of some $520,000 for each of the next five fiscal years.

The draft bill would also require VA to obtain a second opinion in instances where the cost of proposed fee-basis dental care for a veteran would exceed $1000. Current law requires a second opinion for procedures over $500. In keeping with the rising cost of medical and dental care, the draft bill would provide for a $1000 ceiling and a periodic adjustment of the limit. By avoiding costly reexaminations, it is anticipated that the proposal would result in avoiding costs of approximately $198,000 annually for each of the next five fiscal years.

A third provision would permit VA to provide dental treatment, where deemed medically essential, for veterans currently in a VA treatment program. Although VA may provide outpatient dental services necessary to complete dental treatment begun incident to hospital care, VA lacks authority to provide dental treatment to other VA patients suffering from dental problems which may compromise their medical health, notably oncology and AIDS patients being treated on an outpatient basis and elderly patients participating in VA Hospital-Based Home Care programs. The current limitations on VA outpatient dental care are costly hospital admissions to assure that medically at-risk patients receive needed dental care. This proposal would avoid those additional costs as well as provide essential dental care to veterans.

Fourth, we propose authorizing VA to furnish outpatient dental care to veterans of World War I. These veterans are all in an advanced age group. The granting of dental benefits would allow them to regain or maintain systemic health functions and maintain a reasonable quality of life in recognition of their service to our Nation. The cost of this provision would be approximately $1 million annually.

Finally, the bill would also authorize VA outpatient dental care to all former prisoners of war. although outpatient medical care is currently authorized for all former prisoners of war. They are not eligible for outpatient dental benefits unless they were incarcerated for 90 days or more or unless the dental problem requiring treatment is service-connected. This proposal would align the scope of dental benefits available to former prisoners of war with the medical benefits now offered these veterans.

EXTEND AUTHORITIES TO VETERANS MEMORIAL MEDICAL CENTER

The proposed legislation would also extend for five more years, until September 30, 1995, the President's authority to enter into contracts with the Veterans Memorial Medical Center (VMMC) in the Philippines. These contracts provide payments for hospital and nursing home care to United States veterans in that hospital. This proposal would also extend for five years the Secretary's authority to make grants of up to $500,000 annually to the VMMC for replacing and upgrading equipment and rehabilitating the hospital's physical plant and facilities. These authorities both expire on September 30, 1990. Lastly, this provision would earmark the first $50,000 appropriated for grants to the VMMC for the specific purpose of educating and training VMMC personnel.

The policy of the United States has long recognized a moral obligation to provide care to Filipino veterans who served in components of the U.S. Armed Services. Congress has consistently renewed its support to help maintain a high standard of medical care to veterans. The authority to provide contract care is still needed to fulfill this obligation to United States veterans. Continuing the grant program is a cost-effective way for the VMMC to meet the needs of its facility, staffing, and equipment. Continuation of these grants would cost $500,000 for each of the next five years, for a total of $2.5 million.

EXTEND CONTRACT ALCOHOL AND DRUG TREATMENT PROGRAM

The bill would extend on an ongoing basis VA's authority to contract for care, treatment, and rehabilitative services in halfway houses and other alcohol or drug treatment facilities for eligible veterans. The VA has had considerable experience with this cost-effective contract program benefiting a core group of veterans, critically deficient in competitive job skills and/or social and family supports. The authority for this program, if not extended, will expire on September 30, 1991. Its major medical advantages—including maintained sobriety and increased employment and monthly income—have long been demonstrated. The program is an important component of VA's treatment milieu for veterans suffering from substance abuse. The estimated cost of this provision is $5.4 million per year for a five-year total of $27 million.

DISCRETIONARY AUTHORITY ON PAYING BENEFICIARY TRAVEL

The draft bill would provide VA with greater discretion to target medical care monies to areas of greatest need by permitting the Secretary to determine the circumstances under which VA would pay veterans for the cost of travel to a VA medical facility. Public Law No. 100-322 provided that "if" the Secretary provides travel payments to almost "any" veterans eligible for travel benefits, then the benefits "shall" be paid to almost all eligible veterans. Therefore, this law foreclosed VA from exercising any reasonable management flexibility by providing that travel payments must be made in almost all cases, or not at all, whether the travel is routine in nature or critical ambulance service.

By vesting more discretion in the Secretary to target the provision of benefits in most compelling situations, such as ambu-

lance travel, this provision would permit more effective management of the resources available to VA's health-care system. We do not anticipate this provision would have any overall budget impact because any savings in travel costs would be used for other health-related services to veterans.

CONVERSION COSTS FOR CHILD CARE CENTERS

The final provision of this bill would facilitate efforts to establish child care centers at VA medical facilities. The availability of child care services at our medical centers is important, particularly in recruiting and retaining qualified medical personnel. Congress provided the Secretary with authority in Public Law No. 100-322 to establish child care centers at VA facilities through the Veterans Canteen Service. This law directs VA to provide the Veterans Canteen Service with existing space in VA facilities for use as child care centers and to give those centers custodial support, utilities, and certain services and amenities needed for the children's health and safety.

VA facilities may also pay the costs of converting the space into a child care center, but the Canteen Service must reimburse the facility for the cost of the conversion. It would appear that this reimbursement may not be repaid over a multi-year period. But because it may take a considerable length of time for the Canteen Service to recoup the monies needed for reimbursement from the revenues it receives from providing child care, the financial burden imposed on the Canteen Service would severely limit its ability to establish child care centers.

This proposal would help alleviate this problem by permitting medical centers to pay for the conversion costs without requiring Canteen Service reimbursement. Permitting medical centers to fund these conversions would greatly enhance VA's ability to establish child care centers.

VA estimates that the cost of conversions would be between $50,000 and $400,000 per center if they are to meet the State and local child care standards, as required by law. Based on the renovation of ten VA facilities per year, we estimate the cost of this provision to be $1.2 million a year, for a five-year estimated cost of $6 million.

The Office of Management and Budget advises that there is no objection to the submission of the draft bill to Congress, and that its enactment would be in accord with the program of the President.

Sincerely yours,

EDWARD J. DERWINSKI.

ANALYSIS OF BILL

Section 1 of the bill designates the proposal as the "Veterans' Medical Care Amendments of 1990" and provides that the bill's amendments to the law would amend title 38, United States Code, unless otherwise expressly stated.

Section 2 would amend section 111(b)(1) of title 38 to provide the Secretary of the Department of Veterans Affairs (VA) with the discretion to determine the circumstances under which the Department would pay the travel expenses of an eligible veteran to obtain health-care or vocational rehabilitation services at a VA medical facility. Current law requires the Secretary to pay for the travel expenses of almost all veterans eligible for these benefits if the Secretary determines that any eligible veteran should receive travel benefits under this section. This provision would not have any overall budget impact because any savings in travel costs would be used for other VA health services or benefits.

Subsection (a) of section 3 would amend section 612(b)(1) of title 38, which authorizes VA outpatient dental care.

First, subsection (a) would authorize the provision of limited outpatient dental care to veterans to prepare a patient for surgery and other procedures which could be compromised by dental infection. Section 612(b)(1) does not authorize dental services needed in preparation for hospitalization. This provision would permit VA to provide limited outpatient dental treatment to veterans when medically required for hospital treatment where the elimination of dental infection or correction of dental conditions is critical to the success of the planned hospital treatment or the welfare of the patient. These patients would be placed in a pre-bed care program for work-up prior to hospitalization, and the limited dental treatment, professionally determined to be essential, would be completed during the period.

At the present time, patients who need this type of limited dental treatment prior to certain types of surgery or other medical treatment are admitted as inpatients and the care is provided under the authority of section 17.129, 38 Code of Federal Regulations. This practice results in longer periods of hospitalization and is more costly to the Department. The extension of dental care in these situations would result in a cost avoidance of $520,000 for the first year and $2.6 million over five years.

Second, subsection (a) would extend VA outpatient dental care to all former prisoners of war. The law currently limits this care to former prisoners of war who were incarcerated for 90 days or more and those whose dental problems are service-connected. This provision would align dental benefits for former prisoners of war with the existing medical benefits now provided to them. The cost of this extension would be insignificant.

Third, subsection (a) would authorize medically necessary outpatient dental care to veterans currently active in a VA treatment program, particularly oncology and AIDS patients receiving care on an outpatient basis, contract nursing home patients, and those receiving VA Hospital Based Home Care (HBHC). Dental problems for these veterans often complicate existing health problems and may compromise the effectiveness of medical care. Those in nursing homes of homebound are particularly at risk because they typically are older and functionally impaired. The law's limitations on eligibility for dental care in effect encourage costly hospital admissions to assure that medically at-risk patients receive needed dental care. Enactment of this provision would avoid unnecessary costs which might otherwise arise from unnecessary hospital admissions.

Finally, subsection (a) would extend outpatient dental care to veterans of World War I. The veterans of this conflict are in an advanced age group. Granting this benefit would allow them to regain or maintain systemic health functions, maintain a reasonable quality of life, and have the dignity of being granted dental benefits in recognition of their service to their country. This extension would cost approximately $1 million per year for a five-year cost of $6.5 million.

Subsection (b) of section 3 would amend section 612(b)(3) of title 38 to require VA to obtain a second opinion in instances where the cost of proposed dental care for a veteran by a fee-basis practitioner would exceed $1,000. Current law requires a second opinion for procedures over $500. The increase in this ceiling amount to $1,000 would be in keeping with the rising costs of medical and dental care. Further, to avoid the cost and inconvenience of requiring a second opinion, the opinion provides for periodic review and adjustment of the ceiling amount. Approximately 11,000 VA patients undergo these required costly reexaminations annually. It is anticipated that the proposed amendment would reduce that number to 2,000. This would result in avoiding cost to VA of approximately $198,000 a year, and approximately $990,000 over five years.

Section 4 would amend section 620A of title 38 to provide ongoing authority for the pilot program under which VA is authorized to contract for care, treatment, and rehabilitative services in halfway houses, therapeutic communities, psychiatric residential treatment centers, and other community-based treatment facilities for eligible veterans suffering from alcohol or drug dependence or abuse disabilities. It would also eliminate the requirement in subsection (f) of section 620A for costly special evaluations of the program which are not cost-effective based on the proven record of success of the program. Enactment of section 4 would cost approximately $5.4 million per year for a five-year cost of $27 million.

Section 5 would amend section 632 of title 38 to extend the authority of VA to provide contract care to United States veterans in the Veterans Memorial Medical Center in the Republic of the Philippines for an additional five years, to September 30, 1995. It would also extend to that date the VA authority to make grants of up to $500,000 annually to that facility for the purpose of replacing and upgrading equipment and rehabilitating the physical plant and facilities. Section 5 would further provide that the first $50,000 of grants appropriated for the hospital shall be earmarked for educating and training hospital personnel. Grants authorized by section 5 would be $500,000 a year for a five-year total of $2.5 million.

Section 6 would amend section 4209 of title 38, which authorizes VA to establish, under the Veterans Canteen Service, child care centers at VA medical centers. It would specifically amend subsection (c) to authorize medical centers to convert space at their facility for child care purposes without requiring reimbursement for the cost of conversion from the Veterans Canteen Service. This provision would cost an estimated $1.2 million a year for a five-year cost of $6 million.

By Mr. CRANSTON (by request):

S. 2457. A bill to amend title 38, United States Code, to revise the copayment formulas for those non-service-connected veterans with the means to contribute toward the cost of their care; to the Committee on Veterans' Affairs.

INCREASED COPAYMENTS FOR NON-SERVICE-DISABLED VETERANS RECEIVING VA CARE

Mr. CRANSTON. Mr. President, as chairman of the Veterans' Affairs Committee, I have today introduced, by request, S. 2457, a bill to expand the requirements for certain non-service-disabled veterans to make copayments for Department of Veterans Affairs care. The Secretary of Veterans Affairs submitted this legislation by

letter dated March 20, 1990, to the President of the Senate.

My introduction of this measure is in keeping with the policy which I have adopted of generally introducing—so that there will be specific bills to which my colleagues and others may direct their attention and comments—all administration-proposed draft legislation referred to the Veterans' Affairs Committee. Thus, I reserve the right to support or oppose the provisions of, as well as any amendment to, this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point, together with the March 20, 1990, transmittal letter and enclosed analysis of the proposed bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2457

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That except as otherwise expressly provided, whenever in this Act an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

SEC. 2. (a) Section 610 is amended—

(1) by redesignating subsections (f) and (g) as (g) and (h), respectively; and

(2) by adding a new subsection (f) to read as follows:

"(f)(1) The Secretary may not furnish hospital care or nursing home care under this section to a veteran who is eligible for such care under subsection (a)(2)(A) of this section unless the veteran agrees to pay to the United States the applicable amount determined under paragraph (2) of this subsection.

"(2) A veteran who is furnished hospital care or nursing home care under this section and who is required under paragraph (1) of this subsection to agree to pay an amount to the United States in order to be furnished such care shall be liable to the United States for an amount equal to $9 for each day the veteran receives hospital or nursing home care.".

(b) Section 610(a) is amended—

(1) by striking the period at the end of paragraph (2)(A) and inserting in lieu thereof "subject to the provisions of subsection (f) of this section."; and

(2) by striking (f) in paragraph (2)(B) and inserting in lieu thereof "(g)".

(c) Section 610(g)(1) (as so redesignated) is amended by striking "by reason of" and inserting in lieu thereof "under".

(d) Section 610(g) (as so redesignated) is amended by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) A veteran who is furnished hospital care or nursing home care under this section and who is required under paragraph (1) of this subsection to agree to pay an amount to the United States in order to be furnished such care shall be liable to the United States for an amount equal to—

"(A) the lesser of—

"(i) the cost of furnishing such care, as determined by the Secretary, and

"(ii) the amount determined under paragraph (3) of this subsection; and

"(B) an amount equal to $9 for every day the veteran receives hospital or nursing home care after that number of days considered in determining the amount the veteran is liable for under subparagraph (A); and

"(C) effective on January 1 of each year, the amount in effect under clause (B) of this paragraph shall be increased by the percentage increase (if any) in the Consumer Price Index of all Urban Consumers (as published by the Bureau of Labor Statistics of the Department of Labor) for the 12-month period ending on the previous November 30th.".

(e) Subparagraphs (A) and (B) of section 610(g)(3) (as so redesignated) are amended by striking "(2)(B)" each place it appears and inserting in lieu thereof "(2)(A)(ii)".

(f) Section 610(g)(3)(E) (as so redesignated) is amended—

(1) by inserting "paragraph (2)(A) of" after the words "payment under" and after the words "veteran under";

(2) by striking "612(f)" and inserting in lieu thereof "612(g)(2)(A)"; and

(3) by striking "612(f)(4)" and inserting in lieu thereof "612(g)(4)".

(g) Section 610(g)(3)(F) (as so redesignated) is amended—

(1) by adding "paragraph (2)(A) of" after the word "under"; and

(2) by striking "612(f)" and inserting in lieu thereof "612(g)(2)(A)".

SEC. 3. (a) Section 612 is amended—

(1) by redesignating subsection (f) as subsection (g); and

(2) by adding a new subsection (f) to read as follows:

"(f)(1) The Secretary may not furnish medical services under this section (including home health services under section 617 of this title) to a veteran who is eligible for hospital care by reason of section 610(a)(2)(A) of this title unless the veteran agrees to pay to the United States the amount determined under paragraph (2) of this subsection.

"(2) A veteran who is furnished medical services under this section and who is required under paragraph (1) of this subsection to agree to pay an amount to the United States in order to be furnished such services shall be liable to the United States for an amount equal to $5 for each outpatient visit.".

(b) Section 612(a)(4) is amended by striking "subsection (f)" and inserting in lieu thereof "subsections (f) and (g)".

(c) Section 612(g) (as so redesignated) is amended by striking paragraph (2) and inserting in lieu thereof the following:

"(2) A veteran who is furnished medical services under subsection (a) of this section and who is required under paragraph (1) of this subsection to agree to pay an amount to the United States in order to be furnished such services shall be liable to the United States, in the case of each visit in which such services are furnished to the veteran, for—

"(A) an amount equal to 20 percent of the estimated average cost (during the calendar year in which the services are furnished) of an outpatient visit in a Department of Veterans Affairs facility, to be determined by the Secretary, and;

"(B) an amount equal to $10 for each outpatient visit the veteran receives for which the veteran is not liable for payment under subparagraph (A) of this paragraph by reason of paragraph (3) or (4) of this subsection.".

(d) Section 612(g)(3) (as so redesignated) is amended by inserting "paragraph (2)(A) of" after "payment under" and after "veteran under".

(e) Section 612(g)(4) (as so redesignated) is amended by inserting "paragraph (2)(A) of" after the words "payment under".

(f) Section 612(g) (as so redesignated) is amended by striking "610(f)" in paragraphs (3) and (4) and inserting in lieu thereof "610(g)(2)(A)".

(g) Section 612 is further amended—

(1) by redesignating subsections (h), (i), and (j) as (j), (k), and (l), respectively; and

(2) by adding new subsections (h) and (i) to read as follows:

"(h)(1) The Secretary may not furnish a prescription drug under this section to a veteran who is eligible for hospital care by reason of section 610(a)(2)(A) or 610(a)(2)(B) of this title unless the veteran agrees to pay to the United States, in addition to such amounts as are provided for in subsections (f) and (g) of this section, an amount determined under paragraph (2) or (3) of this subsection.

"(2) A veteran eligible for hospital care under section 610(a)(2)(A) who is furnished a prescription drug under this section and who is required under paragraph (1) of this subsection to agree to pay an amount to the United States in order to be furnished such prescription drug shall be liable to the United States for an amount equal to $3 for each such prescription drug.

"(3) A veteran eligible for hospital care under section 610(a)(2)(B) who is furnished a prescription drug under this section and who is required under paragraph (1) of this subsection to agree to pay an amount to the United States in order to be furnished such prescription drug shall be liable to the United States for an amount equal to $5 for each such prescription drug.

"(i) effective on January 1 of each year, the amount in effect under subsections (f)(2), (g)(2)(B), (h)(2) and (h)(3) of this section shall be inceased by the percentage increase (if any) in the Consumer Price Index of all Urban Consumers (as published by the Bureau of Labor Statistics of the Department of Labor) for the 12-month period ending on the previous November 30th.".

THE SECRETARY OF VETERANS AFFAIRS,
Washington, DC, March 20, 1990.

Hon. DAN QUAYLE,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: There is transmitted herewith a draft bill "To amend title 38, United States Code, to revise the copayment formulas for those nonservice-connected veterans with the means to contribute toward the cost of their care." We request that it be introduced so that it may be considered for enactment.

In recent years, Congress revised VA health-care eligibility provisions, expanding eligibility, and directing that VA furnish necessary care, both hospitalization and outpatient treatment, to several categories of veterans, principally those with service-connected disabilities, and those with the greatest financial need. In defining health care eligibility, Congress has long drawn distinctions among veterans both in terms of service-connected status and income. With the new laws governing eligibility, Congress sharpened the distinctions in existing law, requiring that VA generally differentiate among three broad groups of veterans: those to whom VA "shall" provide care, those whom Congress has simply authorized VA to treat, and those whose eligibility turns both of their agreement to make a

specified payment toward their care and on resources and facilities being otherwise available. The third eligibility tier, those nonservice-connected veterans in the highest income category, generally were not previously eligible under law for VA care. In making them eligible for care, Congress determined that those so-called "category C" veterans had the means to pay for part of their care through a deductible linked to the Medicare program.

With the rising cost of medical care, and recognition that only limited resources are available to care for those with higher incomes (who thus have lower statutory priority), it is appropriate and indeed necessary, to partially offset those costs through revisions to the existing copayment formulas. Thus, we propose amendments in our draft bill to require veterans without service-connected disabilities who are in middle or higher income categories (categories B and C), to make a nominal copayment per outpatient visit ($5 and $10) and prescription ($3 and $5); and to make a nominal per diem payment ($9) for inpatient treatment. These charges are analogous to Medicare part B copayments for outpatient and inpatient doctor visits and, in our view, represent an equitable extension of a cost-sharing concept developed by the Congress.

In proposing extension of the copayment concept to "category B" veterans, we have taken notice of the fact that the income threshold for placement in that eligibility category has risen steadily since 1986. Thus, under existing law, a typical married veteran with two children is placed in category B, and is eligible for cost-free care, if annual income is between $22,989 and $31,033. That is an income which would generally not be considered insubstantial. Moreover, under existing law, VA may provide care to category B veterans only to the extent that resources are available. It is reasonable to expect such veterans who seek VA care to make a modest copayment in exchange for care.

We estimate that enactment of the draft bill would result in collections amounting to approximately $30.0 million in Fiscal Year 1991, and approximately $150.0 million over five fiscal years. These receipts to the government are included in the President's Fiscal Year 1991 budget.

The Office of Management and Budget advises that there is no objection to the submission of this legislative proposal and that its enactment would be in accord with the program of the President.

Sincerely yours,

EDWARD J. DERWINSKI.

ANALYSIS OF PROPOSED BILL

Section 2 would amend 38 U.S.C. § 610 to require that nonservice-connected veterans in eligibility Categories B and C (those eligible by virtue of 38 U.S.C. §§ 610(a)(2)(A) and 610(a)(2)(B)) pay a $9 copayment for each day of inpatient care they receive from the VA. For those veterans in eligibility category B, the payment would be required for every day of care. For the higher income category C veterans now eligible for care only if they agree to pay a copayment, the new per diem payment would be in addition to the copayment they must agree to pay to receive inpatient care under existing law. Category C veterans must now agree to pay the full cost of the inpatient care they receive up to the "Medicare deductible." Although that deductible varies from year to year, a veteran generally reaches the deductible after the first two days of inpatient care in a VA facility. Category C veterans would be liable for the new $9 per diem payment only for days of care after those days of care used in calculating the existing copayment. Assuming the current cost of care, and the current Medicare deductible, the $9 copayment would apply to category C veterans beginning on the third day of inpatient care, and would continue for every day in any given quarter. At the beginning of a new quarter, a new Medicare deductible would be satisfied, and then the $9 per diem would begin against. The per diem copayment would be increased each January 1st by the percent change in the Consumer Price Index.

The proposed new copayments would be a mechanism by which those veterans who were not injured during their service, and who are best able to afford care, could help defray the ever escalating cost of VA-provided health-care. Those veterans to whom VA "shall" provide inpatient care under 38 U.S.C. § 610(a), e.g., service-connected veterans, former prisoners of war, World War I veterans, and those who may have been exposed to radiation or Agent Orange during service, would not be liable for any copayment. Those individuals with incomes placing them in eligibility category B can reasonably be expected to make a modest contribution toward the cost of care for their nonservice-connected disabilities, and those in category C can be expected to make a somewhat greater contribution toward their care than is now the case.

Section 4 would amend 38 U.S.C. § 612 to require a new copayment for each outpatient visit made by a nonservice-connected veteran in hospital eligibility category B or C (those eligible for hospital care by virtue of 38 U.S.C. §§ 610(a)(2)(A) and 610(a)(2)(B)). It would impose a $5 per visit copayment for category B veterans, and a $10 per visit copayment for category C veterans. The copayments would be increased each January 1st by the percent change in the Consumer Price Index. For those veterans in eligibility category B, the copayment would be required for every outpatient visit. The higher income category C veterans would be liable for the new payment only after they have satisfied the copayment requirements imposed by current law. Those individuals are now liable, during any quarter, for 20 percent of the cost of each outpatient visit until they have agreed to pay an amount equal to the "Medicare deductible." The new $10 copayment would apply only to outpatients visits for which the veteran is not liable for the 20 percent copayment. As with the new inpatient per diem copayment which section 3 of the bill would impose, the new per visit copayments would constitute a modest and reasonable contribution to the cost of care furnished to those veterans by the VA.

Section 3 would also amend 38 U.S.C. § 612 to require a new copayment for each prescription drug furnished on an outpatient basis to a nonservice-connected veteran in hospital eligibility category B or C (those eligible for hospital care by virtue of 38 U.S.C. §§ 610(a)(2)(A) and 610(a)(2)(B)). It would impose a $3 per prescription copayment for category B veterans, and a $5 per prescription copayment for category C veterans. The copayments would be increased each January 1st by the percent change in the Consumer Price Index. As with the new copayments which sections 3 and 4 of the bill would impose on those veterans when they seek inpatient or outpatient care, the new per prescription copayments would constitute a modest and reasonable contribution to the cost of care furnished by the Government.

By Mr. CRANSTON (by request):

S. 2458. A bill to amend title 38, United States Code, to improve the pay system for registered nurses employed by the Veterans Health Services and Research Administration, and for other purposes; to the Committee on Veterans' Affairs.

VETERANS NURSE PAY ACT

Mr. CRANSTON. Mr. President, as chairman of the Veterans' Affairs Committee, I have today introduced, by request, S. 2458, the proposed Veterans Nurse Pay Act of 1990. The Secretary of Veterans Affairs submitted this legislation by letter dated April 9, 1990, to the President of the Senate.

My introduction of this measure is in keeping with the policy which I have adopted of generally introducing—so that there will be specific bills to which my colleagues and others may direct their attention and comments—all Administration-proposed draft legislation referred to the Veterans' Affairs Committee. Thus, I reserve the right to support or oppose the provisions of, as well as any amendment to, this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point, together with the April 9, 1990, transmittal letter and enclosed documents entitled "Principal Features of Draft Bill," and "Section-by-Section Analysis."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2458

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Veterans Nurse Pay Act of 1990."

SEC. 2. Except as otherwise expressly provided, whenever, in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

SEC. 3. Section 4107 is amended as follows:

(a) Subsection (b)(1) is amended by striking out "The" at the beginning of such subsection and inserting in lieu thereof "Except in the case of basic pay increased under paragraph (3), the".

(b) A new paragraph is added at the end of subsection (b) as follows:

"(3)(A)(i) In accordance with regulations promulgated by the Secretary, the director of each Department health-care facility shall, with respect to nurse positions provided for in paragraph (1) of section 4104 of this title, review rates of basic pay paid by comparable non-Department health-care facilities within the same labor market as the Department facility.

(ii) Where feasible, such reviews will be based solely on survey data compiled by the Bureau of Labor Statistics of the Department of Labor. Such surveys shall be con-

ducted in accordance with established practice. Where the use of Bureau of Labor Statistics data is not possible, the facility shall conduct a survey of such basic pay rates and may consider available information from any source, including other Government agencies.

(iii) Such regulations shall further provide that the basic pay reviews will be conducted on an annual basis, or at more or less frequent intervals when conditions, as determined by the Secretary, so warrant.

"(B)(i) If the Bureau of Labor Statistics or Department survey shows that the rate of basic pay for comparable positions at the non-Department health-care facilities in the particular labor market are greater than the rate of basic pay for the Junior, Associate, Full or Intermediate grades at the Department health-care facility(ies), the Secretary may increase the rate of basic pay for those grades to be competitive with, but not to exceed, the rate of basic pay at the non-Department facilities.

(ii) In determining competitive rates under this subsection, the Secretary will take into consideration such factors as (I) turnover and vacancy rates, as well as patterns of career progression; (II) unemployment rates and trends in local areas; (III) indicators of trends in the quality of registered nursing personnel; (IV) the ability of the Department to fund such rates.

"(C)(i) If the rate of basic pay is increased for the Intermediate grade at a Department health care facility pursuant to subparagraph (B), the Secretary may authorize an increase in the rates of basic pay for the Senior, Chief, Assistant Director and Director grades at that facility so that the percentage of intergrade increase for such grades shall be the same as the percentage of intergrade increase for such grades under the national nurse pay schedule prescribed in paragraph (1);

"(ii) if the rate of basic pay is not increased for the Intermediate grade at a Department health-care facility pursuant to subparagraph (B), the rate of basic pay for the Senior, Chief, Assistant Director and Director grades at that facility shall be as prescribed in paragraph (1).

"(D) Increases in the rate of basic pay under this paragraph shall be effective on such date as the Secretary may prescribe, but no later than 90 days following release of the Bureau of Labor Statistics or Department survey data for such labor market.

"(E) Nothing in this paragraph affects the authority to increase the rates of basic pay provided by subsection (g). Where feasible and cost effective, the rates of basic pay increased pursunt to subsection (g) shall be based solely on data compiled by the Bureau of Labor Statistics.

"(F) An employee who is paid a rate of basic pay established under this paragraph and who is transferred at the same grade (voluntarily or otherwise) from one Department health-care facility to another Department health-care facility shall be paid the rate of basic pay in effect at the health-care facility to which the employee is transferred for the same grade and the same step within that grade as was applicable to that employee immediately before the transfer.".

(c) Subsection (e) is amended as follows:

(1) in paragraph (1), (A) by inserting "or (b)(3)" after "subsection (b)(1)"; and (B) by striking out "(8)" and inserting "(9)" in lieu thereof.

(2) in paragraph (5) by striking out in the first sentence", not to exceed one and one-half times the hourly rate of basic pay for the minimum rate of the Intermediate grade of the Nurse Schedule", and by inserting after the first sentence the following: "Nurse managers and supervisors, other than head nurses, may not receive pay for overtime service under the preceding sentence.".

(3) in paragraph (6) by striking out "or (5)" and inserting, "(5) or (9)(A)" in lieu thereof.

(4) paragraph "(9)" is redesignated as paragraph "(11)" and is further amended by inserting "84," after "83,";

(5) by adding after paragraph (8) the following:

"(9)(A) A nurse shall be paid additional pay equal to 6 percent of the nurse's hourly rate of basic pay for each hour of service as a head nurse. The preceding sentence shall apply only to nurses who are assigned to perform service as head nurses for a period of 30 consecutive days or more;

"(B) The Secretary may pay incentive pay to any nurse serving as Chief of Nursing Service at a Department health-care facility and, as determined as appropriate under regulations prescribed by the Secretary, any nurse paid at the Director grade or above. Such incentive pay shall be not less than 2 percent nor more than 6 percent of such nurse's annual rate of basic pay.".

(d) Subsection (g)(3) is amended by striking out all that follows "(3)" and by inserting in lieu thereof:

"(A) The director of a Department health-care facility may, under regulations prescribed by the Secretary, increase rates of basic pay pursuant to paragraph (1) not to exceed the twenty-eighth step of the grade;

(B) only the Secretary or designee may increase rates of basic pay pursuant to paragraph (1) in excess of the twenty-eight step of the grade, as prescribed in the Secretary's regulations;

(C) any rate of basic pay increased pursuant to paragraph (1) may not exceed the rate of basic pay for individuals serving as Assistant Chief Medical Director.".

(e) The following is added at the end thereof:

"(k) The Secretary or designee may, for nurses employed on an intermittent or fee basis, grant an exception to the reduction in the pay of a reemployed annuitant required by sections 8344(a) and/or 8468(a) of title 5; such exception may be granted only upon a determination that there are special or emergency employment needs resulting from a severe shortage of well-qualified nurses which otherwise cannot readily be met.".

SEC. 4. EFFECTIVE DATE.—The amendments made by this Act shall take effect on October 1, 1990.

THE SECRETARY OF VETERANS AFFAIRS,
Washington, DC, April 9, 1990.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: There is transmitted herewith, a draft bill "To amend title 38, United States Code, to improve the pay system for registered nurses employed by the Veterans Health Services and Research Administration, and for other purposes" with the request that it be referred to the appropriate committee for prompt consideration and favorable action.

This proposed legislation would revise the statutory pay system for registered nurses so as to enhance the Department's ability to compete with other employers for registered nurses. The draft bill would accomplish this by partially converting the pay system to a community-based pay system, would introduce more flexibility and decentralization into the current pay system so as to better target resources to areas of need, and would add pay incentives for nurse managers and supervisors.

During the 1970's the nation began to experience a shortage of registered nurses in its hospitals. The increased demand for skilled care by registered nurses in all phases of medical care has created the need for more nurses. However, the available pool of registered nurses has not kept pace. This has resulted in a shortage of registered nurses in various parts of the country.

To assist the Department in attracting and retaining these critically important health-care workers the Congress has granted VA some degree of pay flexibility and the authority to establish special higher salary rates where needed for VA salaries to be competitive. However, the demand for increased numbers of registered nurses has continued, and VA increasingly has had to utilize the authority to establish special higher salaries to remain competitive. For example, VA was paying special rates at 89 medical centers (53.6 percent) in May 1986, at 117 medical centers (70.5 percent) by July 1988, and at 130 medical centers (78.3 percent) by March 1989. Even with the special rates, VA has not been able to offer competitive salaries at certain geographic locations (e.g., Boston, Southern California, New York City). Thus, the statutory VA salary system is no longer competitive.

In light of these circumstances, the subject of nurse pay has generated strong interest in both the House of Representatives and the Senate. In addition, VA formed a Nurse Pay Task Force to review this matter. The proposed legislation which we are forwarding represents, we believe, the best and most cost effective measures to resolve this situation. In developing these proposals we have taken into consideration the provisions of H.R. 1199, "The Veterans Nurse Pay Act of 1989," and S. 947, "The Veterans Health-Care Personnel Act of 1989," as incorporated in S. 13. Both H.R. 1199 and S. 13 contain features which are meritorious; overall, however, the solutions proposed by them are less than ideal. Our proposal presents an alternative approach which better addresses our needs. It is based on the work of the Nurse Pay Task Force. We also reviewed the findings of a major study on the effects of pay and other personnel management practices, conducted by a private contractor in response to section 231 of Public Law 100-322.

The Department's bill would be effective October 1, 1990, in order to coordinate the bill's costs with FY 1991. The principal features of the draft bill and a comparison with the provisions of H.R. 1199 and S. 13 are outlined in the enclosure.

The Office of Management and Budget advises that there is no objection to submission to Congress of this legislation and that its enactment would be in accord with the program of the President.

Sincerely yours,

EDWARD J. DERWINSKI.

Enclosures.

PRINCIPAL FEATURES OF DRAFT BILL

The primary change proposed by the Department's draft bill is a revision of the registered nurse pay system in section 4107(b). Currently, that section provides for a national pay schedule comprised of eight grades, with pay set by administrative action pursuant to 5 U.S.C. § 5305. It gener-

ally corresponds to pay set for the General Schedule. The draft bill would add a new subsection (b)(3) which would add authority for an alternative partial community-based pay system. Under this new system, the first four pay grades (Junior, Associate, Full and Intermediate) could be based on community pay rates, determined through a local review of rates of basic pay paid by comparable non-VA health-care facilities in the same labor market, if necessary to keep VA as a competitive employer of registered nurses. Where feasible, this review would be based solely on survey data compiled by the Bureau of Labor Statistics of the Department of Labor (BLS). Where the use of BLS data is not possible, the bill would authorize VA to conduct the survey of basic pay rates and the VA could consider available information from any source, including other Government agencies.

This new subsection would empower the Secretary to authorize increases for the Junior, Associate, Full and Intermediate grades at VA Medical Centers in particular labor markets, in place of pay under the national pay schedule, if the survey shows that the community basic rate of pay exceeds the basic rate of pay for those grades in the national pay schedule. These increased pay rates would remain in effect unless further adjusted pursuant to a subsequent survey. If the basic rate of pay at the Intermediate grade is increased at a particular VA Medical Center, the basic rates of pay for the upper grades (Senior, Chief, Assistant Director and Director) also could be increased to retain the intergrade differentials of the national pay schedule. However, if the basic rate of pay for Intermediate grade is not increased and thus remains consistent with the national pay schedule, then the upper grades would continue to be paid under the national schedule. Where community rates are higher for small groups (e.g. nurse anesthetists) existing authority to establish special rates would be utilized. VA would use BLS data in establishing such special rates, unless BLS did not have the needed data, or could not provide it in a timely manner or without major difficulty or cost. In such situations, VA would obtain the data. In addition, in determining competitive rates, VA is to consider employment trends and availability of funds. In locations where the local surveys show that the national pay schedule is competitive overall, then that schedule will be used, and special rates would be authorized for any special cases.

The Department's proposal addresses the primary weaknesses of the existing VA registered nurse pay system: localized non-competitive rates and pay compression. Both the VA Nurse Pay Task Force and the contractor study (conducted pursuant to Public Law No. 100-322) found that VA's basic rates of pay as prescribed in the national pay schedule generally were non-competitive at the entry to staff nurse level; however, the degree of adjustment, through higher than minimum entrance rates or special salary rates, needed to attain competitiveness varied considerably according to locality. Moreover, by mandating the use of BLS data when feasible, the draft bill assures that VA will act on objective data in making its determination on whether competing local pay rates require a higher VA pay rate in that geographic area. VA will work with BLS to assure that the data collected will enable VA to make these determinations. However, where use to BLS data is not feasible, the draft bill would authorize VA to compile the data necessary to make a determination.

This proposal would invest VA with the capability of meeting the competition at the local level where it is needed and to do so in amounts needed to assure competitiveness. At the same time, under this proposal VA rates would not rise above levels needed to assure competitiveness. Moreover, this proposal addresses the problem of pay compression. The contractor study found that although the widespread use of special salary rates was necessary to be competitive at the lower grades, such use has resulted in increased pay compression at affected facilities. The draft bill would help to alleviate the compression by trying the rate for the four lower grades to community rates and by maintaining intergrade differentials at the higher grades when the Intermediate grade rises above the national pay schedule.

In our view, this approach more effectively addresses the areas in which the VA nurse pay schedule needs revision than H.R. 1199 or S. 13. H.R. 1199 would compress the existing eight grade structure into four grades, which would overlap to some extent and correspond to certain grades in the General Schedule. The pay rates for each of the "new" grades would encompass two of the existing nurse pay grades, but would raise the maximum rate by roughly one GS grade. While the smaller number of grades and "pay banding" have some attractive features, we believe that H.R. 1199 would be more expensive and less flexible than is needed for VA to compete for nurses. In the first place, because the pay grades would apply across the board, VA could be required to pay nurses at some locations more than comparable non-VA employers, e.g. in communities where no recruitment or retention problems exist. As we noted in connection with our proposal, pay at the entry and staff nurse levels are subject to wide variations according to locality.

Another provision of H.R. 1199 would authorize directors of VA medical facilities to appoint individuals above the minimum rate of the grade under criteria similar to that contained in section 4107(g). If this provision is intended to delegate fully the section 4107(g) authority for special rates to medical center directors, it falls short of the mark. Section 4107(g) authorizes two types of special higher pay rates: (1) above minimum entrance rates for new appointees and existing employees (i.e., the minimum rate of the grade is set anywhere from step 2 to step 10; however, the maximum rate of the grade is not increased); and special salary rate ranges for existing employees (i.e., the entire 10-step pay range for a particular grade is increased from 1 to 9 steps). H.R. 1199 contains provisions involving the former for new appointees but not existing employees, and does not include the latter. In any event, VA-planned administrative actions already include delegation of the section 4107(g) special rate authority to a more appropriate level.

H.R. 1199 also provides for biennial within grade step advancements based on acceptable or better performance and for within-grade step advancements for certain achievement. VA-planned administrative actions already include greater flexibility in allowing within grade step advancements based on performance and achievement.

The Department's draft bill also would expand VA's authority to establish special salary rate ranges by removing the ceiling which limits increases to the equivalent of the current administratively-established 19th step. Under the draft bill, VA medical center directors may approve special salary rate ranges up to the new statutory 28th step, and the Secretary or designee may approve them above that step. The draft bill retains the overall limit in existing law which provides that these special ranges may not exceed the basic rate of pay set for Assistant Chief Medical Director. The existing 19th step cap prevents VA from being competitive in a limited number of very high salary areas. This provision would give VA the flexibility needed to meet high salary competition in certain areas or for specific types of positions. Given the flexibility of the partial community-based salary system, we anticipate that special rates will be the exception for registered nurses instead of the rule as they are now.

In addition, the Department's draft bill would remove the existing cap on overtime pay, which is one and one-half times the Intermediate grade, step one, for staff nurses and head nurses. This cap on overtime pay rates has been a disincentive to recruitment and retention. Because of the cap, some nurses are paid less for overtime than their regular pay rate. Similar provisions are in H.R. 1199 and S. 13.

Also, the Department's draft bill would add several forms of monetary recognition. First, is additional premium pay of six percent for head nurses. Currently, there is no recognition in the pay system for the duties performed by head nurses. This provision is similar to the one in S. 13; however, S. 13 treats this additional pay as basic pay. The Department's proposal, consistent with treatment of other forms of additional pay under subsection (e), treats this additional pay as premium pay. Also, under the Department's proposal, this additional pay would be paid only so long as an individual performs head nurse duties.

The draft bill would authorize incentive pay for Chief Nurses and other nurse executives. This incentive bonus could range from two to six percent of basic pay. Its purpose is to further recognize the VA nurse executive, relieve pay compression, and make VA salaries for these positions more competitive. Competing health-care employers are providing large compensation packages to executive nurses in positions comparable to VA Chief Nurses.

H.R. 1199 provides for cash awards and step "promotions" in grade when a medical facility director determines "that a nurse has qualifications, experience, or achievement which the Director determines exceeds the standards for the nurse's grade." S. 13 would provide a one percent lump-sum pay increase to nurses who become recertified, provided their proficiency rating is satisfactory or better. The Senate bill also establishes a cash award program for managers and supervisors appointed under 38 U.S.C. 4104(1). Under that proposal, no more than 20 percent of supervisors and managers could receive cash awards ranging from 5 percent of 20 percent of basic pay.

VA's proposal better meets our needs. The House proposal would permit awards to personnel who have qualifications in excess of their grade, but such individuals more properly should be promoted. The other provisions of the House proposal are similar to existing current VA policies which provide special advancements for performance or achievement. In our opinion, the lump-sum proposed in the Senate bill would have little effect on the recruitment and retention of nurses. The amount is too small and, in some instances, the recertification that

would warrant the lump-sum payment can be obtained simply by paying a fee. The Senate's proposed range for supervisory and managerial performance awards also is unrealistic. Moreover, VA already has broad authority to grant performance awards to title 38 employees. VA-planned administrative actions include further delineation of this authority.

Additionally, the Department's draft bill would authorize VA to employ retired VA nurses on an intermittent and fee basis without the reduction in the pay of re-employed annuitants otherwise required by law. VA would utilize this exception only for emergency needs. This authority would permit VA to more readily avail itself of this valuable resource, instead of utilizing the more costly nurse agency personnel to meet emergency needs. These retired VA nurses already are familiar with the VA system and the special needs of its patients.

SECTION-BY-SECTION ANALYSIS

The draft bill would amend section 4107 of title 38, United States Code, to revise the pay system for registered nurses employed by the Department of Veterans Affairs in order to make their pay rates more competitive.

Section 1 contains the short title.

Section 2 notes that references are to title 38, United States Code.

Section 3 amends section 4107 in several ways. Section 3(a) and (b) would amend subsection (b) to add a partial community-based pay system as an alternative to the national pay schedule. Under this alternative pay system, the first four nurse grades (Junior, Associate, Full or Intermediate) could be based on competitive community pay rates determined through a survey of local pay rates, based solely, when feasible, on information gathered by the Bureau of Labor Statistics of the Department of Labor (BLS). VA would be authorized to collect data in situations where the use of BLS data is not possible. In addition, in determining competitive rates, VA must consider turnover, vacancy and unemployment rates, career progression patterns, personnel quality trends, and its ability to fund the rates. Where the survey shows that the Intermediate grade is above the national VA nurse pay schedule, the remaining four grades (Senior, Chief, Assistant Director and Director) also could be adjusted upward; otherwise they remain the same. Where the survey shows that the national pay schedule is competitive the national schedule would be used. Exceptional cases or limited deviations would be handled through existing authority to set special salary rates. VA would use BLS data in setting such special rates, where feasible and cost-effective. The estimated cost of this proposal is $10,169,600 for 1 year and $50,848,000 for 5 years.

Section 3(c) contains several amendments to the premium pay provisions of subsection (e). The amendments would:

(1) make technical amendments reflecting changes made by proposed new subsections (b)(3) and (e)(9);

(2) eliminate, for staff nurses and head nurses, the current ceiling (administratively waivable) on nurse overtime pay in subsection (e)(5);

(3) subsection (e)(6) would be amended to reflect that the 2080 hour year used in calculating the hourly rate of various forms of premium pay under this section applies in calculating the head nurse premium pay added by new paragraph (9);

(4) existing paragraph (9) would be redesignated paragraph (11), and would be amended so as to exclude premium pay under this section from being considered as basic pay for purposes of the Federal Employees Retirement System in chapter 84 of title 5; and

(5) a new paragraph (9) providing for head nurses premium pay and executive nurse incentive pay would be added.

The estimated cost of the proposal eliminating the ceiling on overtime pay is $6,948,700 for 1 year and $34,743,500 for 5 years. The estimated cost of the head nurse premium pay proposal is $5,880,400 for 1 year and $29,402,000 for 5 years; for the Chief Nurse incentive pay, it is $694,800 for 1 year and $3,474,000 for five years.

Section 3(d) of the draft bill would amend subsection (g)(3) to remove the ceiling on the special rate authority, which is equivalent to the current administratively-established nineteenth step. Under the bill, facility directors, as prescribed in regulation, could approve special rates up to a new statutory twenty-eighth step, but approval of the Secretary or designee would be required for rates above the twenty-eighth step. The ceiling in existing law that a special rate can not exceed the rate of pay for an Assistant Chief Medical Director would be retained. The estimated cost of this proposal is $7,479,200 for 1 year and $37,396,000 for 5 years.

Section 3(e) of the draft bill also would empower the Secretary or designee, when there is a severe shortage of well-qualified nurses, to grant exceptions to the reduction in pay required by law for re-employed annuitants employed on an intermittent or fee basis. This proposal would not result in increased costs to VA; however, there is the potential for decreased savings to the Treasury where the reductions in pay otherwise would be deposited.

Subsection 4 would make October 1, 1990, the effective date for the cost provisions of the draft bill to tie it in with FY 1991.

Total costs for the draft bill is $31,172,700 for 1 year and $155,863,500 for 5 years.

By Mr. BENTSEN (for himself, Mr. CHAFEE, Mr. RIEGLE, Mr. MITCHELL, Mr. MOYNIHAN, Mr. DURENBERGER, Mr. ROCKEFELLER, Mr. BRADLEY, Mr. DASCHLE, and Mr. PRYOR):

S. 2459. A bill to amend title XIX of the Social Security Act to provide improved delivery of health care services to low-income children by extending Medicaid coverage to certain low-income children, and for other purposes; to the Committee on Finance.

MEDICAID CHILD HEALTH ACT

● Mr. BENTSEN. Mr. President, one of the most critical problems facing us today is the health of America's children. While we have taken some important steps in recent years to improve access to health services for pregnant women and children, more remains to be done. That is why my colleagues, Senator CHAFEE, Senator RIEGLE and I, are introducing the Medicaid Child Health Act of 1990, along with Senator MITCHELL, Senator MOYNIHAN, Senator DURENBERGER, Senator ROCKEFELLER, Senator BRADLEY, and Senator DASCHLE.

The statistics have become all too familiar. According to the Department of Health and Human Services, the United States ranks 22d in the world in infant mortality—behind East Germany and Singapore and all other major industrialized countries. Our infant mortality rate is twice that of Japan. The National Commission on Infant Mortality recently reported that in Los Angeles and Washington, DC, infant mortality appears to be on the rise.

We are also seeing an alarming increase in the incidence of childhood diseases that could have been prevented with such routine treatment as a timely, basic set of immunizations. In 1983, there were fewer than 1,600 cases of measles in the United States. In 1989, there were over 17,000, and early indications are for 1990 that the number continues to grow. This situation is unacceptable.

It's said that an ounce of prevention is worth a pound of cure, and that's particularly true for health care for young children. Every $1 spent on prenatal care saves more than $3 in the first year of a child's life. And for every $1 we spend on immunizations, we save $10 in health care costs later on. By investing in their health before they're born and while they're young, we can help them grow up strong and healthy. They can avoid those preventable childhood diseases that are costly to treat, and we'll be spending health dollars in an efficient way.

Clearly, we need to make sure that all children have access to preventive care and other health care services. In 1987, only half of those children in families with incomes below the poverty line were covered by Medicaid. While we have taken steps since then to increase Medicaid coverage, many children still do not have access to health care services.

The bill my colleagues and I are introducing today would take several modest and important steps to ameliorate these problems. It would expand Medicaid eligibility for low-income children, improve Medicaid services for pregnant women and children, and make administrative changes and other improvements to provide better access to services for this population. Let me highlight the major provisions of S. 2459.

Medicaid coverage for children whose family incomes are below poverty would be phased in beginning in 1991, so that by the year 2002, all children under age 19 with family incomes below the Federal poverty threshold would be eligible for Medicaid. It is a modest expectation that all children in families with incomes this low should qualify for Medicaid benefits. I would like to see us go farther. In fact, last year, my colleagues and I introduced S. 1201, which would have ex-

tended Medicaid eligibility to all children under the age of 6 with family incomes up to 185 percent of the Federal poverty level.

But the Medicaid Program is a Federal/State partnership, and by expanding coverage in this way, we are asking the States to contribute. Gov. Booth Gardner, cochairman of the subcommittee on health for the National Governors' Association has said that the Federal Government "must be sensitive to the financial situation of States, and acknowledge what's already been done." Our bill is sensitive to State fiscal constraints. We have responded to State concerns by slowly phasing in coverage of children in poverty over a number of years.

At the same time, our bill would allow maximum flexibility for those States that would like to move more quickly to expand Medicaid coverage for children. States could extend coverage to children up to age 19 with family incomes up to 185 percent of the Federal poverty line as early as 1991. States could also choose to target expanded coverage to children in foster care.

We would improve Medicaid benefits by allowing States to provide home and community based services for children who have AIDS or who are dependent on a ventilator. States could also provide home visitor nursing services to infants under 6 months with serious medical conditions. Payments for children with long, costly hospital stays would be improved, thereby ensuring access to hospital care for the sickest children.

We would allow States to provide outreach services to help find more of those pregnant women and children who are eligible for Medicaid, and enroll them in the program. A number of States already have programs of this type. Hopefully, the Federal financial assistance resulting from establishing outreach as an optional service under the Medicaid Program will encourage more States to undertake this initiative.

We may not be able to enact all the provisions of this bill this year. In fact, many of them represent those parts of S. 1201 that we were not able to enact last year. But it is important to keep moving in the direction of improving health care coverage for pregnant women and children, even if we can only take a few steps at a time.

CBO has not yet prepared a final estimate for the costs of this bill, but preliminary figures put the total at about $180 million in 1991, $220 million in 1992, the first full year, and $1.6 billion over 5 years. This is not inexpensive. If the final CBO estimates indicate the costs are much higher, we may need to make adjustments. But in the context of the $45 billion the Federal Government will spend for the Medicaid Program in 1991, $180 is a modest sum to invest in the health of America's children.

Mr. President, I ask unanimous consent that the text of S. 2459 and a brief summary of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2459

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Medicaid Child Health Act of 1990".

SEC. 2. PHASED-IN MANDATORY COVERAGE OF CHILDREN UP TO 100 PERCENT OF POVERTY LEVEL.

(a) IN GENERAL.—Section 1902 of the Social Security Act (42 U.S.C. 1396a), as amended by section 6401(a) of the Omnibus Budget Reconciliation Act of 1989, is amended—

(1) in subsection (a)(10)(A)(i)—

(A) by striking "or" at the end of subclause (V),

(B) by striking the semicolon at the end of subclause (VI) and inserting ", or", and

(C) by adding at the end the following new subclause:

"(VII) who are described in subparagraph (D) of subsection (l)(1) and whose family income does not exceed the income level the State is required to establish under subsection (l)(2)(C) for such a family;";

(2) in subsection (a)(10)(A)(ii)(IX), by striking "or clause (i)(VI)" and inserting ", clause (i)(VI), or clause (i)(VII)";

(3) in subsection (l)—

(A) in subparagraph (C) of paragraph (1) by inserting "children" after "(C)";

(B) by striking subparagraph (D) of paragraph (1) and inserting the following:

"(D) children born after September 30, 1983, who have attained 6 years of age but have not attained 19 years of age,";

(C) by striking subparagraph (C) of paragraph (2) and inserting the following:

"(C) For purposes of paragraph (1) with respect to individuals described in subparagraph (D) of that paragraph, the State shall establish an income level which is equal to 100 percent of the income official poverty line described in subparagraph (A) applicable to a family of the size involved.";

(D) in paragraph (3) by inserting ", (a)(10)(A)(i)(VII)," after "(a)(10)(A)(i)(VI)";

(E) in paragraph (4)(A), by inserting "or subsection (a)(10)(A)(i)(VII)" after "(a)(10)(A)(i)(VI)"; and

(F) in paragraph (4)(B), by striking "or (a)(10)(A)(i)(VI)" ", and inserting "(a)(10)(A)(i)(VI), or (a)(10)(A)(i)(VII)"; and

(4) in subsection (r)(2)(A), by inserting "(a)(10)(A)(i)(VII)," after "(a)(10)(A)(i)(VI),".

(b) CONFORMING AMENDMENT TO QUALIFIED CHILDREN.—Section 1905(n)(2) of such Act (42 U.S.C. 1396d(n)(2)) is amended by striking "age of 7 (or any age designated by the State that exceeds 7 but does not exceed 8)" and inserting "age of 19".

(c) ADDITIONAL CONFORMING AMENDMENTS.—

(1) Section 1903(f)(4) of such Act (42 U.S.C. 1396b(f)(4)) is amended—

(A) by striking "1902(a)(10)(A)(i)(IV)," and inserting "1902(a)(10)(A)(i)(III), 1902(a)(10)(A)(i)(IV), 1902(a)(10)(A)(i)(V),", and

(B) by inserting "1902(a)(10)(A)(i)(VII)," after "1902(a)(10)(A)(i)(VI),".

(2) Subsections (a)(3)(C) and (b)(3)(C)(i) of section 1925 of such Act (42 U.S.C. 1396r-6), as amended by section 6411(i)(3) of the Omnibus Budget Reconciliation Act of 1989, are each amended by inserting "(i)(VII)," after "(i)(VI)".

(d) EFFECTIVE DATE.—(1) The amendments made by this section apply (except as otherwise provided in this subsection) to payments under title XIX of the Social Security Act for calendar quarters beginning on or after January 1, 1991.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation (other than legislation authorizing or appropriating funds) in order for the plan to meet the additional requirements imposed by the amendments made by this section, the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act. For purposes of the previous sentence, in the case of a State that has a 2-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

SEC. 3. OPTIONAL COVERAGE OF CHILDREN WITH INCOME BELOW 185 PERCENT OF THE POVERTY LEVEL.

(a) FLEXIBILITY ON INCOME LIMIT.—Section 1902 of the Social Security Act, as amended by section 6401(a) of the Omnibus Budget Reconciliation Act of 1989 and section 2 of this Act, is amended—

(1) in subclauses (VI) and (VII) of subsection (a)(10)(A)(i), by inserting "minimum" before "income level",

(2) in subsection (l)(2)(B), by striking "133 percent" and inserting "a percentage (established by the State, which is not less than 133 percent and not more than 185 percent)"; and

(3) in subsection (l)(2)(C), by striking "100 percent" and inserting "a percentage (established by the State, which is not less than 100 percent and not more than 185 percent)".

(b) FLEXIBILITY ON AGE.—Section 1902(l) of such Act is amended—

(1) in paragraph (1)—

(A) by striking "and" at the end of subparagraph (C),

(B) by inserting "and" at the end of subparagraph (D), and

(C) by adding at the end thereof the following:

"(E) at the option of the State, children born before October 1, 1983, who have attained 6 years of age but have not attained 19 years of age or a lesser age as selected by the State; and

(2) in paragraph (2)(C) by striking "subparagraph (D)" and inserting "subparagraph (D) or (E)".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to payments under title XIX of the Social Security Act for calendar quarters beginning on or after January 1, 1991.

SEC. 4. OPTIONAL COVERAGE FOR FOSTER CHILDREN.

(a) IN GENERAL.—Section 1902(a)(10)(A)(ii) of the Social Security Act (42 U.S.C. 1396a(a)(10)(A)(ii)) as amended by section 3 of this Act, is further amended—

(1) by striking "or" at the end of subclause (X),

(2) by striking the semicolon at the end of subclause (XI) and inserting "; or"; and

(3) by adding at the end the following new subclause:

"(XII) who are described in subclause (IX) and subsection (s);".

(b) DESCRIPTION OF CHILDREN IN FOSTER HOMES, GROUP HOMES, OR PRIVATE INSTITUTIONS.—Section 1902 of such Act (42 U.S.C. 1396a) is amended by adding at the end thereof the following new subsection:

"(s) Individuals described in this subsection are children who are in a foster home, group home, or private institution for whom a public agency is assuming full or partial financial responsibility or in a foster home, group home or private institution maintained by a private nonprofit agency.

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall become effective with respect to payments under title XIX of the Social Security Act for calendar quarters beginning on or after January 1, 1991.

SEC. 5. MODIFICATION OF ASSET TEST FOR PREGNANT WOMEN.

(a) IN GENERAL.—Section 1902(l)(3) of the Social Security Act (42 U.S.C. 1396a(l)(3)) is amended by inserting before the semicolon at the end of subparagraph (B) the following: "(except that, for purposes of this subparagraph, there shall be excluded from the term 'resources', without regard to the value thereof, any automobile, household goods, personal effects, burial spaces, and insurance policies)".

(b) EFFECTIVE DATE.—(1) The amendment made by subsection (a) shall become effective with respect to eligibility for medical assistance on or after January 1, 1991.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation (other than legislation authorizing or appropriating funds) in order for the plan to meet the additional requirements imposed by the amendments made by this section, the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act. For purposes of the previous sentence, in the case of a State that has a 2-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

SEC. 6. MODIFICATION OF DAY LIMITS FOR PRESUMPTIVE ELIGIBILITY.

(a) ELIMINATION OF 45-DAY LIMIT.—Section 1920(b)(1)(B) of the Social Security Act (42 U.S.C. 1396r-1(b)(1)(B)) is amended—

(1) by adding "or" at the end of clause (i);

(2) by striking clause (ii); and

(3) by redesignating clause (iii) as clause (ii).

(b) 14-DAY LIMIT FOR APPLICATION EXTENDED.—Section 1920 of such Act (42 U.S.C. 1396r-1) is further amended—

(1) in subsection (b)(1)(B)(ii), as redesignated by subsection (a)—

(A) by striking "14 calendar days" and inserting "the requisite number of calendar days as specified by the State (but not less than 14 calendar days)"; and

(B) by striking "fourteenth calendar day" and inserting "requisite calendar day as specified by the State (but not less than the fourteenth calendar day)"; and

(2) in subsection (c)(2)(B) by striking "14 calendar days" and inserting "the requisite number of calendar days as specified by the State (but not less than 14 calendar days)".

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply to payments under title XIX of the Social Security Act for calendar quarters beginning on or after January 1, 1991.

SEC. 7. MANDATORY ELIGIBILITY, CONTINUITY OF CARE AND TEMPORARY EXTENSION OF MEDICAID ELIGIBILITY.

(a) CONTINUOUS ELIGIBILITY FOR PREGNANT WOMEN.—Section 1902(e)(6) of the Social Security Act (42 U.S.C. 1396a(e)(6)) is amended—

(1) by striking "At the option of the State, in" and inserting in lieu thereof "In"; and

(2) by striking "the State plan may nonetheless treat" and inserting in lieu thereof "the State plan shall treat".

(b) CONTINUOUS ELIGIBILITY FOR CERTAIN CHILDREN.—Section 1902(e) of such Act (42 U.S.C. 1396a(e)) is amended by adding at the end thereof the following new paragraph:

"(11)(A) In the case of a child who has not attained 6 years of age and who is determined eligible for medical assistance under this title (other than a child eligible for such assistance because such child is receiving aid under part A or E of title IV or under title XVI), such child shall remain eligible for medical assistance under this title after each determination of eligibility for a period of 6 months and no redetermination of such child's eligibility shall take place for a period of 6 months from the determination of eligibility of such child, regardless of any change in income or resources of the family of which such child is a member.

"(B) With respect to a child who has not attained 19 years of age and who is receiving aid under part A or E of title IV or under title XVI and who is determined to be no longer eligible for such aid, the State may not discontinue medical assistance under this title for such child until the State has determined that such child is not eligible for medical assistance under this title on a basis other than the receipt of aid under such parts or title.".

(c) EFFECTIVE DATE.—(1) The amendments made by subsections (a) and (b) shall become effective with respect to eligibility determinations for medical assistance under title XIX of the Social Security Act on or after January 1, 1991.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation (other than legislation authorizing or appropriating funds) in order for the plan to meet the additional requirements imposed by the amendments made by this section, the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act. For purposes of the previous sentence, in the case of a State that has a 2-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

SEC. 8. ADJUSTMENT IN PAYMENT FOR HOSPITAL SERVICES FURNISHED TO LOW-INCOME CHILDREN.

(a) IN GENERAL.—Section 1902 of the Social Security Act (42 U.S.C. 1396a), as amended by section 4 of this Act, is further amended by adding at the end the following new subsection:

"(t) In order to meet the requirements of subsection (a)(53), the State plan must provide that payments to hospitals under the plan for inpatient hospital services furnished to infants who have not attained the age of 1 year, and to children who have not attained the age of 19 years and who receive such services in a disproportionate share hospital described in section 1923(b)(1), shall—

"(1) if made on a prospective basis (whether per diem, per case, or otherwise) provide for an outlier adjustment in payment amounts for medically necessary inpatient hospital services involving exceptionally high costs or exceptionally long lengths of stay,

"(2) not be limited by the imposition of day limits with respect to the delivery of such services to such individuals, and

"(3) not be limited by the imposition of dollar limits with respect to the delivery of such services to any such individual who has not attained their first birthday (or in the case of such an individual who is an inpatient on his first birthday until such individual is discharged).".

(b) CONFORMING AMENDMENT.—Section 1902(a) of such Act (42 U.S.C. 1396a(a)), as amended by section 6406(a) of the Omnibus Budget Reconciliation Act of 1989, is further amended—

(1) by striking "and" at the end of paragraph (52);

(2) by striking the period at the end of paragraph (53) and by inserting "; and"; and

(3) by inserting after paragraph (53) and before the end matter the following new paragraph:

"(54) provide, in accordance with subsection (t), for adjusted payments for certain inpatient hospital services.".

(c) EFFECTIVE DATE.—(1) The amendments made by this section shall become effective with respect to payments under title XIX of the Social Security Act for calendar quarters beginning on or after January 1, 1991.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation (other than legislation authorizing or appropriating funds) in order for the plan to meet the additional requirements imposed by the amendments made by this section, the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act. For purposes of the previous sentence, in the case of a State that has a 2-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

SEC. 9. OPTIONAL STATE COVERAGE OF HOME OR COMMUNITY-BASED SERVICES TO CERTAIN CHILDREN.

(a) STATE OPTION PROVIDED.—Section 1905(a) of the Social Security Act (42 U.S.C. 1396d(a)), as amended by section 6405 of the

Omnibus Budget Reconciliation Act of 1989, is further amended—

(1) by redesignating paragraph (22) as paragraph (23); and

(2) by inserting after paragraph (21) the following new paragraph:

"(22) home or community-based services (as described in section 1915(c)(1)) for children—

"(A) who have not attained the age of 19 years; and

"(B)(i) who have acquired immune deficiency syndrome, or

"(ii) who are medically dependent on a ventilator for life support;".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall become effective with respect to services furnished on or after January 1, 1991.

SEC. 10. OPTIONAL STATE COVERAGE OF HOME VISITOR SERVICES.

(a) STATE OPTION PROVIDED.—Section 1905(a) of the Social Security Act (42 U.S.C. 1396d(a)) as amended by section 10 of this Act, is further amended—

(1) by redesignating paragraph (23) as paragraph (24); and

(2) by inserting after paragraph (22) the following new paragraph:

"(23) home visitor services as prescribed by a physician and furnished by a registered nurse to infants during their first 6 months of life who have medical conditions which require treatment with life sustaining medications or equipment or technologically assisted feeding; and".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall become effective with respect to services furnished on or after January 1, 1991.

SEC. 11. LIMIT ON NUMBER OF INDIVIDUALS ALLOWED TO PARTICIPATE IN HOME AND COMMUNITY-BASED PROGRAMS UNDER WAIVERS INCREASED.

(a) IN GENERAL.—Section 1915(c)(10) of the Social Security Act (42 U.S.C. 1396n(c)(10)) is amended by striking "200" and inserting "500".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall become effective with respect to waivers granted or renewed under section 1915(c) of the Social Security Act on or after January 1, 1991.

SEC. 12. REPORTING REQUIREMENTS OF THE SECRETARY.

(a) DEFINITION OF MEDICALLY HIGH RISK PREGNANCY AND CHILDREN TO BE DEVELOPED.—(1) The Secretary of Health and Human Services (hereafter in this section referred to as the "Secretary") shall in consultation with appropriate professional health care related groups develop definitions of medically high risk pregnancy and children at a high risk of medical problems. In developing such a definition the Secretary shall consider, among other factors, low birthweight and placement in foster care.

(2) The Secretary shall report to Congress on the definitions developed under paragraph (1) along with such further information or comments as the Secretary may deem relevant not later than March 1, 1991.

(b) DEFINITION OF MEDICALLY UNINSURABLE CHILDREN TO BE DEVELOPED.—(1) The Secretary shall in consultation with appropriate professional health care groups and health insurers develop alternative definitions of medically uninsurable children.

(2) The Secretary shall report to Congress on the definitions developed under paragraph (1) along with such further information or comments as the Secretary may deem relevant not later than March 1, 1991.

(c) MODEL HEALTH BENEFIT PACKAGE FOR PREGNANT WOMEN AND CHILDREN TO BE DEVELOPED.—(1) The Secretary shall in consultation with appropriate professional health care groups and consumers develop a model health benefit package for pregnant women and children through age 18. The package developed by the Secretary shall include—

(A) coverage for appropriately timed primary care visits (including visits for prenatal care, immunizations, screening, and followup treatment of health problems); and

(B) protection against catastrophic expenses for inpatient hospital care.

(2) The Secretary shall report to Congress on the health benefit package developed under paragraph (1) along with such further information or comments as the Secretary may deem relevant not later than March 1, 1991.

(d) REPORT ON IMPROVING PUBLIC HEALTH COORDINATION.—(1) The Secretary shall study different methodologies to improve the coordination between various public health programs, in particular the coordination of benefits provided under titles V and XIX of the Social Security Act, and the special supplemental food program (WIC) established under section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786).

(2) The Secretary in conducting the study under paragraph (1) shall consult with the Governors of the various States and the Secretary of Agriculture.

(3) The Secretary shall report to Congress on the findings of the study conducted by the Secretary under paragraph (1) not later than March 1, 1991.

SEC. 13. SECTION 209(b) STATES PROHIBITED FROM DENYING MEDICAL ASSISTANCE TO CHILDREN 18 YEARS OF AGE OR YOUNGER RECEIVING BENEFITS UNDER SSI.

(a) IN GENERAL.—Section 1902(f) of the Social Security Act (42 U.S.C. 1396a(f)) is amended—

(1) by striking "and section 1619(b)(3)," and inserting ", section 1619(b)(3) and paragraph (2) of this subsection,";

(2) by striking "(1)" and inserting in lieu thereof "(A)";

(3) by striking "(2)" and inserting in lieu thereof "(B)";

(4) by inserting "(1)" after "(f)"; and

(5) by adding at the end the following new paragraph:

"(2) Notwithstanding any other provision of paragraph (1), a State shall provide medical assistance to any individual who is eligible for and receiving benefits under title XVI and who has not attained the age of 18 years.".

(b) EFFECTIVE DATE.—(1) The amendment made by subsection (a) shall become effective with respect to medical assistance provided on or after January 1, 1991.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation (other than legislation authorizing or appropriating funds) in order for the plan to meet the additional requirements imposed by the amendments made by this section, the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act. For purposes of the previous sentence, in the case of a State that has a 2-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

SEC. 14. HEALTH CARE PLANS FOR FOSTER CARE CHILDREN.

(a) IN GENERAL.—Section 475(1) of the Social Security Act (42 U.S.C. 675(1)) is amended—

(1) by inserting "(A)" before "The term"; and

(2) by adding at the end the following new subparagraph:

"(B) The case plan must also include a health care record for the child involved which includes information obtained from the child's parents, the foster care provider responsible for the daily care of the child, the child's health care providers, and other providers of care to the child, including the following:

"(i) A copy of a preplacement health care record that has been completed before the placement of the child in foster care (or within 30 days, in the case of emergency placement in foster care) and provided to the child's foster care provider to ensure that the provider is immediately made aware of the child's health and developmental needs that require continuing attention and services. The preplacement health care record shall, at a minimum, include the following:

"(I) A record of the child's health, mental health, and dental history, including allergies, current medications, immunizations, and any known health and mental health problems.

"(II) Other information about matters concerning the child that may require emergency attention.

"(III) The names and addresses of the child's physician, dentist, and other providers of medical, mental health, developmental, and rehabilitation services.

"(ii) A record indicating that the child's foster care provider was advised of the child's eligibility under the early and periodic screening, diagnosis, and treatment program under title XIX.

"(iii) A health care plan for the child that is maintained by the agency indicating that the ongoing health, mental health, and dental needs of the child are being met. At a minimum, the health care plan shall include a record of the following:

"(I) Periodic health and dental examinations of the child.

"(II) Other diagnoses and treatment received by the child (including the dates of such examinations and treatments and the names and addresses of the health care providers).

"(III) Immunizations received by the child with a schedule of needed future immunizations.

"(IV) Known allergies of the child and prescribed treatment, if any.

"(V) Medications currently being taken by the child.

"(VI) Names and addresses of all health care providers, including those providing mental health, developmental, and rehabilitation services who have information regarding the child's current health care status.

"(iv) A record indicating that—

"(I) the foster care provider has been informed of its responsibilities related to maintaining and updating an abbreviated summary of the child's health care plan documenting the health, mental health, and dental services rendered to the child while in the care of the foster care provider;

"(II) the foster care provider and caseworkers assigned to the child clearly understand their responsibilities with respect to meeting the health care needs of the child; and

"(III) the agency has periodically reviewed the abbreviated summary of the child's health care plan which is maintained by the foster care provider to ensure that the child's health care plan is being adhered to and updated.".

(b) EFFECTIVE DATE.—The amendments made by this section shall become effective on January 1, 1991.

SEC. 15. USE OF MOST RECENT DATA IN CALCULATION OF FEDERAL MATCHING PERCENTAGE.

(a) IN GENERAL.—Section 1101(a)(8)(B) of the Social Security Act (42 U.S.C. 1301(a)(8)(B)) is amended—

(1) by striking "between October 1 and November 30" and inserting "between April 1 and May 31"; and

(2) by striking "promulgation: *Provided*" and all that follows, and inserting "promulgation. The Secretary shall publish in the Federal Register in October of each year a preliminary estimate for each State of the Federal percentage that will become effective in the following October.".

(b) EFFECTIVE DATE AND TRANSITION.—(1) Except as provided in paragraph (2), the amendments made by subsection (a) shall apply to payments for quarters beginning on or after October 1, 1991.

(2) In July 1990 the Secretary of Health and Human Services shall promulgate the Federal percentage in accordance with section 1101(a)(8)(B) of the Social Security Act as amended by subsection (a), using the most recent data that was available as of May 31, 1990. For quarters beginning on April 1, 1991 and on July 1, 1991, the Federal percentage for each State shall be the higher of the Federal percentage that became effective on October 1, 1990, or the Federal percentage calculated under this paragraph.

SEC. 16. OPTIONAL COVERAGE OF OUTREACH SERVICES FOR PREGNANT WOMEN AND INFANTS.

(a) PERMITTING PAYMENT FOR OUTREACH SERVICES FOR PREGNANT WOMEN AND INFANTS AT FEDERAL MEDICAL ASSISTANCE PERCENTAGE.—Section 1903(a)(1) of the Social Security Act (42 U.S.C. 1396b(a)(1)) is amended by inserting "for outreach services for pregnant women and infants described in section 1902(l)(5) or" after "total amount expended during such quarter".

(b) OUTREACH SERVICES FOR PREGNANT WOMEN AND INFANTS DEFINED.—Section 1902(l) of such Act is amended by adding at the end the following new paragraph:

"(5) For purposes of section 1903(a), the term 'outreach services for pregnant women and infants' means, with respect to pregnant women and infants, services to identify individuals described in subparagraph (A) or (B) of paragraph (1), respectively, and, once identified, to assist them in applying for medical assistance under this title.".

(c) EFFECTIVE DATE.—The amendments made by subsection (a) and (b) shall become effective with respect to services furnished on or after January 1, 1991.

SEC. 17. EXTENSION OF FREEDOM OF CHOICE WAIVERS FOR SERVICES RELATED TO PREGNANCY.

(a) IN GENERAL.—Section 1915(b) of the Social Security Act (42 U.S.C. 1396n(b)) is amended by inserting after the matter at the end the following: "A waiver under this subsection for services related to pregnancy shall be for an initial term of 3 years and, upon request of a State, shall be extended for additional 5-year periods unless the Secretary, within 90 days after the date of its submission to the Secretary, either denies such request in writing or informs the State agency in writing with respect to any additional information which is needed in order to make a final determination with respect to the request. After the date the Secretary receives such additional information, the request shall be deemed granted unless the Secretary, within 90 days of such date, denies such request.".

(b) CONFORMING AMENDMENT.—Section 1915(h) of such Act (42 U.S.C. 1396n(h)) is amended by striking "subsection (c)" and inserting "subsection (b), (c)".

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall become effective with respect to waivers granted on or after January 1, 1991.

SUMMARY OF MEDICAID CHILD HEALTH ACT

EXPANDED MEDICAID ELIGIBILITY

Optional coverage of children with incomes below 185 percent of the poverty level up to age 19. States would also have the option of setting separate age and income thresholds for foster care children, or expanding eligibility only for foster care children. (Effective 1/1/91)

Phased-in coverage of children up to age 19 in families with incomes below the Federal poverty level. States would be required to phase-in coverage of children below 100 percent of poverty a year at a time, starting with 6 and 7 year olds in 1991. All children under the age of 19 whose family incomes are below the Federal poverty level would be covered by the year 2002. (Effective 1/1/91)

Other. Extend Medicaid coverage to all children who are SSI recipients in the 14 "209(b)" States.

IMPROVED MEDICAID BENEFITS

Payments for hospital services. Payments for children in disproportionate share hospitals and infants in any hospital would no longer be subject to day limits. Outlier payments would be required in those states that pay hospitals on a prospective basis. Dollar limits could not be imposed on stays for children admitted to the hospital up to age one. (Effective 1/1/91)

Home and Community-Based services. States would have the option of providing home and community-based services under Medicaid for children with AIDS and children who are ventilator-dependent. The Secretary could not limit to fewer than 500 the number of individuals receiving services under a home and community-based services waiver. (Effective 1/1/91)

Optional Coverage of Home visitor services. States would have the option of providing physician-prescribed home visitor nursing service for infants up to 6 months. (Effective 1/1/91)

Optional Coverage of Outreach Services for Pregnant Women and Infants. Outreach services to assist pregnant women and infants in applying for Medicaid would be made an optional service under Medicaid. (Effective 1/1/91)

ADMINISTRATIVE AND OTHER IMPROVEMENTS

Modify the option for presumptive eligibility for pregnant women. Pregnant women who are presumptively eligible for Medicaid, and who apply for Medicaid during a time period specified by the State would continue eligibility until the state determines otherwise. (Effective 1/1/91)

Continuous eligibility. Pregnant women would be Medicaid-eligible for 60 days after delivery. Children would continue to be Medicaid eligible until the state determines that the child is not eligible under any rules. Eligibility redetermination would be limited to very 6 months for children up to age 6. (Effective 1/1/91)

Limit asset test for pregnant women. In determining eligibility for pregnant women, states could not count the value of an automobile, personal effects, household goods, life insurance or a burial plot. (Effective 1/1/91)

Use of Most Recent Data in Calculating Federal Matching Percentage. Annual matching rates would be recalculated in April rather than the previous October, to more accurately reflect the current condition of the state's economy. (Effective 4/1/91)

Secretary Definitions and Report. The Secretary of HHS would report to Congress on ways to improve coordination between Medicaid, Maternal & Child Health, WIC and other programs. The Secretary would also develop definitions of medically higher risk pregnancies, medically high risk children, and medically uninsurable children, and a model health benefit package for pregnant women and children.

Health Care Plans for Foster Children. Federally financed foster care children would be required to have a health care record completed and provided to the foster care provider. (Effective 1/1/91)

Extend "freedom of choice" waivers to States for pregnancy-related services. States would be allowed to receive freedom of choice waivers for innovative delivery of pregnancy related services for an initial period of three years, rather than two. States could apply for a five-year extension of waiver. (Effective 1/1/91)●

Mr. CHAFEE. Mr. President, I am pleased to join Senator BENTSEN in introducing the Medicaid Child Health Act of 1990. This legislation would require States to increase much needed Medicaid services for low-income children. It is our next step toward ensuring that all children have access to necessary health care services.

When millions of children have little or no access to health insurance, we must question the adequacy and effectiveness of our health care delivery system. We must realize the importance of ensuring that children who do not currently receive proper health care services have access to them.

As a member of the Senate Finance Committee and both subcommittees on Health, one of my highest priorities has been to provide widespread and effective preventive health care for low-income children. Since 1984, we have been successful in moving forward in incremental steps toward this goal. Yet, it is clear that much more needs to be done.

The legislation we are introducing today will improve the delivery of health services to children. This legislation requires States to phase in Medicaid coverage of children up to age 19 in families with incomes below the Federal poverty level. States would begin in 1991 by covering 6- and 7-

years-olds and phase in children up to age 19, a year at a time. All children whose family incomes are below the poverty level would be covered by the year 2002. In addition, the legislation gives States the option of covering children with incomes below 185 percent of poverty up to age 19.

This legislation also improves payments for hospital services by prohibiting the use of day limits for children in disproportionate share hospitals and infants in all hospitals. States would have the option of providing home and community-based services under Medicaid for children with AIDS and children who are ventilator-dependent. These changes are necessary to create a system of services that will achieve our goals.

Senator BENTSEN and I believe that further extension of Medicaid coverage is critical for low-income children. Children need a good healthy start in life. We must recognize this now and act on it before its too late for a generation of children living in poverty.

I know there is concern about the cost of such expansions in light of the deficit; however, we must choose our priorities. I believe there are few goals more important than ensuring that the coming generations of Americans begin life with good health and have the opportunity to grow and flourish.

Mr. President, I commend Senator BENTSEN for his continued efforts in this critical area of child health. I hope my colleagues will agree that Federal dollars for this legislation would be well spent, and that even during a time of fiscal restraint, it is sound economic policy to invest in the health of our children.

● Mr. BRADLEY. Mr. President, I rise to cosponsor the Medicaid Child Health Act of 1990. This legislation would significantly expand coverage and benefits for a significant portion of our most at-risk population in America, our poor children. The legislation would mandate the phasing in of coverage for all children below the age of 19 up to the Federal poverty level, cover SSI eligible children, and allow States the option to cover up to the age of 19 all those living below 185 percent of the poverty level. In addition, the bill would expand the State's option to provide home- and community-based services for children with AIDS, home visitation services for infants up to the age of 6 months, and coverage for outreach services for infants and pregnant women.

As we watch the amazing changes that are overtaking the world today, I am more and more convinced that the test of our leadership in the world will be the example we set in providing for the human needs of our own people. Our record on how we treat our children in America is less than exemplary. It is unacceptable that in America today, infant mortality is higher than in all other industrialized nations. It is unacceptable that the country that pioneered the development of vaccines should have childhood immunization rates among minority Americans that rank behind 48 other countries including Albania and Botswana. A country that can put men on the Moon and can dream of sending men to Mars can surely find ways to add ounces to the birthweight of an infant or to get children to the doctor for preventive health care.

This bill will greatly expand health care coverage to the 12 million children who are currently uninsured. Our greatness as a nation is fully diminished by our reluctance to provide basic health care to our children. This bill helps us to begin to redress this glaring omission. I have worked closely with my colleagues, Senators BENTSEN and RIEGLE, on these issues in the past. I welcome their leadership on this bill.●

Mr. RIEGLE. Mr. President, I am pleased to introduce the Medicaid Child Health Act of 1990 with Senators BENTSEN, CHAFEE, MITCHELL, MOYNIHAN, DURENBERGER, MATSUNAGA, ROCKEFELLER, BRADLEY, and DASCHLE. Like last year, there is bipartisan support for these needed improvements to the Medicaid Program and for Congress to complete the work started last session.

It is a national tragedy that one in five children, over 12 million, are without a penny of health insurance. Forty-one percent of uninsured children, or 5 million, live in families with incomes below the Federal poverty level—our most vulnerable families. Our Nation's public program, Medicaid, is an inadequate safety net for low-income children; covering only 50 percent of children below poverty level. In Michigan, we have 300,000 children who have no health insurance.

As chairman of the Finance Subcommittee on Health for Families and the Uninsured, I have been developing this legislation to continue our work last year to improve health care coverage for low-income pregnant women and children. Significant improvements were enacted in the first session including coverage of pregnant women and children up to age 6 in families with incomes up to 133 percent of the Federal poverty level as well as improvements in the types of services provided and reimbursement levels for certain providers.

Mr. President, our Medicaid Child Health Act includes over 15 provisions that expand Medicaid eligibility, and improve benefits and the delivery of health care services. Many of these provisions were part of the Senate or House Budget Reconciliation bills but were not included in the final version of last year's Budget Reconciliation bill. It is vital that we complete the work begun last year.

At a very minimum, I believe this country must start to invest in our most vulnerable children. This bill guarantees coverage of children in families with incomes up to 100 percent of the Federal poverty level. But we would do this in the least burdensome manner, by phasing-in the provision so that by the year 2002 these children would be covered.

States would also have maximum flexibility in designing their Medicaid programs with optional coverage of children up to age 19 with family incomes below 185 percent of the poverty level. Other provisions would improve administration of the Medicaid program including ensured payment for medically necessary services in certain hospitals; ways to prevent inappropriate interruption of coverage; and financing of outreach programs.

I am proud to say in Michigan, the Governor's "Healthy Start" program would provide health care to children up to 200 percent of the poverty level, eventually covering 200,000 uninsured children. Passage of this bill would help Michigan in this effort by allowing Federal matching funds, through Medicaid, for expanding coverage to children. An estimated 180,000 uninsured children in Michigan could potentially receive needed health care services.

Mr. President, until we address the problem of providing comprehensive health insurance for all Americans, efforts that focus on improving the current delivery of maternity and infant child health care in the United States are critical. As chairman of the Subcommittee on Health for Families and the Uninsured, I will continue working with other members of the Finance and Labor and Human Resources Committees to develop a comprehensive proposal that guarantees universal access to health insurance for the 37 million Americans who lack coverage. I am holding a hearing today on this very topic. High quality, affordable health care for all Americans is one of my top priorities in Congress.

By Mr. PELL (by request):

S. 2460. A bill to authorize appropriations for the African Development Foundation, and for other purposes; to the Committee on Foreign Relations.

AUTHORIZATION OF APPROPRIATIONS FOR AFRICAN DEVELOPMENT FOUNDATION

● Mr. PELL. Mr. President, by request, I introduce for appropriate reference a bill to authorize appropriations for the African Development Foundation, and for other purposes.

This proposed legislation has been requested by the African Development Foundation, and I am introducing it in order that there may be a specific bill to which Members of the Senate and

the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with the letter from the President of the African Development Foundation to the President of the Senate, which was received on April 2, 1990.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2460

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 5050(a)(2) of Title V of the International Security and Development Cooperation Act of 1980 is amended by adding a sentence to read as follows: "The Foundation may at its discretion waive this limitation in order to add an amount, not exceeding $100,000, to an existing project where doing so is deemed critical to the fulfillment of the goals of the project."

SEC. 2. Section 510 of Title V of the International Security and Development Cooperation Act of 1980 is amended by deleting "$3,872,000 for fiscal year 1986, and $3,872,000 for fiscal year 1987" in the first sentence, and inserting "$11,500,000 for fiscal year 1991, and such other sums as may be necessary for fiscal year 1992" in lieu thereof.

SECTION-BY-SECTION ANALYSIS

Section 1 of the bill amends the provision of Title V which limits the African Development Foundation's authority to fund a single project to a maximum of $250,000. The amendment provides the Foundation with the discretion to waive this limitation by adding amounts up to $100,000 to an existing project in those situations where it is determined that failure to do so would critically affect the recipient's ability to realize the goals of the project. The Foundation continues to regard the $250,000 ceiling as important in retaining its focus on small-scale grassroots initiatives. However, some degree of flexibility like that enjoyed by the InterAmerican Foundation, which has no funding limitation in its legislation, is regarded as desirable. The waiver would be used in only those exceptional circumstances where on-going projects, already funded at the $250,000 legislative limit, require small amounts of additional funding because of inflation, the declining value of the dollar, or the impact of other unanticipated factors on the project.

Section 2 authorizes the appropriation of $11,500,000 for the African Development Foundation for Fiscal Year 1991, and such sums as may be necessary for Fiscal Year 1992.

AFRICAN DEVELOPMENT FOUNDATION,
Washington, DC, February 26, 1990.

Hon. J. DANFORTH QUAYLE,
Vice President of the United States and President of the Senate, U.S. Senate, Washington, DC.

DEAR MR. PRESIDENT: I herewith transmit a bill to amend the International Security and Development Cooperation Act of 1980 to amend section 5050(a)(2) of the legislation to permit the waiver of the $250,000 ceiling on project funding under certain circumstances; and to authorize appropriations for the Foundation for Fiscal Year 1991 and 1992. This legislative proposal is needed to carry out the President's FY 1991 budget plan.

Section 1 of the bill adds language to section 505(a)(2) of the Act which would authorize the Foundation to add funds to individual projects already funded up to the legislative limit of $250,000, but only in those cases where it is deemed critical to the achievement of the goals of the project. The $250,000 ceiling, while recognized as crucial to preserving the Foundation's focus on small projects, serves on occasion as an impediment to ADF's ability to adequately support some of its already existing projects. This situation may be due, for example, to the impact on project funding of inflation and the declining value of the dollar in the countries where the Foundation operates, or the occasional occurrence of unforeseen natural disasters.

Section 2 of the bill authorizes the appropriation of $11,500,000 for the African Development Foundation for Fiscal Year 1991, and such sums as may be necessary for Fiscal Year 1992.

The Office of Management and Budget advises that there is no objection to the presentation of this proposal to the Congress, and that its enactment would be in accord with the program of the President.

Sincerely,

LEONARD H. ROBINSON, JR.,
President.●

By Mr. KENNEDY:

S. 2461. A bill to reauthorize appropriations to provide for and improve the Drug Treatment Waiting Period Reduction Grant Program under the Public Health Service Act, and for other purposes; to the Committee on Labor and Human Resources.

DRUG TREATMENT WAITING PERIOD REDUCTION GRANT PROGRAM REAUTHORIZATION AND IMPROVMENTS ACT

Mr. KENNEDY. Mr. President, today I am introducing a bill to reauthorize and improve the Drug Treatment Waiting Period Reduction Grant Program. Today, many thousands of drug addicts who need, want, and would benefit from treatment are turned away at the clinic door because there are too few treatment slots. This grant program is one way of responding to that crisis.

Let me briefly recount the history of the Waiting List Grant Program. Section 2053 of the Anti-Drug Abuse Act of 1988—Public Law 100-690—authorized the Alcohol, Drug Abuse and Mental Health Administration [ADAMHA] to make grants to public and nonprofit private entities to reduce the waiting lists at drug treatment programs; $100 million was authorized and appropriated for this purpose.

The legislation was prompted by widespread reports of overburdened treatment providers denying services to desperate addicts because of inadequate resources. One manifestation of the treatment shortfall was the existence of long waiting lists at many treatment programs around the country. These waiting lists had become a vivid symbol of the urgent need for expanded drug treatment capacity in the United States. Indeed, the Anti-Drug Abuse Act of 1988 embodied a fundamental goal: "to increase to the greatest extent possible, the availability and quality of treatment services so that treatment on request may be provided to all individuals desiring to rid themselves of their substance abuse problem," section 2012(5).

In late 1989, the National Association of State Alcohol and Drug Abuse Directors [NASADAD] quantified the extent of the waiting list problems, as well as the broader need for treatment expansion. A 1-day survey of treatment providers in 44 States and the District of Columbia found that: 66,766 persons were on treatment waiting lists on September 25, 1989; approximately 50 percent of those on waiting lists had been waiting for treatment at least 30 days; and the estimated average number of days between request and admission was 22 days for outpatient programs and 45 days for inpatient programs.

Looking beyond waiting lists, NASADAD conducted a study of overall drug and alcohol treatment need. Startingly, the October 1989 study found that 1,407,519 Americans were receiving treatment for drug and alcohol abuse, while an additional 10,596,479 people needed but were not receiving treatment.

The $100 million appropriated for the Waiting List Program in 1988 has been expended, and yet the NASADAD surveys demonstrate that the need for such Federal support remains great. While there are other sources of Federal support for treatment activities—most notably the ADAMHA block grant—the Waiting List Program is one of several categorical grant programs administered by ADAMHA that enable Federal officials to target resources to populations and geographic regions of especially acute need. These categorical programs complement the more general support provided by the block grant.

Recognizing the importance of the Waiting List Program, Congress appropriated, subject to the passage of authorizing legislation, an additional $40 million for the program last year—Public Law 101-164, title IV, chapter III. A provision authorizing the expenditure of these funds would have been included in the conference report accompanying H.R. 3630, but the report has not commanded a majority of the Senate conferees for reasons that have nothing to do with this particular provision. The bottom line, therefore, is that $40 million which could be used to reduce drug treatment waiting lists will be returned to the Treasury unless authorizing legis-

lation is passed before the end of the current fiscal year.

The Senate Labor and Human Resources Committee is the authorizing committee with jurisdiction over the Waiting List Program. As chairman of the committee, I feel a responsibility to do everything within my power to see that the $40 million is expended by ADAMHA. It would be shameful if $40 million appropriated for drug treatment were returned to the Treasury at a moment when the need for treatment services in this country is so overwhelming.

It is my understanding that ADAMHA is seeking a reprogramming or reappropriation of the $40 million because administration officials believe the money could be more effectively spent for other purposes. I have no objection to this effort. Indeed, the programs for which ADAMHA would like to use the money—treatment improvement grants, medications development and AIDS outreach—are all programs I strongly support. It is my understanding, moreover, that a large portion of the money would still be spent directly on treatment services, and would therefore reach the same afflicted population that would be served by the waiting list grants.

If my colleagues on the Senate and House Appropriation Committees wish to permit the $40 million to be redirected for these purposes, I would be pleased to support that decision. If a reappropriation cannot be accomplished, however, I believe the money should be spent on the Waiting List Program, as originally intended. Simply put, I want to see this money spent for drug treatment rather than returned to the Treasury.

My legislation does more than reauthorize the Waiting List Grant Program. I am taking this occasion to propose a series of improvements in the program to assure that the $40 million is expended in the most effective manner possible. Some of these changes would have been accomplished by the passage of H.R. 3630.

First, my bill strikes subsection 509E(d) of the Public Health Service Act, which prohibits the Secretary from making more than one waiting list grant to any single treatment program. That proscription would no longer be appropriate if the Waiting List Program is transformed into a multiyear effort.

Second, I would like to see ADAMHA give priority to programs that serve pregnant and post-partum addicts. Recent studies provide dramatic evidence that substance abuse among child-bearing women has devastating consequences for their offspring. Dr. Ira Chasnoff of the National Association for Perinatal Addiction Research and Education estimates that 375,000 newborns are affected by their mother's substance abuse, a figure that represents 11 percent of all live births. The inspector general of the Department of Health and Human Services recently projected that there may be 4 million so-called crack babies by the year 2000.

Yet many treatment providers are reluctant to serve pregnant addicts because they are ill-equipped to provide comprehensive prenatal care or social services and because they fear liability. A 1989 study conducted by Prof. Wendy Chavkin of Columbia University found that less than half of the drug treatment programs in New York City were willing to admit pregnant addicts. Establishing a "pregnant addict priority" within grant programs is one way to encourage the expansion of services for this afflicted population.

Third, there should be a priority for programs that provide aftercare. Treatment experts concur that addicts are most likely to benefit from treatment if they receive continuing support after they have completed the formal component of the treatment regimen. This is especially true for addicts who complete residential programs, only to return to the community or family environment that may have fostered the addict's drug abuse in the first place.

Fourth, my bill would establish a requirement that State agencies certify the existence of waiting lists on behalf of applicants that are not themselves States. This requirement will provide greater assurance that waiting list grants are being awarded to programs that are, in fact, the most overburdened.

Finally, Mr. President, this legislation would require the ADAMHA administrator to prepare a comprehensive report on the effectiveness of the waiting list program. There has been a certain amount of controversy surrounding this program. Some contend that waiting lists are not the best measure of treatment need, because not all programs maintain such a list, not all lists are kept current and addicts may place their names on more than one list. Also, the waiting list phenomenon may be attributable, in part, to the absence of a central screening process for addicts; a recent GAO study of methadone programs found that some programs were placing addicts on waiting lists while other programs in the same city had vacant slots. Finally, some contend that the waiting list program is not sufficiently farsighted, because it provides a single infusion of resources for treatment programs that may lack long-term funding.

I expect that the Administrator's report will air these questions and provide a basis for determining whether the program should be reauthorized in the future. If waiting lists are not the best measure of treatment we need, we must ascertain a better measure of need or a more effective mechanism for targeting Federal resources to the most overburdened treatment programs.

I flatly reject the view, however, that the $40 million already appropriated for this program should be returned to the Treasury merely because these questions have been raised. NASADAD and every other informed observer of the drug treatment system in the United States have concluded that there is a dire need for Federal resources. Authorizing the expenditure of an additional $40 million for waiting list grants will provide immediate relief to thousands of our fellow citizens who desperately want to end their life-draining addictions.

There will be ample time to fine tune these treatment funding mechanisms. In the meantime, one way or another, we must deliver these urgently needed Federal treatment resources to the thousands of addicts who are turned away at the clinic door. Our failure to do so is a disservice to them and to ourselves, because every addict we do not treat is a potential criminal we may need to incarcerate.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered printed in the RECORD, as follows:

S. 2461

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Drug Treatment Waiting Period Reduction Grant Program Reauthorization and Improvements Act of 1990".

SEC. 2. IMPROVEMENT OF DRUG ABUSE TREATMENT WAITING PERIOD REDUCTION PROGRAM.

Section 509E of the Public Health Services Act (42 U.S.C. 290aa-12) is amended—

(1) by striking out subsection (d);

(2) by redesignating subsection (c) as subsection (d);

(3) by inserting after subsection (b) the following new subsection:

"(c) Subject to the availability of qualified applicants, in awarding grants under subsection (a), the Secretary shall give priority to applicants that provide, directly or through arrangements with public and non-profit entities—

"(1) drug treatment services to pregnant and postpartum women; or

"(2) after-care services to prevent renewed substance abuse by individuals to whom a substance abuse program that receives assistance under this section has provided treatment services, except that a grantee shall not expend in excess of 50 percent of the amount of a grant awarded under subsection (a) to develop and provide such services."; and

(3) in subsection (e)—

(A) by redesignating paragraph (3) as paragraph (4);

(B) by striking out "and" at the end of paragraph (2); and

(C) by inserting after paragraph (2), the following new paragraph:

"(3) in the case of an applicant that is not a State, an agency of the State in which the applicant is located certifies that the applicant satisfies the conditions described in subsection (b); and".

SEC. 3. AUTHORIZATION OF APPROPRIATIONS.

Section 509E(f) of the Public Health Services Act (42 U.S.C. 290aa-12(f)) is amended—

(1) in paragraph (1), by striking out "$100,000,000" and inserting in lieu thereof "$140,000,000"; and

(2) in paragraph (3), by striking out "$100,000,000" and inserting in lieu thereof "$140,000,000".

SEC. 4. REPORT.

Not later than 6 months after the enactment of this Act, the Administrator of the Alcohol, Drug Abuse, and Mental Health Administration shall prepare and submit, to the Senate Committee on Labor and Human Resources and the House Committee on Energy and Commerce, a report concerning the waiting period reduction grant program under section 509E of the Public Health Service Act (42 U.S.C. 290aa-12). Such report shall include—

(1) a list and description of the programs that have been awarded grants under such section;

(2) a description of the process by which funds awarded under such section are expended for treatment services, including a description of the process by which grantees obligate and draw-down funds received under such section;

(3) an assessment of the validity of waiting lists as a measure of treatment need and, if the report concludes that waiting lists are not the most accurate measure of treatment need, a description of other, more accurate means of measuring treatment need;

(4) the views of State, local, and nongovernmental treatment experts with respect to the validity of waiting lists as a measure of treatment need and with respect to the efficiency of the waiting period reduction grant program; and

(5) any other information that the Administrator determines to be necessary to a thorough appraisal of the efficacy of the program under such section.

By Mr. WIRTH (for himself and Mr. HEINZ):

S. 2462. A bill to amend the Solid Waste Disposal Act to require producers and importers of tires to recycle a certain percentage of scrap tires each year, to require the Administrator of the Environmental Protection Agency to establish a recycling credit system for carrying out such recycling requirement, to establish a management and tracking system for such tires, and for other purposes; to the Committee on Environment and Public Works.

TIRE RECYCLING INCENTIVES ACT

Mr. WIRTH. Mr. President, I today introduce legislation on behalf of myself and Senator HEINZ related to solid waste disposal, the recycling of tires. Senator HEINZ and I together for a long time now have been involved in recycling issues trying to develop—growing out of project 88, the economic incentive programs we put together 1½ years ago—trying to develop a significant number of programs that reflect the need to use the economic incentives to solve environmental problems. Part of that is found in the Clean Air Act in the tradable permits area. We introduced legislation relating to recycling of newspapers and motor oil and today the recycling of tires.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2462

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Tire Recycling Incentives Act of 1990".

SEC. 2. FINDINGS.

The Congress finds the following:

(1) The generation of solid and hazardous waste has grown to alarming proportions in the United States, with per capita disposal having increased by 80 percent from 1960 to 1989. Each person in the United States throws away 3.6 pounds of garbage every day—enough annually to fill a convoy of 10-ton garbage trucks 145,000 miles long, which is the equivalent of half-way to the moon or roughly 7 times around the equator.

(2) Frequently, economic incentives are not sufficient to encourage waste minimization and responsible environmental behavior, and such incentives actually may favor increased waste generation and improper behavior.

(3) A system of economic incentives targeted at waste reduction and recycling together with responsible regulation of recycling activity can reduce both the amount and toxicity of materials entering the environment.

(4) The Administrator of the Environmental Protection Agency requires additional statutory authority to establish appropriate management and recycling requirements and to address situations in which economic incentives to encourage waste reduction and responsible environmental behavior are not adequate.

(5) There is a need to encourage greater recycling of scrap tires. Americans generate 279 million scrap tires annually. Such scrap tires, piled one on top of another, would be 98,000 Empire State Buildings. Less than 30 percent of the currently generated scrap tires are recycled. Currently, 2½ to 3 billion scrap tires are stockpiled across America and these scrap tire dumps grow larger every year. Such stockpiling is, itself, a potential health concern.

(6) While worn out tire casings currently represent only 1.2 percent of the solid waste stream, scrap tires present a special disposal or reuse challenge because of their size, shape, and physical and chemical nature.

(7) Whole scrap tires, when disposed of whole in a landfill, have a unique tendency to rise back to the surface, thus disrupting the landfill cap and allowing water to infiltrate the landfill.

(8) Of the 279 million scrap tires generated in the United States every year, 84.5 percent are landfilled, stockpiled, or illegally dumped.

(9) The whole scrap tires which are stockpiled represent not only a waste of resources but also a health hazard because they serve as an ideal breeding ground for mosquitoes, when stockpiled. According to the Environmental Protection Agency, mosquito borne diseases, like encephalitis and yellow fever, as a result of stockpiled tires, cost an estimated $5,400,000 a year.

(10) Further, fire hazards as a result of tire stockpiles are both severe and wide-ranging. Such scrap tire fires frequently result in air, surface, and groundwater pollution. The major problem of a scrap tire fire hazard is the difficulty in extinguishing the fire due to the fact that 75 percent of tire space is void. This void space makes it difficult to put out fires or quench the oxygen supply.

(11) In addition to the difficulty in putting tire fires out, such fires represent a potential health and environmental risk in the form of both liquid and gaseous emissions from the tires. Burning tires emit solvents and polynuclear aromatic hydrocarbons (PAHs)—many of which are carcinogenic. The tires also melt while burning, releasing both sooty smoke and oily liquids. The water used to extinguish the fire mobilizes these chemicals into the surface and groundwater.

(12) Estimated direct annual expenditures for extinguishing tire fires are greater than $2,000,000. One tire fire alone, in Winchester, Virginia, required more than $5,000,000 for control and containment. These estimates say nothing of the environmental damage that must ultimately be paid for.

(13) The best way of eliminating the environmental and health hazards associated with tire piles is to minimize and ultimately eliminate the stockpiling of tires.

(14) While adequate technology exists to significantly reduce tire stockpiles, waste tires are underutilized because of adverse economics. It is simply cheaper to throw them away than to recycle. Until economic forces are reversed, tire stockpiling will be the option of choice. Producers and importers of tires are responsible for introduction of such tires into commerce and therefore need to assure that such tires are ultimately managed in a responsible fashion.

SEC. 3. REQUIREMENTS TO RECYCLE SCRAP TIRES.

(a) IN GENERAL.—Subtitle D of the Solid Waste Disposal Act (42 U.S.C. 6921 et seq.) is amended by adding at the end the following new sections:

"SEC. 4011. RECYCLING REQUIREMENTS FOR SCRAP TIRES.

"(a) GENERAL REQUIREMENT.—(1) During the period beginning not later than 24 months after the date of the enactment of the Tire Recycling Incentives Act of 1990 and ending 10 years after such date, a producer or importer of tires each year shall recycle, using a method described in paragraph (2), an amount of scrap tires equal to at least that amount of tires determined by—

"(A) multiplying the tires produced for domestic use or consumption or imported that year by such person, by

"(B) the recycling percentage established by the Administrator under subsection (b).

"(2) A producer or importer of tires may comply with this subsection by either or both of the following methods:

"(A) By recycling scrap tires in compliance with the requirements of section 4012 and regulations promulgated pursuant to such section through reintroducing the reclaimed rubber into a manufacturing process for purposes of producing new tires or by retreading old tire casings.

"(B) By purchasing recycling credits under the recycling credit system established pursuant to subsection (c).

"(3) A producer or importer of tires shall submit to the Administrator, under regulations promulgated by the Administrator, a report on the amount of tires produced or imported in each calendar year by such person. The report shall be submitted at least once a year, but the Administrator also may require such interim reports under this paragraph as he considers necessary.

"(b) RECYCLING PERCENTAGE.—The Administrator each year shall establish a recycling percentage for use under subsection (a). The percentage applicable during the first year that the requirement established by subsection (a) is in effect shall be a percentage that is 5 percentage points higher than the recycling rate for tires that exists on the date of the enactment of this section. Such recycling rate shall be determined by using data for 1988 or the most recent year for which data are available. For each of the 10 years thereafter, the recycling percentage shall be an additional 5 percentage points higher than the percentage of the previous year. Such recycling percentage shall go into effect automatically and shall be published in the Federal Register.

"(c) CREDIT SYSTEM FOR RECYCLING SCRAP TIRES.—(1) Not later than 24 months after the date of the enactment of the Tire Recycling Incentives Act of 1990, the Administrator shall promulgate regulations to establish a system under which (A) recyclers may create credits for scrap tire recycling, and (B) producers or importers of tires may purchase such recycling credits from such recyclers, for purposes of complying with subsection (a). No person may create such credits, and no producer or importer of tires may purchase such credits, except in accordance with this subsection and the regulations promulgated under this subsection. In developing the regulations, the Administrator shall, to the maximum extent feasible, allow for the use of records kept in the ordinary course of business or other approaches that facilitate the simple, rapid generation and exchange of credits without a case-by-case approval.

"(2) At a minimum, the regulations under paragraph (1) shall include each of the following requirements:

"(A) The owner or operator of any tire sale and installation facility or any scrap tire collection center shall keep receipts issued by any transporters who take delivery of the scrap tires. The receipts shall be kept for at least 3 years and shall show the date, the quantity of scrap tires taken, and the transporter's identification number. The owner or operator shall show such receipts to the Administrator or to any State enforcing this section and section 4012 upon demand. The owner or operator also shall keep on file a copy of the contract or written agreement between the owner or operator and the transporter under which the transporter agrees to take the scrap tires to a recycling facility.

"(B) The owner or operator of a scrap tire recycling facility who obtains a permit in accordance with section 4012 is the only person who may create a recycling credit for the recycling credit system. Recycling credits may be created through shredding scrap tires, burning scrap tires for energy recovery in a manner approved under Federal or State law, reusing scrap tires through retreading, utilizing crumb rubber made from scrap tires in an asphalt road paving mix, recycling scrap tires by reclaiming rubber from the tires, or such other means as may be identified by the Administrator. The amount of recycling credit that may be created for one scrap tire handled at a scrap tire recycling facility is as follows:

"(i) One-fourth of a credit for one tire shredded.

"(ii) One-fourth of a credit for one tire burned after shredding.

"(iii) One-half of a credit for one whole tire burned in an approved manner.

"(iv) Three-fourths of a credit for one tire reused or recycling after shredding.

"(v) One credit for one whole tire reused or recycled. Methods of reuse may include retreading, and methods of recycling may include reclaiming rubber from the tire to produce tires or an asphalt road paving mix. If the method of reclamation involves shredding or crumbling of the whole tire, an additional one-fourth of a credit may not be claimed under clause (i) or (ii).

"(C) Each year a producer or importer of tires shall keep records of the quantity of tires produced or imported, the recycling of scrap tires carried out to comply with subsection (a), the amount of recycling credits purchased, the names of recyclers from whom the credits were purchased and the dates of the purchases, the price paid for the credits, and the amount, if any, of recycling credits sold or carried over from previous years. The regulations shall allow for a two-year carryover of credits.

"(3) The Administrator may include such other requirements in the regulations under paragraph (1) with respect to qualifications for recyclers, importers, and producers, methods for auditing compliance with the system, and enforcement of the system as the Administrator considers necessary or appropriate for administering the recycling credit system established under this subsection.

"(d) REPORTS.—(1) Not later than six years after the date of the enactment of the Tire Recycling Incentives Act of 1990, the Administrator shall submit to Congress an interim report on the implementation of this section. The report shall include, at a minimum—

"(A) a discussion of the effects of the requirements of this section on the tire industry, the scrap tire recycling industry, and the environment, including the extent of improper tire storage and disposal; and

"(B) an evaluation of the level of the recycling percentage under subsection (b) and recommendations on whether, and at what rate, the percentage should be increased in future years.

"(2) Not later than 10 years after such date, the Administrator shall submit to Congress a final report on the implementation of this section. The report shall include an updated version of the discussion and evaluation required in the interim report, as well as such other findings and recommendations with respect to the implementation of this section as the Administrator considers appropriate.

"(3) Each year the Attorney General shall determine the effects of the credit system established under subsection (c) on competition within the tire industry and the scrap tire recycling industry and shall submit to Congress a report on such determination. With respect to any calendar year occurring after the system is established, the determination shall be made, and the report submitted to Congress, not later than 6 months after completion of an audit of compliance with the system carried out by the Administrator during that calendar year, or 6 months after the end of that calendar year, whichever is earlier. The report shall include recommendations for remediating any anti-competitive effects of the credit system, including effects that may be violations of the Sherman Act or the Clayton Act.

"(e) REGULATIONS.—The Administrator shall promulgate regulations to implement this section not later than 18 months after the date of the enactment of the Tire Recycling Incentives Act of 1990. If the Administrator fails to promulgate such regulations by that date, the recycling percentage under subsection (b) shall be 60 percent until such time as the regulations are promulgated and shall apply retroactively for each year the regulations are not in effect.

SEC. 4012. MANAGEMENT STANDARDS FOR SCRAP TIRES AND SCRAP TIRE COLLECTION, STORAGE, AND MANAGEMENT FACILITIES.

"(a) GENERAL REQUIREMENTS.—(1) Not later than 18 months after the date of enactment of this section the Administrator shall take each of the following actions:

"(A) The Administrator shall publish in the Federal Register a set of minimum requirements, together with a model program for the purposes of use by States implementing and enforcing the provisions of this section. Such minimum requirements and model program shall include provisions for collection, transport, storage, financial assurance, and management of scrap tires. In developing such provisions, the Administrator's first priority shall be to protect public health and the environment, but in adhering to that priority, he should not discourage environmentally beneficial reuse, reclamation, or recycling of scrap tires.

"(B) The Administrator shall publish in the Federal Register a procedure under which such minimum requirements shall be incorporated in the solid waste management plan submitted to the Environmental Protection Agency by such State under this title. The Administrator may not approve a State plan (or, if a State plan has already been approved in a State, the portion of the plan for that State incorporating the minimum requirements under this section) unless (i) the State has adopted all elements of the model program developed under this section, and (ii) the State has designated an agency or entity to implement such program.

"(C) The Administrator shall publish enabling regulations under which States may implement and enforce this section by adoption of the model program and regulations. Such enabling regulations shall specify the percentage of paving materials described in subparagraph (D)(i) necessary for a State to acquire in order to qualify for expedited review under that subparagraph.

"(D) In reviewing and approving the State Plan, the Administrator shall provide expedited review to any State which does one of the following in its plan:

"(i) Encourages the recycling of scrap tires by requiring the relevant State highway authority to use paving materials made from crumb rubber from scrap tires for use in asphalt or roadbed construction. Under the plan the State highway authority (or its paving contractor) would be encouraged to acquire such paving materials from a permitted tire recycler. In any such case, the State may enter into contractual arrangements to share in the revenue from the sale of recycling credits under section 4011.

"(ii) Provides for directly acquiring and recycling scrap tires for such paving materials in the same manner as may be done directly by the State highway authority. In any such case, the State may obtain a permit to

recycle such tires and may generate and sell tire recycling credits.

"(b) MANAGEMENT STANDARDS.—Not later than 24 months after the date of enactment of this section, the Administrator shall promulgate regulations establishing standards for the purpose of minimizing potential health and environmental damages from the improper storage and disposal of scrap tires. States shall adopt such standards in implementing and enforcing this section. At a minimum, such standards shall provide for each of the following:

"(1) BAN.—Not later than 12 months after the date of enactment of this section, the Administrator shall ban the disposal of whole tires in land disposal facilities. As part of the ban, the Administrator shall allow for the land disposal of shredded tires, but only in a monofill.

"(2) INVENTORY; TIRE ADVISORY BOARD.—(A) Not later than 12 months after the date of enactment of this section, each State shall conduct an inventory of scrap tire collection facilities, including existing tire piles, dumps, and landfills with aboveground storage of old tires, or any other scrap tire storage of more than 1,000 tires. Such inventory shall be provided to the Administrator and shall be made available by such State to the public for comment. At a minimum, the inventory shall include an estimate of the number of tires in each scrap tire pile, an estimate of the total amount of scrap tires at the site, a description of the site characteristics, including proximity to the 100-year flood plain, and surface water run-on or run-off characteristics, along with current management practices at the site. The inventory shall include the name of the owner or operator of each such site.

"(B) Not later than 12 months after the date of the enactment of this section, each State shall convene a tire advisory board of public and private interests. Such board shall have at least 3 members and shall help coordinate the State's efforts under this section.

"(3) ABATEMENT.—In consultation with the owner or operator of the scrap tire collection facility, the tire advisory board, and the State public health authorities, the State shall, within 18 months of the date of enactment of this section, develop a scrap tire abatement plan. The overall abatement plan for the State inventory of sites shall reflect the following parameters in such priorities as determined by the State:

"(A) Overall size of tire collection site.

"(B) Risk to public health or the environment, including fire hazard.

"(C) Proximity to populated areas.

"(D) Other factors.

In developing an abatement strategy for individual sites, the States may use the enforcement authorities of section 4013.

"(4) REQUIREMENTS; SALE AND INSTALLATION FACILITIES.—Any facility which distributes more than 1,000 tires annually into commerce for final installation onto motor vehicles shall enter into an agreement with a licensed tire hauler. No person operating such tire sale or installation facilities shall give, sell, donate or otherwise provide scrap tires to any person or entity, other than a licensed tire hauler.

"(5) TRANSPORTATION IDENTIFICATION NUMBER.—(A) Except as provided in subparagraph (B), no person may transport scrap tires from a tire sale or installation facility or scrap tire collection facility unless that person has obtained a scrap tire Transportation Identification Number from the authority designated by the State in its State plan. The Administrator shall promulgate such standards and recordkeeping requirements as are appropriate to assure that scrap tires which are collected, transported, and ultimately stored, recycled or disposed of can be correctly accounted for under this section and section 4011.

"(B) The prohibition in subparagraph (A) does not apply to any of the following:

"(A) A trash hauler, such as a municipal solid waste collection truck, carrying fewer than 50 scrap tires.

"(B) A recyclables hauler, such as an auto dismantling yard, carrying fewer than 50 scrap tires.

"(C) An individual transporting fewer than 10 scrap tires.

"(D) A person transporting products derived from tires.

"(E) A person transporting scrap tires for appropriate agricultural purposes, as defined by the Administrator.

"(F) A business that generates and transports its own scrap tires.

"(c) SCRAP TIRE COLLECTION, STORAGE, PROCESSING, TRANSFER, AND RECYCLING FACILITIES: SITE MANAGEMENT AND PERMITS.—

"(1) PERMIT GUIDELINES.—The Administrator shall publish guidelines for the State to use to issue permits to scrap tire storage, processing, transfer, and recycling facilities. Permit guidelines shall provide for effective regulatory control of scrap tires from the point of origination to final disposition. Permit guidelines shall also provide examples of cases in which class permits and permits for mobile equipment are appropriate.

"(2) OPERATION REQUIREMENTS.—The Administrator shall establish by rule each of the following requirements for the operation of such facilities:

"(A) The rules shall limit the maximum size of both existing and future scrap tire piles at scrap tire collection facilities. For existing tire piles subject to the requirements of the inventory and abatement plan, the maximum square area of such existing piles shall be 10,000 square feet, with a height limit of 40 feet and provision for adequate fencing, as determined by the Administrator, to prevent additions to the pile. For such new tire piles as may be required in the abatement program, or until recycling facilities are in operation, any new tire piles shall be limited to 5,000 square feet, with a maximum height of 20 feet.

"(B) The Administrator shall promulgate a ban on open burning within 50 feet of a scrap tire pile, along with a requirement that a 50 foot fire lane be maintained around each pile.

"(C) The Administrator shall promulgate regulations for vegetation, rodent and mosquito control at such facilities as may be appropriate.

"(3) FLOOD PLAIN, WETLAND, SHORELINE, AND RAVINE REQUIREMENTS.—The Administrator shall establish different requirements for scrap tire collection and storage facilities located in a 100-year flood plain and such other areas where water resources are critical, such as wetlands, shorelines, and ravines.

"(4) RECORDKEEPING.—The Administrator shall promulgate such recordkeeping requirements as are minimally necessary to implement this section and section 4011. Such regulations must be part of the State plan.

"(5) EMERGENCY PLANNING REQUIREMENTS.—The Administrator shall publish guidelines for States to follow in making plans for emergencies involving scrap tire facilities. The guidelines shall require States to establish contingency plans for handling an emergency. Such plans shall be developed in consultation with the tire advisory board, the State fire marshal, and local fire departments.

"(6) EMERGENCY MANUAL.—The owner or operator of the facility shall prepare and maintain at the facility an emergency preparedness manual containing the following elements:

"(A) A list of names and numbers of persons to be contacted in the event of a fire, flood, or other emergency involving the tire facility.

"(B) A list of the emergency response equipment present at the facility, its location, and how it should be used in the event of a fire or other emergency.

"(C) A description of the procedures that should be followed in the event of a fire at the facility, including procedures to contain and dispose of the oily material generated by the combustion of large numbers of tires. The procedures in the emergency preparedness manual shall be followed in the event of an emergency at the facility. The emergency preparedness manual shall be updated once a year, upon changes in operations at the facility, or if required by the State.

"(7) EMERGENCY NOTIFICATION AND REPORTS.—The operator of the facility shall immediately notify the State in the event of a fire or other emergency at the facility with potential off-site impacts. Within 2 weeks of any emergency involving potential off-site impact, the operator of the facility shall submit to the State a report on the emergency. This report shall set out the origins of the emergency, the actions that were taken to deal with the emergency, the results of the actions that were taken, and an analysis of the success or failure of the actions.

"(8) OPERATIONAL RECORD.—The Administrator shall promulgate regulations requiring the owner or operator of the facility to maintain records of the number of scrap tires received at the facility, stored at the facility, and shipped from the facility. Records shall also be kept of the amount of tire-derived products received, stored, or shipped from the facility. At the completion of an abatement increment, or a reporting period, the responsible owner or operator shall submit to the State a record of the approximate number of scrap tires remaining in the facility; the amount of tire-derived products stored at the facility; and the number of scrap tires or amount of tire-derived products received at the facility and shipped from the facility during the abatement increment or reporting period. For scrap tires and tire-derived products shipped to another location, the date and the amount shipped must be included.

"(9) INSPECTION.—At the completion of each abatement increment or reporting period the responsible owner or operator shall notify the State so that an inspection of the tire facility may be conducted to certify the completion of the required abatement or permit operating conditions.

"(10) OPERATION, CLOSURE, AND POST-CLOSURE.—The Administrator shall publish guidelines for adoption by the State regulatory authority requiring that all sites regulated under this section have appropriate financial responsibility or insurance to maintain the facility for at least five years after the facility is closed.

"(11) EXEMPTIONS.—The permitting requirements of this section shall not apply to any of the following:

"(A) A tire retailer who stores no more than 500 scrap tires on the business premises.

"(B) A retreading business that stores no more than 15 percent of the amount of used tires retreaded annually on the business premises.

"(C) A business such as an auto dismantling facility that does not remove tires from vehicles as its main activity, if no more than 1500 unmounted scrap tires are kept on the business premises.

"(D) A permitted sanitary landfill that stores no more than 10,000 scrap tires at the landfill site.

"(E) A person using scrap tires on an agricultural site for legitimate agricultural purposes.

"(F) A person who has entered into a scrap tire facility cleanup agreement and is doing work specified by the agreement.

"(d) FEDERAL RESPONSIBILITY.—(1) The Secretary of the Interior, together with the heads of all Federal departments and agencies with responsibilities for public lands or military installations, shall determine the extent of scrap tire piles on such lands or installations and shall develop and implement a plan within 18 months after the date of enactment of this section to remediate such tire piles. The requirements developed in the plan shall also apply to the National Railroad Passenger Corporation.

"(2) The Administrator, in consultation with the Secretary of Energy, the Secretary of Defense, and the Secretary of Transportation, the Administrator of the Federal Highway Administration, and the Administrator of General Services (as appropriate), shall develop a guideline for procuring goods that make use of scrap or used tires, such as retread tires, tires or asphalt made from crumb rubber from scrap tires, and other appropriate goods. Such procurement guidelines shall require that, in the procurement of such goods, the heads of the Federal departments and agencies covered by the guidelines shall procure the goods at reasonable prices.

'SEC. 4013. ENFORCEMENT AND PENALTIES FOR SCRAP TIRE REQUIREMENTS.

"(a) ABATEMENT AUTHORITIES.—For the purposes of enforcing the scrap tire abatement provisions of section 4012, States are authorized to enter into consent orders with the owner and operators of any scrap tire collection facility for proper management and abatement of scrap tires. If a scrap tire collection facility does not agree to the consent order, the State or a county government acting with the consent of the State, is authorized to obtain an abatement order for the purposes of taking control of the scrap tire facility and conducting the cleanup and collecting the abatement costs through the United States Claims Court. States are also authorized to levy fines of $1,000 per day on scrap tire facilities not complying with this Act.

"(b) TIRE COLLECTORS AND TIRES SALES AND INSTALLATION FACILITIES PENALTIES.—Any tire sale or installation facility which is not exempt under sections 4011 and 4012 may be fined up to $100 per day for managing scrap tires in violation of this Act.

"(c) LANDFILLS.—Any owner or operator of a landfill who is found to knowingly violate the prohibition on land disposal by landfilling more than 100 whole tires in any month shall be subject to a $5,000 fine for each 100 tires (or increment thereof) over that limit disposed of in a month.

"(d) TIRE STORAGE, PROCESSING, TRANSFERRING, AND RECYCLING FACILITIES PENALTIES.—Any tire storage, processing, transferring, or recycling facility determined to be in noncompliance with section 4011 or section 4012 shall be subject to fines of $100 per day for each violation.".

(b) DEFINITIONS.—Section 1004 of the Solid Waste Disposal Act is amended by adding the following at the end thereof:

"(41) The term 'producer' with respect to tires means any person who produces tires for an automobile, motorcycle, truck, trailer, semitrailer or combination, or truck tractor. Such production does not include retreading tires.

"(42) The term 'importer' with respect to tires means any person who imports tires, either individually or as part of an automobile or other vehicle.

"(43) The term 'scrap tire' means a tire from an automobile, motorcycle, truck, trailer, semitrailer or combination, and truck tractor, that is no longer usable for the original purpose.

"(44) The term 'scrap tire collection facility' means any facility or entity that voluntarily or involuntarily collects, stores, or otherwise accumulates scrap tires in amounts in excess of 1,000 tires a year, including an auto parts retailer or municipality.

"(45) The term 'recycler' means with respect to tires the owner or operator of a tire recycling facility who has a permit under section 4012.

"(46) The term 'recycling credit' means with respect to tires a legal record of a recycling activity undertaken in accordance with section 4012 that represents scrap tires recycled for purposes of complying with that section and section 4011.

"(47) The term 'tire sale and installation facility' means any facility which sells or installs more than 1,000 tires for operation on the highways of the United States.

"(48) The term 'tire-derived product' means the usable materials produced from the chemical or physical processing of a scrap tire. Such term does not include ash from burning a scrap tire.

"(49) The term 'abatement increment' means a period of time not greater than six months and not less than one month, as specified in an abatement plan, during which a specified number of scrap tires will be removed from a scrap tire collection facility and processed in accordance with section 4011.

"(50) The term 'shredded tire' means a scrap tire reduced to 2-inch by 2-inch chips.".

(c) TABLE OF CONTENTS.—The table of contents for subtitle D (contained in section 1001) is amended by inserting at the end the following new items:

"Sec. 4011. Recycling requirements for scrap tires.
"Sec. 4012. Management standards for scrap tires collection, storage, and management facilities.
"Sec. 4013. Enforcement and penalties for scrap tire requirements".

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out the amendments made by this Act.

Mr. HEINZ. Mr. President, I rise to introduce, along with my friend and colleague from Colorado, Senator TIM WIRTH, a bill for which its timing of introduction is particularly auspicious and important. We are approaching in just a few days the 20th anniversary of Earth Day, a celebration of the power of the individual to make a difference in environmental protection, a global day of awareness that this is a dynamic yet fragile planet, and the health of our planetary environment is being threatened by a full array of man-made insults. The technological gifts of man's genius have thinned the Earth's protective ozone layer, turned the air in many of our major cities into health threatening smog, fouled our rivers to the point they cannot sustain life, and polluted our ground water to the point it is no longer drinkable or usable. Man's creative genius has also produced what has come to represent his most repugnant insult on the environment—garbage.

The United States leads the world in generating garbage. Last year we generated over 180 million tons—nearly 3 pounds per day for every man, woman and child. This volume of what you might call postconsumer material, better known as trash, presents not only severe threats to our health and environment if mismanaged, and frequently it is, but also a tremendous loss to our resource base.

But largely the same genius that caused the problem can and must be instrumental in resolving it. Certainly there are efforts under way by industry to lessen the material that becomes waste. That is a hopeful sign. But much, much more needs to be done. And Americans, I believe, are poised for the third time this century to make recycling a part of their daily lifestyle. This time if we disappoint them in their expectations and in their potential habits, the consequences of failure may, indeed, be serious and permanent.

The legislation that we are introducing today, the Tire Energy Recovery and Recycling Incentives Act, is the third bill aimed at recycling of this type that Senator WIRTH and I have introduced. All of these bills have been aimed at adjusting and stimulating markets for recycled goods. In other words, to bring recycling fully into the waste materials management area.

The Tire Energy Recovery and Recycling Incentives Act has two potentially far-reaching goals. The first is to stimulate the virtually nonexisting market for the hundreds of millions of scrap tires we remove from our cars every year. Nearly 85 percent of these tires are dumped or improperly disposed of; and, second, to assure that the 3 billion or more scrapped tires now dotting our landscape as huge dump piles are managed properly to reduce the risk of fire and environmental damage. The bill aims at the ultimate elimination of these dumps but requires safe management in the interim.

Mr. President, I direct the eyes of our colleagues to the photograph of a literal tire mountain in the central

valley of California. It literally dwarfs some of the homes in the area. I believe there are some 45 million tires at that particular dump site. We should ask, when we can find a dump site, maybe not as monumental, as close as seven blocks from the U.S. Capitol, why do we have such an enormous problem with scrapped tires? Is it because they are utterly devoid of any recoverable materials? No. Scrapped tires can be a very valuable resource. The average tire contains between 2½ and 5 gallons of petroleum products. We are a net importer of 116 billion gallons of oil. We cannot afford to toss valuable resources by the side of the road and yet, of course, we are.

So the question is, Why are these tires not recycled? The answer is, it is simply cheaper to throw them away, at least right now, rather than to recycle them.

Throwing tires away is virtually free—either legally at the sanitary landfill which, by the way, then has to pay to haul or shred the scrapped tires, or they can be disposed of illegally along the roadway or in some abandoned lot. Many of the 84.5 percent of scrapped tires that are being dumped or disposed of are winding up on acres and acres of farm fields after being rejected at the landfills. That, of course, is what happened at the central valley in the picture behind me.

Frequently, the farmer is enticed to use idle acreage and is paid only a few dollars per acre for this tire graveyard. Rarely does the farmer or landowner have any idea of the liability and environmental risks he is accepting.

The solution to this problem and many other environmental problems lies in using the forces of the market for rather than against or on the sidelines in the battle for environmental protection.

Last year Senator WIRTH and I sponsored a major public policy study—Project 88. The project was to show how market forces could be used to protect the environment. The bill that we are introducing today and the two which preceded it, one to be used to encourage the recycling of used newsprint and the other used motor oil, was developed as a direct outcome of that public policy study.

Senator WIRTH and I will soon be sponsoring a second phase of Project 88 which will provide further analysis on how the recommendations of our first study can be implemented. But a major finding of our Project 88 study is that solid waste continues to pile up and that recycling to date is not providing the anticipated relief because of two factors: The first factor is the relatively low cost of disposal in landfills and incinerators does not reflect all of the costs that we incur in managing our mountains of trash. Those costs just really do not show up; and, second, the markets for recyclables have been very weak and unstable—here today, gone tomorrow and back the next day. In the case of tires it is demonstrably provable that these markets are nearly nonexistent.

What our legislation does is to require that manufacturers and importers of tires participate in the recycling of the commodity they produce. These manufacturers or importers would have to show that a minimum percentage of their production had been recycled each year. That minimum percentage will increase 5 percent each year for the next 10 years. Rather than requiring each manufacturer to invest in a recycling facility—that would clearly be costly and inefficient—our bill allows producers to demonstrate compliance by acquiring recycling credits from retreaders who do recycle tires, from producers of asphalt road surface material—they use ground-up tires to build highways—and other recyclers. In that way, we would allow manufacturers to comply in the least cost, least intrusive manner along with providing stable markets and increased economic incentives for higher forms of recycling.

Most importantly, it means that the scrap tires we generate every year will begin to be turned back into rubber for tires and become useful commercial products, not environmental tire bombs.

For those 3 billion or more tires currently sitting in tire dumps, as behind me, the bill additionally provides both an economic incentive to remediate these dumps and the management standards requisite to assure that the risks to human health and the environment are minimized.

As I have said before, without a market for it, recycled garbage is and will remain just garbage. Nowhere is this clearer than in the case of scrap tires which represent a tremendous potential energy and product resource which will continue to be wasted until we begin to build society's waste management costs into the price of the product.

It is this Senator's view that we can no longer view disposal as a cheap methodology and recycling as too expensive.

By Mr. FOWLER (for himself, Mr. HEFLIN, Mr. PRYOR, Mr. HELMS, Mr. MCCONNELL, Mr. HOLLINGS, Mr. SARBANES, and Mr. COCHRAN):

S. 2463. A bill to reaffirm the importance of State and private forestry, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

TIMBER RESEARCH, EDUCATION, AND ENHANCEMENT ACT OF 1990

● Mr. FOWLER. Mr. President, I rise to introduce—along with Senators HEFLIN, PRYOR, HELMS, MCCONNELL, HOLLINGS, SARBANES, and COCHRAN—the Timber Research, Education, and Enhancement Act of 1990, as a forestry title to the 1990 farm bill.

There has been no major revision of existing forestry statutes in over a decade. I think it is time to correct that oversight, and to recognize that the forestry products of this country are an agricultural commodity—governed in large part by our agricultural policies—and should be treated as such in the 1990 farm bill.

The TREE Act has been endorsed by the National Association of State Foresters, the Forest Farmers Association, the National Forest Products Association, the American Forest Council, and the National Association of Professional Forestry Schools and Associations.

The importance of our forestlands cannot be overstated. We all know that the United States ranks first in the world in timber production—and I am proud to say that my home State of Georgia leads the Nation in many forestry products. The forestry industry adds $62 billion a year to the value of the U.S. economy.

That does not even take into account the many other benefits of healthy, growing forests. We talk about problems of global warming, air pollution, sewage spills. According to the Maryland Forest Service, one tree has the cooling effect of five air conditioners. One acre of trees will scrub clean the air polluted by eight cars driven for 12 hours and absorb the carbon dioxide produced by 50 cars. A 129-acre woodland can absorb 1 million gallons of sewage effluent a day. And, as we all know, our forests provide indispensable fish and wildlife habitat.

Our forests, in other words, provide enormous economic and environmental benefits. Right now, neither the economic nor the ecological facts of forestry are encouraging. More acres of trees are being harvested than are being planted.

That is why we need better programs in forestry research, education and extension—to reach the 8 million private citizens who own and manage the majority of this Nation's forestlands. This legislation addresses these needs.

It also seeks to reinforce the forestry initiatives that have proven the most successful in this country. We owe a great debt to State foresters, who have led the way in developing technical assistance programs for long-term planning and forest management, and this bill provides $25 million in grant authority to State forestry programs that are already established and doing the job of improving stewardship of our forestlands.

We are seeking to establish a comprehensive and balanced forestry title, one that addresses the problems of

tree loss in urban areas as well as the opportunities for forestry in the countryside. The TREE Act provides for incentives and educational and technical assistance for maintaining trees and forested areas in urban communities.

For rural areas, it seeks to provide access for wood and wood products to guaranteed credit programs and Public Law 480, similar to other agricultural commodities. In a time of enormous budget deficits, forestry products are one area in which we can expect to expand our exports, an we must maximize those opportunities.

This legislation also calls for an assessment of the U.S. Forest Service role in the development of timber-dependent communities, and directs the Cooperative Extension Service to provide information on rural development opportunities through forestry. The key to these efforts, especially in isolated rural communities that have little diversity to their economies, is sustainable use of forest resources.

These initiatives, it seems to me, can prove decisive, especially for the small, private tree farmers who control most of this Nation's forestland. Their management capabilities will go a long way to determine our success in replenishing our forests.

We must reverse the current trend of harvests exceeding growth if we expect to keep and expand our export markets, to maintain healthy forests and a healthy forestry industry for the future. Considering the time it takes to grow a tree, we must take the strongest possible action now—to avoid the consequences of inaction in the decades ahead.

● Mr. HOLLINGS. Mr. President, I rise today to support the introduction of S. 2463, a bill to reaffirm the importance of State and private forestry. In particular, I am pleased that this bill incorporates my measure, S. 2043, a bill to establish an Emergency Reforestation Program to provide for the reforestation of timberlands that are damaged by natural disasters. Enactment of this legislation will provide necessary assistance for the timberowners who suffered damages from Hurricane Hugo and will create a program to help landowners who suffer similar natural disasters in the future.

This bill would establish a cost sharing program to pay up to 75 percent of reforestation costs for owners of timber stands which suffer damages resulting from conditions which qualify as a major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

On September 21 and 22, 1989, Hurricane Hugo leveled 6.7 billion board feet of timber in South Carolina—enough timber to rebuild the city of Charleston 10 times over. This loss, at an estimated $1.04 billion, represents a severe financial blow to the private timberowners, who own almost 70 percent of South Carolina's forests. These individuals and families saw Hugo wipe away their nest eggs in the course of a few hours. The acres of splintered and shattered trees are the most persuasive testimony to Hugo's brute force, and to the fact that it will be a full generation before the land fully recovers. Since tax casualty losses are virtually nonexistent in this case, these timberowners are looking for ways to reforest their lands.

The enormous amount of wood on the ground also represents the grim possibility of another huge natural disaster in South Carolina: specifically, an uncontrollable forest fire that could feed on the downed timber unless the land is cleaned up. We simply don't have the manpower, rail access, or mill capacity to salvage all the timber, which is subject to rapid deterioration.

Reforestation of the land will also solve several environmental problems. The decomposing wood has been under swift attack of blue stain fungi as well as southern pine beetles and other insects which create health threats. The soil is in danger of extensive erosion, and the wildlife habitats of several endangered species, including the red-cockaded woodpecker, have been virtually demolished.

In the past, Congress has created several emergency programs to address specific problems: emergency housing programs, emergency soil conservation programs, emergency SBA programs, and so forth. However, no program is in place to address a forestry disaster of the scope we have in the Hugo-hit areas. This bill addresses not only the devastation of Hugo, but provides assistance to timberowners who suffer from natural disasters in the future.

I commend the distinguished chairman of the Conservation and Forestry Subcommittee, Senator FOWLER, for his hard work on this bill, which is intended to be included in the 1990 farm bill. This bill covers a wide gamut of areas—research and education, technical assistance, and fire protection, to name a few—in which the United States must continue its commitment to wise forestry practices.

The quality of our forests directly affects the quality of our water, air, forested wetlands, and wildlife habitats. Furthermore, careful stewardship of our timberlands will also help to mitigate the effects of global warming. The Timber Research, Education, and Enhancement Act of 1990 will encourage the conservation and renewal of our Nation's precious resources.●

By Mr. REID (for himself and Mr. BRYAN):

S. 2464. A bill to establish the Red Rock Canyon National Conservation Area; to the Committee on Energy and Natural Resources.

RED ROCK CANYON NATIONAL CONSERVATION AREA

Mr. REID. Mr. President, in 3 days, on April 22, 1990, this Nation will celebrate the 20th Anniversary of Earth Day, a day where 20 years ago our collective conscience awoke and we as a people, who so solidly have our roots in the land, let our voices be heard.

That day 20 million Americans from the Joshua Tree deserts of southern Nevada, to the hardwood forests of northern Maine, let the leaders of this country, so rich in natural resources, know that it was imperative that measures be taken to conserve our precious environment and preserve our proud heritage.

As Gaylord Nelson, the distinguished gentleman from Wisconsin and founder of Earth Day, so aptly put it, "Right now and in the long haul * * * no other issue is more relevant to the condition of human life than our resources."

I rise today with my colleague from Nevada, Senator BRYAN, to introduce a bill to establish the Red Rock Canyon Area of southern Nevada as a national conservation area. This area, on the outskirts of Las Vegas, is vitally important to meet the needs of the rapidly increasing population of Nevada, the fastest growing State in our Nation.

As described in a popular book on Red Rock Canyon by Cheri Cinkoske, it offers the people of the Las Vegas Valley, and indeed all Americans, "both dramatic vistas and detailed closeup views; the space and openness of the desert give the visitor an opportunity to blend with nature, to see its history revealed in rocks, plants, and animals. Forged under a sea, then buried beneath sand dunes, it is now a desert sculpted by the continuing forces of water and wind." Its beauty is one of stark contrast and awesome magnitude.

Mr. President, in considering this bill, we must realize that the time has come to protect these fragile treasures of nature, to protect these priceless values of the ages not only for our children but for their children.

Red Rock Canyon is not only a thing of stunning beauty, but it is an outdoor classroom as well, providing us with the rare opportunity to learn more about our ancient past and the forces that have shaped the natural world. It provides us with 600 million years of natural history to explore.

Red Rock Canyon is the crown jewel of the public lands administered by the Bureau of Land Management [BLM] in Nevada; indeed, it is the crown jewel of the entire 174 million acres of public land managed by BLM throughout the West.

It possesses a cadre of values recognized by this distinguished body as worthy of protection by a national conservation area designation. The

outstanding values found within Red Rock Canyon include scenic, recreational, geologic, biologic, and cultural resources.

The keystone thrust fault, and the red and white fossilized standstone bluffs, are of great interest to students of geology and visitors from all over the world as an outstanding example of this type of geomorphological phenomena. The desert riparian habitat, the unusual and diverse plant and animal life, which includes desert big horn sheep, and remnant Pleistocene flora, are but some of the plethora of natural values which visitors worldwide come to Red Rock Canyon to view. There is a National Register historic site in Brownstone Canyon and numerous rock art and prehistoric habitation sites, dating as far back as 10,000 years, which are highly prized for their interpretive and research values.

Therefore, Mr. President, in order to conserve, protect, and enhance, for the benefit and enjoyment of present and future generations, the area in southern Nevada containing and surrounding the Red Rock Canyon and the unique and nationally important geologic, archaeological, ecological, cultural, scenic, scientific, and recreation resources of the public lands therein contained, I urge the support of my distinguished colleagues for this important piece of environmental legislation for establishing the Red Rock Canyon National Conservation Area.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2464

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—RED ROCK CANYON NATIONAL CONSERVATION AREA

SEC. 101. ESTABLISHMENT OF CONSERVATION AREA.

(a) IN GENERAL.—(1) In order to conserve, protect, and enhance for the benefit and enjoyment of present and future generations the area in southern Nevada containing and surrounding the Red Rock Canyon and the unique and nationally important geologic, archeological, ecological, cultural, scenic, scientific, and recreation resources of the public lands therein contained, there is established the Red Rock Canyon National Conservation Area (referred to as the "conservation area").

(2) The conservation area shall consist of approximately 62,000 acres of federally-owned land, water, and interests as generally depicted on a map entitled "Red Rock Canyon National Conservation Area—Proposed" numbered NV-RRC- ——, —— - —— and dated ——, 19——.

(3) The map described in paragraph (2) shall be on file and available for inspection in the offices of the Director of the Bureau of Land Management of the Department of the Interior.

(b) LEGAL DESCRIPTION.—(1) As soon as practicable after the date of enactment of this Act, the Secretary of the Interior (hereinafter referred to as the "Secretary") shall file a legal description of the conservation area established in subsection (a) with the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives, and such legal description shall have the same force and effect as if included in this Act, except that the Secretary may correct clerical and typographic errors in the legal description.

(2) The legal description described in paragraph (1) shall be on file and available for public inspection in the offices of the Director of the Bureau of Land Management, Department of the Interior.

(c) DISCREPANCIES.—In the case of any discrepancy between or among the map described in subsection (a), the amount of acreage stated in subsection (a), or the legal description filed by the Secretary pursuant to subsection (b), the map described in subsection (a) shall control any question concerning the boundaries of the conservation area.

SEC. 102. MANAGEMENT.

(a) IN GENERAL.—The Secretary, acting through the Director of the Bureau of Land Management, shall manage the conservation area to conserve, protect, and enhance the resources specified in section 101 in accordance with this Act, the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), and other laws, including those relating to management of wild free-roaming horses and burros on public lands.

(b) HUNTING.—(1) Subject to paragraph (2), the Secretary shall permit hunting within the conservation area in accordance with the laws of the United States and the State of Nevada.

(2) The Secretary, after consultation with the Nevada Department of Wildlife, may issue regulations designating zones where and establishing when hunting shall not be permitted for reasons of public safety, administration, or public use and enjoyment.

(c) PROHIBITION OF COLLECTION OF WOOD.—Collection of green or dead wood for sale or other commercial purposes shall not be permitted in the conservation area.

(d) PREVENTIVE MEASURES.—Nothing in this Act shall preclude such measures as the Secretary deems necessary to prevent devastating fire or infestation of insects or disease.

TITLE II—GENERAL PROVISIONS

SEC. 201. MANAGEMENT PLANS.

(a) IN GENERAL.—(1) Within 3 full fiscal years following the fiscal year in which the date of enactment of this Act occurs, the Secretary shall develop and transmit to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives a general management plan for the conservation area and recreation area which shall describe the appropriate uses and development of the conservation area consistent with the purposes of this Act.

(2) The management plan described in paragraph (1) shall be developed with full public participation and shall include—

(A) an implementation plan for continuing program of interpretation and public education about the resources and values of the conservation area;

(B) a proposal for public facilities to be developed, expanded, or improved for the conservation area including the Red Rock Canyon visitors center, to accommodate visitors to southern Nevada;

(C) natural and cultural resources management plans for the conservation area,

ith emphasis on the preservation and long-term scientific use of archeological resource, giving priority to the enforcement of the Archaeological Resources Protection Act of 1979 (16 U.S.C. 470aa et seq.) and the National Historic Preservation Act (16 U.S.C. 470 et seq.) within the conservation area;

(D) a wildlife resource management plan for the conservation area prepared in consultation with appropriate departments of the State of Nevada and using previous studies of the area;

(E) a recreation management plan for the conservation area in consultation with appropriate departments of the State of Nevada; and

(F) a wild horse and burro herd management plan for the conservation area prepared in consultation with appropriate departments of the State of Nevada.

(3) The natural and cultural resources management plans described in paragraph (2)(C) shall be prepared in consultation with the Advisory Council on Historic Preservation and the Nevada State Historic Preservation Office, and such plans shall provide for long-term scientific use of archaeological resources in the conservation area.

(b) WILDERNESS STUDY AREAS.—(1) The general management plan for the conservation area shall review and recommend the suitability or nonsuitability for preservation as wilderness of the lands comprising 46,500 acres, identified as "Wilderness Study Areas" on the map described in section 101.

(2) Pending submission of a recommendation and until otherwise directed by Act of Congress, the Secretary of the Interior, acting through the Director of the Bureau of Land Management, shall manage the lands within the wilderness study areas referred to in paragraph (1) so as to maintain their potential for inclusion within the National Wilderness Preservation System.

SEC. 202. ACQUISITIONS.

(a) IN GENERAL.—Within the conservation area, the Secretary may within the boundaries of his or her jurisdiction, and outside those boundaries when required for the construction or improvement of access roads thereto, acquire lands, waters, and interests in lands and waters (including scenic easements), as the Secretary considers to be in the public interest to carry out this Act by—

(1) donation;

(2) purchase with donated or appropriated funds;

(3) exchange; or

(4) transfer from another Federal agency with the concurrence of the head thereof.

(b) TERMS OF ACQUISITION.—(1)(A) Subject to subparagraph (B), all exchanges pursuant to subsection (a) shall be made in a manner consistent with law and on the basis of equal value, and either party to an exchange may pay or accept cash in order to equalize the value of the property exchange.

(B) If the parties agree to an exchange and the Secretary determines that it is in the public interest, the exchange may be made for other than equal value.

(2) Lands, waters, or interests therein owned by the State of Nevada or a political

subdivision thereof may be acquired by donation or exchange only.

(3) Federally-owned lands, waters, or interests therein located within the conservation area may be transferred out of Federal ownership only in connection with an exchange for lands, waters, or interests therein owned by the State of Nevada or a political subdivision thereof.

(c) INCORPORATION OF ACQUIRED LANDS.—Any lands, waters, or interests therein within the boundaries of the conservation area which after the date of enactment of this Act may be acquired by the United States shall be incorporated into the conservation area and managed accordingly, and all provisions of this Act and other laws applicable to conservation areas shall apply to such incorporated lands.

SEC. 203. WITHDRAWAL.

Except as authorized in this Act, and subject to valid and existing rights, all Federal lands within the conservation area and all lands and interests therein which are acquired by the United States after the date of enactment of this Act are withdrawn from all forms of entry, appropriations, or disposal under the public land laws, from location, entry, and patent under the mining laws, and from operation under the mineral leasing and geothermal leasing laws.

SEC. 204. COOPERATIVE AGREEMENTS.

In order to encourage unified and cost-effective management and interpretation of natural and cultural resoruces in southern Nevada, the Secretary is authorized and encouraged to enter into cooperative agreements with other Federal, State, and local agencies and nonprofit entities providing for the management and interpretation of natural and cultural resources in southern Nevada.

SEC. 205. COORDINATED MANAGEMENT.

The Secretary shall coordinate management of the conservation area with surrounding State and Federal lands in such a manner as best to meet the present and future need of the American people.

SEC. 206. WATER RIGHTS.

(a) RESERVATION OF RIGHTS.—Congress expressly reserves to the United States the amount of water reasonably required to carry out the purposes for which the conservation area is established under this Act.

(2) The priority date of the rights reserved in paragraph (1) shall be the date of enactment of this Act.

(b) EXISTING RIGHTS.—Nothing in this section shall affect any existing valid or vested water right or application for water rights pending as of the date of enactment of this Act that are subsequently granted.

(c) FUTURE RIGHTS.—Nothing in this section shall be construed as establishing a precedent with regard to any future reservation of water rights, nor shall it affect the interpretation of any other Act or any reservation of water rights.

SEC. 207. DEFINITIONS.

For the purposes of this Act—

(1) the term "public lands" has the meaning stated in section 103(e) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1702(e)); and

SEC. 208. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.

By Mr. GRASSLEY (for himself, Mr. HEFLIN, Mr. HATCH, Mr. HUMPHREY, Mr. BIDEN, Mr. SPECTER, Mr. SIMON, Mr. LEVIN, Mr. LIEBERMAN, Mr. MURKOWSKI, and Mr. DECONCINI):

S. 2465. A bill to provide a new civil cause of action in Federal law for acts of international terrorism that provides extraterritorial jurisdiction over terrorist acts abroad against U.S. nationals; to the Committee on the Judiciary.

ANTITERRORISM ACT OF 1990

Mr. GRASSLEY. Mr. President, I rise today to introduce, along with Senator HEFLIN, the Anti-Terrorism Act of 1990. Other cosponsors include: Senators HATCH, HUMPHREY, BIDEN, SPECTER, SIMON, LEVIN, LIEBERMAN, MURKOWSKI, and DECONCINI. This bill will, for the first time, provide for Federal civil remedies against acts of international terrorism.

In recent years, Congress has enacted several laws extending American criminal jurisdiction to acts of international terrorism against our citizens. However, our civil justice system provides little civil relief to the victims of terrorism.

We all remember the tragic case of the PLO terrorists who seized the Italian cruiseliner *Achille Lauro.*

They took 97 passengers captive including Leon and Marilyn Klinghoffer. These terrorists did not stop at surrounding the passengers with guns and explosives. They took the wheelchair bound Mr. Klinghoffer to the side of the boat where they shot him and pushed him into the sea.

In seeking justice, Mrs. Klinghoffer turned to the tort laws of her home State of New York. In Klinghoffer versus John Doe, treasurer of the Palestinian Liberation Organization, Mrs. Klinghoffer seeks compensation from those who are responsible for torts, including wrongful death, assault, battery, false imprisonment, and intentional infliction of emotional distress. This case is still pending in court.

Unfortunately, victims who turn to the common law of tort or Federal statutes, find it virtually impossible to pursue their claims because of reluctant courts and numerous jurisdictional hurdles.

Tragically, we have many more victims who will have no remedy. The Stethem family, who lost their son Robert to the hands of PLO terrorists, have not wandered from our memory.

The hundreds of victims of Pan Am 103, are still in our hearts. Narcoterrorism threatens to produce more American victims.

Just last year, Congress authorized the State Department to increase the rewards for combating terrorism.

We know the importance of providing a monetary incentive in order to gain crucial information on terrorists.

This bill will serve as a further incentive to those with the deep pockets, such as the airline industry, to spend resources and go after terrorists: This bill establishes an express cause of action to gain compensation as fruit of their efforts.

Specifically, this bill will amend title 18, United States Code section 2331.

This title already provides for criminal prosecution of terrorists. This legislation will serve as an appropriate civil counterpart to the criminal statute.

The civil remedies section provides:

First, the first section, section 2331, defines terrorism as: violent acts or acts dangerous to human life that are a violation of the criminal laws of the United States or of any State. These are acts directed toward a civilian population not directed against military personnel or installations.

Second, section 2332 contains the criminal penalties, currently codified under section 2331. This legislation does not change the substance of the criminal penalties section, it merely reclassifies it.

Third, section 2333(a) provides that any national of the United States injured by an act of international terrorism may sue in U.S. district court for treble damages, attorney's fees and costs.

Subsection (b) provides that any final judgment rendered in favor of the United States in any criminal proceeding shall not prevent the defendant from denying the essential elements of the criminal offense in any subsequent civil proceeding.

Subsection (c) provides that a conviction in any foreign state criminal proceeding will be accorded full faith and credit and prevents defendant from denying the allegations of the criminal offense.

Section 2334 grants district court jurisdiction.

Section 2335 sets a 3-year statute of limitations for bringing suit.

Section 2336 states that no suit can be maintained under section 2333 of this chapter for: injury or loss by reason of an act of war.

This section codifies the court-fashioned act of state doctrine, by barring claims arising from official acts of foreign governments.

Finally, section 3 amends title 18, United States Code sections 1603 and 1605, the Foreign Sovereign Immunities Act, to provide for civil actions against a State where that State has entered the commercial arena and therein conducts terrorism.

With the enactment of this legislation, we set an example to the world of how the United States legal system deals with terrorists. If terrorists have assets within our jurisdictional reach, American citizens will have the power to seize them.

We tell the world that we know terrorism when we see it, and we are not shy about combating it.

This legislation reaffirms our commitment to the rule of law: the people

of the United States will be able to bring terrorists to justice the "American Way"; by using the framework of our legal system to seek justice against those who follow no framework and defy all notions of morality and justice.

Thank you, Mr. President, and I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2465

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Antiterrorism Act of 1990".

SEC. 2. TERRORISM.

(a) TERRORISM.—Part 1 of title 18, United States Code, is amended by adding immediately after chapter 113 of the following new chapter:

"CHAPTER 113A—TERRORISM

"Sec.
"2331 Definitions.
"2332 Criminal penalties.
"2333 Civil remedies.
"2334 Jurisdiction and venue.
"2335 Limitation of actions.
"2336 Other limitations.

"§ 2331 Definitions

"As used in this chapter—

"(1) the term 'international terrorism; means activities that—

"(A) involve violent acts or acts dangerous to human life that are a violation of the criminal laws of the United States or of any State, or that would be a criminal violation if committed within the jurisdiction of the United States or of any State;

"(B) appear to be intended—

"(i) to intimidate, coerce, or retaliate against a civilan population;

"(ii) to influence the policy of a government by intimidation, coercion, or retaliation, other than by attacks directed against military personnel or installations; or

"(iii) to affect the conduct of a government by assassination or kidnapping; and

"(C) occur totally outside the United States, or transcend national boundaries in terms of the means by whch they are accomplished, the persons they appear intended to intimidate, coerce, or retaliate against, or the locale in which their perpetrators operate or seek asylum;

"(2) the term 'national of the United States' has the meaning given such term in section 101(a)(22) of the Immigration and Nationality Act;

"(3) the term 'person' means any individual or entity capable of holding a legal or beneficial interest in property; and

"(4) the term 'act of war' means any act occurring in the course of—

"(A) declared war;

"(B) armed conflict, whether or not war has been declared, between two or more nations; or

"(C) armed conflict between military forces of any origin.

"§ 2332. Criminal penalties

"(a) HOMICIDE.—Whoever kills a national of the United States, while such national is outside the United States, shall—

"(1) if the killing is murder as defined in secton 1111(a) of this title, be fined under this title or imprisoned for any term of years or for life, or both;

"(2) if the killing is a voluntary manslaughter as defined in section 1112(a) of this title, be fined under this title or imprisoned not more than 10 years, or both; and

"(3) if the killing is involuntary manslaughter as defined in section 1112(a) of this title, be fined under this title or imprisoned not more than 3 years, or both.

"(b) ATTEMPT OR CONSPIRACY WITH RESPECT TO HOMICIDE.—Whoever outside the United States attempts to kill, or engages in a conspiracy to kill, a national of the United States shall—

"(1) in the cause of an attempt to commit a killing that is a murder as defined in this chapter, be fined under this title or imprisoned not more than 20 years, or both; and

"(2) in the case of a conspiracy by two or more such persons to commit a killing that is a murder as defined in section 1111(a) of this title, if one or more of such persons do any overt act to effect the object of the conspiracy, be fined under this title or imprisoned for any term of years or for life, or both.

"(c) OTHER CONDUCT.—Whoever outside the United States engages in physical violence—

"(1) with intent to cause serious bodily injury to a national of the United States; or

"(2) with the result that serious bodily injury is caused to a national of the United States,

shall be fined under this title or imprisoned not more than 5 years, or both.

"§ 2333. Civil remedies

"(a) ACTION AND JURISDICTION.—Any national of the United States injured in his person, property, or business by reason of an act of international terrorism may sue therefor in any appropriate district court of the United States and shall recover threefold the damages he sustains and the cost of the suit, including attorney's fees.

"(b) ESTOPPED UNDER UNITED STATES LAW.—A final judgment or decree rendered in favor of the United States in any criminal proceeding under section 1116, 1201, 1203, or 2332 of this title or section 1472 (i), (k), (l), (n), or (r) of title 49 App. shall estop the defendant from denying the essential allegations of the criminal offense in any subsequent civil proceeding under this section.

"(c) ESTOPPED UNDER FOREIGN LAW.—A final judgment or decree rendered in favor of any foreign state in any criminal proceeding shall, to the extent that such judgment or decree may be accorded full faith and credit under the law of the United States, estop the defendant from denying the essential allegations of the criminal offense in any subsequent civil proceeding under this section.

"§ 2334. Jurisdiction and venue

"(a) GENERAL VENUE.—Any civil action under section 2333 of this title against any person may be instituted in the district court of the United States for any district in which all plaintiffs reside or the defendant resides, is found, or has an agent.

"(b) SPECIAL MARITIME OR TERRITORIAL JURISDICTION.—If the actions giving rise to the claim occurred within the special maritime and territorial jurisdiction of the United States, as defined in section 7 of this title, then any civil action under section 2333 of this title against any person may be instituted in the district court of the United States for any district in which all plaintiffs reside or the defendant resides, is found, or has an agent.

"(c) CONVENIENCE OF FORUM.—The district court shall not dismiss any action brought under section 2333 on the grounds of the inconvenience or inappropriateness of the forum chosen, unless the action may be maintained in a more convenient or more appropriate foreign court that has jurisdiction over the subject matter and over the defendant or defendants.

"§ 2335. Limitation of actions

"(a) IN GENERAL.—Subject to subsection (b), a suit for recovery of damages under section 2333 of this chapter shall not be maintained unless commenced within 3 years from the date the cause of action accrued.

"(b) CALCULATION OF PERIOD.—The time of the absence of the defendant from the United States or from any jurisdiction in which the same or a similar action arising from the same facts may be maintained by the plaintiff, or any concealment of his whereabouts, shall not be reckoned within this period of limitation.

"§ 2336. Other limitations

"No action shall be maintained under section 2333 of this chapter for injury or loss by reason of an act of war.".

(b) TABLE OF CONTENTS.—The table of contents of part 1, title 18, United States Code, is amended by striking:

"113A. Extraterritorial jurisdiction over terrorist acts abroad against United States nationals..... 2331"

and inserting in lieu thereof:

"113A. Terrorism..... 2331".

(c) REPEAL.—Section 2331 of title 18, United States Code, is repealed.

SEC. 3. AMENDMENTS TO THE FOREIGN SOVEREIGN IMMUNITIES ACT.

(a) GENERAL EXCEPTIONS.—Section 1605 of title 28, United States Code, is amended—

(1) in paragraph (5) of subsection (a) by striking "or" at the end thereof;

(2) in paragraph (6) of subsection (a) by striking the period at the end thereof and inserting in lieu thereof "; or"; and

(3) in subsection (a) by adding at the end thereof the following paragraph:

"(7) in which damages are sought for injuries sustained by reason of an act of international terrorism, as defined in section 2331, title 18, United States Code, or of any other violation of the law of nations which was perpetrated by or aided by that foreign state or by any official or employee of that foreign state while acting within the scope of his office or employment.".

(b) DEFINITIONS.—Section 1603 of title 28, United States Code, is amended by inserting at the end thereof the following subsection:

"(f) The term 'aided by' a foreign state means carried out—

"(1) by an agent or agents of that foreign state;

"(2) at the direction, instruction, request, or suggestion of that foreign state; or

"(3) with financial, material, or logistical support from that foreign state.".

Mr. HEFLIN. Mr. President, I rise today to join Senator GRASSLEY in introducing the Antiterrorism Act of 1990. This legislation will provide a new civil cause of action in Federal law for acts of international terrorism, by establishing extraterritorial jurisdiction over terrorist acts abroad against U.S. nationals.

There have been several alarming trends in terrorist attacks against U.S.

citizens over the course of the last 10 years, during which time approximately 384 American citizens were killed. The first trend is the rise in attacks involving innocent bystanders, and the second is an intent to cause mass casualties.

In recent years, certain incidents of terrorism against American citizens have been particularly horrific. For example, on October 7, 1985, four Palestinian gunmen hijacked the Italian cruise ship *Achille Lauro* off Alexandria, Egypt. While off the Syrian port of Tartus, the terrorists killed wheelchair-bound American Leon Klinghoffer. On December 21, 1988, Pan Am flight 103, just out of London en route to New York City, exploded in the air over Lockerbie, Scotland. There is overwhelming evidence that a bomb in the cargo hold of the plane caused the crash.

The bombing of Pan Am flight 103 and the loss of all 289 passengers onboard may have signaled the beginning of a new Iranian terrorist campaign against the United States. There is also a threat that improved prospects for peace negotiations between Israel and Palestinian groups will generate a new round of terrorism by radical Arab groups. Historically, those who oppose peace talks with Israel have used terrorist tactics to undermine the peace process whenever there are signs of progress between the groups. If this happens, we could see a rise in Middle East terrorism.

While Congress has enacted various laws aimed at extending American criminal jurisdiction for acts of international terrorism against our citizens, there are currently no laws expressly providing Federal civil remedies against these outrageous acts. Therefore, this bill would amend title 18, United States Code, section 2331 by providing a plaintiff a civil cause of action in U.S. District court for injuries caused by acts of international terrorism.

The time has come to provide victims of terrorism with a means of civil redress, and I am proud to join in introducing this legislation.

By Mr. ARMSTRONG:

S. 2467. A bill to amend the Internal Revenue Code of 1986 to provide civil damages for certain careless collection actions; to the Committee on Finance.

CIVIL DAMAGES FOR CARELESS COLLECTION ACTIONS

● Mr. ARMSTRONG. Mr. President, Mrs. Kay Council testified recently before the Internal Revenue Service Oversight Subcommittee of the Senate Finance Committee. I commend her testimony to my colleagues, but only if they've steeled themselves beforehand to read of gross injustice done to an American taxpayer by her Government.

Mrs. Council relates her story of gross carelessness by the IRS. Through its actions, the IRS caused Mrs. Council to lose tens of thousands of dollars and, far more importantly, her husband. Near the end of a 9-year running battle with the Service, Alex Council committed suicide so his life insurance policy could provide his wife with the money she needed to defend herself. Four months later, the Tax Court ruled in favor of Mrs. Council, all liens were ordered dropped, and the Service was ordered to pay Mrs. Council's attorneys $27,900, a small fraction of the costs she has had to pay.

I ask unanimous consent to include her harrowing story.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

Mr. Chairman: My name is Kay M. Council. I live in High Point, North Carolina. I am 48 years old, and I am a widow. I came home one evening in June 1988 and found the lights on, the house empty and a note from my husband:

"My DEAREST KAY—

"I have taken my life in order to provide capital for you. The IRS and its liens which have been taken against our property illegally by a runaway agency of our government have dried up all sources of credit for us. So I have made the only decision I can. It's purely a business decision. I hope you can understand that.

"I love you completely,

ALEX.

"You will find my body on the lot on the north side of the house."

I don't remember many details from the rest of that night, but I will never get over what I lost that night—what the IRS did to us, what it drove my husband to do. He was 49 years old.

Four months later, finally able to pay our attorneys with money from Alex's life insurance, I went to court and beat the IRS. The court entered a judgment barring the IRS from collecting $300,000 in tax, penalties and interest it claimed that we owed. The court agreed that we owed nothing. The court ordered the IRS to cancel the tax lien that it had placed on our property, an illegal tax lien that had ruined our personal finances and our business.

Alex had a development company that was building a residential development in Pfafftown, N.C., the town where we lived. When the IRS placed the illegal lien on our property in May 1987, he was preparing to start another development. But no one wants to lend money to someone who has a tax lien. So the development fell though.

After the IRS acted illegally, our business was practically ruined. Our income from the business then barely covered our living expenses. We owed $112,000 on a construction loan for our home but could not refinance it because of the lien. We faced losing our home when the loan came due.

People talk to me about being angry at Alex for what he did. I try to be but when I sit down and think this out, he was right. There was no other way, except to just give up. If we had given up, we would have lost our home and our business, and we still could not have paid the IRS all that they claimed we owed. We could not give up—Alex could not give up—because we knew the IRS was wrong.

The IRS was wrong from the day they sent us the first notice. They were wrong. We were innocent from day one, and the court decisions and court orders say that. But look at what was done to my life. People sit back and say, "Well, this is a terrible story but it's surely an exception to the rule, and this sort of thing could never happen to me."

They are wrong. This kind of thing should never have happened to me and Alex. We weren't criminals. We weren't trying to do anything wrong, and we didn't do anything wrong. We just got caught up in the middle of a big IRS screw-up, and we couldn't get out of it.

It began in 1979. We were living in a suburb of San Francisco, where Alex was a vice president of a mortgage insurance company that he had helped start. Alex received a bonus. We invested the money in real estate and in oil and gas leases. On the advice of our accountant and our financial consultant, we also bought rights to two paintings offered by an art company in New York. The idea was that we could sell lithographs of the paintings and use other marketing tools available to eventually recoup our investment and make a profit. It was to have been a little business for me to run. But it didn't work out, and we claimed a write-off of about $70,000 in our 1979 tax return.

The IRS audited the return and told us that our accountant was wrong, that it did not consider the art investment a legitimate tax write-off. We expected the IRS to deny the write-off and send a notice of deficiency that would give us 90 days to petition the Tax Court. We planned to fight the claim in Tax Court. If we had lost, we could have scraped together the money and paid the tax. But the IRS did not do that.

If we had received the notice, my husband would be alive. We could have fought the notice and paid the tax if we lost. There were other people who got such notices through the same process; they were fortunate enough that they got theirs and they were able to pay them. They lost money, but they didn't go through the hell that the IRS put us through.

We didn't hear from the IRS during the next couple of years. We lost money on our investments in California, and in 1983 we moved back home to North Carolina, where Alex started the housing development. Then the IRS sent us a bill for $183,021—tax of $115,895 plus penalties and interest. This was in September 1983, four months after the statute of limitations ran out. We were dumbstruck.

In an affidavit filed in federal court in November 1987, Alex described his attempts to find out what had happened.

"Prior to this bill, neither my accountant . . . nor I had received an audit report, a 30-day letter, a 90-day letter or any other notice of assessment. Since that time I have been attempting to determine why I never received these documents or any other notice, which foreclosed any administrative or Tax Court review of the proposed deficiency . . . which efforts were wholly unsuccessful until very recently. The only communication I had received from the IRS since 1983 indicated receipt of my letters requesting the above information, bills threatening collection procedures, and notices of intent to levy on my assets."

The IRS maintained that it had sent us a certified letter containing the required notice of deficiency three weeks before the statute of limitations ran out. We never re-

ceived such notice and our accountant never received such notice, and we tried repeatedly to get the IRS to show us a copy of the notice and proof that it was mailed. It would not. We tried to get the IRS to give us the number of the certified letter so that we could go to the postal records ourselves and try to trace it. The IRS did not respond.

We tried again and again to get the IRS to check into it and resolve it. We had been doing that from the day we first received the tax bill. Their attitude was simply to ignore us. We would get in touch with the problems resolution officer, and he would ask for all of this information, which we would supply him with. They were supposed to get back to us, and then months would go by and we would hear nothing. We would try to get in contact with them. Every time, for some reason, the person we had been working with was no longer in that office, or somebody else was our new resolution officer. And then we would go through the same process again, sending all of this information in. We never got any satisifaction. We were totally ignored.

I think the IRS ignored us because they knew that they didn't have a case, that they were wrong. If they thought they had a case, then why didn't they come in and take our assets, as they did to so many other people? Why did they ignore us for so many years? I feel that they said to themselves that we'll just sit back and see what happens.

If they had gone to the postal records to find out what happened to the certified letter the whole thing could have been avoided and my husband would be alive. But they would not. Alex is dead because of the IRS's arrogance and incompetence.

After two years, we finally received a copy of the notice of deficiency in 1985. In 1987, after a four year wait, the IRS sent us a copy of its only proof of mailing—a certified mail list showing that the notice was mailed at a post office in San Francisco on April 15, 1983. But the IRS's mail list had our address wrong. We lived at 71 Corte Del Bayo in Larkspur, California. The address on the IRS list was 7+- Corte Del Bayo. To us, this seemed to explain why we never received the notice; the IRS had sent it to the wrong address.

The IRS argued in U.S. Middle District Court that the mistake on the mail list didn't mean that the letter was sent to the wrong address. But it had no proof; all it had was the mail list with the incorrect address. We argued in court that the IRS could have found out what happened to the notice by going to the post office and looking at its certified mail records. It did not do this, despite our repeated queries starting in October 1983. By the time the IRS bothered to check, the post office had destroyed the records.

The IRS also argued that we knew that an assessment was likely and implied that we should have taken action ourselves to get the IRS to act before the statute of limitations ran out. That was another totally ridiculous statement, and the judge agreed in his judgment against the IRS in December 1988. Federal law, he said, "does not place upon plaintiffs the burden of hounding the IRS for delivery of a possible notice of deficiency."

Some of my friends and relatives think that I should be happy, that I have accomplished what Alex wanted me to accomplish: I beat the IRS. They ask, "Why don't you get on with your life and be a happy woman?" It's not that simple. Right now I'm fighting for my financial life. I still have that $132,000 mortgage plus interest to pay off at the Millbrook development. My legal fees were close to $70,000, and I still owe my attorneys about $14,000 plus interest even though the court ordered in August 1989 the IRS to pay them $27,900. The IRS dropped the appeal of this order in December, and the check finally came last month.

Alex took his life so I would have money to keep fighting the IRS. He believed that our lawyers were not pushing our case because we didn't have any more money to pay them. I don't think I would have ever gotten into a courtroom if my attorneys hadn't known that I had $250,000 from Alex's life insurance.

What if Alex and I had not had the money to hire the attorneys to start with? If you're poor, what do you do? There's something wrong when the IRS can accuse you of something and assume you are guilty and destroy your life. Aren't you supposed to be innocent until proven guilty? They said, "You're guilty." And I had to fight to prove I was innocent, and, sure, I proved it. Why don't I feel good about it? I always felt that if I beat the IRS I would feel good, that I could say, "All right, Alex, your death wasn't for nothing; we proved we were innocent." Big deal. I keep winning all these victories; I lost the war, a long time ago.

After Alex's death, I was left running a business that I really did not have the knowledge to run. But I had no choice. I had to sell my home at Pfafftown for much less that it was worth in order to pay off the construction loan that was due on it. I could not get the house financed because of the tax lien.

When I bought my house in High Point, I had to use money from the insurance settlement and pay cash for it. I could not get financing because of the tax lien. When I had to buy a car, I had to pay cash for that. And it continues, even though the court made the IRS remove the lien. A few weeks ago I went to buy a vacuum cleaner. The salesman said that I could have 90 days to pay cash for it, but he went ahead and applied for financing on it. They turned me down because of the tax lien that is still on my credit report. I thought that, since the IRS puts these tax liens on your credit report, when the lien is released they would have it removed. But it doesn't work that way; it's my responsibility. The credit bureau said that there is no way I can get the lien off my credit report, that it stays on there for seven years. All I can do is attach a statement to the report explaining what happened. So I'm still feeling the effects of the IRS action against us, even though I beat the IRS in court. And I'm going to feel the effects of it, because it's on my credit record and every time I apply for credit I have to sit down and explain to people. I will have to do that for the next seven years.

IRS Commissioner Fred Goldberg was on "Good Morning America" the other day talking about an article in "Money" magazine which said that American citizens pay billions of dollars that they don't owe, simply because the IRS sends out inaccurate notices. Goldberg said "Sure, people pay money they may not owe. We make mistakes." He agreed that taxpayers should fight the IRS. "Grab us by the neck and tell us," he said.

How do you grab them by the neck? How do you get to anybody in the IRS? We tried for five years, and all we got was nothing. And he says, "Grab us by the neck." Who is the IRS? The only people I have ever seen that were IRS were people that I saw in the courtroom. Other than that, I have never been able to have any contact in any way with the IRS.

The IRS should not be in the position to say to the taxpayer, "You're guilty of this." And the taxpayer should not be put in the position of spending every dime that they have, to prove that they're innocent. Look what I went through to prove my innocence. You talk about winning battles; look at the battles I won. But I lost the war because my husband is dead.

I should feel some satisfaction that I beat the IRS, that I got a $27,900 check from them to pay a portion of my attorney's fees. I don't feel good about any of it. I feel cheated.

I was cheated of my rights as a citizen. I was cheated of growing old with the man I love. I lost my best friend. I now have to start a new life and a new career at the age where I should be able to enjoy my children and grandchildren. I worked for 20 years as a professional, but I have not been in the job market since 1982. Our children have no father, only the emotional devastation left in their life to try and deal with. Our grandchildren have no "pop," that's the name they use for the grandfather they loved dearly. Our granddaughter thinks her pop got sick and died. How do you explain the IRS and suicide to a five-year-old? It seems to me that somebody has to be held accountable for the destruction to me and my family.

Yet I am told I cannot sue the IRS for damages, economical or personal. How do you put a price tag on life? I can't sue them for the illegal tax lien they put on us. I had no rights. The IRS has them all.

People ask me why I am doing this, because it just devastates me every time I have to go through this, every time I go back to the night when Alex died. All I can say is I thought that beating the IRS would give some meaning to Alex's death, but it hasn't. There has to be more.

There has to be something done to control the IRS, to keep it from destroying people's lives. And I really believe that if enough little people like me keep coming forward, there are going to have to be some changes.

Mr. ARMSTRONG. Unfortunately, the IRS' carelessness in the Council case is not unusual. Despite the best efforts of IRS personnel struggling against the usual handicaps of a large Federal bureaucracy and an antiquated information-processing system, taxpayers annually spend thousands of dollars trying to overcome IRS snafus. From the perspective of the IRS, the Treasury, and the Congress, these costs to the taxpayers are unfortunate; from the perspective of the taxpayer, they're theft.

As part of the 1988 Taxpayer Bill of Rights the Senate granted taxpayers the right to sue the Federal Government for damages if in connection with the determination or collection of any Federal tax an IRS employee carelessly, recklessly, or intentionally disregards a provision of the Internal Revenue Code. While this provision was largely accepted in the conference report, the right to sue for carelessness was deleted.

I have been introducing a series of bills called Fair Play for Taxpayers. Today, I am introducing another bill in this series to allow taxpayers to sue the Federal Government for damages if an IRS employee carelessly disregards a provision of the Internal Revenue Code. There is no excuse for imposing costs on taxpayers through IRS carelessness.

No suit could compensate Mrs. Council for the ultimely death of her husband. But taxpayers who suffer economically due to IRS carelessness should be able to recover their losses. This is the very least to which they should be entitled when their lives are disrupted due to IRS carelessness.●

By Mr. BREAUX:

S. 2468. A bill to amend the Solid Waste Disposal Act to provide for State management of solid waste; to reduce and regulate the interstate transportation of solid wastes, and for other purposes; to the Committee on Environment and Public Works.

STATE REGULATION AND MANAGEMENT OF SOLID WASTE

Mr. BREAUX. Mr. President, I rise to talk about something that is part of every single day of our lives—trash. We don't want something, we throw it away. Americans annually throw away 160 million tons of waste. That's an average of 3.5 pounds a day per person, enough to fill a convoy of garbage trucks halfway to the Moon every year. Every day each one of us throws away soda cans, newspapers, memos, letter, et cetera, often giving little to no thought of where that trash goes once it leaves our trash cans.

Because most communities have yet to enact recycling programs—only 11 percent of solid waste is ever used again—much of this garbage goes directly into landfills which are perilously close to capacity in every part of the country.

Consider these sobering facts: More than two-thirds of our country's landfills have been shut down since the late 1970's. A third of those remaining will be full within the next 5 years. All of this while our volume of waste is expected to increase by an additional 20 percent by 2000.

At the same time as landfill space is running out, intense local opposition to the siting of landfills and other solid waste disposal facilities has been increasing. This is the so called not in my backyard syndrome or "NIMBY."

A recent New York Times article points out that some communities, such as New York City, as a means to keep landfills from filling up too fast, have doubled fees that private garbage haulers have to pay for the right to dump trash in the landfill. The result? More waste is being shipped to other States for disposal.

Some communities, whose landfills have reached capacity, have negotiated with landfills in other parts of the country to dispose of that garbage. At least 28,000 tons of garbage travels our Nation's highways every day in route from cities in New York, Pennsylvania, and New Jersey to other parts of the country.

Last fall, a series of newspaper articles was published throughout the country on the extent of this problem. An article in the Washington Post, last November, talked about the fierce politics of Yankee garbage in the Virginia mountains, pointing out how the beautiful mountains of Virginia became the unwelcome recipients of somebody else's garbage.

Also last fall, the Chicago Tribune published an article titled "East Garbage Is Filling the Heartland". This article pointed out that Interstate Highway 80 traversing the northern part of the United States east to west and west to east was the garbage pipeline where unwanted garbage is being put on the interstate highway systems and traveling thousands of miles to another State for disposal.

In Louisiana, a 63-car train of sewage sludge from Baltimore found its way to several small Louisiana towns for disposal. The citizens of Shriever, Labadieville, and Donaldsonville rightfully did not want this foul-smelling, disgusting cargo, which eventually was accepted by a landfill in another State.

Who could blame any community for rejecting such a train? It sometimes seems that Louisiana, commonly known as the sportsman's paradise, is in danger of becoming the dumper's paradise. I feel strongly that Louisiana and other States should not be forced to become the dumping ground for the rest of the Nation, particularly when they are taking care to site and maintain solid waste disposal facilities.

Mr. President, these are isolated examples of a national problem. Last November, Newsweek published a cover story titled "Buried Alive the Garbage Glut: An Environmental Crisis Reaches our Doorstep." This article points out the strong need that we as a nation have to get our garbage crisis under control. There is a snowball of garbage accumulating in the heavily populated regions of the country—especially in the Northeast, where landfill capacity will run out, some say, in less than 5 years.

The downhill slope for this snowball of garbage leads to the less-populated regions, where landfill capacity will be barely sufficient through the turn of the century. By the year 2000, this snowball of trash will have rolled across the Mississippi looking for a final resting place. Already communities in the East and Midwest are contracting with private landfill owners in other regions to accept their garbage.

This game of "pass the trash" has got to stop. States and communities in these less-populated areas are revolting against this deluge of garbage pouring across their borders, while at the same time making plans to pass their own garbage on to the next State.

This game of "last tag" must be replaced with a workable solution. Individual States will not be able to handle the NIMBY opposition within their jurisdictions and create new landfill capacity, new incinerator capacity, or emplace workable recycling programs, without tough Federal guidance.

It is time for this body to pick up where we stopped 10 years ago and establish the standards needed for the States to plan out the waste management needs, for interstate cooperation, and for recycling to become the rule and not the exception.

Recognition of Earth Day is an appropriate time to introduce this legislation before our Earth gets buried in its own trash.

Traditionally, the responsibility for garbage disposal has rested with State and local governments—but the State's ability to care for its citizens is undermined by the current system. For example, in Louisiana, parishes are trying to site landfill capacity, but, at the same time, a privately owned solid waste disposal facility is accepting waste from Baltimore. Private contractors can agree to accept out-of-State waste from anywhere in the country with the State having little to say in the matter.

Many States resent their status as a dumping ground for other State's garbage, and rightfully so. States are beginning to establish legal barriers to the importation of solid waste from another State. Such barriers include refusing waste from States that fail to sufficiently address their own waste disposal problems and the charging of higher fees on out-of-State waste. The legal status of such State-imposed barriers is questionable.

A 1978 Supreme Court case, City of Philadelphia versus New Jersey, held that a New Jersey State law banning out-of-State waste from being disposed of within that State was unconstitutional as a violation of the interstate commerce clause of the Constitution. The Court found that although, relatively valueless, trash is commerce. The intent of the New Jersey law was to conserve its landfill space. However, the Court found that the means New Jersey chose to preserve that space burdened out-of-State commercial interests. And, under the commerce clause, the States are restricted in their ability to regulate interstate commerce when such regulation places an "undue burden" on that commerce.

The Philadelphia case is clear that a State, acting on its own, may not unduly burden interstate commerce by banning the importation of out-of-

State waste. Congress, on the other hand, is specifically given the authority under the Constitution to regulate interstate commerce. This authority is broad and far reaching, and Congress may use it to authorize state-imposed bans on waste shipments. I refer my colleagues to a report by the Congressional Research Service titled: "State and Local Discrimination Against Import of Solid Waste: Constitutional Issues" for a detailed discussion of the constitutional issues.

Mr. President, it is time to get the garbage crisis under control. Wastes should not be moving long distances between States creating potential health hazards, unpleasant odors, noise, increased traffic, and impeding the ability of States to effectively manage their own wastes. A State should continue to have the primary responsibility to care for its citizens by assuring solid waste management capacity. Congress must provide the means by which a State can assure its solid waste management needs are met.

Therefore, I am introducing legislation today to give the States the means and support they need. The primary Federal statute governing disposal of solid waste is the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act [RCRA]. Subtitle D of RCRA encourages, but does not require, States to develop solid waste management plans. The bill I am introducing today will require each State to develop a plan. The plan is to project how the State will manage solid waste generated within its borders for 20 years. The plan must demonstrate that solid waste will be managed in accordance with the following priorities: The State must first take steps to reduce the amount of waste generated within its borders; next, the State must encourage recycling, energy and resource recovery; and only as a final option, should the State consider landfills, incinerators, and other options of disposal. The State will be required to demonstrate that it complies with the waste management hierarchy and has issued all appropriate permits for capacity sufficient to manage the solid waste for rolling 5-year periods. The Federal Government working with the State will be required to provide technical and financial assistance to local communities to meet the requirements of the plan. The plan shall also provide that if the State accepts out-of-state waste such waste will be managed in accordance with the plan and shall be accepted only if doing so, will not impede the ability of the State to manage its own solid waste.

A State with an approved plan will then have the authority to refuse to accept out-of-state waste for purposes of solid waste management—other than transportation—and to charge higher fees on out-of-state waste based on the origin of such waste. Half of the proceeds from the out-of-state fees will go to the locality where the garbage is being disposed and may only be used for solid waste management activities.

By giving the States with approved solid waste management plans the authority to exclude out-of-state wastes, I expect the States to be better equipped, through providing and utilizing solid waste management capacity, to develop the capacity to effectively manage its own wastes within its own borders. I expect this power to be exercised to discourage garbage exports as a disposal practice and to encourage each State to manage its own solid waste. The interstate barriers will be particularly helpful in encouraging States to make significant strides toward minimizing the amount of waste generated within their borders and to increase recycling efforts since waste exports will be a less attractive waste management option.

I do not expect States to exercise these new powers to discourage the free flow of such nonhazardous scrap materials as metal, paper, or glass across State lines for recycling or resource recovery. Each State will be required in its plan to meet a particular priority of preferred methods of solid waste management. Recycling and resource recovery are key elements of this hierarchy. I would not expect that each State would necessarily need or want to consruct recycling and resource recovery facilities within its borders, since it may not be economically justifiable to do so given the uncertain markets for recycled goods. I do expect that States would find it in their interest to enter into regional or interstate agreements to facilitate scrap material recycling and the free flow of those materials to regional or interstate recycling or resource centers. Free trade in scrap is important to encouraging recycling and resource recovery and States should not use powers created by this bill to thwart national recycling and resource recovery goals of nonhazardous scrap materials.

Often solid waste that is transported between States is carried in the same vehicles as food and other consumer goods. This backhauling procedure is alarming and raises serious public health concerns. This legislation would require the regulation of those vehicles that carry both garbage and consumer goods in a manner that is protective of human health.

The concern about interstate transport of waste is not restricted to solid wastes. Many States, such as Louisiana, are also the dumping grounds of hazardous wastes generated throughout the country. The public health concerns associated with hazardous waste disposal are particularly acute. Each hazardous waste facility is subject to strict RCRA permitting requirements and is often subject to individualized treatment standards. This process is often burdensome and controversial.

Yet, States that have borne the burdens and have been responsible in siting hazardous waste facilities are often penalized for doing so by having to accept other State's hazardous wastes. Many States, such as Louisiana, have sited hazardous waste capacity and are net importers of hazardous wastes. However, other States have had difficulty in siting new capacity and send their hazardous wastes out of State, therefore, shifting the permitting burdens and potential public health risks of their wastes to another State.

Under my bill, using available data, each State will be classified as net importers or net exporters of hazardous waste. Each State will be required to develop hazardous waste management programs under which the State must demonstrate that it has capacity to handle hazardous waste it generates. Net exporter States will have to demonstrate in their programs the steps they will take to change their status. A State may change its statute as a net exporter through means that include siting additional hazardous waste management capacity, or accepting more hazardous wastes from other States. This does not mean that each State has to dispose of all of its hazardous waste within its borders, wastes may still be shipped to other States provided, that the State sending the waste is also disposing of its share of hazardous waste.

A State that is a net importer of hazardous waste and that has an approved program may refuse to accept hazardous waste and may charge higher fees on hazardous wastes generated in net exporting States that do not have approved programs.

It is not the intent of this bill that every State will be required to site facilities for every hazardous waste that is generated within its borders. It is the intent of this bill that every State share the burden of disposing of the Nation's hazardous waste. I expect States will find it preferable to enter into regional and interstate agreements to develop ways to meet their burden.

Mr. President, the interstate war over garbage is only just starting. Those States with solid and hazardous waste capacity, the "have" States, are resisting becoming the Nation's dumping grounds. Those States without solid and hazardous waste capacity, the "have not" States need help in finding management options within their own borders. Congress needs to take clear and decisive action to give the State's the powers they need to

manage their own waste and to protect all Americans from public health threats associated with interstate shipment of solid and hazardous waste.

Mr. President, I ask unanimous consent that the text of the bill and the articles mentioned earlier be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2468

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,

TITLE I.—GENERAL AMENDMENTS

SECTION 101. SHORT TITLE.

This Act may be cited as the State Regulation and Management of Solid Waste Act of 1990.

SEC. 102. CONGRESSIONAL FINDINGS.

(a) Section 1002(a)(4) of the Solid Waste Disposal Act is amended to read as follows:

"(4) that while the collection and disposal of solid waste should continue to be primarily the function of State, regional and local agencies, the problems of waste disposal as set forth have become a matter national in scope and in concern and necessitate Federal action through—

"(A) requirements that each State develop a program for the management and disposal of solid waste generated within each State over the next 20 years;

"(B) authorizing each State to restrict the importation of solid waste from a State of origin for purposes of solid waste management other than transportation; and

"(C) financial and technical assistance and leadership in the development, demonstration, and application of new and improved methods and processes to reduce the amount of waste and unsalvageable materials and to provide for proper and economical solid waste disposal practices."

"(b) Section 1002(b) of the Solid Waste Disposal Act is amended as follows:

"(1) strike the word "and" at the end of paragraph (7);

"(2) paragraph (8) is amended to read as follows:

"(8) alternatives to existing methods of land disposal must be developed since it is estimated that eighty percent of all permitted landfills will close in twenty years; and"

(3) add the following after paragraph (8):

"(9) solid waste is being transported long distances across country for purposes of solid waste management and, in some cases, in the same vehicles that carry consumer goods. Such practices are harmful to the public health and measures should be adopted to ensure public health is protected when such goods are transported in the same vehicles as solid waste is transported."

SEC. 103. OBJECTIVES AND NATIONAL POLICY.

(a) Section 1003(a)(1) of the Solid Waste Disposal Act is amended to read as follows:

"(1) assuring that each State has a program to manage solid waste generated within its borders, and by providing techical and financial assistance to State and local governments and interstate agencies for the development of solid waste management plans (including recycling, resource recovery, and resource conservation systems) which will promote improved solid waste management techiques (including more effective organization arrangements), new and improved methods of collection, separation, and recovery of solid waste, and the environmentally safe disposal of nonrecoverable residues,".

(b) Section 1003(a) of the Solid Waste Disposal Act is further amended by:

(1) striking "and" at the end of paragraph (10);

(2) striking the period at the end of paragraph (11) and insert in lieu thereof a semicolon; and

(3) adding the following new paragraphs:

"(12) promoting the use of regional and interstate agreements for economically efficient and environmentally sound solid and hazardous waste management practices, and for construction and operation of solid waste recycling and resource recovery facilities; and

"(13) promoting recycling and resource recovery of solid waste through the development of markets for recycled products and recovered resources.".

SEC. 104. DEFINITIONS.

(a) Section 1004 of the Solid Waste Disposal Act is amended by adding at the end thereof:

"(40) The term "recycling" means any use, reuse or reclamation of a solid waste.

"(41) The term "state or origin" means any state that authorizes a person to transport solid or hazardous waste generated within its borders to a state of final destination for purposes of solid waste management other than transportation.

"(42) The term "state of final destination" means any state that authorizes a person to transport solid waste from a state of origin into such state for purposes of solid waste management other than transportation.".

(b) Section 1004(12) of the Solid Waste Disposal Act is amended to read as follows:

"(12) The term "manifest" means the form used for identifying the quantity, composition, and the origin, routing, and destination of solid and hazardous waste during its transportation from the point of generation to the point of disposal, treatment, storage, recycling, and resource recovery."

(c) Section 1004(28) is amended by inserting "recycling, resource recovery," before the term "treatment."

(d) Section 1004(29)(C) is amended by inserting "recycling," before the term "treatment."

TITLE II.—STATE SOLID WASTE MANAGEMENT PLANS

SEC. 201. OBJECTIVES OF SUBTITLE D.

(a) The first two sentences of section 4001 of the Solid Waste Disposal Act are amended to read as follows: "The objectives of this subtitle are to reduce to the maximum extent practicable the amount of solid waste generated and disposed of during the 20-year period following the date of enactment of this Act by requiring each State to develop a program which will meet the aforementioned standards, and which—

"(1) first, reduces the amount of solid waste generated in the State and encourages resource conservation; and

"(2) second, facilitates the recycling of solid waste and the utilization of valuable resources, including energy and materials which are recoverable from solid waste.

"(b) Such objectives are to be accomplished through federal guidelines and technical and financial assistance to States; encouragement of cooperation among Federal, State, and local governments and private individuals and industry; encouragement of States to enter into interstate or regional agreements to facilitate environmentally sound and efficient solid waste management; and through approval and oversight of the implementation of solid waste management plans.".

SEC. 202. STATE SOLID WASTE MANAGEMENT PLANS.

(a) Sec. 4003(a) of the Solid Waste Disposal Act is amended by:

(1) inserting before the first sentence the following new sentence: Upon the expiration of 180 days after the date of approval of a State's solid Waste Management Plan required by this section or upon the date a State plan becomes effective pursuant to section 4007(d), it shall be unlawful for a person to manage solid waste within that State, to transport solid waste generated in that State to a State of final destination, and to accept solid waste from a State of origin for purposes of solid waste management other than transportation unless such activities are authorized and conducted pursuant to the provisions of the approved plan." and

(2) striking in the first sentence thereof "each State plan must comply with the following minimum requirements" and inserting in lieu thereof "each State Solid Waste Management Plan must comply with the following minimum requirements".

(b) Sec. 4003(a) is further amended by amending paragraphs 4003(a)(5) and (6) to read as follows:

"(5) The plan shall identify the quantities, types, sources, and characteristics of solid wastes that are reasonably expected to be generated within the state or transported to the state from a state of origin during each of the ensuing twenty years following the date of enactment of this Act and that are reasonably expected to be managed within the state during each of the ensuing twenty years.

"(6) The plan shall provide that the State acting directly, through authorized persons, or through interstate or regional agreements, shall ensure the availability of solid waste management capacity to manage the solid waste identified in paragraph (5) in a manner that is environmentally sound and that meets the objectives of this subtitle as defined in Sec. 4001.".

(c) Section 4003(a) of the Solid Waste Disposal Act is further amended by adding the following new paragraphs at the end thereof:

"(7) When identifying the amount of solid waste management capacity necessary to manage the solid waste identified in paragraph (5), the State shall take into account solid waste management agreements in effect upon the date of enactment of this Act that exist between a person operating within such state and any person in a state or states contiguous with such state.

"(8) The plan shall provide for the identification and annual certification to the Administrator of how the State has met the objectives of this subtitle as defined in Sec. 4001 and that the State has issued permits consistent with all the requirements of this Act for capacity sufficient to manage the solid waste identified in paragraph (5) of this section for the ensuing five year period and that the state has identified and approved the sites for capacity identified in paragraph (5) of this section for the ensuing eight year period.

"(9) The plan shall provide that all solid waste management facilities located in the state meet all applicable federal and state laws and for the enactment of such State and local laws as may be necessary to fulfill the purposes of this Act.

"(10) The plan shall provide for a program that requires all solid waste management facilities located or operating in the state to register with the state and that only registered facilities may manage solid waste identified in paragraph (5). Such registration shall at a minimum include the name and address of the owner and operator of the facility; the address of the solid waste management facility; the type of solid waste management used at the facility; and the amounts, types and sources of waste to be managed by the facility.

"(11) The plan shall provide for technical and financial assistance to local communities to meet the requirements of the plan.

"(12) The plan shall specify the conditions under which the State will authorize a person to accept solid waste from a State of origin for purposes of solid waste management other than transportation, and ensure that such waste is managed in accordance with the plan and that acceptance of such waste will not impede the ability of the State of final destination to manage solid waste generated within its borders.".

(c) Section 4006 of the Solid Waste Disposal Act is amended by adding the following new subsection:

"(d) SUBMISSION OF PLANS.—Not later than four years after the date of enactment of this Act, each State shall, after consultation with the public, other interested parties, and local governments, submit to the Administrator for approval a plan that complies with the requirements of section 4003(a) of this Act.

(d) Section 4007(a)(1) of the Solid Waste Disposal Act is amended to read as follows: "(1) it meets the requirements of section 4003(a);".

(e) Section 4007(a) is amended by deleting the period at the end of clause (C) and inserting in lieu thereof a semicolon and the word "and", and by adding the following new paragraph at the end thereof:

"(3) it furthers the objectives of section 4001 of this Act.".

(f) The third sentence of Section 4007(a) is amended to read as follows: "Upon receipt of each State's certification required by section 4003(a)(8), the Administrator shall determine whether the approved plan is in compliance with the provisions of section 4003, and if he determines that revision or corrections are necessary to bring such plan into compliance with the minimum requirements promulgated under section 4003 (including new or revised requirements), he shall, after notice and opportunity for public hearing, withhold per his approval of such plan.".

(g) Section 4007 is amended by adding the following new paragraph at the end thereof:

"(d) FAILURE OF THE ADMINISTRATOR TO ACT ON A STATE PLAN.—If the Administrator fails to approve or disapprove a plan within eighteen months after a State plan has been submitted for approval the State plan as submitted shall go into effect at the expiration of eighteen months after the plan was submitted. The plan shall remain in effect as submitted and subject to review by the Administrator and revision in accordance with section 4007(a).".

TITLE III.—HAZARDOUS WASTE MANAGEMENT PROGRAMS

SEC. 301. HAZARDOUS WASTE MANAGEMENT PROGRAM.

(a) Subtitle C of the Solid Waste Disposal Act is amended by adding at the end thereof the following new section:

"SEC. 3019. (a) HAZARDOUS WASTE NET EXPORTER GUIDELINES.—Within one year from the date of enactment of this section the Administrator shall promulgate guidelines, utilizing data including data received through the manifest system required by Section 3002(a)(5) of the Solid Waste Disposal Act and Title III of the Superfund Amendments and Reauthorization Act of 1986 detailing how each State shall:

"(1) estimate the amount, sources and types of hazardous waste generated within its borders during the three years prior to the date of enactment of this section and during each year thereafter;

"(2) estimate the amount of hazardous waste identified in subsection (1) that was recycled, destroyed, treated, or securely disposed within such State during the three years prior to the date of enactment of this section and during each year thereafter;

"(3) estimate the amount of hazardous waste identified in subsection (1) that was exported to a state or states of final destination to be recycled, destroyed, treated, or securely disposed during the three years prior to the date of enactment of this section and during each year thereafter; and

"(4) estimate the amount of hazardous waste that was imported from a state or states of origin for purposes of hazardous waste recycling, destruction, treatment or secure disposition during the three years prior to the date of enactment of this section and during each year thereafter.

"(b) SUBMISSION OF DATA.—Within six months after the Administrator promulgates the guidelines required by subsection (a), each State shall provide to the Administrator the data required by subsections (a)(1)–(4) for the three years prior to the date of enactment of this section and shall continue to provide to the Administrator such information for each year thereafter.

"(c) LIST OF NET EXPORTERS OF HAZARDOUS WASTE.—Based on the data received by each State pursuant to subsections (a) and (b), the Administrator shall determine whether each State is a net exporter of hazardous waste. A state shall be a net exporter if the Administrator determines that when the amount of hazardous waste identified by the state pursuant to subsection (a)(3) less the amount of hazardous waste identified by the state pursuant to subsection (a)(4) is a positive number. Upon making a determination that a state is a net exporter of hazardous waste the Administrator shall publish an initial list of such designations in the Federal Register. At any time after the date of publication of the initial list, the Administrator may revise the list to add or delete states as net exporters. A state may petition the Administrator to change its designation as a net exporter.

"(d) HAZARDOUS WASTE MANAGEMENT PROGRAM GUIDELINES.—Not later than one year from the date of enactment of this section and after notice and hearing, the Administrator shall, promulgate guidelines to assist States in the development and implementation of Hazardous Waste Management Programs that meet the requirements of subsection (e).

"(e) HAZARDOUS WASTE MANAGEMENT PROGRAM REQUIREMENTS.—Within two years from the date of enactment of this section, each State shall submit to the Administrator for approval a program, that is protective of human health and the environment, to ensure such State has adequate permitting, siting, planning and regulatory capability for recycling permitted pursuant to the requirements of this Act, destruction, treatment, or secure disposition of all hazardous waste, generated within the State for a period of five years following the date of enactment of this section, and shall revise such program for each year thereafter. Such program shall at a minimum:

"(1) provide for the siting, permitting, and construction of hazardous waste recycling, destruction, treatment, and disposal facilities consistent with federal permitting procedures;

"(2) provide that no siting or permitting laws that prohibit or restrict new and expanded capacity for hazardous waste treatment, destruction, or disposal facilities be adopted by such state or its locality without a reasonable basis in protection of human health and the environment;

"(3) ensure that all facilities identified in subsection (1) are in compliance with subtitle C of the Solid Waste Disposal Act;

"(4) provide that if such State is a net exporter of hazardous waste it shall establish a schedule and procedures that demonstrate that it will change its designation as a net exporter of hazardous waste within five years of the date of approval of the program; and

"(5) provide for the submission of annual reports to the Administrator to demonstrate compliance with the provisions of this subsection.

"(f) APPROVAL OF HAZARDOUS WASTE MANAGEMENT PROGRAMS.—Within six months upon receipt of each State program, the Administrator shall approve such program if it meets the requirements of subsection (e) and shall publish a notice of approval in the Federal Register. If the Administrator disapproves a state program, such state shall have six months to comply with the provisions of subsection (e). If after two years after a state submits the program for approval, and no later than four years after the date of enactment of this section, the program is not in compliance with the requirements of subsection (e), the state shall not be in compliance and notification of non-compliance shall be published by the Administrator in the Federal Register. Once the Administrator approves the State program, it shall publish a notice of approval in the Federal Register.

"(g) OVERSIGHT OF HAZARDOUS WASTE MANAGEMENT PROGRAMS.—For each year after approval of a State program required by subsection (e) and upon receipt of the reports required by subsection (e)(5) the Administrator shall certify whether each State's program is in compliance with the provisions of subsection (e). If the Administrator finds that a State is no longer in compliance with the provisions of subsection (e), it shall so notify the State. The State shall have six months from the date it was notified by the Administrator to demonstrate compliance with this section. If the State does not demonstrate compliance within six months after receiving notification by the Administrator, the Administrator shall publish a notice of non-compliance in the Federal Register. Once the Administrator determines the State is in compliance with the requirements of this section, it shall publish a notice in the Federal Register.".

TITLE IV.—INTERSTATE TRANSPORT OF WASTE

SEC. 401. AUTHORITY OF STATES TO CONTROL INTERSTATE SHIPMENT OF SOLID WASTE.

(a) Subtitle D of the Solid Waste Disposal Act is amended by adding at the end thereof the following new sections:

"SEC. 4011. (a) AUTHORITY TO RESTRICT INTERSTATE TRANSPORT OF SOLID WASTE.—

Upon the expiration of one hundred and eighty days after the date the Administrator has approved a Solid Waste Management Plan required by section 4003, or after the date a State plan becomes effective in accordance with section 4007(d), such State with an approved or effective State plan is authorized to prohibit or restrict a person from importing solid waste from a State of origin for purposes of solid waste management (other than transportation). A State may authorize a person to import solid waste from a State of origin for purposes of solid waste management (other than transportation) only in accordance with the provisions of section 4003(a)(12).

"(b) Each state is authorized to levy fees on solid waste that differentiate rates or other aspects of payment on the basis of solid waste origin. At least fifty percent of the revenues received from such fees collected shall be allocated by the State to the local government in whose jurisdiction the solid waste will be managed. Such fees shall be used by such local governments for the purpose of carrying out provisions of an approved plan.".

SEC. 402. AUTHORITY OF STATES TO CONTROL INTERSTATE SHIPMENTS OF HAZARDOUS WASTE.

(a) AUTHORITY TO RESTRICT INTERSTATE TRANSPORTATION OF HAZARDOUS WASTE.—Subtitle C of the Solid Waste Disposal Act is amended by adding the following new subsection:

"SEC. 3020. Effective four years after the date of enactment of this section, a State that is not a net exporter and that has a Hazardous Waste Management Program that is approved and in compliance with the requirements of this section is authorized to:

"(1) levy fees on hazardous waste received from a State or States of origin that differentiate rates or other aspects of payment on the basis of hazardous waste origin; and

"(2) restrict or limit a person from importing hazardous waste from a State or States of origin for purposes of recycling, treatment, disposal, or destruction;

if the State of origin is a net exporter of hazardous waste and does not have a Hazardous Waste Management Program that is approved and in compliance with the requirements of this section. At least fifty percent of revenues derived from the fees collected shall be allocated to the local government in whose jurisdiction such hazardous waste is being recycled, disposed, treated, or destroyed.".

"(i) JUDICIAL REVIEW.—Section 7006(b) is amended by:

(1) striking "AND" in the caption, inserting a comma after "3005," and inserting "AND 3019" after "3006";

(2) inserting "and in approving or disapproving any State program under section 3019" after "3006," in subparagraph (2); and

(3) adding the following new sentence at the end thereof: ": *Provided*, That any approved Hazardous Waste Management Program required by section 3019 shall remain in effect during the pendency of any proceeding to review an Administrator's action under section 3019.".

TITLE V.—TRANSPORTATION OF SOLID WASTE

SEC. 501. STANDARDS APPLICABLE TO THE TRANSPORTATION OF SOLID WASTE.

(a) Subtitle D of the Solid Waste Disposal Act is amended by adding the following new section 4012 at the end thereof:

"SEC. 4012. (a) STANDARDS APPLICABLE TO THE TRANSPORTERS OF SOLID WASTE.—Not later than 180 days after the date of enactment of this section, and after opportunity for public hearings, the Administrator, after consultation with the Secretary of Transportation and the States, shall promulgate regulations establishing such standards, applicable to transporters of solid waste in interstate commerce, as may be necessary to protect human health and the environment in connection with the interstate transportation of solid waste. Such standards shall include but need not be limited to requirements respecting—

"(1) recordkeeping concerning the types and quantities of solid waste being transported, and its source and delivery points;

"(2) compliance with a manifest system that sets forth the facility or facilities for which such waste is destined, and the fact that such waste arrived at a facility or facilities certified, licensed, or permitted under applicable Federal and State laws;

"(3) transportation of solid waste only to the solid waste management facility or facilities which the shipper designates on the manifest form;

"(4) notification of the types of consumer goods transported in the same vehicles in which solid waste is transported;

"(5) establishment of standards that protect public health and safety when consumer goods are transported in the same vehicles in which solid waste is or has been transported.".

TITLE VI.—FINANCIAL ASSISTANCE

SEC. 601. FEDERAL ASSISTANCE.

(a) Section 4008(a)(1) of the Solid Waste Disposal Act is amended by—

"(1) striking "and" after "fiscal year 1982"; and

"(2) by inserting after "10,000,000 for each of the fiscal years 1985 through 1988" the following: ", and $100,000,000 in funds for each of the fiscal years 1989 through 1993".

(b) Section 4008(a)(2) is amended by adding the following new subsection at the end thereof:

"(E) There are authorized to be appropriated 25,000,000 for each of the fiscal years 1989 through 1993 for the purposes of providing grants to States for the encouragement of recycling, resource recovery and resource conservation activities. Such activities shall include licensing and construction of recycling, resource recovery and resource conservation facilities within the State and the development of markets for recycled products.".

SEC. 602. RURAL COMMUNITIES ASSISTANCE.

(a) Section 4009(d) of the Solid Waste Disposal Act is amended by deleting "and $15,000,000 for each of the fiscal years 1981 and 1982 to carry out this section." and inserting in lieu thereof the following, ", $15,000,000 for each of the fiscal years 1981 and 1982, and $50,000,000 for each of the fiscal years 1989 through 1993 to carry out this section.".

(b) Section 4009(a) is amended by inserting "section 4004 and" before "4005".

[From the New York Times, Mar. 22, 1990]

REFUSE PILES IN NEW YORK: UNWANTED BUT GROWING

(By Allan R. Gold)

Fifteen months ago, in an effort to keep the giant Fresh Kills landfill from filling up to fast, New York City doubled the fee it charges private garbage haulers for the right to dump trash there. The tactic has worked well—almost too well.

Dumping at Fresh Kills—a rising pyramid of trash that rates as the world's largest landfill—has dropped by about 30 percent.

But now, Ohio, Kentucky and several other states—distant, cheaper destinations for some of the New York garbage—are threatening to impose import restrictions. People there resent being someone else's dumping ground, especially New York's, and besides, they have their own garbage crises.

$100 MILLION A YEAR

Closer to home, in the Greenpoint and Williamsburg sections of Brooklyn, residents are up in arms over what the state says has been a surge in transfer stations, where garbage is repackaged for transport to landfills upstate or to other states. Neighbors say they are smelly and noisy, and officials say some do not meet environmental guidelines.

As for the financial benefits of the higher fees, the private haulers have stayed away in such numbers that New York City's Sanitation Department says it is losing $100 million a year.

New York finds itself in a puzzle that illustrates just how limited its current waste-disposal options are. The situation offers perhaps the most dramatic illustration of the region's mounting garbage disposal problem since the "Mobro" garbage barge fiasco of about three years ago. At the time, a barge laden with Long Island trash was denied access to a dump by six states and three countries in the course of a 162-day, journey.

Almost nobody wanted that garbage, and refuse has become even less popular today, for many people in government and the waste industry.

The problem is that New York and many other states are running out of places to dump their garbage. For the most part, New York City relies for disposal on the Fresh Kills landfill. A state estimate several years ago predicted that capacity at the site would be exhausted by the year 2000.

In an attempt to extend the life of the landfill, the Sanitation Department in December 1988 raised the dumping fee for haulers of commerical waste. The increase, to $40 a cubic yard, or about $80 a ton, from $18 a cubic yard, sent the haulers scurrying for other disposal avenues.

Bredan Sexton, the Sanitation Commissioner, said yesterday that the city had expected only about 10 percent to 20 percent of the privately hauled waste to be diverted.

Mr. Sexton also said no one in government predicted the rapid increase in interstate shipments of waste as a result of the increase in the dumping fee.

"If we could have predicted that, it might have changed how we handled" the increase, he said, suggesting a phase-in period might have been employed.

The increase in truck traffic is readily apparent in some city neighborhoods.

"You can sit here on Canal Street and watch truck after truck going to the Holland Tunnel to go on to Kentucky and Ohio," said Michael Burke, a Sanitation Department official.

VERY ANGRY AT NEW YORKERS

The city will likely have to reckon with the increased waste exports soon.

At least Ohio, Pennsylanvia and Kentucky are considering legal changes to make it more difficult to import out-of-state waste.

"To be very frank, we are very angry at New Yorkers over making us your dumping ground. It is a situation we find intolerable," Richard Sahli, deputy director of the

Ohio Environmental Protection Agency, recently told a New York legislative hearing.

"Everyone remembers the garbage barge," said Senator Nicholas A. Spano, a Westchester Republican and vice chairman of the Legislative Commission on Solid Waste Management. "The trucks are going to be the garbage barges of the highway."

New York City has more than an interstate problem. The increased dumping fee had a direct impact on Greenpoint and Williamsburgh in Brooklyn. These are neighborhoods with industry, where residents are generally accustomed to dirty, noisy businesses.

WREAKED HAVOC

But some residents said they did not bargain for a big rise in the number of sites that serve as an intermediate stop for commercially generated garbage on its way out of state.

"The transfer stations have wreaked havoc," said Inez Pasher, a member of the local community board. The situation has improved since residents started to complain early last year about the smell of the operations and truck noise, Ms. Pasher said.

The State Commissioner of Environmental Conservation, Thomas C. Jorling, estimates that about 40 of the city's 200 or more transfer stations are in the Greenpoint-Williamsburg area.

Transfer stations that are properly run serve a useful purpose, Mr. Sexton said, by at least increasing the amount of garbage that is recycled. At the stations, trucks that have collected waste are emptied and often scoured for material that can be salvaged for sale. What remains is bundled and placed on trucks for shipment to a landfill, many times out of state.

Some stations have been shut down for not having proper permits, operations that Mr. Sexton described as "fly by night." He also acknowledged that the industry "grew faster than we or the state could regulate them." Residents of the area have complained bitterly about overlapping jurisdictions that have hurt enforcement efforts.

A lawyer representing several transfer stations, Lawrence B. Goldberg, acknowledged that there have been some abuses. But he said transfer stations were not responsible for the increased truck traffic, blame for which he placed squarely on the city because of the increased dumping fees.

In addition, Mr. Goldberg said city and state government were giving in to political pressure by unfairly cracking down on transfer stations.

SLUDGE: TOWN PEEVED AT POO-POO CHOO-CHOO

(By Christopher Rose)

SCHRIEVER, LA.—Folks who live along the railroad tracks get used to all the toxins, dioxins, chlorines and methanes that rumble by each day, but the 63 sleek black railroad cars that rolled into town three weeks ago are more than your everyday poison.

They are full of what the experts call "concentrated solids" or "treated municipal sewage," but everyone around here knows what that really means.

They call it the poo-poo choo-choo.

When the wind blows, they can smell it. They can see the flies, big as a child's thumb.

Worse yet, though the sludge is not considered hazardous, it comes from the North.

"This is horrible, terrible, disgusting," said Anne Carol Pennison, a real estate agent who lives 200 yards from the railroad cars that arrived from Maryland last month.

Pennison and her family have lived by the Schriever depot all their lives. They've evacuated for ammonia leaks, and fled when a derailment knocked out a bridge up the tracks, but the prospect of Yankee wastes rotting in their front yard is just too much to bear.

"Why did they bring this down here?" she asked. "Why do we always have to take someone else's garbage?"

"This is an insult to the people of Terrebonne Parish and to the state of Louisiana," said Fred Lemoine, parish public service administrator. "It's hard to believe that we're held in such low regard as to be blessed with this material. It's like the garbage barge revisited."

In many ways, the Schreiver waste train is similar to the notorious garbage barge, the floating trash heap from Long Island, N.Y., that wandered the high seas—including a visit to the Louisiana coast—in 1987 as her captain looked for a dump with a welcome mat.

The poo-poo choo-choo's journey began when Baltimore city officials contracted the firm of Metcalf and Eddy to haul away hundreds of thousands of tons of sludge from the city's backlogged system, according to Dan Martin, manager of GSX Land Treatment Inc. in White Castle, La. Metcalf and Eddy subcontracted with GSX to dispose of 12,000 tons, and that's when the trouble began.

The loaded freight cars from Baltimore created a logjam once they hit Louisiana, Martin said. The first stop was Donaldsonville, where residents complained of strong odors, prompting the city to file an injunction. GSX next rolled the train into Labadieville and began transferring the sludge to trucks for the final leg of the trip to White Castle for burial—a time-consuming process. As the trains backed up on Louisiana tracks, the whiff of controversy rose high.

Assumption Parish District Attorney Donald Carmouche threatened to sue GSX unless they ceased the waste transfer operation Labadieville.

The damning evidence, it seems, was a home video taken by a nearby resident that showed some of the waste spilling onto the tracks during the transfer.

"Gnats and flies swarmed the leaking cars," said the Thibodaux Daily Comet after viewing the video. "Some leaks resembled open faucets."

GSX, whose corporate base is in South Carolina, halted shipments from Baltimore and pulled out of Labadieville, parking the remaining 63 loaded cars in Schriever, where they are no more welcome.

"You've got a real proud people down here and we're tired of being a cesspool for the United States," said Terrebonne Parish pollution control administrator Al Leveron.

So GSX has shifted to a mode of damage control to protect its relationship with Louisiana.

"We're trying to get it out of here," Martin said, but GSX officials have discovered problems the garbage barge never faced.

While the barge floated in international waters looking for a home, Interstate Commerce Commission regulations and the Department of Transportation do not allow trains to wander so freely.

"We cannot legally move this train until we have a destination," Martin said. "Hopefully, it will be somewhere out in the sticks."

So far, no takers.

"How about the middle of the desert somewhere?" Pennison said.

"It doesn't matter to me where it goes, as long as it's out of here," said a Southern Pacific Railroad worker at the Schriever depot.

"They ought to take it back where it came from—right back to Boston."

Boston, Baltimore—it doesn't make any difference to the folks in Schriever, as long as it's anywhere but here.

[From Newsweek, Nov. 27, 1989]

BURIED ALIVE—THE GARBAGE GLUT: AN ENVIRONMENTAL CRISIS REACHES OUR DOORSTEP

At a distance, the yellow, granulated mounds rising 250 feet over Staten Island might be mistaken for sand dunes—if not for the stench. Fresh Kills is the largest city dump in the world, home to most of Gotham's garbage, 24,000 tons each day brought round-the-clock by 22 barges. "We get it all here—your plastics, your Styrofoams, even stoves and refrigerators," says supervisor William Aguirre. "It was a valley when it started [in 1948]. Now it's a mountain." By the year 2000, Fresh Kills will tower half again as high as the Statue of Liberty and fill more cubic feet than the largest Great Pyramid of Egypt—provided it lives that long. The State of New York claims Fresh Kills is leaching 2 million gallons of contaminated gunk into the ground water each day and has threatened to close the dump down in 1991. As a result, city sanitation commissioner Brendan Sexton left this message for newly elected Mayor David Dinkins: "Hi, Welcome to City Hall. By the way, you have no place to put the trash."

Neither do many American communities, from Philadelphia to Berkeley, Minneapolis to Jacksonville. More than two thirds of the nation's landfills have closed since the late 1970s; one third of those remaining will be full in the next five years. Federal law prohibits dumping trash into the ocean. Incineration is under attack on economic and environmental grounds. Recycling is gaining popularity, but currently only 11 percent of U.S. solid waste lives again as something else. And still the volume of garbage keeps growing—up by 80 percent since 1960, expected to mount an additional 20 percent by 2000. Not including sludge and construction wastes, Americans collectively toss out 160 million tons each year—enough to spread 30 stories high over 1,000 football fields, enough to fill a bumper-to-bumper convoy of garbage trucks halfway to the moon.

Municipal waste haulers aren't taking it there—yet. But as their own landfills close and disposal fees soar, many communities are trucking their trash across state lines and into rural areas. Some 28,000 tons of garbage travel the nation's highways each day; New York, Pennsylvania and New Jersey export 8 million tons a year. That practice can be costly, too: Long Island townships each spend an average of $23 million a year shipping garbage out of state. Increasingly, it incenses residents on the receiving end as well. "I'm all for taking care of our garbage needs, but New Jersey can take care of its own," says state Sen. Roger Bedford of Alabama, which has placed a two-year moratorium on accepting garbage not grown at home.

NIMBY (Not in My Backyard syndrome) is breaking out all over, frustrating efforts to build new landfills, expand old ones and site incinerators, transfer stations and recycling centers. NIMBY has been joined by

other acrimonious acronyms of the waste wars: GOOMBY (Get Out of My Backyard), LULU (Locally Undesirable Land Use) and NIMEY (Not in My Election Year). Greater Los Angeles has suffered them all in recent years. Angry citizens have three times blockaded the entrance to Lopez Canyon Landfill, hoping to close the last remaining city-owned dump. Officials of surrounding L.A. County say their canyons won't accept any more of the city's trash and Mayor Tom Bradley helped scuttle the proposed $235 million Lancer incinerator when political opposition to the project grew ferocious. As a result, "we actually have garbage trucks running around town everyday without a place to dump," says local environmentalist Will Baca.

That doesn't faze some unscrupulous drivers. As legal disposal grows more difficult, some private waste haulers simply unload their fetid cargo anywhere, from ghetto streets to forests. Even the Mafia is concerned about the lack of landfill space. Law-enforcement officials say that two New York mob families, which own carting companies, are trying to gain control of valuable Pennsylvania dumps. Worse still, some truckers who haul meat and produce to the East in refrigerated vehicles are carrying maggot-infested garbage back West in the same trucks. Congress is considering banning the practice, which carries serious health risks. "Would you serve potato salad from your cat's litter box?" asked Pennsylvania State University food-science professor Manfred Kroger at congressional hearings in August.

Junk Mail: The garbage crisis didn't appear overnight, of course. Environmentalists first warned of it in the 1970's, and some citizens conscientiously toted cans, bottles and paper to ragtag recycling centers. But there were scant markets for the recycled material and enthusiasm faded like last year's newsprint. The urgency seemed to wane as well: garbage, after all, isn't as frightening as toxic waste or as photogenic as the burning Amazon. Meanwhile, the throwaway society has grown ever more disposable, substituting squeezable plastic ketchup bottles for glass, generating 12.4 billion glossy mail-order catalogs each year and annually buying some 1 billion individual foil-lined boxes of fruit juice, complete with shrink wrapping and a plastic-encased straw on the side.

Ann: All I've been thinking about all week is garbage. I mean, I just can't stop thinking about it.

"Psychiatrist: What kind of thoughts about garbage?

Ann: I've just gotten real concerned over what's gonna happen . . . I mean, we've got so much of it . . . The last time I started feeling this way is when that barge was stranded and you know, it was going around the island and nobody would claim it . . ."—Opening lines of "sex, lies and videotape," 1989.

The saga of Islip's wandering garbage barge may have been to the trash crisis what the sinking of the Lusitania was to World War I. Ports as far away as Belize turned back the ship laden with 3,000 tons of Long Island filth in the spring of 1987, and nightly news stories starkly reminded Americans that what they toss out must go *somewhere.* Since then, 18 states and scores of municipalities have embarked on ambitious waste-reduction programs. Next July, Minneapolis and St. Paul will ban all plastic food packaging that won't degrade or can't be recycled; Nebraska will ban most disposable diapers in 1993. With amazing speed, recycling has shed its tie-dyed image, attracted big-business investment and political passion. "Nobody knew what the heck curbside recycling was two years ago," says Gary Mielke of Illinois's Department of Energy and Natural Resources; now 500,000 households in his state alone set their glass, paper and aluminum on the street in separate containers. The efforts seem to provide an outlet for a wide range of environmental angst. "People are so tired of hearing about oil spills and nuclear accidents and ozone—things they can't do anything about," Mielke observes. "Recycling is the way they can do their part."

Paper glut: Alas, it isn't that simple, as Minneapolis discovered last spring. Thousands of residents eagerly turned in their glass, cans and newspapers. But newsprint handlers were so inundated that rather than buying it for $12 a ton, some started charging $20 a ton just to haul it away. Success has threatened newspaper-recycling programs all over the country. Only eight U.S. paper mills are equipped to turn old newspapers into new newsprint, and their capacity is still geared more to the scale of Boy Scout paper drives than mandatory municipal collection. In August the nationwide glut of newsprint stood at 1 million tons. Industry officials say markets have improved since then, but they complain that too many cities launched into newspaper collection before securing purchasers. Washington, D.C., is among them: papers picked up in its two-month-old recycling program are piling up in a big storage pit. If a buyer isn't found, all those carefully sorted newspapers may simply be hauled off to a dump or an incinerator.

Many other efforts to reduce the nation's trash volume are working at cross purposes as well, leaving citizens who want to help wondering what to do and whom to believe. Sales of degradable disposable diapers are soaring; some communities now require degradable plastic grocery bags. Yet most experts dismiss such items as little more than marketing ploys that don't do much to reduce volume in landfills. Photodegradables decompose only in the presence of sunlight, which doesn't shine inside covered dumps. Many biodegradables rely on microorganisms to digest additives like cornstarch, but disintegration takes place very slowly in dry, oxygen-starved landfills. What's more, if degradables are mingled with recycled plastics, they can weaken the resulting products: picture your fence posts made of recycled plastic sagging in a couple of years. The rush to degradable plastics "is a joke," says Jack Hogan, a group vice president of Spartech Corp., which nevertheless makes the material. "Our company is responding to our customers, who are forced to do this because of legislation. But you and I will be part of history when they degrade in landfills.

Perhaps no consumer item better symbolizes the crisis—and the contradictions—than the polystyrene foam containers that keep McDonald's hamburgers warm and litter roadsides with such appalling frequency. McDonald's switched from paper to the plastic packaging 10 years ago amid concern over vanishing forests and paper-mill pollution, and was a leader in eliminating ozone-harming CFCs (chlorofluorocarbons) from polystyrene production. Now facing restrictions on the foam containers in nearly 100 communities, the company is scrambling to recycle the material. Last month 100 McDonald's in New England began asking customers to toss their polystyrene into separate trash cans; fledgling recycling centers then pound it into plastic pellets that can be used in such things as Rolodex file holders, cassette boxes and yo-yos. Someday, McDonald's envisions building whole restaurants out of recycled burger boxes. "This material has many, many uses," insists Ray Thompson, a spokesman for Amoco, which makes the boxes. "It only makes sense to enrich our waste stream with more polystyrene."

"It's one of those great mysteries of life in America," mutters the cartoon character Shoe as he puts his groceries away. "In just one day, how do two bags of ordinary groceries turn into three bags of garbage?"

Polystyrene makers insist that their abandoned trays, coffee cups and containers comprise less than 0.25 percent of the nation's trash. The biggest single component—41 percent by weight—is paper products, and their share has grown steadily, thanks in part to reams of computer printouts and competing regional phone books. Yard waste is the next biggest source by weight (18 percent before recycling), followed by metals (8.7 percent), glass (87.2 percent), food (7.9 percent), plastics (6.5 percent) and wood (3.7 percent). Toxic materials make up about 1 percent of the waste stream. They are supposed to be disposed of separately in facilities approved by the Environmental Protection Agency and carefully monitored for leakage. But many hazardous household products—from paint to nailpolish remover—slip through the EPA's guidelines.

Roughly 80 percent of all that stuff ends up in landfills. Some 6,000 remain nationwide, from unruly city dumps to state-of-the-art engineering marvels. Inside some methane gas is produced but not much else happens. "Practically nothing decomposes in a landfill," says University of Arizona anthropologist William Rathje, who has made a career excavating dumps from Tucson to Chicago. Rathje has found recognizable hot dogs, corncobs and grapes buried for 25 years, and readable newspapers dating back to 1952. The slow rate of degradation is actually a blessing, he says. If more of the contents did decompose, that would hasten the rate at which toxic inks, dyes and paints mixed with the leachate, posing more of a threat to ground water.

Landfill operators say that newer facilities pose few environmental dangers. "These are not just holes in the ground," says Bill Plunkett, spokesman for Waste Management, Inc., the nation's largest solid-waste-disposal firm. "They are highly engineered excavations which have expensive leachate- and gas-collection systems." In addition to taking in 2,500 tons of trash each day, Waste Management's 397-acre Settler's Hill landfill in Geneva, Ill., recovers enough methane to power 7,500 homes. The site will include two golf courses, a driving range, ski slopes, trails for horseback riding, jogging, biking, a lake and a picnic area. Still, NIMBY reigns supreme. Even when Waste Management offered $25 million to Chicago's Lake Calumet area for permission to expand a landfill there, residents weren't swayed. "No dumps, no deals," says state Rep. Clement Balanoff. "We have done more than our share."

Incinerators draw even more ire than landfills these days. "Resource recovery" plants were the bright hope of the 1970s energy crisis, promising to provide steam and electricity while simultaneously reducing trash volume by 90 percent. Some 155 incinerators are now in operation and 29

more are under construction. But an additional 64 have been blocked, canceled or delayed. The problems are partly economic: construction costs can run as high as $500 million, and the energy that incinerators produce is not cost-competitive, even though public utilities are required by law to purchase the power. But what worries residents more are the toxic air pollutants, including dioxins, that some incinerators release. Even the leftover ash can be toxic and should be disposed of as hazardous waste. In Philadelphia's own version of the Islip garbage barge, a ship carrying 28 million pounds of city incinerator ash was rejected by seven countries on three continents over a 22-month period. It was ultimately dumped last year, but the ship's owners refuse to say where.

Incinerator operators say that pollution controls such as high-temperature furnaces, scrubbers and bag houses virtually eliminate harmful emissions. They and environmentalists have dueled with scientific studies over how dangerous trash-burning can be. L.A.'s Lancer project was stopped after one test found it might cause an additional .118 case of cancer per million people. Detroit officials say the ash from their new $438 million incinerator is no more toxic than what remains in someone's fireplace. Yet the Detroit facility has repeatedly failed state ash tests, and in September it flunked air-pollution tests with mercury emissions four times Michigan's allowable level. Allen Hershkowitz, senior scientist at the Natural Resources Defense Council, believes that incineration *can* work safely. But he says too many U.S. operators see the environmental concerns as public-relations problems rather than serious calls for upgrading practices. Meanwhile, says Hershkowitz, the fast promises of incinerator operators have "conspired to blind public officials to the opportunities that recycling offers."

Recycling also holds the edge in creating new jobs, protecting the environment and conserving natural resources. EPA has set a goal of recycling 25 percent of the nation's waste by 1992. But success will depend largely on finding markets for the recycled products. "Most people think they put out the glass, aluminum and paper and they've recycled. In fact, all they've done is separate," says Edward Klein, who heads the agency's task force on solid waste. "Until those commodities are taken somewhere else and used again, you haven't recycled."

What follows is a status report on the potential markets for recyclable materials:

Aluminum: Turning bauxite into new aluminum is 10 times more expensive than reprocessing used cans. That's one key reason more than half of all aluminum beverage cans are recycled today—42.5 billion annually. Even so, Americans still toss out enough aluminum every three months to rebuild the nation's entire airline fleet.

Glass: Reusing old glass also costs less than forging virgin materials. To date, only 10 percent of it is recycled, but markets are growing steadily. Glass bottles can live again as "glassphalt" (a combination of glass and asphalt) and, of course, as other food containers. A California firm, Encore!, has even disproven the old adage that new wine can't come in old vessels. It grosses $3 million a year collecting and sterilizing 65,000 cases of empties each month and selling them back to West Coast wineries.

Yard waste: Composting America's fertile mounds of leaves and grass clippings could eliminate one fifth of the nation's waste—and as much as one third of L.A.'s total. But aside from backyard gardeners, there hasn't been much call for mulch. Pesticides and lawn chemicals also pose toxicology problems in compost heaps. Still, experts say that markets would grow if more municipalities followed Fairfield, Conn., which this fall opened a $3 million composting center to create topsoil for parks, playgrounds and public landscaping.

Plastics: The $140 billion-a-year plastics industry is at last waking up to recycling. Currently only 1 percent of plastics is recaptured, but manufacturers are scrambling to find new uses, from plastic "lumber" to stuffing for ski jackets. Procter & Gamble is making new Spic and Span containers entirely from recycled PET (polyethylene terephthalate, the stuff beverage bottles are made of) and hopes to turn even used Luvs and Pampers into plastic trash bags and park benches. There are still limitations. The Food and Drug Administration will not permit recycled plastic to serve or store food, since it cannot be decontaminated. Some products—like squeezable ketchup bottles—have up to six layers of polymers, which complicates separating. And some recycled plastic never looks new again. Tom Tomaszek, manager of Plastics Again, a polystyrene recycling center near Boston, says the pellets his plant produces come only in "army green," while manufacturers want white or clear. "The biggest problem," Tomaszek says, "is getting people away from the idea that new is better."

Paper: Industry officials like to boast that nearly 30 percent of all paper products consumed in this country are recycled—26 million tons a year, turning up in cereal boxes, toilet tissue, even bedding for farm animals. Still, that leaves more than 40 million tons clogging landfills and going up smokestacks annually. Tree-poor nations like Taiwan and Korea import some U.S. wastepaper. But matching supply, demand and reprocessing capacity at home will take time and coordination. U.S. recycling mills can actually use more high-quality white paper, like computer printouts, than communities are collecting. For newsprint and magazines, the opposite is true. (Currently, no U.S. mills turn recycled fibers into the kind of glossy, clay-coated paper that NEWSWEEK uses.) With burgeoning collection efforts, "we have the potential in this country to increase the supply [of wastepaper] overnight," says J. Rodney Edwards of the American Paper Institute. "But expanding the capacity to use it will take three to five years."

Historically, the American marketplace has been driven by *demand* for products, not *supply* of raw materials. But some lawmakers have concluded that the free market needs adjusting if recycling is to significantly dent the nation's garbage piles. Florida now taxes nonrecycled newsprint at 10 cents per ton. California and Connecticut have passed laws to require newspapers to use a rising percentage of recycled paper in coming years. Elsewhere, officials are looking for ways to force manufacturers to take more responsibility for the disposal of their products, long after they have left the factory. Some states are considering taxing products made with materials or packaging that can't be recycled. Deposits are another approach. One bill before Congress would require anyone who sells batteries to take them back and return them to an appropriate recycling facility. "We need to get the upstream side to recognize that the end of the pipeline has only so much capacity," says Lanny Hickman of the Governmental Refuse Collection and Disposal Association.

Receiving an environmental award from George Bush last week for his community recycling program, high-school student Allen Graves of North Hollywood, Calif., asked the President, "Does your office recycle?"

"I don't know," said Bush.

Busy, distracted citizens also need incentives to recycle. To that end, New York City plans to fine residents who don't comply with its nascent program: $25 for the first offense, $500 for four offenses in a six-month period, with landlords dunned up to $10,000 if their tenants don't cooperate. San Francisco is relying heavily on public education, reminding residents that recycling one aluminum can, for example, can save enough energy to run a TV for three hours. Nearby Berkeley has even tried gimmickry. Under its Eco-lotto program, city officials selected one household by random each week, rummaged through its trash and promised to award the homeowner $250 if no recyclables had been discarded. If the lucky household wasn't careful, the cash was rolled over into the next week's prize. Sadly, the pot rose to $4,500 before the city found a winner.

Charging citizens directly for the amount of trash they throw out may prove more effective. In many communities, garbage removal still comes as part of a general-service bill, so residents neve know how much it costs. Seattle changed that with "variable can rates" in the 1970s. Today residents pay $13.75 to have a single can of trash picked up four times each month, and $9 for each additional can. Faced with such fees, residents have been buying more recyclables, fewer packaged goods and more large-size boxes. Two thirds of Seattle households also signed up to have private haulers collect their recyclables and yard waste. Combined, those measures have cut Seattle's trash volume by 25 percent. City officials are still considering building an incinerator, but thanks to recycling, they hope it will be a smaller, cheaper one.

Seattle's program is considered a model of modern "integrated waste management"—in short, reducing and recycling as much trash as possible, then burning or burying the rest. Some local environmentalists still bitterly oppose incineration, but organizations from the Environmental Defense Fund to the Office of Technology Assessment say that the nation will need a judicious mix of all four methods to handle its trash in the future. Many experts believe that at best, the nation can recycle only about half of its garbage; recycling itself produces some residues that need to go to landfills. But those, too, can be used more efficiently. One Long Island firm, Landfill Mining Inc., has come up with a technique to "recycle" old dumps: digging through them to unearth reusable material like metal and glass. That allows the landfills to be lined and leaves room for more waste—or incinerator ash. "We can actually recycle the space," says founder Robert Flanagan.

The nation has only begun to focus its collective ingenuity on source reduction—generating less garbage in the first place. For that, citizens will need to rethink their priorities. It wasn't so long ago that Americans reused string and rubber bands, resharpened razors, threw food scraps into the stock pot and made grease into soap. (At the turn of the century, pigs were also part of waste management in many cities; 100 of them could eat a ton of garbage a day, creating low-cost meat and fertilizer.) The disposable society has brought many conven-

iences. Single-serving frozen dinners in microwavable trays do facilitate mealtime.

Wrapping fast-food utensils in plastic, cuts down on germs. Ketchup really does come out faster when the bottle can be squeezed. How much do those conveniences mean to us? Are they worth the price of a landfill or an incinerator next door?

Unfortunately, the trade-offs aren't so obvious. It has been far too easy, when taking out the sixth or seventh bag of trash in a week, to assume that the garbage truck will dump in someone else's backyard, or not to think about it at all. With rare exceptions during wartime, Americans have not been adept at making individual sacrifices for the common good. That mentality will have to change. Otherwise, the dumps will cover the country coast to coast and the trucks will stop in everybody's backyard.

TEEING OFF ON JAPAN'S GARBAGE

With their disposable chopsticks and triple-wrapped groceries, the Japanese are hardly more virtuous than Americans when it comes to generating trash: each person produces 1.9 pounds a day, compared with 3.5 pounds in the United States. But since the tiny country has even less landfill space than the United States, necessity has inspired a sophisticated system for handling trash. The key difference is that while Americans believe "there is a single solution to the garbage crisis, Japanese realize that burning, burying, recycling and reducing each has its place," says William Rathje of the University of Arizona.

For the Japanese, the solution of choice is recycling. In Tokyo, enterprising firms have traditionally toured neighborhoods, collecting newspapers, magazines and rags in exchange for new bathroom and facial tissue. Button-shaped batteries, containing toxic mercury, are returned to the store to be recycled. And although only a few years ago no Japanese would touch used goods, the latest trend is garage sales and flea markets, which give secondhand wares new life. About 40 percent of solid waste is recycled, including half the paper, about 55 percent of glass bottles and 66 percent of food and beverage cans. Some towns go further: residents of Zentsuji separate trash into 32 categories, from paper and glass to rags and appliances, and haul it all to collection spots.

Since the early 1970s, officials have strictly enforced mandatory separation of burnable from noncombustible trash. Burnable waste, 72 percent of the total after recycling, is trucked to incinerators, which reduce it in weight and volume by at least 80 percent. Every Japanese community has its own incinerator or access to one nearby (there are 1,899 garbage-burning plants, compared with the 155 large incinerators in the United States). Although the Japanese boast that their incinerators are clean, with waste gases scrubbed by electrostatic precipitators, officials monitor only four types of emissions, and there is controversy over whether toxic dioxins and furans—produced during combustion—are spewed out.

Nonburnable garbage is separated, melted and refabricated; ferrous metals are reclaimed. What's left, 24 percent of the total after recycling, becomes landfill at one of 2,411 sites—few of which resemble the ugly mounds in the United States. The verdant lawns of one of Tokyo Bay's two "Dream Islands," landfill that opened in 1957, are covered with a soccer field, baseball diamonds and a bicycling course; there is also a pool and indoor garden (both warmed by heat from the garbage-to-energy plant nearby). And next autumn Tokyo plans to open a golf course, campground and picnic area atop more garbage piled in the bay. The only clue that it isn't terra firma will be 70 12-foot pipes planted in the ground to carry off methane gas, from rotting kitchen waste.

Yet Japan has not conquered garbage. The overall recycling rate peaked at about 50 percent; it has dropped during the 1980s. And the country still makes too much of the stuff. Gleaming appliances and barely used furniture are discarded, and it's impossible to buy even a pencil without the salesclerk wrapping it. "Everything is wrapped in this country," laments Yasumichi Yamamoto, an official of Chiba City's Public Cleansing bureau. Partly as a result, Tokyo and three neighboring prefectures will have an excess of 3.43 million tons of garbage by 2005, and might have to ship it elsewhere. Before that happens, the government will probably promote greater recycling and changes in consumption patterns to reduce the amount of trash that its citizens generate. Garbage is one Japanese export without a market.

THE SUPPLY-SIDE THEORY OF GARBAGE

Another day, another 3.5 pounds of garbage to generate. Sound like a challenge? It's a snap to fulfill your quota. Brush you teeth, rinse, toss the paper cup. Shave with a disposable razor. Comb your hair—oops, a couple of comb teeth snapped off; out it goes. For breakfast, a single-serving cereal box and a juice-in-a-box. There's no time to do dishes, so use a paper bowl and plastic spoon. Off to work, buying a cup of coffee and newspaper on the way. And on through the day . . .

Every American seems to be doing his part; we're producing twice the solid waste per person as the Europeans. This dubious achievement, says Steve Romalewski of the New York Public Interest Research Group (NYPIRG), means that cutting down on trash is "a primary component in a safe and sensible solution to the garbage crisis." The less there is, the less that must be recycled, burned or buried. Known by the unglamorous name source reduction, its potential is huge. Packaging accounts for about one third of solid waste and throwaway items such as plastic utensils account for still more: 1.6 billion disposable pens, 2 billion disposable razors and 16 billion disposable diapers a year. "We have been a throwaway society," says Norman H. Nosenchuck, director of the New York State Division of Solid Waste. "We simply have to change our ways."

Thin diapers: Some changes are already here. In the last 20 years, the soft-drink industry has cut the plastic use in 2-liter bottles by 21 percent, the aluminum in cans by 35 percent and the glass in non-refillable bottles by 43 percent. Each cut saved money for the manufacturer. McDonald's now pumps syrup for soft drinks directly from delivery trucks into tanks in the restaurants, rather than shipping it in disposable cardboard containers. That saves 68 million pounds of packaging a year. Last week Procter & Gamble announced that it is test-marketing fabric-softener concentrate that the shopper purchases in small paper cartons, pours into a dispenser at home, adds water to and shakes. Those steps replace the plastic jugs of ready-made softener, reducing packaging by 75 percent. P&G's disposable Pampers diapers now come in a thin variety that does the job with half as much material. Aveda, a cosmetics firm in Minneapolis, is designing a metal makeup bottle that the consumer can take back to the store for a refill.

Further reductions will require more radical changes. All packaging exists for a reason. Concerns about tampering led to the plastic collars around products for aspirin to yogurt. Waxed-paper inner bags keep cereals in cardboard boxes fresh. But many products owe their existence to the quest for convenience and to marketing ploys. Today we use microwavable, throwaway trays of frozen foods rather than casserole dishes and buy microwave cake mix complete with a throwaway baking pan. Our kids tote juice boxes to the playground and play miniature Helmut Newtons with their Kodak Flings or Fujki disposable cameras. Toothpaste tubes come in boxes so stores can stack them easily; cereal boxes are bigger than needed so they make an impressive display on the store shelf. Cookies come neatly arranged in plastic trays inside paper bags. The list is as long as a supermarket aisle.

Americans won't give up their disposable lifestyle easily, but a little old-fashioned Yankee ingenuity can help. Office workers might make photocopies on both sides of the paper, halving the amount intended for the memo tray as well as, eventually, the circular file. But short of having the state set wages, there is little hope of making it cheaper to repair a radio than buy a new one.

White-cloth gentility: What if consumers had to pay up-front for their wastrel tastes? The Environmental Defense Fund, an environmental research and lobbying group, has proposed a sales or user tax based on the quantity of packaging in a product, and a national sales tax on disposable items like diapers, razors and plates. NYPIRG prefers a deposit on packages, to induce consumers to opt for minimal packaging or to at least return the containers for recycling. Rhode Island taxes fast-food packages already; the revenue is earmarked for a litter-cleanup program. None of the changes will be easy. Politicians like taxes even less than they do garbage dumps. And some family's livelihood depends on hawking disposable razors. But reducing garbage at the source will lessen the burden on incinerators, recycling programs and landfills, to say nothing of bringing a little white-cloth gentility to the school lunchroom.

[From the Chicago Tribune, Nov. 5, 1989]

EAST'S GARBAGE FILLING HEARTLAND

(By Casey Bukro)

Great waves of garbage are spilling into the Midwest.

Thousands of tons of it arrive from the Northeast each day, rolling in aboard trucks that may give no clue to their cargo as they hurtle along interstate highways and rumble down rural roads.

The disposal of garbage from Eastern homes and businesses is rapidly turning into a long-distance enterprise, one with major environmental and health implications but little regulation.

Northeastern states find it cheaper to transport their garbage hundreds of miles than to pay up to $130 a ton to bury it in local disposal sites that are filling fast.

Midwesterners find their landfills invaded by our-of-town garbage that robs them of local disposal space and could hasten the day when underground drinking-water supplies are threatened by toxic waste from leaking dumps.

"The checks came due from a disposable society this year," said Richard Sahli chairman of Ohio's Solid Waste Management Ad-

visory Council, who is asking Congress to adopt national solid waste planning policies so states cannot be bombarded with garbage from across state lines.

Among the consequences of this dump-on-you-neighbor approach:

Three Northeastern states—New Jersey, Pennsylvania and New York—export 8 million tons of garbage a year, much of it ending up in the Midwest.

This flood of our-of-state garbage is eating away at landfill space in Pennsylvania, Ohio, Michigan, Kentucky, Illinois and Indiana, as state and local officials try to plan for their own future garbage disposal needs.

Eager to cash in on high-paying opportunities to haul garbage, some trucking companies that send meat, produce and other food in refrigerated vans or dry trailers to the East Coast are using the same vehicles to haul maggotinfested garbage to Midwest dumps on the return trip.

The long-distance garbage trade has spawned trash brokers, landfill speculators, rogue truckers, garbage pirates and a flood of speeding trucks on the nation's highways.

Illinois also exports waste, although not to the extent or distance of Northeastern states. Metropolitan Chicago, which is expected to run out of landfill space by the mid-1990s, sends an estimated 40 percent of its garbage across state lines, to less expensive dumps up to 75 miles away in Wisconsin, Indiana and Michigan.

All of this is a sharp break from an earlier American tradition, in which solid waste disposal was considered a local matter.

Contrary to popular belief about the "town dump," garbage landfills are not always run by municipalities or other government bodies. Some dumps are privately owned and collect fees from garbage dumpers in the pursuit of profit.

Just 14 percent of the nation's 5,800 landfills fit this description, but they account for half of the nation's disposal space and almost all of the dumps that take out-of-state waste. More than half of the landfills are owned by government, but many of these are small rural garbage piles; the remainder are jointly owned or operated by governments and private industry.

"There is a misconception on the part of the general populace that these landfills are public utilities," said David Ehrlich, a Pennsylvanian who was linked with several leading landfills in the East and who recently was involved in the sales of three Indiana landfills to out-of-state buyers. They are profit-making enterprises, owned and operated by people who paid for them.

Fueling the thirst for revenue are federal pollution-control regulations that will take effect by 1991.

These rules will require many operators to install plastic liners to protect underground water from the liquid that can ooze out of dumps, to monitor landfills for leaks and to buy insurance to pay for future environmental damage.

The average cost of implementing these rules is expected to be $43,600 a year per landfill, and some operators are welcoming out-of-state garbage as fast as they can get it so they can fill their dumps before the new regulations take effect.

Americans were awakened to the national waste disposal crisis in 1987 by the garbage barge from Islip, N.Y., that wandered the world for months in search of a place that would accept its load. The trash ultimately was burned in a Brooklyn incinerator.

This episode was followed last year by the closure of dozens of East Coast beaches after medical wastes washed ashore.

This year, the symbol of the garbage crisis is the trash-filled tractor-trailer.

Hard-driving garbage vans roll hundreds of miles, often over Int. Hwy. 80, the garbage pipeline that links the East with 24 landfills that take out-of-state wastes.

It is estimated that 30 percent of the trucks entering Ohio from Pennsylvania are carrying garbage.

Around 28,000 tons of refuse travel over the nation's highways each day, often enclosed in tractor trailers that give no clue to their contents except the odor left in their wake.

Long-distance trash hauling was rare until about two years ago. Since then, it has grown into a $350 million business as Americans fill up their local dumps and find it easier or cheaper to export the wastes that are mounting rapidly in an affluent society infamous for its throwaway habits.

The total amount of garbage produced annually in the U.S. has risen 80 percent since 1960. Population growth accounts for part of the increase, but individual habits also are to blame: Each American now produces 3.6 pounds of household garbage a day, a 34 percent increase from 1960.

Nationally, that adds up to 162 million tons of garbage a year.

That's enough to bury 2,700 football fields in a layer of trash 100 feet deep.

The 8 million tons of garbage that New Jersey, Pennsylvania and New York export each year could fill Chicago's 110-story Sears Tower, the world's tallest building, 11 times.

And Americans are expected to produce 20 percent more waste by the turn of the century.

It is said that the nation is in danger of choking on its own garbage. By exporting, some states have decided to let others choke on theirs.

The National Solid Wastes Management Association in Washington hopes that export is only a temporary solution until Eastern states develop recycling programs, build garbage-burning plants that produce energy, and create more, landfills to ease their garbage crisis. Some of these projects are underway, although incinerators often attract fierce opposition as potential sources of air pollution.

"The problem is, that's a three- to seven-year process," said Michael Sheward, a spokesman for the association. "So the movement of garbage from one state to another becomes the temporary solution. It also becomes a way for a community to abdicate responsibility for its own disposal needs."

Waste transportation is a shell game in which some states that export garbage are also major importers. For instance, Pennsylvania sent out 1.5 million tons of trash last year, at the same time it was getting 2.8 million tons from other states.

The trend to trash exporting is sanctioned by a 1978 U.S. Supreme Court ruling that declared garbage an interstate commodity protected by the commerce clause of the U.S. Constitution. Solid waste cannot be banned from crossing state lines.

Thirty-three states in recent years have enacted or proposed legislation that is intended to exclude, limit or more closely regulate waste from other states. Some appear to run contrary to the high court decision, but these are yet to be tested in court.

The Supreme Court ruling was the result of a lawsuit Philadelphia filed in an attempt to stop New Jersey from trying to prevent out-of-state trash from filling up its landfills.

In an odd twist, New Jersey now is the nation's champion waste exporter, shipping away at least half of the 11 million tons of waste it produces each year. It is expected to send about 1.5 million tons this year to Ohio alone.

Gary Sondermeyer, a solid waste management official in New Jersey's Department of Environmental Protection, says his state is not retaliating for all the years it was a dumping ground for the East Coast.

"We've just come to the point where we've exhausted our landfill capacity," said Sondermeyer. The state now has 12 landfills in operation, compared with 400 before 1970. Many were filled, or closed because they were environmental hazards.

Ordinary landfills usually take household garbage mixed with commercial trash such as cardboard boxes, containers or restaurant wastes. They normally do not accept industrial wastes, such as toxic chemicals, or hospital, infectious or radioactive wastes.

However, household trash often contains paint, cleaning fluid, used motor oil and other toxic substances. More than half of the 1,194 sites designated by the U.S. Environmental Protection Agency as the nation's worst toxic waste hazards started as ordinary garbage dumps.

The EPA estimates that half the nation's garbage landfills could be filled and closed by 1995.

This, together with the rising trend in waste exports, is bound to pit states against one another in a rivalry for landfill space.

It is a conflict likely to keep courts and lawmakers busy for years.

Congress has stepped into the controversy over hauling garbage in trucks that also transport food.

"The thought of rotting garbage being hauled in food trucks is truly disgusting," said Rep. William Clinger (R., Pa.). Congress is conducting hearings on three bills to outlaw the practice.

Fears over garbage exports escalated in late October when the Indiana Department of Environmental Management went to court to block the transfer of 300 tons of Philadelphia garbage from five railroad boxcars to a privately owned landfill in Center Point, Ind.

The agency obtained a restraining order after learning that the Philadelphia garbage shippers had not applied for a permit to transfer the garbage from the train to trucks in a Terre Haute railroad yard.

"We were under the impression they were on the way back to Philadelphia," said Bettie Cadou, a spokeswoman for the state agency. "But [the next] evening, we were told the boxcars were back in Terre Haute. They had taken a circuitous route back to Terre Haute."

Indiana authorities threatened further legal action, and the garbage train finally left for Philadelphia two days later.

Though most of the nation's garbage is transported by truck, Conrail reports it earned $1.1 million last year hauling garbage in trains—to Ohio and Indiana.

ALONG AMERICA'S GARBAGE HIGHWAY

(By Casey Bukro)

WESTBOUND ON I-80.—A convey of four trucks appears in the rear-view mirror. They're coming fast.

They pass with a blast of wind, trailing a powerful stench. Bales of garbage are visible under mesh coverings draped across the high-walled truck beds.

They travel in a pack, swinging from left lane to right while passing cars on this stretch of Int. Hwy. 80 between Strattonville and Mercer, Pa.

The speedometer hits 75 in a 55-mile-an-hour zone as a motorist tries to keep up with the convoy. It's no use. The trucks weave around the cars in their path, and soon they are out of sight.

This is a close encounter with some of the rubbish haulers that boom along the garbage highway that slices through America's industrial heartland and part of the nation's breadbasket.

I-80 springs not far from the throb of busy Manhattan and the Statue of Liberty, passing near the dismal industrial city of Newark, N.J., and through New Jersey's swampy meadowlands.

The concrete ribbon goes on to link such cities as Cleveland, Toledo and Chicago.

In between, the scenery changes gradually from coastal swamps to the hazy green valleys of Pennsylvania, the pastures of Ohio, the cornfields of Indiana and Illinois.

There's heavy truck traffic all the way.

Going east, I-80 is a cornucopia of manufactured goods and food.

Going west, it is the trash trail by which the remnants of that great abundance come home to roost as refuse.

The highway and the roads that branch off it provide access to 24 landfills that accept out-of-state garbage.

At least 24,000 tons of East Coast garbage travels over I-80 every day. Following are some other encounters along the garbage highway.

An old refrigerator, a ripped mattress and the handlebars of a bicycle stand out among the mosaic of paper and plastic littering an I-80 exit ramp near Wilkes-Barre, Pa.

The sour smell of 21 tons of Brooklyn garbage fills the air as Mike Walt surveys his overturned rig and counts himself lucky to walk away unhurt.

Walt says he ran off the road because he encountered a motorist backing down the ramp.

His patrol car parked nearby, Pennsylvania State Trooper John Schmidt is not entirely convinced. "They take those ramps too fast," he says, but he does not ticket Walt.

Schmidt frowns as his gaze shifts from the wreckage to the parade of trucks roaring by on the interstate, urgently making time. State police officials estimate that 1,200 garbage laden trucks ply I-80 westbound in Pennsylvania each day.

"These garbage trucks," Schmidt mutters. "I could stop one and find at least two or three violations, either bad tires, leaking brakes, logs not up to date, no tail lights. There are a few reputable companies, but most of them are hauling junk and driving junk."

The conversation halts abruptly as Schmidt jumps into his car, makes a u-turn with his red light flashing, and pursues a speeding truck.

Nobody wants to touch the mess when a garbage van spills its cargo.

Police training did not prepare Cpl. Steve Byron of the Pennsylvania State Police for what he encountered in a truck stopped at a weigh station, where drivers must stop for safety inspections.

State police crawl under the trucks to check air hoses and other critical parts.

When Byron did this, he felt something pelting him from above. He looked up, and his blood ran cold.

"There were thousands and thousands of squirming maggots falling off the truck" through cracks in the floor of a trailer van carrying a load of garbage. It left a lasting impression.

"It's a mess to crawl under there," says Byron. "I'm not going to do it anymore."

Police talk of the hard-driving habits of some garbage truckers and their repeated weight and safety violations.

One trooper recalled a driver who was cited for 40 violations at a weigh station and ordered to park his unsafe truck until it could be towed. Instead, the driver sneaked back and drove the rig away. It was stopped a short distance later, westbound on I-80, by another trooper.

Pennsylvania State Police Cpl. Thomas Parry says the garbage drivers are not daunted by traffic tickets, and he believes the reason is simple arithmetic.

A speeding ticket might cost $100, says Parry, but drivers may earn several times that amount for just one load.

Curious about the backgrounds of these drivers, Parry began asking questions and learned that many are amateurs trying to make a fast buck.

"I would say they are running beyond their abilities," says Parry. "A lot of guys do it after 5 p.m., after their usual work, [or] they drive garbage Saturday and Sunday. They work at a gas station and take a load or two for extra money. . . . There must be hundreds of them. There's an awful lot of money in it."

The interstate highway system was designed to carry more automobile than truck traffic.

Projections envisioned 60 percent passenger cars and 40 percent trucks, but that ratio in Ohio is now reversed, according to Sgt. Steve Horsley of the Ohio State Highway Patrol post in Warren.

Ohio is the final destination for many of the long-haul garbage wagons.

Truckers also stop at the I-80 rest plazas, which usually feature a low-slung yellow-brick building with a fast-food restaurant, a game room, a gift shop and rest rooms.

Truckers complain that some of their trash-hauling colleagues have been known to drop one-ton bales of garbage at these rest stops, leaving a reeking reminder of their visit.

In one of these plazas near Toledo, trucker Steve Oliver of Tecumseh, Mich., is picking through the greeting-card rack in the gift shop. Oliver, who is transporting frozen food, says the garbage drivers tend to stand out.

"I've seen quite a few of them pulled over [by police]. I've seen quite a few try to dodge the scales" at weigh stations, Oliver says. "They tend to run in packs. They're not as independent as other drivers. . . . They have a bad name. Maybe it's because of what they haul."

By Mr. CHAFEE (by request):

S. 2469. A bill to provide for the conservation and development of water and related resources, to authorize the U.S. Army Corps of Engineers to construct various projects for improvements to rivers and harbors of the United States, and for other purposes; to the Committee on Environment and Public Works.

S. 2470. A bill to provide for increased revenues for the maintenance of commercial harbors by the Army Corps of Engineers, and for other purposes; to the Committee on Finance.

WATER RESOURCES DEVELOPMENT LEGISLATION

● Mr. CHAFEE. Mr. President, I am introducing, by request, the administration's 1990 water resources development legislation for the U.S. Army Corps of Engineers.

I ask unanimous consent that copies of the bills and section-by-section analyses of the bills be reprinted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2469

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Water Resources Development Act of 1990".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents.
Sec. 2. Definitions.
Sec. 3. Project authorizations.
Sec. 4. Project modifications.
Sec. 5. Protection of software development.
Sec. 6. Assistance to non-Federal public entities.
Sec. 7. Challenge cost-sharing program for the management of recreation facilities.
Sec. 8. Project interest and discount rates.
Sec. 9. Assistance to private entities.
Sec. 10. Recreation user fees at water resources development areas administered by the Department of the Army.
Sec. 11. Cost-sharing of Section 22, Planning Assistance to States.
Sec. 12. Cost-sharing of flood plain management services.
Sec. 13. Authorization of appropriations from the Harbor Maintenance Trust Fund.
Sec. 14. Administration of Harbor Maintenance Trust Fund.
Sec. 15. Creation of Marine Waterways Trust Fund.
Sec. 16. Period of environmental demonstration program.
Sec. 17. Magnetic levitation transportation system implementation plan.
Sec. 18. Overtime pay for emergency work.
Sec. 19. Emergency and disaster authority.

SEC. 2. DEFINITIONS.

a. For purposes of this Act, the term "Secretary" means the Secretary of the Army.

b. The terms "Indian" and "Indian tribe" have the meaning provided in section 450b of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).

SEC. 3. PROJECT AUTHORIZATIONS.

(a) The following projects for water resources development and conservation and other purposes are authorized to be carried out by the Secretary substantially in accordance with the plans and subject to the conditions recommended in the respective reports designated in this subsection:

(1) COYOTE AND BERRYESSA CREEKS, CALIFORNIA.—The project for flood control, Coyote and Berryessa Creeks, California: Report of the Chief of Engineers, dated February 7, 1989, as modified by the Secretary in the letter to the Congress dated December 5, 1989, at a total cost of $56,300,000, with an estimated first Federal cost of $39,050,000, and an estimated first non-Federal cost of $17,250,000.

(2) PASSAIC RIVER MAINSTEM, NEW JERSEY AND NEW YORK.—The project for flood control, Passaic River Mainstem, New Jersey and New York: Report of the Chief of Engineers, dated February 3, 1989, as modified by the Secretary in the letter to the Congress dated March 8, 1990, at a total cost of $913,500,000, with an estimated first Federal cost of $674,600,000, and an estimated first non-Federal cost of $238,900,000.

(3) MILL CREEK, TENNESSEE.—The project for flood control, Mill Creek, Tennessee: Report of the Chief of Engineers, dated April 21, 1988, as modified by the Secretary in the letter to the Congress dated December 12, 1989, at a total cost of $14,500,000, with an estimated first Federal cost of $7,250,000, and an estimated first non-Federal cost of $7,250,000.

(b) NOGALES WASH AND TRIBUTARIES, ARIZONA.—

(1) The Secretary is authorized to construct the project for flood control, Nogales Wash and Tributaries, Arizona, substantially in accordance with the Report of the Chief of Engineers dated February 28, 1989, as modified by the Secretary in the letter to the Congress dated March 15, 1990, at a total cost of $7,260,000, with an estimated first Federal cost of $5,435,000, and an estimated first non-Federal cost of $1,825,000.

(2) For the purpose of providing flood control benefits in the United States, the Secretary, on behalf of the United States and in consultation with the Secretary of State, acting through the United States Commissioner, International Boundary and Water Commission, United States and Mexico, (hereinafter the Commission) is authorized to cooperate with the Government of Mexico and to transfer to the Commission the funds necessary to provide for associated construction, operation, and maintenance of flood warning gages in Mexico as may be allowed under such international agreements as may be concluded between the United States and Mexico.

SEC. 4. PROJECT MODIFICATIONS.

RAY ROBERTS LAKE, GREENBELT, TEXAS.—The project for navigation and other purposes, Ray Roberts Lake, Greenbelt, Texas, authorized by section 301 of the Rivers and Harbors Act of 1965 (79 Stat. 1073) is modified to authorize the Secretary to construct recreation features substantially in accordance with the Report of the Chief of Engineers dated December 24, 1987, at a total cost of $4,620,000, with an estimated Federal first cost of $1,732,500, and an estimated non-Federal first cost of $2,887,500.

SEC. 5. PROTECTION OF SOFTWARE DEVELOPMENT.

For the purpose of commercializing Federally developed technology through negotiation of a cooperative research and development agreement, the Secretary, acting through the Assistant Secretary of the Army (Civil Works), is authorized to withhold from the public Federally developed computer software that is subject to negotiation under a cooperative research and development agreement for up to two years or until execution of a cooperative research and development agreement pursuant to section 7 of the Water Resources Development Act of 1988 (102 Stat. 4022-23), whichever is less.

SEC. 6. ASSISTANCE TO NON-FEDERAL PUBLIC ENTITIES.

Section 3036(d)(2) of title 10, United States Code, is amended by striking it in its entirety and replacing it with the following:

"(2) Under the supervision of the Secretary, the Chief of Engineers may accept orders to provide services to another department, agency, or instrumentality of the United States or, on a reimbursable basis, to a State or political subdivision of a State, an Indian tribe, a territory or possession of the United States, or the Commonwealths of Puerto Rico and the Northern Mariana Islands. The Chief of Engineers may provide any part of those services by contract. Services may be provided to a State or a political subdivision of a State, an Indian tribe, a territory or possession of the United States, or the Commonwealths of Puerto Rico and the Northern Mariana Islands only if—

"(A) the services are consistent with the missions of the Chief of Engineers; and,

"(B) if the work to be undertaken on behalf of non-Federal interests involves Federal assistance, the head of the department or agency providing Federal assistance for the work does not object to the provision of services by the Chief of Engineers."

SEC. 7. CHALLENGE COST-SHARING PROGRAM FOR THE MANAGEMENT OF RECREATION FACILITIES.

The Secretary is authorized to develop and implement a program to share the cost of managing recreation facilities and natural resources at water resources development projects under the jurisdiction of the Department of the Army. To implement the program, the Secretary is authorized to negotiate and enter into cooperative arrangements with non-Federal public and private entities. Under these arrangements, the Secretary may accept funds, materials and services from such entities to carry out the program at projects where recreation facilities and natural resources are being maintained with Federal funds.

SEC. 8. PROJECT INTEREST AND DISCOUNT RATES.

Section 80(b) of the Water Resources Development Act of 1974, Pub. L. 93-251, is amended to read as follows:

"(b) In the case of any project authorized before January 3, 1969, if the appropriate non-Federal interests have, prior to December 31, 1969, given satisfactory assurances to pay the required non-Federal share of project costs and a contract for physical construction of such project or separable element thereof has been awarded before December 31, 1990, the discount rate to be used in the computation of benefits and costs for such project or separable element shall be the rate in effect immediately prior to December 24, 1968, and that rate shall continue to be used for such project or separable element until construction has been completed, unless otherwise provided by a statute enacted after the date of enactment of this Act."

SEC. 9. ASSISTANCE TO PRIVATE ENTITIES.

The Secretary is authorized to accept orders to provide work or services to corporations, partnerships, limited partnerships, consortia, public and private foundations, or nonprofit organizations operating within the United States, a territory or possession of the United States, or the Commonwealths of Puerto Rico and the Northern Mariana Islands; provided that such entities furnish in advance of fiscal obligation by the United States such funds as are necessary to cover any and all costs of such work or services; and provided further that, prior to providing any such work or services, the Secretary must first determine that the work or services to be provided are within the Civil Works mission of the Corps of Engineers and are in the public interest. The Secretary may provide such work or services, or any part thereof, by contract; however, prior to the Secretary providing any such work or services to any such entity, the entity must—

(1) certify to the Secretary that provision of such work or services is not otherwise reasonably and expeditiously obtainable from the private sector; and

(2) agree to hold and save the United States free from any damages due to any planning, design, construction, operation, or maintenance activities related to the work or services.

SEC. 10. RECREATION USER FEES AT WATER RESOURCES DEVELOPMENT AREAS ADMINISTERED BY THE DEPARTMENT OF THE ARMY.

(a) The second sentence of section 210 of the Flood Control Act of 1968 (82 Stat. 746; 16 U.S.C. 460d-3) is amended to read:

"Nothwithstanding section 4(b) of the Land and Water Conservation Fund Act of 1965, as amended (78 Stat. 897; 16 U.S.C. 460*l*-6a(b)), the Secretary of the Army is authorized to charge fees for the use of specialized recreation sites and facilities, including, but not limited to, improved campsites, swimming beaches, and boat launching ramps; however, the Secretary shall not charge fees for the use or provision of drinking water, wayside exhibits, general purpose roads, overlook sites, toilet facilities, or general visitor information. The fees shall be deposited into the special Treasury account for the Corps of Engineers that was established by section 4(i) of the Land and Water Conservation Fund Act of 1965, as amended (16 U.D.C. 460*l*"-6a(i)).".

(b) Section 4 of the Land and Water Conservation Fund Act of 1965, as amended, (78 Stat. 897; 16 U.S.C. 460*l*-6a) is further amended by deleting the next to the last sentence of subsection (b).

SEC. 11. COST-SHARING OF SECTION 22, PLANNING ASSISTANCE TO STATES.

Section 22 of the Water Resources Development Act of 1974, Public Law 93-251, as amended (42 U.S.C. 2952d-16), is further amended by:

(1) redesignating subsections (b) and (c) as (c) and (d), respectively; and

(2) inserting a new subsection (b) as follows: "(b) For the purpose of recovering 50 percent of the total cost of providing assistance pursuant to this section, the Secretary of the Army is authorized to establish appropriate fees, as determined by the Secretary, and to collect such fees from States or other non-Federal public bodies designated by the States. The Secretary shall phase in the cost sharing program by recovering approximately (1) 10 percent of the total cost of providing assistance in the Fiscal Year 1991; (2) 30 percent of the total cost in the Fiscal Year 1992; and (3) 50 percent of the total cost in the Fiscal Year 1993 and each of the succeeding fiscal years. The fees shall be deposited into the Federal account entitled, 'Contributions and Advances, Rivers and Harbors, Corps of Engineers (8862)' and shall be available until expended to carry out this section."

SEC. 12. COST-SHARING OF FLOOD PLAIN MANAGEMENT SERVICES.

Section 206 of the Flood Control Act of 1960, Public Law 86-645, as amended (33 U.S.C. 709a), is further amended by:

(1) redesignating subsection (b) as (c); and

(2) inserting a new subsection (b) as follows:

"For the purpose of recovering 50 percent of the total cost of providing services pursuant to this section, the Secretary of the Army is authorized to establish appropriate fees, as determined by the Secretary, and to

collect such fees from Federal and non-Federal interests and agencies. The Secretary shall phase in the cost sharing program by recovering approximately (1) 10 percent of the total cost of providing services in the Fiscal Year 1991; (2) 30 percent of the total cost in the Fiscal Year 1992; and (3) 50 percent of the total cost in the Fiscal Year 1993 and each of the succeeding fiscal years. The fees shall be deposited into the Federal account entitled 'Contributions and Advances, Rivers and Harbors, Corps of Engineers (8862)' and shall be available until expended to carry out this section."

SEC. 13. AUTHORIZATION OF APPROPRIATIONS FOR THE HARBOR MAINTENANCE TRUST FUND

Section 210(a) of the Water Resources Development Act of 1986, Public Law 99-662, is amended—

(1) by deleting "and" at the end of paragraph (1);

(2) by striking "not more than 40 percent" from the beginning of paragraph (2) and inserting in lieu thereof "up to 100 percent";

(3) by deleting the period at the end of paragraph (2) and inserting in lieu thereof "; and "; and,

(4) by adding a new paragraph (3) as follows:

"(3) into the Marine Waterways Trust Fund created by section 9511 of the Internal Revenue Code of 1986 amounts to reimburse up to 100% of the eligible expenditures incurred by the National Oceanic and Atmospheric Administration during each fiscal year beginning in fiscal year 1991 in carrying out its nautical charting and marine navigational safety programs and activities, including the nautical charting program, marine weather services, charting survey ship support, and marine tides and circulation programs; except that, no more than 0.01 percent of the value of the commercial cargo involved, as collected pursuant to section 4461 of the Internal Revenue Code of 1954 [now 1986], shall be available for carrying out the purposes of this paragraph during any single fiscal year."

SEC. 14. ADMINISTRATION OF THE HARBOR MAINTENANCE TRUST FUND.

(a) Section 9505(c)(1) of the Internal Revenue Code of 196 is amended by striking "(as in effect on the date of enactment of this section)" and inserting in lieu thereof "(as amended by section 14 of the Water Resources Development Act of 1990".

(b) Section 9505(c)(3) of the Internal Revenue Code of 1986 is amended by deleting it in its entirety and replacing it with the following:

"(3) to carry out section 15(d) of the Water Resources Development Act of 1990."

(c) Section 1403(b) of the Water Resources Development Act of 1986 is amended by striking it in its entirety.

(d) There is authorized to be appropriated to the Department of the Army out of the Harbor Maintenance Trust Fund established by section 9505 of the Internal Revenue Code of 1986, for each fiscal year $5,000,000, to be used by the Department of the Army to provide payment of all administration expenses incurred by the Department of the Army, the Department of the Treasury, and the Department of Commerce in administering the tax imposed by section 4461 of the Internal Revenue Code 1986.

SEC. 15. CREATION OF MARINE WATERWAYS TRUST FUND

(a) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code of 1986 (relating to establishment of trust funds) is amended by adding after section 9510 the following new section:

"SEC. 9511. MARINE WATERWAYS TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is hereby established in the Treasury of the United States a trust fund to be known as the 'Marine Waterways Trust Fund', consisting of such amounts as may be—

"(1) transferred to the Marine Waterways Trust Fund from the Harbor Maintenance Trust Fund as provided in section 210(a) of the Water Resources Development Act of 1986, as amended by section 14 of the Water Resources Development Act of 1990; and,

"(2) appropriated to the Marine Waterways Trust Fund pursuant to section 16(b) of the Water Resources Development Act of 1990.

"(b) TRANSFER TO MARINE WATERWAYS TRUST FUND OF AMOUNTS FOR PURPOSES OF REIMBURSEMENT.—There are authorized to be appropriated to the Marine Waterways Trust Fund out of the Harbor Maintenance Trust Fund established by section 9505 of the Internal Revenue Code of 1954 [now 1986] such sums as may be necessary to reimburse the program costs described in subsection (c).

"(c) EXPENDITURES FROM MARINE WATERWAYS TRUST FUND.—Amounts in the Marine Waterways Trust Fund shall be available to the Department of Commerce, as provided by appropriations Acts, for reimbursement of up to 100% of the costs incurred in carrying out nautical charting and marine navigational safety programs and activities of the National Oceanic and Atmospheric Administration during each fiscal year beginning in fiscal year 1991, including—

"(1) the nautical charting program;

"(2) marine weather services;

"(3) charting survey ship support; and,

"(4) Marine tides and circulation programs."

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated out of the general fund of the Treasury of the United States to the Marine Waterways Trust Fund for each fiscal year beginning in fiscal year 1991 such sums as may be necessary to pay the balance of all eligible expenditures incurred by the National Oceanic and Atmospheric Administration in carrying out its nautical charting and marine navigational safety programs and activities not provided by payments from the Harbor Maintenance Trust Fund under section 210(a) of the Water Resources Development Act, as amended by section 14 of the Water Resources Development Act of 1990.

(c) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of the Internal Revenue Code of 1986 is amended by adding after the item relating to section 9510 the following new item:

"Sec. 9511. Marine Waterways Trust Fund."

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on September 30, 1990.

SEC. 16. PERIOD OF ENVIRONMENTAL DEMONSTRATION PROGRAM.

(a) Section 1135(b) of the Water Resources Development Act of 1986 (33 U.S.C. 2294 note) as amended, is further amended by striking out "5-year period" and inserting in lieu thereof "ten-year period".

(b) Section 1135(d) of such Act as amended is further amended by striking out "5 years" and inserting in lieu thereof "ten years".

SEC. 17. MAGNETIC LEVITATION TRANSPORTATION SYSTEM IMPLEMENTATION PLAN.

(a) The Secretary is authorized, in partnership with the Department of Transportation, and in coordination with the Department of Energy, the Environmental Protection Agency, and other interested Federal agencies, to conduct research and development associated with the development and implementation of a pilot program for an advanced Magnetic Levitation High Speed Transportation System (MAGLEV).

(b) To develop the concept designs, the Secretary is authorized to undertake collaborative research and development with one or more non-Federal entities, including State and local governments, colleges and universities, and corporations, partnerships, sole proprietorships and trade associations which are incorporated or established under the laws of any of the several states of the United States or the District of Columbia.

(c) Administrative provisions.—

(1) In carrying out subsection (b), the Secretary may enter into contracts or cooperative research and development agreements as defined in section 12 of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3710a); except that the Secretary may provide up to 50 percent of the cost of each collaborative research and development project undertaken.

(2) The research, development, or use of any technology pursuant to an agreement under subsection (b), including the terms under which such technology may be licensed and the resulting royalties may be distributed, shall be subject to the provisions of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701-3714).

(3) The Secretary may withhold Federally developed technical information relating to computer software which may be subject to an agreement under subsection (b) until the intellectual property rights concerning the technology are determined by execution of an agreement pursuant to this subsection.

(d) Reports.—The Secretary, together with the Secretary of Transportation, the Secretary of Energy, and the Administrator of the Environmental Protection Agency, or their designated representatives, shall prepare a joint report on the progress made under this subsection. The report shall be submitted to the Congress within two years of the date of enactment of this Act.

(e) There is authorized to be appropriated such sums as are necessary to carry out the purposes of this section.

SEC. 18. OVERTIME PAY FOR EMERGENCY WORK.

a. Section 5547(b)(1) of title 5, United States Code, is amended by adding at the end thereof the following new sentence:

"The provisions of subsection (a) shall also not apply to the pay of any employee of the Army Corps of Engineers for any pay period in which such employee is assigned to work on, or in support of, emergency or disaster relief efforts undertaken in an area where there has been a determination or declaration by the President, in accordance with the Robert T. Stafford Disaster Relief and Emergency Assistance Act, that an emergency or major disaster exists."

b. Section 5547(b)(2) is amended by inserting after the word "firefighter" the phrase "or Army Corps of Engineers".

c. Section 5547(b)(3)(b) is amended by inserting after the word "means" the following: ", with respect to the first sentence of paragraph (1),".

SEC. 19. EMERGENCY AND DISASTER AUTHORITY.

Section 5(a) of the Act entitled "An Act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes", approved

August 18, 1941, as amended (33 U.S.C. 701n), is further amended by striking "flood emergency preparation" in the first sentence and inserting in lieu thereof "preparation for emergency response to any natural disaster".

SECTIONAL ANALYSIS OF THE WATER RESOURCES DEVELOPMENT ACT OF 1990

INTRODUCTION

In 1986, after 16 years of stalemate on water project cost sharing, the Administration and the Congress reached agreement and the landmark 1986 Water Resources Development Act was signed into law.

As part of that compromise, there was a general understanding that a two-year cycle of water project authorization bills could be reestablished. This, the basis for what eventually became the Water Resources Development Act of 1988 was formed. In addition to establishing a two-year cycle for water project bills, the 1988 Act solidified the critical cost sharing reforms of the 1986 Act and adopted a pattern of limited size authorization bills to stay within realistic budget considerations.

It is now time to follow up with a Water Resources Development Act of 1990. Toward that end, the Department of the Army has developed proposed legislation for the 101st Congress.

We have identified several unifying themes or policies under which to develop a water bill for 1990. They are as follows:

Maintain the reforms of the Water Resources Development Acts of 1986 and 1988—Cost sharing principles and policy directives must be preserved, without exception.

Limit the number and cost of authorizations—The scope of legislation must be consistent with spending objectives and projects must be economically justified and environmentally sound.

Exclude "premature" projects—Projects that have not been fully reviewed by the Executive Branch must not be included.

Observe Federal/non-Federal responsibilities—New Program initiatives and special interest provisions that shift non-Federal responsibilities to the Federal government are unacceptable.

Advance the principles of cost recovery in construction, operation, and maintenance of Federal projects.

Utilize the Army Corps of Engineers expertise to assist other governmental agencies as a technical, scientific, and construction management resource.

We believe that adherence to these principles will assure passage of a Water Resources Development Act for 1990. It will help reinstate the biennial authorization process that is so important to strengthening partnerships with non-Federal sponsors and the orderly, predictable authorization and execution of Army's civil works mission. It will also provide for optimal use of Corps of Engineers technical, scientific and management capabilities.

SECTIONAL ANALYSIS

Section 1. Short Title; Table of Contents.

Section 2. Definitions.

Section 3. Project Authorizations.

This section includes water resources projects which have met all Executive Branch review requirements and are now ready to be authorized.

(a)(1) Coyote and Berryessa Creeks, California.—The project for flood control, Coyote and Beryessa Creeks, California, is based on the Report of the Chief of Engineers, dated February 7, 1989, as modified by the Secretary in the letter of Congress dated December 5, 1989.

The project is located in the cities of San Jose and Milpitas in the Santa Clara Valley immediately south of San Francisco Bay. Coyote and Berryessa Creeks drain about 372 square miles of an area composed of large industrial complexes and some residential development.

The selected plan is also the NED plan. The plan for Coyote Creek includes approximately four miles of Federal improvements and about two miles of improvements funded by the local sponsor. The project includes overflow channels and offset levees on Coyote Creek. The plan for Berryessa Creek consists of approximately four miles of channel improvements, a sedimentation basin, and offset levees. The project provides 100-year flood protection.

Based on October 1989 price levels, the estimated cost of the recommended plan is $56,300,000 of which $39,050,000 would be Federal. Annual O&M is a non-Federal responsibility and is estimated at $544,000. Average annual costs, based on 8⅞ percent discount rate and a 100-year period for economic analysis are $5,450,000 for Coyote Creek and $1,250,000 for Berryessa Creek. Average annual benefits are $5,650,000 for Coyote Creek and $1,630,000 for Berryessa Creek. The benefit-cost ratio is 1.1 for Coyote Creek, excluding benefits from work done by the sponsor for which credit would be given and for which costs have been included. Benefits for that work have not been specifically calculated, but, if included, would yield a benefit to cost ratio for the entire Coyote Creek project in excess of 1.3. For Berryessa Creek the benefit-cost ratio is 1.3. All benefits are flood damage prevention benefits.

The non-Federal sponsor is the Santa Clara Valley Water District. The sponsor supports implementation of the project.

(2) Passaic River Mainstem, New Jersey and New York.—The project for flood control, Passaic River Mainstem, New Jersey, is based on the Report of the Chief of Engineers dated February 3, 1989, as modified by the Secretary in the letter to Congress dated March 8, 1990.

The Passaic River Basin is a 935 square mile watershed in northeastern New Jersey and southeastern New York. It includes portions of Judson, Bergen, Essex, Passaic, Morris, Sussex, Union and Somerset Counties in New Jersey and Orange and Rockland Counties in New York. The Basin is located in the Greater New York City Metropolitan Area, within a 35 mile radius of New York City.

The recommended plan is the NED plan. The plan consists of large diversion tunnels, channel modifications, levees, floodwalls, preservation of natural flood storage areas and fish and wildlife mitigation measures. These measures provide protection against floods, ranging from 100-years to a 500-year event, to the Passaic River Basin's major flood damage areas.

Based on October 1989 price levels, the estimated cost of the recommended plan is $913,500,000 of which $674,600,000 would be Federal. Annual O&M is a non-Federal responsibility and is estimated at $2,200,000. Average annual costs, based on 8⅞ percent discount rate and a 100-year period for economic analysis are $96,000,000 and average annual benefits are $142,000,000. The benefit-cost ratio is 1.5.

The non-Federal sponsor is the State of New Jersey. The sponsor supports implementation of the project.

(3) Mill Creek, Tennessee.—The project for flood control, Mill Creek, Tennessee, is based on the Report of the Chief of Engineers, dated April 21, 1988, as modified by the Secretary in the letter to Congress dated December 12, 1989.

The Mill Creek Basin lies primarily within Nashville, Davidson County and Williamson County in central Tennessee. The recommended plan is the NED plan and consists of construction of two detention dams, one on Mill Creek and one on Sevenmile Creek, and widening a ¾-mile section of channel on Sevenmile Creek. In addition, the existing flood warning system will be modified to be compatible with the headwater dams. The project provides about 100-year flood protection. The flooding problem extends along Mill Creek for about 24 miles to Nolensville and along its primary tributary, Sevenmile Creek, for about 3 miles.

Based on October 1989 price levels, the estimated cost of the recommended plan is $14,500,000 of which $7,250,000 would be Federal. Annual O&M is a non-Federal responsibility and is estimated at $46,000. Average annual costs, based on 8⅞ percent discount rate and a 50-year period for economic analysis are $1,300,000 and average annual benefits are $2,000,000 and the benefit-cost ratio is 1.5. All benefits are flood damage prevention benefits.

The non-Federal sponsor is the Metropolitan Government of Nashville and Davidson County. The sponsor supports implementation of the project.

(b) Nogales Wash and Tributaries, Arizona.

Subsection (1) of this section authorizes the project for flood control, Nogales Wash and Tributaries, Arizona, based on the Report of the Chief of Engineers dated February 28, 1989, as modified by the Secretary in the letter to the Congress dated March 15, 1990.

The project is located adjacent to the United States-Mexico border, in central and northern portions of the City of Nogales, in Santa Cruz County, Arizona. The Nogales Wash is the major drainage system for the City of Nogales.

The recommended plan for the project is the NED plan and consists of two separable elements: (1) lateral collector channels along the U.S. side of the International Boundary to reduce flooding in downtown Nogales and provide 33-year level of protection and (2) Chula Vista channels to capture breakout flows from Nogales Wash and Potrero Creek and convey them around the Chula Vista/Pete Kitchen community to provide a 100-year level of protection.

Subsection (2) authorizes the Secretary, in consultation with the Secretary of State, acting through the Commissioner of the International Boundary Water Commission, to cooperate with Mexico in order to place flood warning gages on Mexican soil. The gages are features of the project authorized in subsection (a), and would be installed in Mexico to provide flood control benefits to the United States. The International Boundary Water Commission would provide support to the United States in the negotiations with Mexico to provide for construction, operation and maintenance of the flood warning gages in Mexico.

Based on October 1989 price levels, the estimated cost of the recommended plan for the entire project, including the flood warning gages, is $7,260,000, of which $5,435,000 would be Federal. The estimated cost for the flood warning gages to be installed in Mexico is approximately $120,000. Annual

O&M for the project is a non-Federal responsibility and is estimated at $14,000. Average annual costs, based on 8⅞ percent discount rate and a 100-year period for economic analysis are $678,000 and average annual benefits are $1,372,000. The benefit-cost ratio is 2.0.

The non-Federal sponsor is the Santa Cruz County Flood Control District. The sponsor supports implementation of the project.

Section 4. Project Modifications.

Ray Roberts Lake Greenbelt, Texas.—The Ray Roberts Lake Greenbelt, Texas, project is based on the Report of the Chief of Engineers dated December 24, 1987.

The project is located in the Dallas, Denton, and Forth Worth metropolitan area in north central Texas. The Rivers and Harbors Act of 1965, Section 301, contains authority for construction of both Ray Roberts Lake and Lewisville Lake, including additional lands (2,900 acres) for public use and access and new recreation development at Lewisville Lake.

The selected plan is a result of a Cost Authorization Change Study which was done at the request of the non-Federal sponsors. The recommended plan consists of acquisition and management of 1,600 acres in fee and/or a conservation easement along the 14 river mile stretch of the Elm Fork of the Trinity River between Ray Roberts Dam and Lewisville Lake for recreation purposes.

Based on October 1989 price levels, the estimated cost of the recommended plan is $4,620,000 of which $1,732,000 would be Federal. Annual O&M is a non-Federal responsibility and is estimated at $60,000. Average annual costs, based on a 8⅞ percent discount rate and a 50-year period for economic analysis are $554,200 and average annual benefits are $1,718,200. The benefit-cost ratio is 3.1.

The non-Federal sponsors are the Texas Parks and Wildlife Department and the cities of Dallas and Denton. The sponsors support implementation of the project.

Sec. 5. Protection of Software Development.—

Much of the interest expressed by non-Federal parties to collaborate with Army Corps of Engineers laboratories in the commercialization of Corps technology advances has focused on the development or fine tuning of Federaly developed technical information. Recently, the Corps expanded its technology transfer programs under the Construction Productivity Advancement Research (CPAR) program, which was authorized under section 7 of the Water Resources Development Act of 1988 (P.L. 100-676). This program enables the Corps to share the cost of research with a non-Federal partner.

Through our experience negotiating cooperative research and development agreements under CPAR, we have found that the non-Federal partner has had particular interest in Federally developed software, which, through improvement and commercialization, would be of value to the private sector. However, in many cases, the protections afforded under the various technology transfer, patent, and copyright laws do not apply to Federallly developed software during the pre-contractual bargining process. As a result, the Federally developed software could be obtained by the public through requests under the Freedom of Information Act, creating an exposure risk before a cooperative research and development agreement is concluded.

This proposal is aimed at protecting Federally developed software from disclosure when the information is subject to negotiation of a cooperative research and development act under the CPAR program.

The proposed legislation would create a limited exception to the Freedom of Information Act, covering a period not to exceed two years, beginning with negotiations of an agreement and ending with execution of a cooperative research and development agreement under section 7 of the Water Resources Development Act of 1988.

Sec. 6. Assistance to Non-Federal Public Entities.—

10 U.S.C. 3036(d)(2) authorizes the Chief of Engineers to provide services to another department, agency, or instrumentality of the United States or, on a reimbursable basis, to a state or political subdivison of a state. These services include but are not limited to studies and planning activities, engineering and design, construction managment, and training. Currently, these services may be provided to a state or political subdivision of a state only if the work to be undertaken on behalf of the non-Federal interests involves Federal assistance and the head of the department or agency providing the Federal assistance does not object to the provision of services by the Chief of Engineers. The present provision unduly limits the circumstances under which the Corps can provide reimbursable services. The proposed legislation would amend 3036(d)(2) so that the Chief of Engineers could conduct reimbursable work for a state or political subdivision of a state whether or not Federal assistance is involved. In addtion, under the existing provision the language of the statute clearly authorizes the Chief of Engineers to provide work or services to states or political subdivisons of states. However, the word "states" is not defined in the law; nor is it defined in title 10 of the United States Code. Without a broad definition of the word "states", it would be difficult to argue that the present provision applies to the commonwealths, territories, or possessions of the United States. There is a recognized need of such assistance in the commonwealth, territories, or possessions affiliated with the Untied States, and the proposed legislation will clarify that 10 U.S.C. 3036(d) applies to these entities.

Sec. 7. Challenge cost-sharing program for the Management of Recreation Facilities.—

The purpose of the proposed legislation is to authorize the Secretary of the Army to establish a "challenge" cost-sharing program for the management of recreation facilities and natural resources at water resources development projects under the Secretary's jurisdiction. This cost-sharing program challenges the non-Federal section to join in partnership with the Corps to manage recreation facilities and natural resources at projects where such facilities and resources are being maintained with federal funds. Specifically, it would permit the Secretary to enter into cooperative arrangements with non-Federal public entities, private groups, and individuals to accept donations of funds, materials, and services. A donation could be applied toward a specific facility or spread among facilities or projects, depending upon the terms of the particular cooperative arrangement. The legislation would not affect non-Federal cost-sharing requirements under other laws. This legislative proposal is consistent with the partnership concepts envisioned in the Water Resources Development Acts of 1986 and 1988. It recognizes the reality of Federal budgetary constraints and offers the non-Federal sector an opportunity to join in partnership with the Corps to greatly enhance the use of limited Federal dollars.

Sec. 8. Project Interest and Discount Rates.—

Section 80 of the Water Resources Development Act of 1974, P.L. 93-251, directs that the interest rate for discounting future benefits and computing costs be based on Water Resources Council formula published on 24 December 1968. In addition, Section 80 freezes the interest rates at the rate in effect immediately prior to 24 December 1968 for projects authorized prior to 3 January 1969 provided satisfactory assurances of local cooperation were received by 31 December 1969.

The "grandfather" clause has been with us now for 15 years and has set the base interest rate for these "grandfathered" projects at 3¼%. This has resulted in projects not being supported in today's environment of much higher interest rates. The original intent of providing a transition between old and new discount rate calculations has long since served its purpose. Also, projects not started in 15 years should not be expected to be judged on such outdated discount rates any longer. Therefore, legislation is proposed to introduce an expiration of December 31, 1990 for this "grandfather" clause by amending P.L. 93-251.

Sec. 9. Assistance to Private Entities.—

Under existing law, the Department of the Army can perform work or services for other Federal agencies and for states or political subdivisions of states. Currently, however, there is no similar authority to provide such assistance to the private sector, even though there may be a legitimate need for such assistance in an area within the Corps' expertise. The proposed legislation would provide authority for the Department of the Army to perform work or services which are within the civil works mission of the Corps of Engineers and which are in the public interest for corporations, partnerships, limited partnerships, consortia, public and private foundations, or nonprofit organizations, provided such entities certify that the work or services are not otherwise reasonable and expeditiously obtainable from the private sector; agree to hold and save the United States free from any damages due to any planning, design, construction, operation, or maintenance activities related to the work or services; and furnish funds to the United States to cover any and all costs of the work or services in advance of fiscal obligations by the United States.

Sec. 10. Recreation User Fees at Water Resources Development Areas Administered by the Department of the Army.—

The purpose of the proposal is to authorize the collection of recreation user fees for use of specialized recreation sites and facilities, including but not limited to, improved campsites, swimming beaches, and boat launching ramps at water resources development areas administered by the Department of the Army. Enactment of the legislation would remove existing restrictions on the authority of the Department of the Army to impose reasonable charges for use of certain developed recreational areas under its administration and would eliminate the requirement to provide one free campground at each project where camping is permitted. The legislation, however, is not intended to authorize the imposition of fees for general public access to water resources development projects.

The Department of the Army, through the Corps of Engineers, administers one of the largest systems of outdoor recreation in

the entire Federal Government. In the past, the bulk of the cost of operating and maintaining this extensive program has been borne by the general taxpayers even though an easily identifiable group—those who actually visited our recreation areas and used our facilities—derived a direct benefit at little or no cost to themselves.

Certainly, the availability of Federally subsidized outdoor recreation is of indirect benefit to all Americans. However, those who actually visit and use such areas derive greater benefit and should be expected to contribute a higher percentage of the costs of operating and maintaining those areas and facilities. A May 1986 study completed by Market Opinion Research of Detroit (and underwritten by the National Geographic Society and presented to the President's Commission on Americans Outdoors) gives us additional insight into current public opinion on this issue. As a part of the study, Market Opinion Research conducted a 2,000-interview telephone survey and found that a 55-percent majority of American adults thinks the costs of maintaining existing recreation areas should come mainly from user fees, rather than taxes.

Sec. 11. Cost-Sharing of Section 22, Planning Assistance to States.—

The purpose of this proposal is to authorize the Secretary of the Army to apportion the costs of providing water resources planning assistance furnished to states and entities designated by states under Section 22 of the Water Resources Development Act of 1974. The legislation would allow recovery of up to 50% of the program cost. The enactment of such legislation would enable the Secretary of the Army to maintain this successful program while reducing the program's budgetary impacts by applying the cost-sharing and beneficiary-pay principles of the Water Resources Development Act of 1986, P.L. 99-662. Under this program the Corps provides assistance to clearly identifiable beneficiaries who otherwise could use non-Federal sources for such services.

Section 22 of the Water Resources Development Act of 1974, P.L. 93-251, as amended (42 U.S.C. 1962d-16), authorizes the Secretary of the Army to provide planning assistance to States on the development, use, and conservation of water and related resources in drainage basins. The assistance provided under this program supports and supplements States' efforts and, in many cases, becomes an integral part of a State's overall comprehensive plan.

Application of the cost-sharing and beneficiary-pay principles of the Water Resources Development Act of 1986 will allow the Corps of Engineers to address current program demands. Consistent with the precept that the beneficiary of services should pay for at least a portion of those services, the proposed legislation would allow the Secretary of the Army to apportion up to 50 percent of program costs to the users of these services. Because beneficiaries of these programs have expressed concern over the hardships that would be brought about by initiating cost-sharing in one year, it is proposed that the cost-sharing be phased in over a three-year period, beginning at 10 percent in fiscal year 1991, 30 percent in 1992, and increasing to 50 percent in 1993.

Sec. 12. Cost-Sharing of Flood Plain Management Services.—

The purpose of this proposal is to authorize the Secretary of the Army to apportion up to 50 percent of the program costs of flood plain management services provided under Section 206 of the Flood Control Act of 1960 to beneficiaries of the services. The enactment of such legislation would enable the Secretary of the Army to maintain this successful program while reducing the program's budgetary impacts by applying the cost-sharing and beneficiary-pay principles of the Water Resources Development Act of 1986, P.L. 99-662. Under this program the Corps provides assistance to clearly identifiable beneficiaries who otherwise could use non-Federal sources for such services.

Section 206 of the Flood Control Act of 1960, P.L. 86-645, as amended (33 USC 709a), authorizes the Secretary of the Army to provide flood plain information and assistance upon request from other Federal agencies and from state, local and private interests to assist those entities in flood plain land use and development decision making.

During fiscal year 1989 alone, the Corps provided over 96,000 responses to requests involving potential flood plain development valued at over $15 billion. Requests for assistance have continually increased. Application of the cost-sharing and beneficiary-pay principles of the Water Resources Development Act of 1986 will allow the Corps of Engineers to meet current program demands. Consistent with the precept that the beneficiary of services should pay for at least a portion of those services, the proposed legislation would allow the Secretary of the Army to apportion 50 percent of the cost of these services. The Secretary would devleop procedures to recover approximately 50 percent of the cost of such services. Because beneficiaries of these programs have expressed concern over the hardships that would be brought about by initiating the cost-sharing in one year, it is proposed that the cost-sharing be phased in over a three-year period, beginning at 10 percent in fiscal year 1991, 30 percent in 1992, and increasing to 50 percent in 1993.

Sec. 13. Authorization of Appropriations From the Harbor Maintenance Trust Fund—

This proposal would amend section 210(a) of the Water Resources Development Act of 1986, P.L. 99-662, to authorize appropriations from the harbor maintenance trust fund to pay for up to 100 percent of the eligible operations and maintenance costs assigned to commercial navigation of all harbors and inland harbors within the United States. The current law allows appropriations of funds to pay for up to 40 percent of such costs. This proposal would also authorize appropriations of funds from the harbor maintenance trust fund into the newly created marine waterways trust fund for the purpose of reimbursing up to 100 percent of the expenditures incurred by the National Oceanic and Atmospheric Administration in carrying out its nautical charting and marine navigational safety programs and activities. No more than .01 percent of the value of commercial cargo subject to the port user fee can be used to reimburse NOAA's costs during any single fiscal year.

Sec. 14. Administration of Harbor Maintenance Trust Fund.—

The Corps of Engineers has been advised by the United States Customs Service that Customs will not be able to sustain an adequate resource commitment, manpower and funds, to the administration of the Harbor Maintenance Trust Fund program unless a source of funding is found for the administration and enforcement of the program. Previously, Customs drew necessary funds from their Commercial Merchandising Processing Fee. A 1988 General Agreement for Tariff and Trade (GATT) user fee decision requires that Customs' Commercial Merchandising Processing Fee resources be dedicated only to Customs commercial activities. As a result of this decision, Customs' commitment to the harbor maintenance program will be scaled down to a maintenance level. This will most certainly result in a reduction of revenues from this source.

The Proposal would authorize appropriations from the Harbor Maintenance Trust Fund to pay administrative expenses incurred by the Department of the Army, the Department of the Treasury, and the Department of Commerce in administering the port use fee imposed by Section 4661 of the Internal Revenue Code of 1954.

Sec. 15. Creation of Marine Waterways Trust Fund.—

This proposal established a marine waterways trust fund in the Treasury of the United States. The funding sources for the newly created trust fund consist of transfers from the harbor maintenance trust fund and if necessary from appropriations out of the general revenues of the Treasury. Amounts in the marine waterways trust fund are to be used to reimburse up to 100 percent of the costs incurred in carrying out nautical charting and marine navigational safety programs and activities of NOAA during each fiscal year beginning in FY 1991. Funds for reimbursing NOAA's cost are to come first from transfers to the marine waterways trust fund from the harbor maintenance trust fund; however, no more than .01 percent of the value of the commercial cargo subject to the port user fee can be used for reimbursing NOAA's costs. In the event that there are not sufficient funds available from the harbor maintenance trust fund to reimburse all of NOAA's costs, the balance of the eligible expenditures may be obtained from an appropriation from the general funds of the Treasury.

Sec. 16. Period of Environmental Demonstration Program.—

Section 1135 of the Water Resources Development Act of 1986, P.L. 99-662, authorized the Secretary of the Army to carry out a demonstration program in the two-year period beginning on the date of enactment of the 1986 Act, November 17, 1986, for the purpose of making such modifications in the structures and operations of water resources projects constructed by the Secretary before the date of enactment of the 1986 Act which will improve the quality of the environment in the public interest. Section 1135 also requires that non-Federal interests share 25 percent of the cost of any modifications carried out under the section. Section 41 of the Water Resources Development Act of 1988, P.L. 100-676, extended the demonstration program period to 5-years.

The purpose of this proposal is to extend the program to 10-years in order to take advantage of any opportunities that may arise on any completed water resources project, as well as to demonstrate the viability of improving the quality of the environment and to allow potential cost sharing partners more time to obtain the necessary financing to support non-Federal participation. Presently, we are identifying and reviewing a number of demonstration proposals. However, because of continuing advancements in the environmental sciences and technology and identification of new environmental hazards it is impossible to identify today what demonstration programs will be needed in the future. The proposal would provide the Secretary of the Army with the

flexibility needed to respond to demonstration opportunities in a timely manner.

Sec. 17. Magnetic Levitation Transportation System Implementation Plan.—

Magnetic Levitation (MAGLEV) high-speed transportation systems offer a low-pollution, energy efficient means of ground transportation. High speed systems could be made available through the use of advanced MAGLEV technology. A combined Government/industry effort to develop a prototype MAGLEV system would enable the United States industry to become a world leader in MAGLEV and superconductor technology. That technology could greatly advance the transportation network in the United States and end our reliance on the existing foreign technology for high speed ground transportation.

The purpose of this proposal is to stimulate the private sector to develop an operational second-generation MAGLEV system having significant advantages over existing foreign technologies and utilizing the strengths of U.S. industry. To achieve this purpose, the proposal would authorize the Secretary, in partnership with the Secretary of Transportation, and in consultation with other Federal agencies, to provide for research and development of second generation MAGLEV technology. The development of this technology would include the design, construction, operation, testing, and evaluation of a prototype vehicle guideway system. The design work would be cost shared with private industry, pursuant to cooperative research and development agreements. These agreements would be tailored to meet the requirements of each non-Federal partner or partners, to maximize the potential for early commercialization of the MAGLEV technology.

Sec. 18. Overtime Pay for Emergency Work.—

The major natural disasters in 1989, i.e., Hurricane Hugo and the Loma Prieta earthquake, have made the Corps of Engineers acutely aware of the statutory limitation on overtime pay for civilian members directly involved in emergency response work. The purpose of the proposed legislation is to raise the pay period and yearly overtime ceilings for Corps of Engineers employees working on or in support of emergency or disaster relief efforts. The special pay provisions would be applicable only where there has been a determination or declaration by the President, in accordance with the Robert T. Stafford Disaster Relief and Emergency Assistance Act, that an emergency or major disaster exists.

Sec. 19. Emergency and Disaster Authority.—

This proposal would authorize the Corps of Engineers to plan and prepare for response to any natural disaster. The Corps of Engineers is one of the leading federal agencies with a nationwide capability to respond quickly and effectively to requests for assistance during times of natural disaster. As a result of this capability, the Corps becomes extensively involved in a broad range of emergency activities: recent examples are Hurricane Hugo in the Caribbean and the southeastern United States; the Loma Prieta Earthquake in California; the severe drought situation in the central United States; tornadoes in Alabama; and, extensive flooding in many locations of the nation. This proposal will enable the Corps to plan, prepare for, and respond more effectively to the broad spectrum of natural disasters.

S. 2470

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Harbor Maintenance Act of 1990".

SEC. 2. INCREASE IN HARBOR MAINTENANCE FEE.

Section 4461(b) of the Internal Revenue Code of 1986 is amended by striking out "0.04" and inserting in lieu thereof "0.125".

ANALYSIS OF THE HARBOR MAINTENANCE ACT OF 1990

The Water Resources development Act of 1986 established an ad valorem fee on commercial cargo loaded or unloaded at ports. The revenues from this fee are made available for a portion of the Army Corps of Engineers' maintenance activities at the Nation's harbors. This legislative proposal increases the ad valorem rate for the port user fee from its current 0.04 percent to 0.125 percent. The increased rate will allow recovery of up to 100 percent of the eligible operation and maintenance dredging program costs and will allow recovery of the costs of certain National Oceanic and Atmospheric Administration programs that benefit the commercial navigation industry.●

By Mr. FORD (for himself and Mr. LEAHY):

S. 2471. A bill to provide for a study of the National School Lunch Program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

STUDY OF NATIONAL SCHOOL LUNCH PROGRAM

Mr. FORD. Mr. President, I rise today to introduce legislation authorizing a comprehensive study of the National School Lunch Program. This important program, which dates back to 1946, was designed to safeguard the health and well-being of our children, as well as encourage the consumption of nutritious agricultural products. And for the most part, it has been a significant success. Today, the School Lunch Program operates in over 90 percent of our country's elementary and secondary schools. Recent studies show that well nourished children are better students, and are less likely to develop absentee or tardiness problems. The long-term benefits for our society are quite obvious.

The National School Lunch Program serves more than 24 million children nationwide, providing 4 billion lunches per year. In my home State of Kentucky, about 660,000 children benefit from this important Child Nutrition Program. Nearly 80 million meals were served in Kentucky under this program last year. Students may qualify for free or reduced price meals, depending upon their family income level. But about half of all meals go to students receiving paid meals under this program as an important source of nutrition. In my State, 54 percent of the lunches served were paid meals. States receive assistance in the form of cash or commodity reimbursements for each meal provided.

However, Mr. President, this program has changed in significant ways over the last 10 years. The last comprehensive Federal study of the operation of the National School Lunch Program was in 1979. In 1981, child nutrition programs were dramatically altered, and the Federal child nutrition budget was reduced by almost one-third. Additional income documentation and verification requirements were placed upon school food officials administering the School Lunch Program. And reimbursement levels provided for all meals were reduced from 18½ to 10½ cents. In Kentucky, this meant a decrease of more than 5 percent in the number of students who could be served the following year on a daily basis.

And the availability of bonus commodities, which are derived from farm program surpluses, has declined sharply in recent years. The amount received by schools for the School Lunch Program has decreased by more than $300 million, or about 70 percent, since 1987.

Last year, important legislative changes were made in an attempt to streamline compliance and accountability requirements under the act. I believe it is time to assess the impact of these changes.

And there are some who would like to change the School Lunch Program in equally significant ways for the decade ahead. Some would make this program, which was designed to benefit all children, a more targeted benefits program available only to children from lower income families. Others would demand more of State and local agencies and individual schools in achieving the goals of the program. There is some danger that additional requirements would drive schools from the program, to the detriment of all of our young people. I would suggest that any decision in this regard must be an informed decision. Mr. President, it is again time that we take a closer look at the operation of the School Lunch Program.

Mr. President, the study I am proposing today is straightforward. It would require the Secretary of Agriculture to analyze several important factors in assessing changes in the operation of the National School Lunch Program over the last decade. These include the impact of decreased bonus commodities on a State-by-State basis; indirect costs faced by school food service authorities; current costs of providing school lunches; the reasons why some schools have left the program and the impact on low-income children at those schools; and changes in responsibility during the last decade for both State officials and school food service authorities.

I would hope that this study assists in planning the long-term direction of

this important program. My colleagues on the Agriculture Committee took the lead in initiating several important changes in child nutrition programs last year, and will be seeking to improve other programs this year under the Leland Memorial Domestic Hunger Relief Act. I would hope that this study, in a small but important way, would complement these efforts and assist in any future improvements made to the National School Lunch Program. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2471

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,

SECTION 101. FINDINGS.

The Congress hereby finds that—

(1) the last comprehensive study of school nutrition programs was requested in 1979;

(2) in 1981, the Federal child nutrition budget was reduced by approximately one-third;

(3) the availability of bonus commodities to the National School Lunch Program has been reduced by $300 million since 1987;

(4) many schools are bearing significant increases in indirect cost assessments;

(5) there have been significant increases in administrative responsibilities in operating Federal child nutrition programs at both the State and local level; and

(6) there is limited national data with which to evaluate the impact of increased financial pressures upon the National School Lunch Program.

SEC. 201. PURPOSES.

The School Lunch Study will provide an updated analysis of the National School Lunch Program and will serve as a basis for evaluting changes to such program. This study will help to ensure that the National School Lunch Program is structured and administered in such as way as to provide the greatest number of children with nutritious meals.

SECTION 301. SCHOOL LUNCH STUDY.

The Secretary of Agriculture shall conduct a study of the National School Lunch Program to determine—

(a) the amount of bonus commodities lost, by state, since the 1987-88 school year;

(b) the amount of indirect costs assessed against local school food service authorities by schools;

(c) the current cost of providing a school lunch by component, including the costs of labor;

(d) why those schools that voluntarily dropped the National School Lunch Program during the 1990s made their decision to do so;

(e) if low-income children in schools that voluntarily dropped out of the National School Lunch Program continue to receive meals free of charge;

(f) the changes in responsibility, and costs associated with those changes, that have occurred since 1980 at the state agency level in the administration of the school programs at the state level;

(g) the changes in responsibility and costs to local school food service authorities of satisfying the federal administrative program requirements, including the cost of audits; and

(h) what school food service authorities charge students for non-free or reduced price meals.

SEC. 401. REPORT TO CONGRESS.

The Secretary shall submit a final report to Congress on the Study by no later than October 1, 1991.

By Mr. FOWLER (for himself and Mr. NUNN):

S. 2473. A bill to extend and revise the price support and related programs for the 1991 through 1995 crops of peanuts, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

PEANUT PRICE SUPPORT EXTENSION ACT

● Mr. FOWLER. Mr. President, I rise today to introduce, along with my colleague the distinguished senior Senator from Georgia, the Peanut Program Extension Act of 1990.

The peanut program has been one of the most successful and cost-effective measures of our farm policy. This bill will maintain the successful 1985 program with only technical changes. It will extend the current price support formula based on the cost of production. It has the support of the Georgia Peanut Producers Association, the Georgia Farm Bureau, the Georgia Peanut Commission, and the Southeastern Peanut Association.

Mr. President, Senator NUNN and I are extremely proud of the fact that our home State leads the Nation, and the world, in peanut production. Our farmers have done a good job. The peanut program has played its proper role, and supported itself at almost no cost to the taxpayers. The budget outlays for this program have actually declined since 1985. All we seek to do is to maintain this model partnership and continue our support for this important sector of our agricultural economy.●

By Mr. DASCHLE (for himself Mr. PRESSLER, and Mr. WIRTH):

S. 2474. A bill to authorize an exchange of lands in South Dakota and Colorado; to the Committee on Energy and Natural Resources.

EXCHANGE OF CERTAIN LANDS

● Mr. DASCHLE. Mr. President, I rise today to join with my distinguished colleagues, Senator LARRY PRESSLER and Senator TIM WIRTH, in introducing a land exchange between South Dakota and Colorado.

Nearly a year ago I traveled to the Black Hills of South Dakota to join Homestake Mining Co. officials as they announced plans to transfer some of the most scenic, environmentally valuable land in South Dakota out of private ownership and into the hands of the Forest Service and the American public.

Since that time we have worked Homestake as it has developed the details of its proposed land swap, built understanding and support for the plan in the environmental community and with the public in South Dakota and Colorado.

The legislation I introduce today represents the result of this work. It authorizes a land swap involving Forest Service and Homestake lands in South Dakota and Colorado and represents a tremendous net gain for the public domain.

The lands to be provided to the Forest Service by Homestake Mining Co. will be among the crown jewels of their holding in South Dakota's Black Hills. They include some 20 miles and 1,250 acres of breathtakingly beautiful land along Spearfish Canyon and 8,125 highly accessible acres near Piedmont, SD. These lands and others, roughly 12,000 acres in all, will be added to the Black Hills National Forest in exchange for 1,415 remote acres of Forest Service land in Colorado.

I look forward to continuing to work with Homestake, with the Forest Service, with the distinguished members of our delegations from Colorado and South Dakota and with the public as we finalize and move this legislation forward this year.

I now ask unanimous consent that letters from the Natural Resources Users' Coalition and the South Dakota Wildlife Federation be printed in the RECORD at the conclusion of this statement. As these letters indicate, the outstanding efforts of the Forest Service and Homestake have already won this land transfer proposal consensus support in my State.

This among the most generous transfer plans I have seen offered to the public by any private party anywhere in my region. Homestake Mining Co. deserves commendation for the stewardship it has exercised over these lands in the past and for its willingness to place them back into the public domain.

I hope my colleagues will see fit to offer speedy approval for our legislation to accomplish that goal and look forward to successfully completing the effort we began with our announcement in the Black Hills last year.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NATURAL RESOURCES USERS' COALITION,
Rapid City, SD, March 22, 1990.

RICH HARR,
Homestake Mining Co.,
Land Management Division, Lead, SD

DEAR MR. HARR: The NRUC is a coalition of 20 environmental and outdoor recreational oriented organizations with a total membership fluctuating between 3000 and 3500 persons. The NRUC Officers and Board of Directors unanimously and heartily endorse the proposed South Dakota-Colorado Land Exchange which would transfer approximately 14000 acres owned by Homestake Mining Co., located in the Black Hills of SD for approximately 1300 acres of U.S. Forest Service land in Summit County, Colorado. We see many advantages for increased public recreation and wildlife habitate en-

hancement by US Forest Service acquisition of the Homestake Mining Co. land in the Black Hills via the proposed exchange.

Sincerely,

GARY ENGEL,
President, NRUC.

SOUTH DAKOTA WILDLIFE FEDERATION,
March 7, 1990.

Mr. RICH HARR,
Homestake Mining Land Division,
Main Street, Lead, SD.

DEAR RICH: I would like to express my appreciation for the tour of the proposed land exchange areas conducted by the Homestake Land Management Division. As chairman of the Public Land Committee for the S.D. Wildlife Federation, I feel that the proposed exchange of Homestake Land in the Black Hills to the U.S. Forest Service for Forest Service Lands in Colorado, is a good proposal.

The presentation of the proposed exchange by yourself and Jim Wainwright, including the flight over the proposed areas and the tour by vehicle, helped clarify the value of these areas to the public. Several values are apparent and include valuable deer winter range and wildlife habitat, high quality trout fisheries, as well as aesthetic natural beauty, (Spearfish Canyon).

We feel this exchange would be beneficial from a national standpoint as well as for South Dakota, because of the numbers of people who come to the Black Hills from many other states to enjoy the recreational and scenic values.

We will encourage the U.S. House of Representatives and Senate to act favorably on this proposal.

Sincerely,

DON HAUSLE,
Chairman, Public Lands Committee.●

By Mr. LOTT (for himself and Mr. COCHRAN):

S. 2475. A bill to provide for the acquisition of the William Johnson House and its addition to the Natchez National Historical Park, and for other purposes; to the Committee on Energy and Natural Resources.

ACQUISITION OF WILLIAM JOHNSON HOUSE

● Mr. LOTT. Mr. President, I am introducing legislation today, along with the senior Senator from Mississippi, Senator COCHRAN, which will amend Public Law 100-479, the Natchez National Historical Park, to authorize the acquisition of one very important piece of property for inclusion in the park. We are joining in the efforts of our colleague from the Fourth Congressional District in our State, Congressman MIKE PARKER, who introduced this bill on April 4 of this year in the House of Representatives. This historic property is referred to as the William Johnson House, which according to some authorities, may be the finest unit of the National Park System to address post Civil War/freed black history.

William Johnson was born a slave and was freed in 1820 by his white owner. He learned the profession of barbering, a popular trade among southern freed blacks, and at a young age became the owner of his own barber shop. By the late 1840's, he had aquired substantial land holdings and established himself as a planter as well as an urban businessman. Johnson's business and high standards of conduct placed him in a high position in Natchez free black society. Johnson was tragically murdered in 1851, however, his 2,000-page diary of his personal and business life continues to serve as one of America's most important historical chronicles.

As an author of Public Law 100-479 which established the Natchez National Historical Park, I know it was our intent to demonstrate many historical themes with the creation of this park on the bluffs on the Mississippi River in Natchez, MI. African-American history is a historical theme specifically designated by the National Park Service to be addressed by the Natchez National Park. No other property in Natchez can better demonstrate this than the William Johnson House.

This historic property would be used as a visitor reception area and exhibit area where the black history of Natchez would be interpreted. The upper floors of the home would be restored to the year 1851 and would interpret the life of Natchez's unique diarist.

Mr. President, I would also like to point out that this legislation does not require any additional appropriation over the authorized amount in Public Law 100-479. The property will be acquired with local and State funds.

Mr. President, I am confident that my colleague will recognize the importance of this historic property and will support this effort to allow the William Johnson house to be included in the Natchez National Historical Park.●

● Mr. COCHRAN. Mr. President, today I am joining my distinguished State colleague, Mr. LOTT, in introducing legislation to authorize the National Park Service to acquire the William Johnson House in Natchez, MS, for inclusion in the Natchez National Historical Park. This bill is identical to legislation introduced by our colleague in the other body Mr. PARKER, on April 4, 1990.

The William Johnson House is uniquely suited to interpret black history in the South. Although the Natchez National Historical Park Act authorizes acquisition of properties illustrating black contributions in the antebellum South, no properties in the park were owned by blacks. The William Johnson House was.

The house was the residence and business of one of America's most notable southern freedmen. Born a slave and freed at a young age, William Johnson became a prosperous merchant and planter in Natchez. He left a 2000-page diary, one of the most valuable commentaries we have on life in the antebellum South.

The legislation we are introducing today will not obligate the National Park Service to purchase the William Johnson House. State and local governments, with help from the private sector, will acquire the property and donate it to the Park Service. The Mississippi Department of Archives and History has already begun raising funds for the purchase, and plans call for restoration of the house and use of the downstairs for a comprehensive exhibit interpreting black history.

The experiences of black Americans in the antebellum South is a growing area of interest. Acquisition of the William Johnson House will enlarge our understanding of these experiences.

I urge Senators to support the passage of this legislation.●

By Mr. LEAHY (for himself, Mr. HUMPHREY, and Mr. KOHL):

S. 2476. A bill to amend title 18 of the United States Code to clarify and expand legal prohibitions against computer abuse; to the Committee on the Judiciary.

COMPUTER ABUSE AMENDMENTS ACT

Mr. LEAHY. Mr. President, I am pleased to introduce the Computer Abuse Amendments Act of 1990 with my New England neighbor from New Hampshire. Senator GORDON HUMPHREY is an acknowledged Senate expert on computers, and I also thank Senator KOHL for joining us as an original cosponsor.

Technology is hurling us into the 21st century at speeds that leave lawmakers gasping. This bill catches up with some problems already out of hand, by strengthening laws against computer abuse, deterring malicious computer hacking, and aiding prosecution of computer crimes without criminalizing creative attempts at legitimate experimentation.

Americans are increasingly reliant on computers for research and communication in businesses, industries, education, and the govenrment.

A data base must be trustworthy to develop user confidence in the computer networks. But our demand for easy, swift access to information through fast-developing computer technology oftentimes trades off security for convenience.

Computer abuse can be a costly and damaging setback for all users when hackers enter programs and tamper with them.

The problem has no international boundary lines. Hackers from Australia were tracked down and arrested last month for fouling computer programs here at home.

Robert Morris, Jr., a brilliant but misguided graduate student, was convicted of violating the Computer Fraud and Abuse Act. Morris released a computer worm onto the INTERNET computer network.

Our committee has heard testimony of detective work that resulted in the conviction of computer spies who had successfuly broken into our defense computer network, trying to extract classified information—posing a real threat to national security. Dr. Clifford Stoll's testimony, incidentally, is a fascinating study of modern spy techniques and computer genius.

Our laws governing computer crimes are strong.

Director Sessions of the FBI testified last year that the Bureau uses a range of Federal statutes to investigate computer crimes, including the Computer Fraud and Abuse Act, title 18, United States Code, section 1030, et seq.; the Electronic Communications Privacy Act, title 18, United States Code, section 2510, et seq.; and the wire fraud statute, title 18, United States Code, section 1343.

The most recent crimes stress our need to strengthen our warning against computer vandalism of any kind.

The bill we introduce today amends the Computer Fraud and Abuse Act in these particulars.

Section 3(a) makes it a felony to transmit an unauthorized program or code that alters the informaton stored in that computer, if that damage exceeds $1,000, or involves medical records. Section 3(b) creates a penalty for the felony of up to 5 years in prison and/or a fine.

Section 3(a) also includes a parallel misdemeanor for recklessly transmitting a destructive computer program or code. The penalty in section 3(b) for the misdemeanor would be a fine and/or imprisonment for up to 1 year.

Section 3(c) defines the term "access" which is used throughout the Computer Fraud and Abuse Act. Section 3(d) creates a new, civil cause of action for compensatory or injunctive relief for victims.

The Technology and the Law Subcommittee will hold a hearing on this bill on April 27. I am particularly interested in receiving comments about the intent standard for the new misdemeanor, the new civil cause of action, and the definition of "access." I want to ensure that, in creating a private cause of action to boost deterrence, we do not open the floodgates to frivolous litigation. I also look forward to testimony from prosecutors and computer experts on the scope of the "access" definition, to be sure that it is technically sound and a useful tool for prosecuting computer crimes.

Mr. President, I want to thank Senator HUMPHREY and Senator KOHL once again for their hard work on this bill. I look forward to working with them at our upcoming hearing on the legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2476

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Computer Abuse Amendments Act of 1990".

SEC. 2 FINDINGS.

The Congress finds that—

(1) the maintenance of the security and integrity of computer systems has become increasingly critical to national security, interstate and foreign commerce, communications, education, science, and technology in the United States;

(2) the deliberate abuse of computers and computer systems to cause damage, disruption, and interference with the efficient functioniing of computer systems has created significant problems for both government and nongovernment computer systems, and such abuse creates real and potential problems for national security, commerce, business, science, and education, and imposes significant burdens on interstate and foreign commerce;

(3) in light of rapid developments in computer technology, it is necessary to revise and clarify existing Federal laws governing computer security and abuse to assure that novel forms of serious computer abuse are clearly prohibited; and

(4) it is the intent of this Act to exercise the full scope of the powers of Congess under the Commerce Clause of the United States Constitution to regulate forms of computer abuse which arise in connection with, and have a significant effect upon, interstate or foreign commerce.

SEC. 3. AMENDMENTS TO THE COMPUTER FRAUD AND ABUSE ACT.

(a) PROHIBITION.—Section 1030(a)(5) of title 18, United States Code, is amended to read as follows:

"(5)(A) through means of or in a manner affecting a computer used in interstate commerce of communications, knowingly causes the transmission of a program, information, code, or command to a computer or computer system if the person causing the transmission intends that such program, information, code or command will damage, disrupt, alter, destroy, or misappropriate the functioning, use, programs, systems, databases, or other information of or contained in the affected computer or computer system and the transmission of the harmful component of the program, information, code, or command—

"(i) occurred without the knowledge and authorization of the persons or entities who own or are responsible for the computer system receiving the program, information, code, or command; and

"(ii)(I) causes loss or damage to one or more other persons of a value aggregating $1,000 or more during any one-year period; or

"(II) modifies or impairs, or potentially modifies or impairs, the medical examination, medical diagnosis, medical treatment, or medical care of one or more individuals; or

"(B) through means of or in a manner affecting a computer used in interstate commerce or communications, knowingly causes the transmission of a program, information, code or command to a computer or computer system if the person caused the transmission with reckless disregard for whether the transmission will damage, disrupt, alter, destroy or misappropriate the functioning, use programs, systems, databases, or other information of or contained in the affected computer or computer system and the transmission of the harmful component of the program, information, code, or command—

"(i) occurred without the knowledge and authorization of the persons or entities who own or are responsible for the computer system receiving the program, information, code, or command; and

"(ii)(I) causes loss or damage to one or more other persons of a value aggregating $1,000 or more during any one-year period; or

"(II) modifies or impairs, or potentially modifies or impairs, the medical examination, medical diagnosis, medical treatment, or medical care of one or more individuals; or".

(b) PENALTY.—Section 1030(c) of title 18, United States Code, is amended—

(1) by striking "and" after the semicolon at the end of paragraph (2)(B);

(2) in paragraph (3)(A) by inserting "(A)" after "(a)(5)"; and

(3) in paragraph (30(B) by striking the period at the end thereof and inserting "; and"; and

(4) inserting at the end thereof the following:

"(4) a fine under this title or imprisonment for not more than 1 year, or both, in the case of an offense under subsection (a)(5)(B).".

(c) DEFINITION.—Section 1030(e) of title 18, United States Code, is amended—

(1) in paragraph (6), by striking "and" after the semicolon;

(2) in paragraph (7), by strking the period and inserting "; and";

(3) by adding after paragraph (7) the following new paragraph:

(8) the term 'access' means—

"(A) to gain access to the stored or displayed information or to the functions of a computer or computer system in such a way that such information can be seen or otherwise deciphered or such functions can be performed; or

"(B) to transmit, or cause the transmission of, a program, information, code, or command to a computer or computer system under circumstances where the person causing the transmission intends, or reasonably expects, that such program, information, or command will significantly damage, disrupt, alter, destroy, or misappropriate the functioning, use, programs, systems, databases, or other information of or contained in that computer or computer systems, whether or not the persons causing the transmission gains access in the manner described in subparagraph (A).".

(d) CIVIL ACTION.—Section 1030 of title 18, United States Code, is amended by adding at the end thereof the following new subsection:

"(g) Any person who suffers damage or loss by reason of a violation of this section may maintain a civil action against the violator to obtain compensatory damages and injunctive relief or other equitable relief.".

Mr. HUMPHREY. Mr. PRESIDENT, I am pleased to join with Senator LEAHY in introducing the Computer Abuse Amendments Act of 1990.

This legislation deals with an issue of great practical importance for Americans in all walks of life—the

computer systems which have become an indispenable tool for business, science, medicine, government, and countless other activities at home and in the workplace.

Our dependence on the efficient operation of computer systems and computer communications networks has increased geometrically over the past 10 years. We now take for granted the instantaneous communication, research cababilities, and countless other technological advances which the computer age has made possible. I might add that my concerns in this area are more than theoretical, since I use my Senate computer as an all-purpose tool for staying abreast of Senate business.

The national and international computer networks which allow the rapid exchange of information and ideas provide one of the great benefits of modern computer technology. But they also provide a window of vulnerability that can be exploited by those who seek to abuse and undermine our computer systems.

Over the past few years, incidents of serious computer abuse have increased markedly. The incidents range from the reckless experimentation of irresponsible computer "hackers" to the systematic efforts of foreign agents to gain unauthorized access to sensitive military data bases. Computer abusers have developed a complex arsenal of new techniques, including computer viruses and "worms," which result in the replication and retransmission of destructive programs to wreak havoc in computers throughout the country. It is only a matter of time before a computer virus or some other form of computer sabotage causes major damage to one of our financial institutions, medical information networks, or government information systems.

These incidents underscore the need for increased efforts to maintain the security and integrity of our interdependent computer systems and networks. Criminal computer abuse represents a significant threat to the Nation's commerce and security.

The broader solution to this problem lies in the development and implementation of more effective computer security systems and technology. But in the meantime, it is important that we update our computer crime laws to stay abreast of the rapid changes in computer abuse techniques.

The bill that Senator LEAHY and I introduce today is an important step in that direction.

Our bill amends the Computer Fraud and Abuse Act [CFAA] to eliminate potential gaps and ambiguities in that legislation. For example, the computer abuse crimes covered by the CFAA are all limited by the concept of "unauthorized access" to certain categories of computers. But experience has taught us that some of the most far-reaching forms of computer sabotage can be activated without gaining unauthorized access to the affected computer systems. For example, a destructive computer virus can be transmitted to a remote computer system even though the originator of the virus never gained personal "access" to that system. Our bill closes this potentially serious loophole in existing law.

The Computer Abuse Amendments Act also clarifies and expands the protection of computers provided by existing law. Whereas the CFAA's coverage was limited to "Federal interest computers" as defined in that act, our bill makes it clear that any computer used in interstate commerce or communications is protected against criminal computer abuse. The bill also provides necessary clarification of the kinds of computer harm which are covered by the CFAA. It also proposes a civil action enabling persons to obtain compensatory damages for losses caused by computer abuse crimes.

This bill was drafted after extensive study and consultation with knowledgeable persons in various sectors of the computer and software industries. I am especially pleased to stress that it represents a genuinely bipartisan approach to this important issue. Senator LEAHY's staff and my staff on the Technology and the Law Subcommittee have worked closely together in developing the bill's language.

The Computer Abuse Amendments Act represents a significant step in our efforts to contain the growing problem of criminal computer abuse. I urge my colleagues to support prompt enactment of this important bipartisan bill.

By Mr. PELL:

S. 2477. A bill to establish an Office of Recycling Research and Information in the Department of Commerce, to require research on the recycling of scrap automobile tires, and for other purposes; to the Committee on Environment and Public Works.

TIRE RECYCLING PROMOTION ACT

Mr. PELL. Mr. President, today I am introducing legislation to encourage the recycling of automobile tires as a viable substitute for tire incineration. Most important, the bill directs the Federal Government to provide States, cities, and towns the information necessary to close down tire incineration plants within their borders or adjacent borders. This legislation would also break new ground in creating markets for all recycled material by establishing an Office of Recycling Research and Information within the Department of Commerce.

Piles of used tires continue to grow, while plans for their incineration continue to move forward in many places, including areas in and around my home State of Rhode Island. I believe this legislation offers a good start to solving one of the worst plagues of our disposable society—used tires.

Although the focus of this legislation is the eventual elimination of tire incineration, there is another purpose served by this bill in the creation of an Office of Recycling Research and Information within the Department of Commerce. The Office of Recycling Research will act as clearinghouse for practical, market-oriented, research on recycling.

This legislation is a companion measure to a bill recently introduced in the House of Representatives by Congressman GEORGE HOCHBRUECKNER of New York. I want to thank Congressman HOCHBRUECKNER for the opportunity to bring this innovative legislation before the Senate. His leadership on recycling and other important environmental issues makes him a credit to the Congress and the people of Long Island.

The changes I have made to the Senate version of this bill reflect the unique problems of my home State of Rhode Island. It has been estimated that Rhode Island produces a million used tires a year. I have also been told that Rhode Island has the dubious honor of having the second largest used tire pile in America. However, the most alarming reality of the used tire glut for Rhode Island is the construction of a large tire incineration plant just over the western border of our State.

That is why I have included language in the bill to compel the Department of Commerce to use no less than one half of recycling research dollars for tire recycling research. I have also included language to steer research dollars to providing information of States, cities, and towns that want to shut down tire incineration facilities.

By Mr. BRADLEY:

S. 2478. A bill to provide for the extension of a Medicaid respite demonstration project; to the Committee on Finance.

MEDICAID RESPITE DEMONSTRATION PROJECT

● Mr. BRADLEY. Mr. President, I rise to introduce a bill to extend the New Jersey Medicaid Respite Care Demonstration Project for another 2 years.

The Senate Aging Committee recently held a hearing on the Medicaid Respite Care Demonstration Project at my request.

Mr. President, the demonstration project was originally intended for a full 4 years beginning in 1986. Delays in implementation has meant that it will only have provided services for 2 years before the expiration of the funding. A full-scale evaluation of the project is in progress through the State University of New Jersey at Rutgers. The program deserves a full 4 years of operation before meaningful conclusions can be drawn. It is my

hope that the program will serve as a blueprint for a national network of caregiver support under the Medicare Program. This bill, therefore, provides an extension for the respite care demonstration project for an additional 2 years.

Mr. President, the stories that I heard from both caregivers and providers of respite services moved me deeply. I am more convinced than ever of the need for supporting the enormous network of loving family caregivers who provide the overwhelming majority of care for disabled Americans in the home and the community. The New Jersey respite care project serves nearly 2,000 families a year. These are families who opt to keep their disabled members at home despite extensive sacrifices. One woman with three children spoke of her resolve to keep her mother with Alzheimer's disease at home with the family. Respite care allows her family to spend two Saturdays a month together in activities that are not disrupted by the constant demands of attending to her mother. Attending her son's baseball game or a family outing are activities that the Wagenblast's cannot take for granted. Respite care brings a semblance of normalcy to their lives and allows them to continue to love and care for their elder member in the way that feels right to them.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2478

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. MEDICAID RESPITE DEMONSTRATION PROJECT EXTENDED.

Section 9414 of the Omnibus Budget Reconciliation Act of 1986 is amended—

(1) by amending subsection (e) to read as follows:

"(e) DURATION.—The project under this section may continue until September 30, 1992."; and

(2) in subsection (d), by striking the last sentence and inserting in lieu thereof the following new sentence: "For the period beginning October 1, 1990, and ending September 30, 1992, Federal payments for the project shall not exceed amounts not expended under the project in the preceding fiscal year.".●

By Mr. SIMON:

S.J. Res. 289. Joint resolution to designate October 1990 as "Polish-American Heritage Month"; to the Committee on the Judiciary.

POLISH-AMERICAN HERITAGE MONTH

● Mr. SIMON. Mr. President, today I am introducing a joint resolution to designate October 1990 as Polish-American Heritage Month. Although I have been the sponsor of this measure since I joined this body, this year is particularly important.

About 1 year ago Solidarity's Lech Walesa and General Jaruzelski were putting the final touches on the Round Table Agreement resulting in an interim government. Now Lech Walesa is considering running for President, Tadeusz Mazowiecki is the Prime Minister of a multiparty, democratic Poland and the economy is being converted to a free market system.

Poland led the way in Eastern Europe in the transition from Communist dictatorship to multiparty democracy. Not long after Tadeusz Mazowiecki was sworn in as Prime Minister last August, the people of Hungary, East Germany, Czechoslovakia, Bulgaria, and Romania followed Solidarity's lead in pressing for free elections and free markets.

In light of Poland's historic role in the revolutions of 1989, this year's Polish-American Heritage Month will surely be a time of reflection and pride. Poland and America have always had historically close ties. Poles were among the first settlers to arrive in Jamestown, VA, in the 17th century. Poland's Constitution of May 3, 1791, was modeled directly on the Constitution of the United States.

Now, with the end of Communist domination, these ties are being renewed. In the 1989 SEED Act the United States pledged about $850 million over 3 years for developing Poland's new free market infrastructure, democratic institutions and environment. The recent visit of Prime Minister Mazowiecki highlighted the importance of our aid package as the Polish economy makes the difficult transition to a free market economy. Clearly, there is more we can and should do this year to cement Poland's newfound freedoms firmly in place.

Polish-American Heritage Month will enable us to put the dramatic changes of the last year in some kind of historical perspective. As the Polish people set up new political and economic institutions, we hope to be able to share in their difficulties and rewards.

Mr. President, I ask unanimous consent that the resolution marking Polish-American Heritage Month be printed in the RECORD in full.

There being no objection, the joint resolution ordered to be printed in the RECORD, as follows:

S.J. RES. 289

Whereas the first Polish immigrants to North America were among the first settlers of Jamestown, Virginia, in the 17th century;

Whereas Kazimierz Pulaski, Tadeusz Kosciuszko, and other Poles came to the British colonies in America to fight in the Revolutionary War and to risk their lives and fortunes for the creation of the United States;

Whereas Poles and Americans of Polish descent have distinguished themselves by contributing to the development of arts, sciences, government, military service, athletics, and education in the United States;

Whereas the Polish Constitution of May 3, 1791, was modeled directly on the Constitution of the United States, is recognized as the second written constitution in history, and is revered by Poles and Americans of Polish descent;

Whereas Poles and Americans of Polish descent take great pride and honor the greatest son of Poland, His Holiness Pope John Paul the Second;

Whereas Poles and Americans of Polish descent and people everywhere applauded the efforts of Solidarity's leader Lech Walesa and the Polish Government in holding a round table conference in February-April 1989, which led to a peaceful transition to a multiparty democracy;

Whereas Americans of Polish descent and Americans take great pride in the election of Tadeusz Mazowiecki as Prime Minister of Poland;

Whereas Americans of Polish descent and Americans support the struggle of the Polish people to move toward a free-market economy;

Whereas the Polish-American Congress is observing its 46th anniversary this year and is celebrating October 1990 as Polish-American Heritage Month: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 1990 is designated "Polish-American Heritage Month", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such a month with appropriate ceremonies and activities.●

By Mr. ARMSTRONG (for himself and Mr. GLENN):

S.J. Res. 290. Joint resolution to designate the week of July 22, 1990, through July 28, 1990, as the "National Week of Recognition and Remembrance for Those Who Served in the Korean War"; to the Committee on the Judiciary.

NATIONAL WEEK OF RECOGNITION AND REMEMBRANCE FOR THOSE WHO SERVED IN THE KOREAN WAR

● Mr. ARMSTRONG. Mr. President, June 25 of this year marked the 40th anniversary of the date on which the military forces of North Korea, organized, trained, and equipped by the Soviet Union, crossed the 38th Parallel and invaded the Republic of South Korea. Three days later, President Harry Truman ordered the Armed Forces of the United States to defend that beleaguered nation, and by the Fourth of July, U.S. Army forces, supported by the Navy and Air Force units, were engaged in combat with the North Korean invaders.

Encouraged by the prompt action of the United States, the United Nations condemned the North's act of aggression; and it created a United Nations Command to repel the invasion, to restore the territory of the Republic of Korea, and to protect the people of the Republic of Korea from Communist domination imposed by their neighbor from the north. In addition to the United States and South Korea, 20 other nations provided military

contingents, which served under the United Nations banner.

The fighting raged for more than 3 years as the United Nations fighting forces drove the North Koreans from the Republic of Korea and then stemmed the tide of Chinese Communist Army attacks. Active hostilities ended with an armistice signed on July 27, 1953. The provisions of the armistice agreement still constitute, among other things, a de facto boundary between the two Koreas—a boundary which is still defended, in part by United States troops serving under the United Nations command.

More than 5.7 million American servicemen and women were involved—directly or indirectly—in the Korean war. American casualties were heavy: more than 54,000 were killed, over 100,000 were wounded, and more than 8,000 are missing or unaccounted for.

At a ceremony on July 27, 1988, to celebrate the 35th anniversary of the signing of the armistice, Secretary of Defense Frank Carlucci said about them:

For America, the human legacy of the Korean War is the sterling performance of her uniformed sons and daughters who, uncomplaining, took up arms to defend a nation they never knew and a people they never met.

In a land so remote from America and America's consciousness, heroes came to the fore and the inner strength of our troops showed through. They fought brilliantly and tirelessly and enabled our Nation to achieve its aim, and to prove to ourselves and the World that America comes to the aid of its friends, defends its principles, and never retreats from freedom's fight.

Fought in a remote place and in the shadow of World War II, the Korean war became a victory forgotten by history, but it is remembered forever by those who fought freedom's battle, and those at home who suffered the loss of loved ones. Today, the importance of what they did 40 years ago is beginning to emerge through the mists of time. Forty million people in the Republic of Korea enjoy peace and freedom, still protected by the Armed Forces of the United States and South Korea as part of the United Nations Command. Perhaps, what we did as a nation in South Korea was one of the earliest signs of the end of Communist aggression and domination. It was a ripple that grew into waves of democracy which swept the world during 1989 and into the new decade.

Today, as a nation, we are beginning to accord those who served in our Armed Forces in those trying times the recognition that has been long overdue. In October 1986, Congress passed legislation to authorize the establishment of the Korean War Veterans Memorial in the Nation's Capital, to be sited on The Mall near the Lincoln Memorial, directly across the Reflecting Pool from the Vietnam Veterans Memorial. A magnificent design has been selected, and fundraising continues for its completion.

The joint resolution I offer today is an extension of the Nation's recognition and appreciation of those who carried the promise of freedom to that distant land so many years ago. This bill, and its companion in the House of Representatives, sets aside the week of July 22-29, 1990—the week that includes the anniversary date of the signing of the armistice which ended active combat in Korea—as a special week of recognition and remembrance for those who served in our Armed Forces in the Korean war. It also calls on the President to issue a proclamation calling for the national flag to be flown at half staff on all public buildings on July 27 in memory of those who died or who are missing as a result of the Korean war. The Presidential proclamation would also recommend the conduct of special activities and ceremonies in cities, towns, and States across the country in recognition and remembrance of those who served.

We in the Senate have led the way in the passage of similar resolutions in the past 2 years, and I urge your favorable consideration of this much deserved recognition for those who served in war so that others might enjoy the fruits of liberty and peace.●

By Mr. HATCH:

S.J. Res. 291. Joint resolution designating the week of October 14, 1990, as "National Standards Week"; to the Committee on the Judiciary.

NATIONAL STANDARD WEEK

Mr. HATCH. Mr. President, I rise today to introduce a joint resolution designating the week of October 14, 1990, as "National Standards Week." This week was chosen to coincide with "World Standards Day," which will be celebrated on October 14, 1990.

Mr. President, as you know, the United States is currently facing a large trade deficit. In response to this deficit, we have spent millions of dollars promoting U.S. products overseas and engaged in extensive negotiations with our major trading partners to try to open foreign markets to American products. However, I believe that we have overlooked one of the simplest and least expensive methods of making our products more competitive. I am talking about efforts to promote harmonized product standards.

Some of my colleagues may not be aware of the importance of product standards. Standards are the specifications, measurements, and other requirements that govern the manufacture and sale of products within a country. U.S. exports must meet the applicable foreign standards if they are to be eligible to be sold in a particular country. For this reason, any efforts we can make to help our trading partners write standards that include rather than exclude American products will go a long way toward opening those markets to our goods.

Last year, I helped guide through the Senate a bill which provides money for a standards writing specialist to be sent to Saudi Arabia to help the Saudis write product standards. During this project, I became acutely aware of the importance of standards and standards writing to our national interest. The project is jointly funded by the Department of Commerce and a group of private sector companies, and the standards expert is credentialed by the Government.

The benefits of the single small project are significant. For an investment of $250,000 in Government funds, it is estimated that exports to the six Persian Gulf nations which have adopted Saudi standards will increase by as much as $500 million. That means 15,000 new jobs and $15 million in tax revenues for the United States.

Mr. President, our foreign competitors are well aware of the importance of standards to international trade. Last year, while we were debating whether or not we would spend $250,000 for a standards expert in Saudi Arabia, the Japanese and Germans dispatched large teams to represent their countries in Saudi Arabia.

This situation points up the pressing need we have to raise the awareness of all Americans to the importance of product standards to our international competitiveness. I believe that a National Standards Week will help to focus national attention on this important issue, and I invite my colleagues to join me in sponsoring this joint resolution.

By Mr. RIEGLE (for himself, Mr. LEVIN, Mr. GORE, Mr. BURDICK, Mr. DECONCINI, Mr. GLENN, Mr. LAUTENBERG, Mr. METZENBAUM, Mr. CRANSTON, Mr. BENTSEN, Mr. KERRY, Mr. ROCKEFELLER, Mr. DIXON, Mr. BOREN, Mr. ADAMS, Mr. HOLLINGS, Mr. GRAHAM, Mr. LIEBERMAN, Mr. D'AMATO, Mr. CHAFEE, Mr. WILSON, Mr. DOMENICI, Mr. MCCLURE, Mr. BOSCHWITZ, Mr. HATCH, Mr. MURKOWSKI, Mr. DURENBERGER, Mr. THURMOND, Mr. JEFFORDS, and Mr. COATS):

S.J. Res. 293. Joint resolution to designate November 16, 1990, as "National Philanthropy Day"; to the Committee on the Judiciary.

NATIONAL PHILANTHROPY DAY

● Mr. RIEGLE. Mr. President, today, I am pleased to be joined by 29 of my colleagues in introducing a resolution to designate November 16, 1990, as "Philanthropy Day." A similar resolu-

tion was approved last year with widespread support.

Philanthropy is deeply rooted in the American tradition. Literacy volunteers in our small towns and inner cities are the direct descendants of the men and women who built the one room schoolhouses in the vast frontier of 19th century America. From the charity of Ben Franklin, who raised money to build the first hospital in the United States, to the millions of people who donate to help make the United States the world leader in health research, philanthropic efforts have made an important mark on our Nation.

The Washington Monument can be seen as a strong symbol of the American spirit of giving. At George Washington's request, the Federal Government did not originally provide funding for the Washington Monument. People from all over the country and around the world got together to donate money and bricks to help construct it. To recognize that generosity, the names of individuals or groups who donated were inscribed on the monument stones.

National Philanthropy Day provides us with the opportunity to commend those who give of themselves. On past Philanthropy Days, thousands of people from all parts of the country have gotten together to mark the contributions of the citizens who have made a difference in their community. Today, I will mention two people who have strengthened our Nation by giving of themselves.

Dave Bing, a Piston great who was recently elected to the Basketball Hall of Fame, is now a successful businessman in Detroit. He is also a philanthropist who, with the help of a number of NBA players, raised $600,000 to enable the Detroit public schools to maintain a fall varsity sports season.

Not as well known, but also representative of the generous spirit of philanthropy is a woman from Grand Rapids named Maggie Fegal. Drawing on almost 50 years of experience serving her community, Ms. Fegal is more involved and energetic than ever. By organizing the Toughlove Program, an important support group; by serving in the Senior Senate; by helping to organize the community Meals on Wheels Program; and by bringing optimism and hard work to the variety of additional voluntary activities she is involved in, Maggie Fegal has made a real difference.

The spirit of philanthropy is stronger than ever. In no other time have so many citizens given so much time and money to create a better tomorrow. Although those who give of themselves do not ask for credit, we ought to recognize their generous spirit. I urge my colleagues who are not cosponsors to join and help make November 16, 1990, National Philanthropy Day.

Mr. President, I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 293

Whereas there are more than 800,000 nonprofit philanthropic organizations in the United States;

Whereas such organizations employ more than 10,000,000 persons, including approximately 4,500,000 volunteers;

Whereas the people of the United States contributed approximately $104,000,000,000 in 1988 to support such organizations;

Whereas philanthropic organizations are responsible for enhancing the quality of life of people throughout this Nation and the world;

Whereas the people of this Nation owe a great debt to the schools, churches, museums, art and music centers, youth groups, hospitals, research institutions, community service institutions, and organizations that aid and comfort the disadvantaged, sick, and elderly; and

Whereas the people of the United States should demonstrate gratitude and support for philanthropic organizations and for the efforts, skills, and resources of the people who carry out the missions of such organizations: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 16, 1990, is designated as "National Philanthropy Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day with appropriate ceremonies and activities.●

By Mr. PELL (for himself, Mr. KENNEDY, Mrs. KASSEBAUM, Mr. METZENBAUM, Mr. COCHRAN, Mr. HATCH, Mr. DODD, Mr. JEFFORDS, Mr. SIMON, Mr. THURMOND, Ms. MIKULSKI, Mr. COATS, Mr. ADAMS, and Mr. DURENBERGER):

S.J. Res. 294. Joint resolution to designate May 4, 1990, as Department of Education Day; to the Committee on the Judiciary.

DEPARTMENT OF EDUCATION DAY

● Mr. PELL. Mr. President, this year marks the 10th anniversary of the creation of the U.S. Department of Education. As an original cosponsor of the legislation to create a Cabinet-level Department of Education, I am therefore proud to introduce a joint resolution to celebrate this 10th anniversary, and to urge my colleagues to join me in supporting it.

It is often said that education is primarily a State and local matter, and so it is. Over 90 percent of all funds spent on education in the United States are from State and local sources. This does not, however, reflect the small but critical role that Federal aid plays in the enhancement of education in our Nation.

Federal student aid—from Pell grants, to Stafford loans, to college work study, to Perkins loans, to supplemental grants, to graduate assistance programs—accounts for three-fourths of all aid available to students seeking a postsecondary education. Without the Federal presence, postsecondary educational opportunity and access would be very severely diminished.

Federal compensatory education assistance for the poor, as reflected in our proven and popular chapter 1 program, accounts for more than two-thirds of all the money that is spent in this area.

The Federal role in vocational education began in 1917, and it remains a vital and critical role today. While State and local spending may now outstrip the Federal contribution in dollars, the Federal policy remains critically important.

The same is true in a variety of other educational endeavors, be it impact aid, the TRIO Programs, adult education, libraries, or special education.

Most important, representation in the Cabinet means that the concerns of education are heard at the highest level of our Government. No longer does education take a back seat. It is at the table from the outset. That is how it should be.

For many years I have contended that the real strength and health of America cannot be measured by our weapons of destruction, our machinery of construction, or the amount of gold in Fort Knox. To my mind, the real strength and health of our Nation is found in the sum total of the education and character of our people.

Be it our industrial machinery, our scientific capabilities and accomplishments, our ability to build and maintain a strong defense, or our cultural advancements, all depend in large measure on the education of our people.

I may not always agree with the actions and decisions of officials in the Department of Education, but that by no means lessens my enthusiasm for the Department itself. If it has problems, then we must seek to solve them. If it has failings, then we must seek to overcome them. But the important fact is that it is there in the center of things, at the heart of the debate in the highest circles of our Government, which is precisely where the discussion of education should be.

Mr. President, I salute the Department of Education on this, its 10th birthday. I applaud it for a job well done during its first decade. But most important, I challenge those in the Department to build on what has been accomplished. It is without question that education should be one of our Nation's top priorities, and that those who labor on behalf of education, be they in the Department or the class-

room, should strive to achieve the education of excellence so very critical to our Nation's well-being. The Department has a very important role to play in our Government, but it is a role that depends, as does all of education, upon the people who staff it. Thus, on this 10th anniversary, I salute the Department, but I pay special tribute to the people who give it life and meaning.

I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 294

Whereas education is a vital national concern and a State and local responsibility fundamental to the progress and security of our Nation;

Whereas a continuing need exists to ensure that all Americans have equal access to educational opportunities that enable all Americans to achieve their fullest potential;

Whereas, on May 4, 1980, the United States Department of Education was created as a Cabinet-level agency to ensure that education issues receive proper attention at the Federal level and to coordinate the education activities of the Federal Government effectively;

Whereas the Department of Education administers important Federal programs to assist elementary, secondary, and postsecondary education; collects data and oversees research and assessment on America's schools and disseminates such information to educators and to the general public; identifies and focuses attention on the main issues and problems in education; enforces Federal statutes that prohibit discrimination in programs and activities receiving Federal funds; and ensures equal access and educational opportunity for all individuals; and

Whereas officials and employees of the Department of Education through dedication, diligence, loyalty, and integrity reflect the highest quality of public service and deserve recognition as the Department of Education celebrates its tenth anniversary: Now, therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That May 4, 1990, is designated as "Department of Education Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.●

● Mrs. KASSEBAUM. Mr. President, I am pleased to join with other members of the Committee on Labor and Human Resources in cosponsoring this resolution commemorating the 10th anniversary of the formation of the Department of Education. I am happy to be the ranking Republican member on the Education Subcommittee as we highlight this anniversary.

As we mark this milestone in the Department's history, we are fortunate to have a President who has made education a priority in his administration. As the "Education President," President Bush called together the Nation's Governors in September for a landmark summit on education. This 2-day meeting was only the third meeting of its kind in the history of our country.

At the summit, the President and Governors put forth the idea of national goals, and a list of six national education goals was recently adopted by the National Governors Association. I hope these national education goals will spur local schools to define their own educational goals and establish specific measureable outcomes to assess progress in areas of particular importance to their schools and communities. While our vision for education may be national in scope, its delivery rests squarely in the hands of local officials.

So as we celebrate this 10th anniversary, I hope that educators across the country will observe this event and recognize the work of the caring, committed individuals at the Department—both in Washington and across the country in the regional offices. I hope that local educators will also take time to reflect upon the achievements they have made and the goals to which they aspire.●

Mr. HATCH. Mr. President. This year marks the 10th anniversary of the creation of the Department of Education. In the last 10 years we have seen the public understanding of the importance of education grow dramatically. Former Secretary Terrel Bell, a fellow Utahn, instigated this self-examination with the famous document "A Nation at Risk," which forced all of us to take another look at our educational system and the needs of our people for better training and education. Since then, all 50 States have responded by enacting their own reforms and trying out new ideas.

President Bush and Secretary Cavazos have worked closely with the States to set new national goals for achieving educational excellence. We are entering a new era in education, a time when the Federal Government needs to work with local and State government leaders to encourage innovation. The Federal Government must provide more flexibility in Federal rules and regulations, while maintaining accountability, so that the unique needs of every local school district can be met. I commend the President and Secretary Cavazos for their willingness to do this. The efficacy of this policy will be proven in the next 10 years when students in the United States are the best educated in the world.

ADDITIONAL COSPONSORS

S. 16

At the request of Mr. CRANSTON, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 16, a bill to require the executive branch to gather and disseminate information regarding, and to promote techniques to eliminate, discriminatory wage-setting practices and discriminatory wage disparities which are based on sex, race, or national origin.

S. 720

At the request of Mr. BOREN, the name of the Senator from North Carolina [Mr. HELMS] was added as a cosponsor of S. 720, a bill to amend the Internal Revenue Code of 1986 to extend and modify the targeted jobs credit, and for other purposes.

S. 814

At the request of Mr. DOMENICI, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 814, a bill to provide for the minting and circulation of $1 coins, and for other purposes.

S. 874

At the request of Mr. FORD, the name of the Senator from New Jersey [Mr. BRADLEY] was added as a cosponsor of S. 874, a bill to establish national voter registration procedures for Presidential and Congressional elections, and for other purposes.

S. 980

At the request of Mr. MITCHELL, the name of the Senator from Colorado [Mr. WIRTH] was added as a cosponsor of S. 980, a bill to amend the Internal Revenue Code of 1986 to improve the effectiveness of the low-income housing credit.

S. 1006

At the request of Mr. LEAHY, the name of the Senator from Mississippi [Mr. LOTT] was added as a cosponsor of S. 1006, a bill to encourage innovation and productivity, stimulate trade, and promote the competitiveness and technological leadership of the United States.

S. 1214

At the request of Mr. DECONCINI, the name of the Senator from Maryland [Ms. MIKULSKI] was added as a cosponsor of S. 1214, a bill to provide that ZIP code boundaries may be redrawn so that that they do not cross the boundaries of any unit of general local government.

S. 1216

At the request of Mr. SIMON, the names of the Senator from Maryland [Mr. SARBANES], the Senator from Rhode Island [Mr. PELL], and the Senator from New York [Mr. D'AMATO] were added as cosponsors of S. 1216, a bill to amend the National Labor Relations Act to give employers and performers in the live performing arts, rights given by section 8(e) of such act to employers and employees in similarly situated industries, to give to such employers and performers the same rights given by section 8(f) of such act to employers and employees in the construction industry, and for other purposes.

S. 1273

At the request of Mr. BOREN, the names of the Senator from North Carolina [Mr. SANFORD] and the Senator from Nebraska [Mr. EXON] were added as cosponsors of S. 1273, a bill to amend the Internal Revenue Code of 1986 with respect to treatment by cooperatives of gains or losses from sale of certain assets.

S. 1308

At the request of Mr. BRADLEY, the name of the Senator from Maryland [Ms. MIKULSKI] was added as a cosponsor of S. 1308, a bill to amend title 39 of the United States Code to grant local governments the discretion to assign mailing addresses to sites within their jurisdiction.

S. 1349

At the request of Mr. PRYOR, the names of the Senator from Mississippi [Mr. COCHRAN], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Georgia [Mr. FOWLER], and the Senator from Idaho [Mr. MCCLURE], were added as cosponsors of S. 1349, a bill to amend the Internal Revenue Code of 1986 to exclude small transactions and to make certain clarifications relating to broker reporting requirements.

S. 1384

At the request of Mr. DASCHLE, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of S. 1384, a bill to amend title XVIII of the Social Security Act to provide direct reimbursement under part B of Medicare for nurse practitioner or clinical nurse specialist services that are provided in rural areas.

S. 1452

At the request of Mr. MCCAIN, the name of the Senator from Wisconsin [Mr. KASTEN] was added as a cosponsor of S. 1452, a bill to amend the Communications Act of 1934 to require that communications services be more universally available and for other purposes.

S. 1511

At the request of Mr. PRYOR, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 1511, a bill to amend the Age Discrimination in Employment Act of 1967 to clarify the protections given to older individuals in regard to employee benefit plans, and for other purposes.

S. 1557

At the request of Mr. ROTH, the name of the Senator from Arizona [Mr. MCCAIN] was added as a cosponsor of S. 1557, a bill to amend title 17, United States Code, to permit the unlicensed viewing of videos under certain conditions.

S. 1664

At the request of Mr. HEINZ, the namesof the Senator from New York [Mr. D'AMATO] and the Senator from Illinois [Mr. SIMON], were added as cosponsors of S. 1664, a bill to establish a congressional commemorative medal for members of the Armed Forces who were present during the attack on Pearl Harbor on December 7, 1941.

S. 1690

At the request of Mr. DODD, the names of the Senator from North Carolina [Mr. SANFORD] and the Senator from Alabama [Mr. SHELBY] were added as cosponsors of S. 1690, a bill to establish programs to improve foreign language instruction, and for other purposes.

S. 1791

At the request of Mr. SASSER, his name was added as a cosponsor of S. 1791, a bill to amend the International Travel Act of 1961 to assist in the growth of international travel and tourism into the United States, and for other purposes.

At the request of Mr. ROCKEFELLER, the name of the Senator from Wyoming [Mr. SIMPSON] was added as a cosponsor of S. 1791, supra.

S. 1878

At the request of Mr. GRAHAM, the names of the Senator from Tennessee [Mr. SASSER] and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of S. 1878, a bill to amend title XIX of the Social Security Act to allow for State matching payments through voluntary contributions and State taxes.

S. 1890

At the request of Mr. THURMOND, the names of the Senator from Kentucky [Mr. FORD] and the Senator from Missouri [Mr. DANFORTH] were added as cosponsors of S. 1890, a bill to amend title 5, United States Code, to provide relief from certain inequities remaining in the crediting of National Guard technician service in connection with civil service retirement, and for other purposes.

S. 1893

At the request of Mr. LAUTENBERG, the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of S. 1893, a bill to reauthorize the Asbestos School Hazard Abatement Act of 1984.

S. 1903

At the request of Mr. HATCH, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of S. 1903. a bill to amend the Public Health Service Act to establish Federal standards to ensure quality assurance in private sector drug testing programs, and for other purposes.

S. 1942

At the request of Mr. ROCKEFELLER, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 1942, a bill to provide for home and community care as optional State-wide service, and for other purposes.

S. 1977

At the request of Mr. DASCHLE, the name of the Senator from Georgia [Mr. FOWLER] was added as a cosponsor of S. 1977, a bill to amend the U.S. Grain Standards Act to improve the competitive position of U.S. grain in international and domestic markets, to facilitate the communication of quality characteristics that final buyers of grain desire, to provide certain incentives to producers of high quality grain, and to improve the quality of farm-owned and federally owned reserve grain stocks, and for other purposes.

S. 1981

At the request of Mr. HOLLINGS, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 1981, a bill to permit the Bell Telephone companies to conduct research on, design, and manufacture telecommunications equipment and for other purposes.

S. 2025

At the request of Mr. HEINZ, the names of the Senator from Arizona [Mr. MCCAIN] and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of S. 2025. a bill to amend the Internal Revenue Code of 1986 to make permanent certain expiring tax provisions.

S. 2039

At the request of Mr. COCHRAN, the names of the Senator from South Dakota [Mr. DASCHLE], the Senator from Virginia [Mr. ROBB], the Senator from Missouri [Mr. DANFORTH], and the Senator from Indiana [Mr. COATS] were added as cosponsors of S. 2039, a bill to improve the quality of student writing and learning, and the teaching of writing as a learning process in the Nation's classrooms.

S. 2048

At the request of Mr. SARBANES, the names of the Senator from Iowa [Mr. HARKIN], the Senator from Rhode Island [Mr. PELL], the Senator from Delaware [Mr. BIDEN], and the Senator from North Carolina [Mr. SANFORD] were added as cosponsors of S. 2048, a bill to provide for cost-of-living adjustments in 1991 under certain Government retirement programs.

S. 2077

At the request of Mr. GRASSLEY, the names of the Senator from Arizona [Mr. DECONCINI] and the Senator from Ohio [Mr. METZENBAUM] were added as cosponsors of S. 2077, a bill to amend the Federal Aviation Act of 1958 to limit the age restrictions imposed upon aircraft pilots.

S. 2079

At the request of Mr. KERRY, his name was added as a cosponsor of S. 2079, a bill to amend the Immigration and Nationality Act to provide for temporary protected status for Lebanese nationals.

S. 2119

At the request of Mr. KASTEN, the names of the Senator from Oregon [Mr. PACKWOOD] and the Senator from Arizona [Mr. DECONCINI] were added as cosponsors of S. 2119, a bill to amend the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990, to increase the total amount of commitments which may be made to finance projects for housing and infrastructure in Israel for Soviet refugees, and for other purposes.

S. 2146

At the request of Mr. ARMSTRONG, the names of the Senator from Alaska [Mr. STEVENS], the Senator from North Carolina [Mr. HELMS], and the Senator from Wyoming [Mr. SIMPSON] were added as cosponsors of S. 2400, a bill to amend section 7430 of the Internal Revenue Code of 1986 with respect to eligibility of taxpayers to receive attorney fees and other costs.

S. 2408

At the request of Mr. GLENN, the names of the Senator from Hawaii [Mr. INOUYE] and the Senator from New York [Mr. D'AMATO] were added as cosponsors of S. 2408, a bill to establish a system for labeling of plastic resin products, and to promote recycling of plastics and use of degradable plastics.

S. 2422

At the request of Mr. BOND, the name of the Senator from California [Mr. WILSON] was added as a cosponsor of S. 2422, a bill to establish a research program for the development and implementation of new technologies in food safety, and for other purposes.

S. 2425

At the request of Mr. KERRY, the names of the Senator from Illinois [Mr. SIMON] and the Senator from Washington [Mr. ADAMS] were added as cosponsors of S. 2425, a bill to amend the Federal Election Campaign Act of 1971 to provide for a voluntary system of spending and public financing of Senate general election campaigns, to limit contributions by multicandidate political committees, and for other purposes.

S. 2434

At the request of Mr. D'AMATO, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of S. 2434, a bill to permit the implementation of the Department of Transportation antidrug program rule for recipients of Federal mass transit assistance.

S. 2443

At the request of Mr. ARMSTRONG, the names of the Senator from Alaska [Mr. STEVENS] and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of S. 2443, a bill to amend the Internal Revenue Code of 1986 to provide that the rate of interest on overpayments and underpayments of tax be the same.

SENATE JOINT RESOLUTION 195

At the request of Mr. D'AMATO, the names of the Senator from Massachusetts [Mr. KERRY] and the Senator from Pennsylvania [Mr. HEINZ] were added as cosponsors of Senate Joint Resolution 195, a joint resolution proclaiming Christopher Columbus to be an honorary citizen of the United States.

SENATE JOINT RESOLUTION 224

At the request of Mr. BYRD, the names of the Senator from Arizona [Mr. DECONCINI], the Senator from Florida [Mr. MACK], the Senator from Utah [Mr. HATCH], the Senator from Texas [Mr. BENTSEN], and the Senator from Connecticut [Mr. LIEBERMAN] were added as cosponsors of Senate Joint Resolution 224, a joint resolution to designate the month of May 1990 as "National Trauma Awareness Month."

SENATE JOINT RESOLUTION 242

At the request of Mr. THURMOND, the names of the Senator from Minnesota [Mr. BOSCHWITZ] and the Senator from Missouri [Mr. DANFORTH] were added as cosponsors of Senate Joint Resolution 242, a joint resolution designating the week of April 22 through April 28, 1990, as "National Crime Victims Rights Week."

SENATE JOINT RESOLUTION 248

At the request of Mr. BOSCHWITZ, the names of the Senator from Oklahoma [Mr. BOREN], the Senator from Vermont [Mr. JEFFORDS], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from South Dakota [Mr. PRESSLER], the Senator

from Michigan [Mr. LEVIN], the Senator from Wyoming [Mr. WALLOP], the Senator from Kansas [Mrs. KASSEBAUM], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of Senate Joint Resolution 248, a joint resolution to designate the month of September 1990 as "International Visitor's Month."

SENATE JOINT RESOLUTION 265

At the request of Mr. DODD, the names of the Senator from Florida [Mr. GRAHAM], the Senator from North Dakota [Mr. CONRAD], the Senator from Colorado [Mr. WIRTH], and the Senator from Alabama [Mr. SHELBY] were added as cosponsors of Senate Joint Resolution 265, a joint resolution commemorating May 18, 1990, as the 25th anniversary of Head Start.

SENATE JOINT RESOLUTION 267

At the request of Mr. THURMOND, the names of the Senator from California [Mr. WILSON], the Senator from Kansas [Mr. DOLE], the Senator from Alabama [Mr. HEFLIN], the Senator from Washington [Mr. GORTON], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Louisiana [Mr. BREAUX], the Senator from Texas [Mr. BENTSEN], the Senator from Maryland [Ms. MIKULSKI], and the Senator from Rhode Island [Mr. PELL] were added as cosponsors of Senate Joint Resolution 267, a joint resolution to authorize and request the President to designate May 1990 as "National Physical Fitness and Sports Month."

SENATE JOINT RESOLUTION 269

At the request of Mr. D'AMATO, the names of the Senator from Wyoming [Mr. SIMPSON] and the Senator from Wyoming [Mr. WALLOP] were added as cosponsors of Senate Joint Resolution 269, a joint resolution authorizing and requesting the President to designate the second week of March 1990 as "National Employ the Older Worker Week."

SENATE JOINT RESOLUTION 274

At the request of Mr. LAUTENBERG, the name of the Senator from Massachusetts [Mr. KERRY], was added as a cosponsor of Senate Joint Resolution 274, a joint resolution to designate the week beginning June 10, 1990 as "National Scleroderma Awareness Week."

SENATE JOINT RESOLUTION 276

At the request of Mr. LIEBERMAN, the names of the Senator from Michigan [Mr. RIEGLE], the Senator from Wyoming [Mr. WALLOP], the Senator from Wisconsin [Mr. KASTEN], and the Senator from Wisconsin [Mr. KOHL] were added as cosponsors of Senate Joint Resolution 276, a joint resolution designating the week beginning July 22, 1990, as "Lyme Disease Prevention Week."

SENATE JOINT RESOLUTION 277

At the request of Mr. LUGAR, the names of the Senator from Missouri [Mr. BOND], the Senator from New Jersey [Mr. BRADLEY], the Senator from Indiana [Mr. COATS], the Senator from Tennessee [Mr. GORE], the Senator from New York [Mr. D'AMATO], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Wisconsin [Mr. KASTEN], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Delaware [Mr. ROTH], the Senator from Alabama [Mr. SHELBY], the Senator from Illinois [Mr. SIMON], and the Senator from California [Mr. WILSON] were added as cosponsors of Senate Joint Resolution 277, a joint resolution designating October 6, 1990, as "German-American Day."

SENATE JOINT RESOLUTION 278

At the request of Mr. ROCKEFELLER, the names of the Senator from Missouri [Mr. BOND], the Senator from Kentucky [Mr. FORD], the Senator from California [Mr. WILSON], the Senator from Alabama [Mr. SHELBY], the Senator from Massachusetts [Mr. KERRY], the Senator from Nebraska [Mr. EXON], the Senator from New Jersey [Mr. BRADLEY], the Senator from New York [Mr. D'AMATO], the Senator from Alaska [Mr. STEVENS], the Senator from Illinois [Mr. DIXON], the Senator from Arizona [Mr. DECONCINI], the Senator from Hawaii [Mr. INOUYE], the Senator from Connecticut [Mr. DODD], the Senator from Maryland [Ms. MIKULSKI], the Senator from New Mexico [Mr. DOMENICI], and the Senator from North Dakota [Mr. BURDICK] were added as cosponsors of Senate Joint Resolution 278, a joint resolution designating July 19, 1990 as "Flight Attendant Safety Professionals' Day."

SENATE JOINT RESOLUTION 279

At the request of Mr. SPECTER, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from Tennessee [Mr. GORE], the Senator from Michigan [Mr. RIEGLE], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Mississippi [Mr. COCHRAN], the Senator from New Jersey [Mr. BRADLEY], and the Senator from Texas [Mr. BENTSEN] were added as cosponsors of Senate Joint Resolution 279, a joint resolution to designate the week of September 16, 1990, through September 22, 1990, as "National Rehabilitation Week."

SENATE JOINT RESOLUTION 281

At the request of Mr. DECONCINI, the names of the Senator from Montana [Mr. BURNS], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Wyoming [Mr. SIMPSON], the Senator from Oregon [Mr. PACKWOOD], the Senator from Alabama [Mr. SHELBY], the Senator from Washington [Mr. ADAMS], the Senator from North Dakota [Mr. BURDICK], the Senator from Illinois [Mr. DIXON], the Senator from Utah [Mr. GARN], and the Senator from North Carolina [Mr. SANFORD] were added as cosponsors of Senate Joint Resolution 281, a joint resolution to designate September 13, 1990, as "National D.A.R.E. Day."

SENATE JOINT RESOLUTION 282

At the request of Mr. WILSON, the names of the Senator from Mississippi [Mr. COCHRAN], the Senator from Wisconsin [Mr. KASTEN], the Senator from Alabama [Mr. HEFLIN], and the Senator from Washington [Mr. ADAMS] were added as cosponsors of Senate Joint Resolution 282, a joint resolution to designate the decade beginning January 1, 1990, as the "Decade of the Child."

SENATE JOINT RESOLUTION 284

At the request of Mr. BYRD, the names of the Senator from Hawaii [Mr. INOUYE], the Senator from Virginia [Mr. WARNER], the Senator from Missouri [Mr. BOND], the Senator from Maryland [Ms. MIKULSKI], the Senator from New Jersey [Mr. BRADLEY], and the Senator from Massachusetts [Mr. KERRY] were added as cosponsors of Senate Joint Resolution 284, a joint resolution to designate the week beginning September 16, 1990 as "National Give the Kids a Fighting Chance Week."

SENATE CONCURRENT RESOLUTION 53

At the request of Mr. BOSCHWITZ, the name of the Senator from Idaho [Mr. MCCLURE] was added as a cosponsor of Senate Concurrent Resolution 53, a concurrent resolution concerning Iranian persecution of the Baha'is.

At the request of Mr. DODD, the name of the Senator from New Hampshire [Mr. RUDMAN] was added as a cosponsor of Senate Concurrent Resolution 53, supra.

SENATE CONCURRENT RESOLUTION 91

At the request of Mr. HATFIELD, the name of the Senator from Florida [Mr. GRAHAM] was added as a cosponsor of Senate Concurrent Resolution 91, a concurrent resolution expressing the sense of the Congress with respect to achieving common security in the world by reducing reliance on the military and redirecting resources toward overcoming hunger and poverty and meeting basic human needs.

SENATE CONCURRENT RESOLUTION 96

At the request of Mr. FORD, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from North Dakota [Mr. CONRAD], the Senator from Virginia [Mr. ROBB], and the Senator from Nebraska [Mr. EXON] were added as cosponsors of Senate Concurrent Resolution 96, a concurrent resolution to urge the administration in the strongest possible terms not to propose civil air transport services for inclusion under the General Agreement on Tariffs and Trade [GATT], or the proposed General Agreement on Trade in Services

[GATS], and to actively oppose any proposal that would consider civil air transport services as a negotiation item.

SENATE CONCURRENT RESOLUTION 102

At the request of Mr. DIXON, the name of the Senator from Florida [Mr. GRAHAM] was added as a cosponsor of Senate Concurrent Resolution 102, a concurrent resolution expressing the sense of Congress regarding the existing borders between Germany and Poland.

SENATE CONCURRENT RESOLUTION 112

At the request of Mr. MOYNIHAN, the name of the Senator from Illinois [Mr. DIXON] was added as a cosponsor of Senate Concurrent Resolution 112, a concurrent resolution expressing the sense of the Congress that the United States should seek to obtain an advisory opinion for the International Court of Justice concerning the right of self-determination of the people of Lithuania.

SENATE CONCURRENT RESOLUTION 115

At the request of Mr. LAUTENBERG, the names of the Senator from Delaware [Mr. BIDEN], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Maryland [Ms. MIKULSKI], the Senator from Connecticut [Mr. DODD], the Senator from New Jersey [Mr. BRADLEY], the Senator from Michigan [Mr. LEVIN], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Virginia [Mr. ROBB], and the Senator from North Dakota [Mr. CONRAD] were added as cosponsors of Senate Concurrent Resolution 115, a concurrent resolution to express the sense of the Congress regarding future funding of Amtrak.

SENATE RESOLUTION 231

At the request of Mr. BRADLEY, the names of the Senator from New York [Mr. D'AMATO], and the Senator from Iowa [Mr. HARKIN] were added as cosponsors of Senate Resolution 231, a resolution urging the submission of the Convention on the Rights of the Child to the Senate for its advice and consent to ratification.

SENATE RESOLUTION 263

At the request of Mr. LAUTENBERG, the name of the Senator from Connecticut [Mr. DODD], was added as a cosponsor of Senate Resolution 263, a resolution to express the sense of the Senate regarding the need to establish a sound national transportation policy integrating all modes of transportation and maintaining a significant Federal role.

SENATE RESOLUTION 270

At the request of Mr. SIMON, the name of the Senator from Oklahoma [Mr. BOREN], was added as a cosponsor of Senate Resolution 270, a resolution expressing the sense of the Senate regarding the urgent famine situation in Ethiopia.

SENATE CONCURRENT RESOLUTION 122—ESTABLISHING THE ALBERT EINSTEIN CONGRESSIONAL FELLOWSHIP PROGRAM

Mr. HATFIELD submitted the following concurrent resolution; which was referred to the Committee on Rules and Administration:

S. CON. RES. 122

Whereas a need exists to facilitate understanding, communication, and cooperation between Congress and the scientific education community;

Whereas the scientific education community includes a cadre of nationally recognized outstanding secondary school science and mathematics teachers; and

Whereas secondary school science and mathematics teachers can provide insight into education programs that work effectively in the classroom: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FELLOWSHIP PROGRAM.

(A) IN GENERAL.—The Speaker of the House of Representatives and the President Pro Tempore of the Senate are authorized to enter into an agreement with the Triangle Coalition for Science and Technology Education to establish an Albert Einstein Congressional Fellowship Program (referred to in this joint resolution as the "fellowship program"), which provides for each fiscal year, beginning with fiscal year 1991, two fellowhips within the House of Representatives (referred to in this joint resolution as the "House fellowships") and two fellowships within the Senate (referred to in this joint resolution as the "Senate fellowships").

(b) RESPONSIBILITIES.—The Speaker of the House of Representatives and the President Pro Tempore of the Senate may enter into the agreement described in subsection (a), and fund fellowships as specified in section 4(a), only if the Triangle Coalition for Science and Technology Education—

(1) undertakes the application responsibilities referred to in section 2(a);

(@) participates in the evaluation referred to in section 3; and

(3) provides the funding for administration and evaluation costs referred to in section 4(b).

SEC. 2. SELECTION PROCESS.

(a) APPLICATION.—The Triangle Coalition for Science and Technology Education shall—

(1) publicize the fellowship program;

(2) develop and administer an application process; and

(3) conduct an initial screening of applicants for the fellowship program.

(b) SELECTION.—

(1) HOUSE FELLOWSHIPS.—The Speaker of the House of Representatives, in consultation with the Minority Leader of the House and with the chairmen and ranking minority party members of the Committee on Education and Labor of the House of Representatives and the Committee on Science, Space, and Technology of the House of Representatives, shall select the recipients of the House fellowships.

(2) SENATE FELLOWSHIPS.—The President Pro Tempore of the Senate, in consultation with the Minority Leader of the Senate and with the chairmen and ranking minority party members of the Committee on Labor and Human Resources of the Senate and the Committee on Commerce, Science, and Transportation of the Senate, shall select the recipients of the Senate fellowships.

(c) PLACEMENT OF FELLOWSHIPS.—

(1) HOUSE FELLOWSHIPS.—The Speaker of the House of Representatives, in consultation with the Members referred to in subsection (c)(1), shall place one fellowship recipient on the staff of the Committee on Education and Labor of the House of Representatives, and one recipient on the staff of the Committee on Science, Space, and Technology of the House of Representatives. Either or both of these recipients may instead serve on the personal staff of a member of the House of Representatives.

(2) SENATE FELLOWSHIPS.—The President Pro Tempore of the Senate, in consultation with the Members referred to in subsection (c)(2), shall place one fellowship recipient on the staff of the Committee on Labor and Human Resources, and one recipient on the staff of the Committee on Commerce, Science, and Transportation. Either or both of these recipients may instead serve on the personal staff of a member of the Senate.

(d) ELIGIBLE RECIPIENTS.—Recipients shall be selected from a pool of nationally recognized outstanding secondary school science and mathematics teachers. The pool shall include teachers who have received Presidential Awards for Excellence in Science and Mathematics Teaching, as established by section 117(a) of the National Science Foundation Authorization Act of 1988 (42 U.S.C. 1881b), or other similar recognition of their skills, experience, and ability as science or mathematics teachers.

(e) COMPENSATION.—

(1) HOUSE FELLOWSHIPS.—The Speaker of the House of Representatives shall fix the compensation of each recipient of a House fellowship.

(2) SENATE FELLOWSHIPS.—The President Pro Tempore of the Senate shall fix the compensation of each recipient of a Senate fellowship.

(f) LENGTH OF TERM.—Each fellowship recipient shall serve for a period of up to 1 year.

SEC. 3. EVALUATION.

The Chairmen of each committee referred to in section 2(b) and the Executive Director of the Triangle Coalition for Science and Technology Education shall submit to the Speaker of the House of Representatives and the President Pro Tempore of the Senate, as appropriate, an annual report evaluating the fellowship program, and shall make recommendations concerning the continuation of the program.

SEC. 4. FUNDING.

(a) FELLOWSHIPS.—

(1) HOUSE FELLOWSHIPS.—FOr fiscal year 1991, the funds necessary to provide any House fellowships shall be paid from the contingent fund of the House of Representatives, but not to exceed a total of $37,500 for the House fellowships.

(2) SENATE FELLOWSHIPS.—For fiscal year 1991, the funds necessary to provide any Senate fellowships shall be paid from the contingent fund of the Senate, but not to exceed a total of $37,500 for the Senate fellowships.

(b) ADMINISTRATION AND EVALUATION.—The Triangle Coalition for Science and Technology Education shall provide the funds necessary for the administration of the fellowship program and for the evaluation referred to in section 3.

● Mr. HATFIELD. Mr. President, Over the last 2 years I have been ac-

tively involved in efforts to increase public focus on the importance of mathematics and science education. I am tremendously pleased that this week the Senate Labor Committee will hold the initial hearing on S. 2114, the Excellence in Mathematics, Science and Engineering Education Act of 1990—introduced in February by Senator KENNEDY and me. With this legislation, we are beginning the process by which we will reverse current trends and begin to see significant improvement in our children's achievement in these areas in the next decade.

However, Mr. President, I remain concerned that the action we take at the Federal level be appropriate and responsive to the needs of our local and State educators. The success of our efforts to improve mathematics and science education in this country will not be measured in Washington. It will be measured in rural Oregon, in urban New York and in every city and town in between. We therefore cannot legislate in isolation. We need input from the foot soldiers on the front lines—our teachers. It is our responsibility to facilitate better understanding, communication, and cooperation between the scientific education community and Congress.

With the enactment in 1983 of the Economic Security Act, Congress established the Presidential Awards for Excellence in Science and Mathematics Teaching to identify outstanding middle school and high school teachers. To date, over 700 teachers have been invited to Washington to be recognized for their achievement, professionalism, and contribution to science and mathematics instruction. These are the true heroes of our impending revolution.

These teachers and other educators who have achieved similar recognition represent a body of experience and knowledge from which Congress can and should draw. Not only do we need their insight on effective programs, we need their experience on what works in our classrooms. We will benefit from their perspective on policies that will promote national progress to meet the recent goal set by the President, and reenforced by S. 2114, to assist our youth in making substantial gains in mathematics and science achievement by the year 2000.

Therefore Mr. President, I am pleased to introduce today legislation to establish the Albert Einstein Congressional Fellowship Program for our Nation's mathematics and science teachers. My legislation will provide two fellowships in the Senate and two fellowships in the House of Representatives for the 1991 fiscal year to allow teachers to participate in the policymaking process. Secondary school teachers of mathematics and science will be eligible to apply for a fellowship on the staff of a congressional committee concerned with education and science.

Mr. President, this small effort is intended to increase access by our teachers to the policymaking arena, and to bring to Congress new insights and the practical experience of secondary school science and mathematics educators. I believe this program will greatly enhance the legislative process.

This legislation has strong support across the country. Both the National Science Teachers Association and the National Council of Teachers of Mathematics have endorsed the legislation. The Triangle Coalition, a consortium of over 95 national organizations and over 30 affiliated local alliances representing business, industry, labor, scientific and engineering societies, assisted in the formulation of this legislation and strongly supports its enactment. I am also pleased that my colleague, Representative TOM SAWYER of Ohio, has introduced companion legislation in the House today.

I encourage the Senate, Mr. President, to recognize the need for active participation by our educators in the legislative efforts formulated at the Federal level. Given the magnitude of the emerging crisis in science and mathematics education, this need cannot be overstated.

National interest in improving our students' achievement in mathematics and science education is growing daily. In the last few weeks alone, both Newsweek and the Washington Post have featured articles on the need to broaden the pool of those interested in science. These articles clearly demonstrate, Mr. President, that improvement in mathematics and science education has become increasingly critical.

I ask unanimous consent that the two articles, entitled "Not Just for Nerds," and "Scientists Say Basic Research Is Hurt by Cut in New Grants," be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

SCIENTISTS SAY BASIC RESEARCH IS HURT BY CUT IN NEW GRANTS

(By William Booth)

The whole thing seemed so unscientific. But the members of the American Society for Cell Biology and the American Society for Biochemistry and Molecular Biology were concerned, incensed, alarmed. So, for the first time in their long histories, the two societies hired themselves a lobbyist.

"A lot of the membership thought it was repugnant," said William Lennarz, president of the biochemical and molecular biology society. "But I thought it was necessary."

Lennarz and his colleagues were disturbed by trends they see at the National Institutes of Health (NIH) and the National Science Foundation (NSF), the federal agencies that fund the majority of academic scientists in the United States—the "individual investigators" who run small research programs at the universities and who do basic, as opposed to applied, scientific research. It is basic research, the scientists point out, that makes the discoveries that go on to find practical application. Virtually all the medical advances reaching patients today came out of basic research laboratories a decade or more ago, when funding was richer.

"These mom-and-pop operations are the future of science in our country. And the bottom line is real simple: the number of new grants is going down, not up," said Lennarz, a professor at the State University of New York at Stony Brook.

Most of the country's scientists, including those who eventually work in industry, are trained by individual investigators supported by federal grants. As fewer new grants are awarded, Lennarz predicted that fewer young people will enter science. Some heads of research labs already say privately that some of the brightest young minds are already opting for careers outside of science because they "see the handwriting on the wall." Already, a young scientist's chance of winning support from the government, even after his research proposals are approved, is less than one in four.

Scientists contend that if current trends continue. America will lose its lead in basic science. "America stands on the top of the heap in biotechnology," Lennarz said. "But if we keep losing our young people, we're going to go the way we went with automobiles and steel."

The funding formulas are not without paradox, according to scientists. On the surface, the science agencies have their biggest budgets ever. But fewer and fewer new scientists are getting funded. In addition, many core programs in math, physics, engineering and biology are shriveling up, scientists say.

NIH is enjoying the largest budget in its history. President Bush requested $7.9 billion for fiscal 1991, up $350 million from the current fiscal year. NIH is supporting 20,300 grants this year, another record.

But most of these awards are "continuing grants," meaning that the scientist is simply getting the second, third or fourth year installment of money committed to the researcher by the government.

The grants that indicate current trends are the "new and competing renewal grants," those awards made to researchers who are applying for new funds or are competing against other scientists to renew federal support for their research. This year, NIH plans to award about 4,600 new and competing grants, down from a peak of 6,400 in 1987.

"That is what is alarming," Lennarz said.

Meanwhile, fewer and fewer of the grants approved by special peer review committees are actually funded. In the mid-1980s, the award rate peaked at 38 percent. In 1991, it is expected to be 24 percent, a historic low. In other words, only one-quarter of the research ideas judged worthy of pursuit will be supported.

A final straw, Lennarz said is the practice of subjecting grants to "downward negotiations" of between 10 and 14 percent after they are awarded. Despite the name, they are obligatory, across-the-board cuts.

At the NSF, the federal agency that funds non-medical, non-military research, the trends are similar. Even though the NSF budget may double from its 1987 level to $3.2 billion by 1994, scientists contend that many core programs at NSF are suffering.

"The rhetoric does not square with reality," said John C. Crowley, vice president of the Association of American Universities, which dissected the NSF budget recently.

"Most research programs are not gaining ground consistent with announced national goals and documented needs. Instead, they are weakening steadily. Despite good intentions on all sides, the game plan is losing."

Between 1988 and 1990, two-thirds of the competitive research programs in four of the largest research areas funded by NSF have been cut to below their 1988 levels, according to Crowley. "The programs that support the bulk of individual investigators are shrinking," Crowley said.

The reasons for the decline are many. Large projects consume some of the increases. For example, many biologists who do basic science fear that NIH's commitment to the Human Genome Project, an ambitious but rather mechanical crash program to decode all the genes that create a human, is siphoning funds from basic science. AIDS funding has also absorbed large portions of the increases at NIH.

At NSF, much of the increase in recent years has gone to programs to bolster science education, to give minorities and women greater access to science careers and to build special facilities such as telescopes and supercomputing centers.

"There is a problem at NSF and NIH, no question about it," said White House science adviser D. Allan Bromley.

Part of the problem, Bromley said, comes from the fact that NSF and NIH extended the length and size of grants a few years ago. He also said that there are now more young scientists than ever applying for federal funds. In addition, Bromley said Congress has also repeatedly given less to NSF than Presidents Reagan or Bush requested.

Crowley said that there was another problem, as well. "There is an imperative operating in politics that favors the new, the dramatic, the big," Crowley said. In this kind of atmosphere, the little guy gets squeezed. In Congress and the administration, "Everybody loves science, but it's nobody's No. 1 priority."

NOT JUST FOR NERDS

You may not recall the difference between DNA and the PTA, but you've no doubt heard about the science-literacy crisis. Every year brings a fresh set of revelations about America's seemingly boundless superstition and ignorance. Fully 40 percent of the nation's adults think alien creatures have visited Earth, according to studies by Jon Miller, director of Northern Illinois University's Public Opinion Laboratory. Only 45 percent of us know the planet revolves annually around the Sun, and just 46 percent have accepted that humans evolved from earlier species. The prescience era even has its acolytes in the White House. Ronald Reagan admits to being interested in astrology and permitted his wife's obsession with pseudoscience to influence the presidential schedule.

While hocus-pocus thrives in high places, one international study after another places U.S. school kids near the bottom of the heap in mathematical achievement. The Educational Testing Service reported last year that Korean 13-year-olds succeeded twice as often as Americans at solving a two-step mathematical problem, such as determining an average. Three times as many could design a simple scientific experiment. University of Michigan researchers have documented similar achievement gaps between Chinese and American children of various ages. Other investigators have shown that average Japanese 12th graders have a better command of mathematics than the top 5 percent of their American counterparts. Indeed, a 1989 report by the National Research Council estimates that three quarters of the nation's graduating high-school seniors leave school without the skills to survive a college-level math or engineering course.

These unrelenting poor results have managed to restore science education to the nation's list of unmet crises. Science—with its drab lab coats, pocket penholders and flaming Bunsen burners—suddenly seems more important. Brains are beautiful! The nation needs its nerds; maybe we all better become nerds. The alternative, say the mighty coalition of teachers, business leaders and public officials, is trouble. Without more and better technical education, the argument runs, future workers will be ill prepared for even the most routine jobs. The United States will lack the engineering talent to compete effectively in the new global economy. Worse yet, voters won't be able to make sensible decisions about waste management or global warming or genetic experimentation or new missile systems. None of those claims is beyond dispute—indeed, some scientists take issue with each of them—but no one denies that something is seriously wrong.

Open eyes: Science is simply a way of looking at the world. At root, it consists of asking questions, proposing answers and testing them rigorously against the available evidence. As the popular astronomer Carl Sagan wrote recently, "Science invites us to let the facts in, even when they don't conform to our preconceptions. It counsels us to carry alternative hypotheses in our heads and see which best match the facts." For all the natural forces it explains, science is a course in analytical thought.

Unfortunately, few American students ever get to taste real science, for few of the nation's schools teach it. All parties now seem to agree that American science education serves not to nurture children's natural curiosity but to extinguish it with catalogs of dreary facts and terms. "The questions we're all interested in concern the universe we live in, the way our bodies work, what the mind is, how all these things are integrated," says Stephen Toulmin, a physicist turned philosopher at Northwestern University. As most of us know firsthand, those aren't the kinds of questions that kids are encouraged to ponder. Instead, says Toulmin, "we teach them to solve differential equations, to handle test tubes without breaking them."

Whether out of boredom, laziness or the allure of other pursuits, American students are fleeing math and science in droves. By the third grade, half of all students don't want to take science anymore, says Edward Pizzini, associate professor of science education at the University of Iowa; by the eighth grade, only 1 in 5 wants to keep going. Fewer than half ever take a math or science course after the 10th grade, and only 1 percent study calculus, a subject pursued by 12 percent of Japan's high-school students. The proportion of college students who major in engineering is six times as high in Japan (4 percent) as in the United States (.7 percent). And the U.S.-born engineering doctorate is almost a thing of the past. Foreign nationals now receive a quarter of the natural-science Ph.D.s and more than half of the engineering Ph.D.s awarded in this country.

Sense of crisis: All of which raises economic concerns. Thanks largely to the influx of foreign graduate students, the nation's annual Ph.D. crop has so far held steady as a percentage of the population. But many analysts predict actual shortages of Ph.D. scientists by the mid-1990s unless more students are drawn into the pipeline—particularly more minority students. Historically, science and engineering have been overwhelmingly white, male enclaves; in a 1986 count, only 2.5 percent of the nation's engineers were black and even fewer Hispanic. But both of those groups are now growing fast as a percentage of the population, and the proportion of white males is declining. To keep up, science will have to attract more minority and female students.

Stirred by the sense of crisis, various groups—school boards, corporations, foundations, the federal government—have launched ambitious initiatives to help create a more science-savvy populace. Project 2061, a massive program sponsored by the American Association for the Advancement of Science, now has six teams of elementary educators working up a plan to revise the nation's primary schools. The National Science Teachers Association has its own nationwide "scope sequence and coordination project"; 10,000 members of the NSTA will meet this week in Atlanta to chart the crisis, among other things. The National Science Foundation is offering grants to states that want to revamp their science- and math-education programs. The National Research Council and the Smithsonian Institution have joined forces to set up a National Sciences Resources Center to train teachers and help bring real science into the schools. The list goes on.

These may all be worthy efforts. The current system is repelling vast numbers of Americans from a fascinating human endeavor, and it may be depriving the nation of a new generation of technical innovators. To the extent that better teaching can alleviate our ignorance and stoke the economy, no one is likely to oppose it. Nonetheless, a few apostates question whether the situation is as dire, or better teaching as sure a cure, as the science boosters proclaim. Will the demand for scientists and engineers really go unmet for any duration, they ask. Is a working knowledge of science in fact essential to productive employment? To good citizenship?

Morris Shamos, an emeritus professor of physics at New York University, thinks not. The impending manpower shortage, he argues, has never been unambiguously documented. "We have seen spot shortages of scientists and engineers in the past and will continue to see them in the future, simply because the supply cannot be turned on and off as quickly as the demand," he argues. "But the same is true of surpluses in the field, and we have seen times when engineers were pumping gas or driving cabs."

Professional scientists are not the education advocates' only concern. They warn that numerically controlled machines are fast replacing old drill presses, and that future autoworkers will have to manipulate robots rather than wrenches. Shamos counters that Americans have mastered all manner of gizmos—from personal computers to electronic machine tools—by reading the instructions or attending on-the-job training courses. The fact that few of us can explain what's going on inside these contraptions has yet to cripple us.

There would seem to be even less evidence that science illiteracy is locking people out of the white-collar work force. As Harper's editor Lewis Lapham has observed, "The society bestows its rewards on the talent for

figuring a market, not on the proofs of learning or the subtlety of mind." Ronald Reagan's superstitions didn't slow him down. Nor have Vice President Dan Quayle's scientific failings kept him from becoming chairman of the National Space Council. Why send astronauts to Mars? "We have seen pictures," he explained last fall, "where there are canals, we believe, and water. If there's water, that means there's oxygen. If oxygen, that means we can breathe. And therefore, from the information we have right now, Mars clearly offers the best opportunity to see if a man or a woman can be able to survive on that planet."

Atomic poetry: As for the argument that good citizenship requires a working knowledge of science, it's true that public-policy issues have become increasingly technical. It's also true that scientists are often as bitterly divided on them as the rest of us. People who are familiar with science can argue more effectively about the pros and cons of pesticides or nuclear power. But if science is needed for more effective debate, asks Harvey Brooks, emeritus professor of technology and public policy at Harvard, what about other disciplines? Central American history, say, or economics? What about geography? Just last year, young Americans placed last among 10 nations on a National Geographic quiz about the world's political boundaries. When adults were included, Americans placed sixth. But even then, only 32 percent could find Vietnam on a map. Fourteen percent could not find the United States.

None of this suggests that science doesn't matter. To say a president needn't understand biology is not to say he shouldn't. And trying to raise public awareness of history or geography hardly precludes doing the same with science. The reasons aren't all utilitarian. The insights of science rival those of poetry or music; the contemplation of atomic structure or speculation on the cosmic reaches offer mystery and elegance that would please any supple mind.

Unfortunately, none of us can begin to take in the expanding web of human knowledge; no amount of schooling will make us expert in every new drug, weapon, device, food additive or environmental issue. Since we can't know what's in every black box science sends our way, some critical perspective seems especialy important. Whether we gain that perspective via physics or philosophy is of little consequence. But gain it we must. The alternative is live by the judgment of experts who are no less fallible than we are.●

SENATE RESOLUTION 272—RELATIVE TO THE FAMINE IN THE SUDAN

Mr. SIMON (for himself, Mr. HUMPHREY, Mr. PELL, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. CRANSTON, Mr. HELMS, and Mr. MITCHELL) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 272

Whereas famine is a direct result of the ongoing civil war in Sudan;

Whereas the Government of Sudan and the Sudanese People's Liberation Army have used food as a political weapon;

Whereas 250,000 Sudanese people, one-quarter of them children, died of famine in 1988;

Whereas Operation Lifeline Sudan, initiated by the United Nations in the spring of 1989, with strong support of the U.S. Government, saved the lives of thousands of Sudanese people through the delivery of 110,000 metric tons of food;

Whereas as many as 760,000 Sudanese people, many of them in garrisoned government-held towns in southern Sudan are threatened with starvation;

Whereas the breakdown in October 1989 of the informal ceasefire and the resumption of intensified fighting hinder famine relief efforts by the international community; and

Whereas in November 1989, the Government of Sudan suspended all cooperation with humanitarian efforts to assist the people of southern Sudan;

Whereas the Government of Sudan and the Sudanese People's Liberation Army have reached agreement on Phase II of Operation Lifeline Sudan: Now, therefore be it

Resolved, That it is the sense of the Senate that—

1. the President should urge the Government of Sudan and the Sudanese People's Liberation Army to adopt an informal ceasefire in order to facilitate relief efforts;

2. the Sudanese People's Liberation Army should immediately cease shelling of the garrison town of Juba;

3. the Government of Sudan should not obstruct the activities of private voluntary organizations assisting with humanitarian relief activities; and

4. the President should encourage the Government of Sudan and the Sudanese People's Liberation Army to implement fully the agreement on Phase II of Operation Lifeline Sudan.

Mr. SIMON. Mr. President, on April 5 I submitted a resolution on the urgent food relief situation in Ethiopia. As a result of an error in the processing of the legislation following my action a second resolution I submitted on the hunger situation in Sudan was not also introduced. In addition, the CONGRESSIONAL RECORD for April 5 indicates in my statement that the Sudan resolution was submitted as Senate Resolution 270. That is incorrect: Senate Resolution 270, as submitted on April 5 concerns the situation in Ethiopia. Therefore, I am submitting today a similar resolution on the situation in Sudan.

The Horn of Africa is in crisis. War and drought once again threaten the lives of millions of people in Ethiopia and Sudan. Senators HUMPHREY, PELL, KASSEBAUM, KENNEDY, CRANSTON, HELMS, and MITCHELL joined me in submitting Senate Resolution 270 on Ethiopia and today join me in submitting a similar resolution on the situation in Sudan. We want to highlight the urgency of finding every possible way to get food relief to people in great need.

We want to impress upon both the Ethiopian and Sudanese Government the need to permit the safe transport of food. We ask the same of the rebel movements. We encourage the United Nations and the international community to respond to this urgent crisis. And we will continue to work with our own administration. I ask unanimous consent that the text of Senate Resolution 270, as introduced on April 5, and the text of Senate Resolution 272, as introduced today, be printed in the RECORD at this point.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

S. RES. 270

Whereas famine threatens the lives of some three million five hundred thousand to five million people in the northern Ethiopian provinces of Eritrea, Tigray, and Wello;

Whereas the major cause of the famine is ongoing civil war;

Whereas all parties to the conflict have deliberately put military objectives above the food needs of innocent civilians;

Whereas cross-border feeding operations are insufficient to meet the desperate needs;

Whereas the northern corridor through the Eritrean Port of Massawa, currently held by the rebel Eritrean People's Liberation Front, is critical to relief efforts to feed some one million five hundred thousand people in need in rebel and government-held areas;

Whereas the Government of Ethiopia has refused to accept the offer made by the Eritrean People's Liberation Front to allow international relief access through Massawa; and

Whereas the relief operation along the southern corridor through Wello Province must be expanded to reach the one million four hundred thousand people estimated to be at risk there: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) all parties to the conflict in Ethiopia must put humanitarian needs above military goals and adopt an immediate ceasefire;

(2) cross-border feeding operations should be expanded to their fullest capacity;

(3) the Government of Ethiopia should permit the Port of Massawa to be opened immediately for the purposes of international relief operations;

(4) the President should encourage all parties to the conflict to adopt an immediate cease-fire;

(5) the President should impress upon all nations supplying military assistance to the parties in the conflict the importance of their role in facilitating a cease-fire;

(6) the President should impress upon the Government of Ethiopia the urgent need of allowing relief access through the Massawa Port and along the northern corridor;

(7) the President should encourage the United Nations to take a more prominent role in coordinating relief efforts in Ethiopia;

(8) the President should call on the Soviet Government to continue to respons to the war and famine in Ethiopia by exerting increased pressure on the Ethiopian regime to allow for the full utilization of all available relief corridors; and

(9) the President should encourage European, African, and other leaders to help facilitate a cease-fire and emergency relief efforts.

S. RES. 272

Whereas famine is a direct result of the ongoing civil war in Sudan;

Whereas the Government of Sudan and the Sudanese People's Liberation Army have used food as a political weapon;

Whereas 250,000 Sudanese people, one-quarter of them children, died of famine in 1988;

Whereas Operation Lifeline Sudan, initiated by the United Nations in the spring of 1989, with strong support of the U.S. Government, saved the lives of thousands of Sudanese people through the delivery of 110,000 metric tons of food;

Whereas as many as 760,000 Sudanese people, many of them in garrisoned government-held towns in southern Sudan are threatened with starvation;

Whereas the breakdown in October 1989 of the informal ceasefire and the resumption of intensified fighting hinder famine relief efforts by the international community;

Whereas in November 1989, the Government of Sudan suspended all cooperation with humanitarian efforts to assist the people of southern Sudan; and

Whereas the Government of Sudan and the Sudanese People's Liberation Army have reached agreement on Phase II of Operation Lifeline Sudan: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

1. the President should urge the Government of Sudan and the Sudanese People's Liberation Army to adopt an informal ceasefire in order to facilitate relief efforts;

2. the Sudanese People's Liberation Army should immediately cease shelling of the garrison town of Juba;

3. the Government of Sudan should not obstruct the activities of private voluntary organizations assisting with humanitarian relief activities; and

4. the President should encourage the Government of Sudan and the Sudanese People's Liberation Army to implement fully the agreement on Phase II of Operation Lifeline Sudan.

AMENDMENTS SUBMITTED

NONDISCRIMINATORY TREATMENT OF PRODUCTS OF THE PEOPLES' REPUBLIC OF HUNGARY

MACK AMENDMENT NO. 1471

(Ordered to lie on the table.)

Mr. MACK submitted an amendment intended to be proposed by him to the bill (H.R. 1594) to extend nondiscriminatory treatment to the products of the Peoples' Republic of Hungary, as follows:

AMENDMENT No. 1471

On page 71, after line 12, insert the following new section:

SEC. . METAL OXIDE VARISTORS.

(a) IN GENERAL.—Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new heading:

"9902.85.33	Metal oxide varistors (provided for in subheading 8533.40.00, 8541.10.00, or 8541.50.00)	Free	No change	No change	On or before 12/31/92".

(b) EFFECTIVE DATE.—

(1) GENERAL RULE.—The amendment made by this section shall apply with respect to goods entered, or withdrawn from warehouse for consumption, on or after October 1, 1990.

(2) RELIQUIDATION.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, upon a request filed with the appropriate customs officer after September 30, 1990 and before April 1, 1991, any entry, or withdrawal from warehouse for consumption, of an article to which the amendment made by this section applies that was made—

(A) after December 31, 1988, and

(B) before October 1, 1990,

and with respect to which there would have been a lower duty if the amendment made by this section had applied to such entry or withdrawal, shall be liquidated or reliquidated as though such entry or withdrawal had occurred on October 1, 1990.

CHAFEE AMENDMENTS NOS. 1472 THROUGH 1480

(Ordered to lie on the table.)

Mr. CHAFEE submitted nine amendments intended to be proposed by him to the bill (H.R. 1594, supra), as follows:

AMENDMENT No. 1472

On page 17, between lines 21 and 22, insert the following new paragraph:

( ) Heading 9902.29.52 (relating to 2,5-dimethoxyacetanilide).

AMENDMENT No. 1473

On page 17, between lines 21 and 22, insert the following new paragraph:

( ) Heading 9902.29.61 (relating to 3-(4'-aminobenzamido)phenyl-β-hydroxyethylsulfone).

AMENDMENT No. 1474

On page 17, between lines 21 and 22, insert the following new paragraph:

( ) Heading 9902.29.25 (relating to 4-chloro-2-nitroaniline).

AMENDMENT No. 1475

On page 17, between lines 21 and 22, insert the following new paragraph:

( ) Heading 9902.29.86 (relating to 2,4-dichloro-5-sulfamoylbenzoic acid.

AMENDMENT No. 1476

On page 85, between lines 12 and 13, insert:

SEC. 2014. 50 PERCENT REDUCTION IN DUTY ON CERTAIN HEATING OIL.

(a) IN GENERAL.—Section 213 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2703) is amended by adding at the end thereof the following new subsection:

"(h) REFINED HEATING OIL.—

"(1) RATE OF DUTY.—The rate of duty on any distillate or residual fuel oil that—

"(A) is described in subheading 271.00.10 of the HTS; and

"(B) is refined in a beneficiary country, is a rate equal to 50 percent of the general column 1 rate of duty under the HTS that would apply to such article but for this subsection.

"(2) ADMINISTRATION.—

"(A) The President shall proclaim the rates of duty imposed under paragraph (1).

"(B) The duty applied under paragraph (1) is in lieu of the duty provided for that article under general column 1 of the HTS."

(b) CONFORMING AMENDMENT.—Paragraph (3) of section 213(b) of the Caribbean Economic Recovery Act (19 U.S.C. 2703(b)(3)) is amended by inserting "except as provided in subsection (h)," before "petroleum" the first place it appears.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to goods entered, or withdrawn from warehouse for consumption, on or after the 30th day after the date of the enactment of this Act.

AMENDMENT No. 1477

On page 17, between lines 21 and 22, insert the following new paragraphs:

( ) Heading 9902.84.42 (relating to certain narrow weaving machines).

( ) Heading 9902.84.45 (relating to certain wool carding and spinning machinery).

( ) Heading 9902.84.50 (relating to certain lace braiding machines).

AMENDMENT No. 1478

On page 17, between lines 21 and 22, insert the following new paragraph:

( ) Heading 9902.29.07 (relating to 2-[(3-nitrophenyl)-sulfonyl]ethanol).

AMENDMENT No. 1479

On page 17, between lines 21 and 22, insert the following new paragraph:

( ) Heading 9902.29.42 (relating to 4-chloro-2,5-dimethoxyaniline).

AMENDMENT No. 1480

On page 17, between lines 21 and 22, insert the following new paragraph:

( ) Heading 9902.29.45 (relating to 3,4-diaminophenetole dihydrogen sulfate).

SHELBY AMENDMENT NO. 1481

(Ordered to lie on the table.)

Mr. SHELBY submitted an amendment intended to be proposed by him to the bill H.R. 1594, supra, as follows:

Part 1 of subtitle A of title I of the bill is amended by adding at the end the following new section:

SEC. . GARMENTS TREATED AS WATER RESISTANT.

The Additional United States Note 2 to chapter 62 is amended by striking ", lining or inner lining".

DOLE (AND GRASSLEY) AMENDMENT NO. 1482

Mr. DOLE (for himself and Mr. GRASSLEY) proposed an amendment to the bill H.R. 1594, supra, as follows:

At the appropriate place, add the following:

SEC. . ETHYL TERTIARY BUTYL ETHER.

(a) IN GENERAL.—Subchapter I of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new heading:

"9901.00.52 Ethyl tertiary butyl ether (provided for in subheading 2909.19.10) and any mixture containing ethyl tertiary butyl ether	6.66¢/liter	No change (A, E, IL) 5.29¢/liter (CA).	6.66¢/liter	On or before 12/13/92 or the date before 12/31/92 on which Treasury regulation §1.40–1 is withdrawn or declared invalid".

(b) STAGED RATE REDUCTION.—Any staged rate reduction of a rate of duty set forth in heading 9901.00.50 of the Harmonized Tariff Schedule of the United States that was proclaimed by the President before the date of enactment of this Act and would otherwise take effect after the date of enactment of this Act shall also apply to the corresponding rates of duty set forth in subheading 9901.00.52 of such Schedule.

(c) EFFECTIVE DATE.—The amendment made by this section shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the date that is 15 days after the date of enactment of this Act.

DOLE AMENDMENT NO. 1483

Mr. DOLE proposed an amendment to the bill H.R. 1594, supra, as follows:

At the appropriate place add:

That section 553 of the Tariff Act of 1930 (19 U.S.C. 1553) is further amended—

(a) by redesignating the text of such section as subsection (a) of such section; and

(b) by adding at the end thereof the following new subsection:

"(b) Notwithstanding subsection (a), the entry for transportation in bond through the United States of any lottery ticket, printed paper that may be used as a lottery ticket, or any advertisement of any lottery, that is printed in Canada, shall be permitted without appraisement or the payment of duties under such regulations as the Secretary of the Treasury may prescribe, except that such regulations shall not permit the transportation of lottery materials in the personal baggage of a traveler.

This amendment shall be effective fifteen days after the date of enactment of this Act.

BIDEN AMENDMENT NO. 1484

Mr. BIDEN proposed an amendment to the bill H.R. 1594, supra, as follows:

On page 85, after line 12, insert the following new section:

SEC. 2014. EXTENSION OF TRADE BENEFITS TO THE ANDEAN REGION.

(a) FINDINGS.—The Congress finds that:

(1) United States antinarcotics policy places a high priority on assisting the nations of the Andean region of South America, the source of 100 percent of the world's supply of cocaine;

(2) The President and Congress have recognized that United States trade and economic policies play an important role in the overall United States antidrug strategy in the Andes.

(3) The extension of special trade preferences for articles from the Andean region would help revitalize the national economies of the Andes and further United States antinarcotics policy in the region.

(b) SENSE OF CONGRESS.—The Congress urges the President to:

(1) Review the merits of extending the benefits provided under the Caribbean Basin Economic Recovery Act to the Andean region.

(2) Continue to explore additional mechanisms to expand trade opportunities for the Andean region, and report to Congress in a regular and timely fashion on the result of this review.

CRANSTON AMENDMENT NO. 1485

Mr. CRANSTON proposed an amendment to the bill H.R. 1594, supra, as follows:

On page 59, before line 1, insert at the end of title I, subtitle A, part II, subpart B:

"9902.48.18 Toilet paper, of cellulose webbing or webs of cellulose fibers, in rolls of a width exceeding 15cm (Provided for in Subheading 4818.10.00)	3.5%.	No change	No change	On or before 12/31/92.
"9902.48.19 Handerchiefs, cleansing or facial tissues or towels, all the foregoing of cellulose webbing or webs of cellulose fibers, in rolls of a width exceeding 15cm (Provided for in Subheading 4818.20.00)	3.5%.	No change	No change	On or before 12/31/92.

THURMOND AMENDMENT NO. 1486

Mr. THURMOND proposed an amendment to the bill H.R. 1594, supra, as follows:

On page 17, between lines 21 and 22, insert:

( ) Heading 9902.29.27 (relating to tetraamino biphenyl).

DODD AMENDMENT NO. 1487

Mr. DODD proposed an amendment to the bill H.R. 1594, supra, as follows:

At the appropriate place in the bill add the following new section:

"SEC. . Trade Benefits for Nicaragua. Notwithstanding any other provision of law, the President is authorized to designate Nicaragua as a beneficiary developing country for the purposes of title V of the Trade Act of 1974, as amended, and as a beneficiary country under the Caribbean Basin Economic Recovery Act, and any such designation may remain effective for the duration of the calendar year 1990."

MACK (AND GRAHAM) AMENDMENT NO. 1488

Mr. MACK (for himself and Mr. GRAHAM) proposed an amendment to the bill H.R. 1594, supra, as follows:

On page 71, after line 12, insert the following new section:

SEC. . METAL OXIDE VARISTORS.

(a) IN GENERAL.—Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new heading:

"9902.85.33 Metal oxide varistors (provided for in subheading 8533.40.00, 8541.10.00, or 8541.50.00)	Free	No change	No change	On or before 12/31/92".

(b) EFFECTIVE DATE.—

(1) GENERAL RULE.—The amendment made by this section shall apply with respect to goods entered, or withdrawn from warehouse for consumption, on or after October 1, 1990.

(2) RELIQUIDATION.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, upon a request filed with the appropriate customs officer after September 30, 1990 and before April 1, 1991, any entry, or withdrawal from warehouse for consumption, of an article to which the amendment made by this section applies that was made—

(A) after December 31, 1988, and

(B) before October 1, 1990,

and with respect to which there would have been a lower duty if the amendment made by this section had applied to such entry or withdrawal, shall be liquidated or reliquidated as though such entry or withdrawal had occurred on October 1, 1990.

DURENBERGER AMENDMENT NO. 1489

Mr. DURENBERGER proposed an amendment to the bill H.R. 1594, supra, as follows:

On page 102, after line 11, insert the following new subsection:

(e) RAILROAD CARS.—Subparagraph (B) of section 13031(b)(1) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(b)(1)(B)) is amended to read as follows:

"(B) the arrival of any railroad car the journey of which originates and terminates in the same country, but only if no passengers board or disembark from the train and no cargo is loaded or unloaded from such car while the car is within any country other than the country in which such car originates and terminates; or".

On page 102, line 12, strike "(e)" and insert "(f)".

KERRY AMENDMENT NO. 1490

Mr. KERRY proposed an amendment to the bill H.R. 1594, supra, as follows:

On page 75, line 5, after "assembled" insert "or processed".

On page 75, line 7, after "components" insert "or materials".

On page 75, line 20, after "assembled" insert "or processed".

On page 75, line 21, after "components" insert "or materials".

On page 76, line 5, after "components" insert "materials".

NOTICES OF HEARINGS

SUBCOMMITTEE ON INNOVATION, TECHNOLOGY, AND PRODUCTIVITY

Mr. BUMPERS. Mr. President, I would like to announce that the Small Business Committee's Subcommittee on Innovation, Technology and Productivity will hold a hearing on Friday, April 20, 1990. The subcommittee will examine the barriers to the sale of United States auto parts to Japanese auto companies located in the U.S. and abroad. The hearing will be held in room 428A of the Russell Senate Office Building and will commence at 9:30 a.m. For further information, please call Chuck Ludlan of the Committee staff at 224-5175, or Pauline Abernathy of Senator LEVIN'S staff at 224-6221.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. INOUYE. Mr. President, I would like to announce that the Select Committee on Indian Affairs will be holding a hearing on Tuesday, April 24, 1990, beginning at 9:30 a.m., in 485 Russell Senate Office Building on S. 1289, the National Indian Forest and Woodland Enhancement Act and S. 2075, the Indian Environmental Regulation Enhancement Act.

Those wishing additional information should contact the Select Committee on Indian Affairs at 224-2251.

Mr. President, I would like to announce that the Select Committee on Indian Affairs will be holding an oversight hearing on Monday April 30, 1990, beginning at 2 p.m., in 485 Russell Senate Office Building on S. 1203, the Indian Economic Development Act of 1989; S. 1650, the Indian Employment Opportunity Act of 1989; and the Supreme Court's decision in Cotton Petroleum to be followed by a markup on S. 143, the Indian Development Finance Act, and other committee business.

Those wishing additional information should contact the Select Committee on Indian Affairs at 224-2251.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. LEVIN. Mr. President, I wish to announce that the Subcommittee on Oversight of Government Management, Committee on Governmental Affairs, will hold a hearing on S. 1957, a bill to increase the purchase of commercial items by civilian agencies, on Thursday, April 26, at 2 p.m., in room 342 of the Dirksen Senate Office Building.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON MINERAL RESOURCES PRODUCTION AND DEVELOPMENT

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Subcommittee on Mineral Resources Production and Development of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 2 p.m., April 19, 1990 to receive testimony concerning reclamation and bonding practices associated with hard rock mining on Federal and State lands.

The PRESIDING OFFICER. Without objection, it is soordered.

COMMITTEE ON THE JUDICIARY

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Thursday, April 19, 1990, at 10 a.m. to hold a hearing on drug prevention campaign.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERNATIONAL FINANCE

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Subcommittee on International Finance of the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Thursday, April 19, 1990, at 10 a.m. to hold hearings on exchange rates.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON AGRICULTURAL PRODUCTION AND STABILIZATION OF PRICES

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Subcommittee on Agricultural Production and Stabilization of Prices of the Senate Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, April 19, 1990, at 2 p.m. to hold a hearing in preparation for the 1990 farm bill. The hearing will address deficiency payment problems with regard to barley.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on April 19, 1990, at 9:30 a.m. on the nomination of Tommy G. Thompson of Wisconsin to be a member of the Board of Directors of the National Railroad Passenger Corporation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on April 19, 1990, at 2 p.m. on the nomination of John K. Lauber of Maryland to be a member of the National Transportation Safety Board [NTSB].

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON THE CONSUMER

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Subcommittee on the Consumer, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on April 19, 1990, at 10 a.m. on H.R. 94, the Hotel/Motel Fire Safety Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CHILDREN, FAMILIES, DRUGS AND ALCOHOLISM

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Subcommittee on Children, Families, Drugs and Alcoholism of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Thursday, April 19, at 2 p.m., for a hearing on "Domestic and Family Violence."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Thursday, April 19, at 10 a.m., for a hearing on "Math and Science Education: Preparing for Our Environmental and Technological Future."

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON READINESS, SUSTAINABILITY AND SUPPORT,

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Armed

Services Committee, Subcommittee on Readiness, Sustainability and Support be authorized to meet in open session on Thursday, April 19, 1990, at 2 p.m. to receive testimony on Department of Defense base closures and realignments in review of S. 2171, the Department of Defense Authorization Act for fiscal year 1991.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet on Thursday, April 19, 1990, at 9 a.m. in open session to receive testimony on the President's report on the U.S. military presence in East Asia.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON WATER RESOURCES, TRANSPORTATION, AND INFRASTRUCTURE

Mr. GRAHAM. Mr. President, I ask unanimous consent that the Subcommittee on Water Resources, Transportation, and Infrastructure, Committee on Environment and Public Works, be authorized to meet during the session of the Senate on Thursday, April 19, beginning at 10 a.m., to conduct a hearing on S. 2183, the Water Resources Development Act of 1990 and other water resources issues.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

HOOSIER HEROES: VINCENNES FIRE CHIEF MAKES SUPREME SACRIFICE VOLUNTEERING TO HELP OTHERS

● Mr. COATS. Mr. President, the city of Vincennes mourns one of its local heroes, a man who made his mark as a volunteer and then died while volunteering to help others who were in serious trouble.

Recently, Lester Stewart, former fire chief of the Vincennes Volunteer Fire Department, died after he had stopped to help the victims of a three-vehicle wreck that sent eight people to the hospital. Stewart collapsed at the scene of the accident on Indiana Route 67 south of Bruceville after coming upon the two cars and a tractor-trailer which were involved in the wreck.

According to press accounts, the first car had hydroplaned on wet pavement and crossed the center line. The car then struck the rear wheels of the tractor-trailer. The driver of the second car swerved in order to avoid the accident occurring ahead. Upon collision both cars left the road, landing in deep ditches. Eight of the nine persons involved were injured and had to be sent by ambulance to the Good Samaritan Hospital in Vincennes. Six were later treated and released; the truck driver was the only person not taken to the hospital.

Chief Stewart was driving with his wife Esther on Indiana 67 between Vincennes and Bruceville when he spotted the accident. He stopped his car, got out to offer assistance, and saw a baby trapped in one of the cars. According to Esther Stewart, her husband climbed a twelve-foot bank in order to reach the vehicle, pulled a 10-month-old infant from the wrecked car, and handed the child to a firefighter who had driven to the scene. After rescuing the baby Stewart suddenly collapsed onto the tailboard of a fire truck. He was rushed to the Vincennes hospital, where he was pronounced dead. The coroner later ruled that death was caused by a heart attack. The child, Nicole Hagemeier, who was a passenger in a vehicle driven by her mother which had crashed when she tried to avoid the accident, was not seriously injured.

Concerning the tragic death of former Fire Chief Stewart, Assistant Fire Chief Richard Teising was quoted as saying: "He died doing what he had been doing for years, volunteering to help other people."

The citizens of Vincennes are mourning the untimely death at age 55 of one of its finest citizens. The infant and her mother are especially grateful for the courage of this former volunteer fire chief who just happened to be passing by that fateful evening. Fire Chief Lester Stewart's presence of mind, prompt action, and characteristically unselfish deed made a heroic difference that night of March 30, 1990.

Our heart-felt condolences go out to Esther Stewart and the Stewart family. And our gratitude goes to the brave volunteers of the Vincennes Fire Department and to volunteers everywhere who, like this Hoosier hero, put themselves on the line for the safety of others each and every day.●

A TRIBUTE TO TOM STUBBS

● Mr. KOHL. Mr. President, today I wish to take a moment to recognize a staff member of mine, Tom Stubbs, who has decided to leave my office to take a position in the private sector. I hope this decision was as hard for him to make as it is for me and my staff to accept.

Tom has been a valuable member of my staff—and will remain a valued friend—for a number of reasons. First, he knows what he is talking about. Tom is one of the most knowledgeable individuals I have met when it comes to issues regarding the Federal budget, business interests, and taxes. I realize he must have been frustrated when, on more than one occasion, I would ask him to review a difficult budget or tax issue for the 14th time. But he always did it—intelligently and comprehensively. In addition to his patient persistence, I could alway rely on Tom to challenge my inclinations. He always made sure that I heard all sides of an issue. And he always made sure that I knew which side he was on.

And that suggests the second reason I will miss Tom. Too often around here we are surrounded by people who say "yes, Senator." Those may be the only two words in the English language that do not come easily to Tom. He has strong beliefs, he has firm values, and he has the courage to express them. I may not have always appreciated his candor, but I always admired it. And even when I did not agree with him, I always understood an issue more fully after talking with him.

Finally, though, I think the strongest testament to Tom's character is the fact that he has been able to keep a healthy sense of perspective. While doing an amazing amount of work for me, he has also found time to go to law school and be a good father and husband. I do not know how he did it, but his wife Mimi continues to claim that she loves him, and his son, Justin, may not be able to speak yet but the look in his eyes when he sees his father is as eloquent statement of love as I have ever seen.

Tom was a great help to me. More importantly, I believe he helped the people of Wisconsin and the country. I will miss him; but I hope and suspect that we have not seen the last of him on the Hill. I wish him well.●

THE HOSPICE OF ST. JOHNS

● Mr. ARMSTRONG. Mr. President, I ask for the privilege today of bringing an outstanding Colorado success story to the attention of the U.S. Senate and the Nation at large. It is the story of the Hospice at St. Johns of Lakewood, CO.

It is a modern success story for two very fundamental reasons. First, the St. Johns Hospice represents a recognition that death is as profound a part of life as birth. It extends intelligent, sympathetic help to individuals facing death and assists families in a situation most of us find difficult to confront. Father Paul von Lobkowitz, founder and executive director of the Hospice, eloquently expresses the philosophy of St. Johns with his statement, "Everyone here is living, in many ways our patients are at the peak of their lives."

Second, St. Johns Hospice is a splendid example of how citizens can recognize a vital human need and directly assume the responsibility for meeting it. The concerned people who founded St. Johns Hospice and continue its operation did not seek government programs to resolve the need. They took direct action to change the situation

as it was in their power to change it. In so doing, they demonstrate once again the finest attributes of the character of the American people.

Mr. President, I ask to have printed in the RECORD a history of the Hospice of St. Johns entitled, "Where the Heart Finds Peace." I commend it to my colleagues and others who are interested in an example of success in meeting the needs of people at the local, personal level where solutions are most effective.

The history follows:

WHERE THE HEART FINDS PEACE

THE HISTORY OF THE HOSPICS OF ST. JOHN

The Hospice of St. John is a remarkable facility located in Lakewood, Colorado. It is operated and staffed by a group of people more dedicated and caring than almost any others I have ever known.

I first heard about the Hospice of St. John in 1984 when I was invited to attend the opening dedication of the Hospice's first free-standing building. Since that time, I have watched with interest as the staff and supporters of this unique facility have worked to build the best hospice in the nation. Their story is a compelling one.

St. John's Hospice offers dying people a place to go when they can find no other place to turn for help. Unique in the state and one of only nine facilities like it in the country, the Hospice is a place where the terminally ill can be secure in knowing that respect will be given to the quality and dignity of their lives. Patients at the Hospice have reached a point where no known cure is available for their illness. And they have decided to live the remainder of their lives in comfort rather than being submitted to further painful and almost certainly hopeless medical procedures.

Over 6,000 people have lived and died at the Hospice since its founding in 1977, 200 of those were AIDS patients. And yet, remarkably, the Hospice has never received any federal or state funding other than Medicaid and Medicare. Most patients are on Medicare, Medicaid and private insurance. And the Hospice relies on the generous donations of supporters of the Hospice, ongoing volunteer assistance, and available grant monies. Memorial contributions and fund raising efforts go on throughout the year.

The Hospice provides complete and compassionate medical care to its patients, 38 beds for adults and a nursery with 3 beds for children. And yet, care at the Hospice costs far less than it would at a traditional hospital. As a matter of tact, the Hospice provides care at a fraction of the cost of a hospital. The average hospital patient can expect to pay anywhere from $750 to $1,000 a day. By comparison, the Hospices cost is approximately $185 a day.

Statistics show that 11% of Medicare dollars go to the costs of patients in their last few weeks of life. At this stage, patients generally require costly and complicated medical treatment. The dramatic cost of health care is causing a health care crisis in this country. But the Hospice of St. John is offering excellent care at a fraction of the cost—without the funding of the federal or state government. Clearly, this type of facility may offer the alternative America needs to consider as a way to conquer future health care needs.

A commitment to service

While it is operated like a residence home, because of their illnesses, patients at the Hospice require more attention and more special medical care than is possible in their own homes. There are significantly more nurses per patient at the Hospice than one would find in a nursing home. And the Hospice staff provide patients with the medical care they cannot receive at home.

To meet the increased manpower needs this type of facility demands, the Hospice has come to rely on a tireless army of volunteers who provide a great deal of the personnel hours. They come from all walks of life and assist in all aspects of patient care. "We recorded over 10,000 hours of volunteer service at the Hospice in 1989," reported Pam Currier, director of volunteers. "That adds up to a savings of roughly $70,000 in wages alone. We have never had to advertise for help. Our volunteers come to us on their own. They are very giving people."

"The quality of service we provide really rests on the trained nurses and volunteers," Father Paul believes. "The Hospice owes its unique spirit largely to them. Many of our patients don't have families and the volunteers and nurses can become close friends. Even patients who have families often find it easier to confide in nurses and volunteers, because they aren't so emotionally involved."

Intense training programs are a part of the Hospice volunteer program. Each volunteer is asked to make a commitment to the Hospice and complete a series of training sessions. Hundreds of people who have volunteered their time over the years, many leaving only when their own age forces them to retire.

In many instances, there is an on-going relationship between the family of a patient and the Hospice. Many family members become volunteers after the death of their loved one. Don Thompson is an example. He was the President of a bank in Denver when his wife was admitted to the Hospice with Lou Gehrig's disease. She was a patient for several weeks. During her stay, Don spent a tremendous amount of time with her at the Hospice. After her death, he participated in the bereavement program where he met the daughter of another Hospice patient. The woman has just lost one of her parents and was going through a loss similar to Don's. They eventually married. Don gave up his job at the bank to become the Director of the Pastoral program at the Hospice. He served several years in that capacity and stepped down only recently when ill health forced him to retire.

A long history

The name plate on Father Paul's office door reads, "Father Paul Prince von Lobkowitz." The title is serious. He grew up in a castle in what is now Czechoslovakia and his lineage runs through history to half the great houses of Europe. In addition, he is an Orthodox priest and a monk of the Sovereign Order of St. John of Jerusalem, one of the surviving branches of the Knights of Malta. It is the Order that founded and operates the Hospice under contract with a volunteer, secular board according to state codes.

Founded in the 11th century, the Knights of Malta are the oldest order of knighthood in the world. The first Order members offered refuge, shelter and medical care to pilgrims on their way to Jerusalem during the Crusades. Today, the modern Hospice continues the mission of the Knights by offering care to those in need, namely individuals with terminal illness. Its mission, as it was in the beginning, is to serve the sick.

Many serve in the Order today as lay Knights. Denver's Knights of Malta volunteer their time and talents to the Hospice, working with patients and raising money to keep the facility afloat. They are a Christian organization, offering fellowhip and a life commitment to service. Father Paul is a religious Knight, having decided early in his life to take the monastic vows of poverty, celibacy, obedience and hospitality and serve as a nurse. And serve he has, in Africa, in East Pakistan (now Bangladesh), and since 1977 in Colorado.

In 1977 when he arrived in Colorado, Father Paul began working in a wing in Georgian House, a nursing home in Lakewood. There he established a hospice ward, the Hospice of St. John, managing six beds for the terminally ill. In 1984 the Hospice of St. John out-grew its space in Georgian House and moved into its present 38 bed facility.

Public recognition

Over the years, the Hospice of St. John has been recognized and honored for its tremendous work. Most of the local Denver television stations and newspapers including the Denver Post and the Rocky Mountain News have run feature stories on the Hospice, telling its story through the stories of its' patients. The national media has shown its' share of interest in the Hospice, too. Charles Kuralt reported on the Hospice for CBS. Tom Brokaw NBC did a program on AIDS that included coverage of the Hospice program. Sandle Stoddard, the author of the first hospice book in America called The Hospice Movement, did a program about the Hospice of St. John for Baltimore television station Channel 2.

In addition to media attention, the Hospice has gained the support of celebrities and performers. Actress Susan Sullivan has been a long-time friend of the Hospice. Her commitment has helped raise much-needed funds. The rock group Boston held a concert fundraiser for the Hospice. Stars from Hollywood and Las Vegas, performers in music, comedy and theater have come together for the benefit of the Hospice of St. John.

The patients are the real story

Oftentimes, we think of facilities like the Hospice as caring only for the elderly. That is not the case with the Hospice of St. John. In fact, the Hospice has cared for ten children in its' nursery over the years. One special child, Jessica Boyce, came to the Hospice not long after it re-located to its present location. Jessica started having medical trouble when she was about three months old. Over the three years that followed, slowly collapsed, congested lungs and seizures had left her dangerously ill many times. Batteries of tests and constant IVs had virtually ruined her tiny veins and she was being fed through a tube that ran directly into her stomach. By the time she was four, Jessica's fragile body had deteriorated so badly that her parents conceded the remainder of her life should be spent in comfort rather than being submitted to painful and almost certainly hopeless attempts at cures.

Jessica was admitted to the Hospice of Saint John just after her fourth birthday. She adjusted well to Hospice life. And while she did not recover, her condition stabilized somewhat. Over the years, she suffered several pneumonias. And no one was quite sure whether or not the small child could see.

She could not speak. But she bonded with many on the nursing staff, responding to touch, and she contributed greatly to the Hospice by visiting patients and bringing a feeling of life and joy to many of the other patients. Jessica died when she was eight.

Another remarkable patient at the Hospice was an elderly woman in her seventies who was a patient for several months. She was extremely ill and by the end had become quite frail. One Wednesday evening she received a call from her grandson in Kansas City. "I'd like to come and show you your great-grandchild," he said, "but I can't afford to fly. I will have to drive. I can leave after work on Friday evening and I promise to drive through the night. I can get there sometime after breakfast Saturday morning if you promise to hold on." The elderly woman took a turn for the worse that night. Her vital signs changed; her blood pressure dropped. The Hospice staff didn't think she would make it through the night. But she held on that night and through the next day and on through Friday. By Friday night her blood pressure was frighteningly low but she hung on all that night and at about 8:30 the next morning, Saturday, her grandson arrived with the child. The woman was unresponsive and completely still. "Wake up, Grandma," the young man pleaded, "your great-granddaughter is here." The woman opened her eyes, held out her hand to the child with a smile and died.

And I must share the story of Mary Jane Whitman. Mrs. Whitman was admitted to the Hospice in December of 1988. She was totally bedridden, suffering from three forms of cancer. Worse still, both of her hips were fractured so she couldn't even ride in a wheel chair. Early in January, she told Father Paul the story of her son who was in a band that she had helped start at Highlands Ranch High School. The members of the band were going to Florida to compete in a national band competition. Mrs. Whitman wanted terribly to go, but her illness made such a trip impossible. Father Paul told her that if she could get herself into a wheel chair, he would see to it that she went to Florida. Within a week, she was in a wheel chair.

So Father Paul made some phone calls, contacting friends of the Hospice in the Highlands Ranch area to help fund the trip. A grant was given that covered Mrs. Whitman's fare as well as that of her husband, her sister and Father Paul, who went along as her nurse. By monitoring her medication, she was able to travel comfortably. She felt no pain and was quite alert throughout the entire weekend. She watched her son and the band win some awards, took part in all of the day excursions around Disney World and the Epcot Center, and returned home the next Monday. Mrs. Whitman celebrated her 50th birthday the Friday after she returned from Florida. Soon thereafter, her condition changed. She died the following Friday evening.

The Hospice of St. John welcomes people of all ages, races, religions and national origins who are suffering from a terminal illness. Its mission is to offer physical, emotional and spiritual care to those who are passing through their final phase of life. The Hospice offers the expertise of experienced physicians, nurses, pastoral staff, social service, and bereavement counselors.

The facility strives to reach the needs of each individual patient. They are allowed to bring their pets—just like home. There is even a resident pet dog, Inky, who offers patients the comfort and companionship that only pets can offer. A volunteer oversees the daily round of the cocktail cart. And smoking is allowed out on the porch * * * as the terminally ill, no one would suggest it might ruin their health!

The Hospice is a place unto itself. Staff and patients learn to adjust to the constant face of death in a building in which everyone draws on their personal strengths to live and work in the heat of life's ultimate event.

To Father Paul von Lobkowitz, Founder and Executive Director, the Hospice is a place where the heart finds warmth and the soul finds peace. "Everyone here is living," Father Paul says, "In many ways our patients are at the peak of their lives. They are in crisis, true, but they absorb life like a sponge. Everything is more important when you are about to lose it."●

FAMILY FRIENDS

● Mr. PRYOR. Mr. President, as chairman of the Senate Special Committee on Aging, I would like to take this opportunity to draw the attention of my fellow Members to a outstanding intergenerational initiative known as Family Friends. This program brings together disabled children and older volunteers, who provide friendship and a helping hand to these children and their families.

Family Friends is a national demonstration program sponsored by the National Council on Aging, with funding for the Robert Wood Johnson Foundation. Tailoring each site to the specific needs and resources of the surrounding area, Family Friends is operating in a number of cities across the Nation, including Cleveland, Hartford, Los Angeles, Florida, Salt Lake City, Omaha, San Antonio, and Washington, DC.

Under Family Friends, volunteers 55 or over provide a broad range of services to disabled children. Volunteer visits occur at least once a week to the home of the child. Depending on the need, a volunteer may assist a child with disabilities in eating, dressing, or washing. The volunteer also may take him or her to the park, museum, or baseball game. For hard-pressed families, these outings may be all that stands between the disabled child and social isolation.

At the same time, a Family Friend volunteer provides the crucial break from care taking for the parent of a disabled child. As a result, a parent can take time to rest or to carry out other responsibilities, without neglecting the needs of the child. Program volunteers also are someone the parent can take to, providing solace when coping becomes difficult. Many of these older volunteers, who have the perspective that comes only with time and the coming to terms with loss, are especially effective in this role.

For program volunteers, Family Friends opens up opportunities to build a relationship with a child in need, as well as with members of the child's family. In providing needed assistance, volunteers earn the love of the disabled child and gain the fundamental sense of satisfaction that comes from helping others. When the lives of many elderly persons are haunted by isolation and loneliness such results are precious.

Of course, the most meaningful testimony to this program's value is spoken by those who participate in Family Friends. Although there are too many letters to cite here, I would like to take a moment to quote from a one or two that are representatives of the praise this program receives. For example, a Family Friends volunteer writes:

[W]hen people question my ability to deal with Family Friends, a program which has taught me how to help a family cope with an unusual situation of having an exceptional child, I tell them to try working with this program and they can find out how fulfilling it is to see a little flower grow and bloom into such a healthier and beautiful plant. To know that the little part I have played in this growth makes my heart swell with pride and with all the love I have given and received and seeing a little one look up, smile, and with impaired speech say—"I love you Ms. Bernie" * * *

Another letter, from a parent of a disabled child reads:

Rosemary comes for three hours on Friday afternoons and it is hard to express in words how much I look forward to that time * * * I enjoy seeing Michael and Rosemary interact. She talks to him constantly. They go on walks and read stories together. She swings with him and helps him play with his toys. They snuggle together in the rocking chair for quiet time.

Michael truly enjoys his time with Rosemary. Though he can't talk, his eyes and face light up at the mention of her name or the sight of her face * * * I enjoy talking to Rosemary too. Her experience with six children of her own is valuable to me * * * This program is a God-send. * * *

Mr. President, there are between 4.8 and 7.2 million children who suffer from chronic health conditions, while as many as 1 to 2 million need special help to feed, dress, or bathe themselves. Some 90 percent of all children with severe disabilities live at home. Family Friends was designed to fit the story behind these numbers, to lessen the often overwhelming reality parents face in raising a severely disabled child by drawing on the experience and good will of older Americans.

Family Friends has pioneered a successful approach to helping families with a disabled child who lives at home. It also has created new ways for older individuals to contribute to the lives of those in desperate need of their patience, experience, and generosity. Clearly, Family Friends is a proven success, and I applaud the vision and innovation of this program.●

LEW KING RANGERS

● Mr. McCAIN. Mr. President, this Saturday is a very special day in the lives of many Arizonans. On April 21, the Lew King Rangers will celebrate their 40th anniversary at Rawhide in Scottsdale, AZ. For years, the thousands of Arizonans who joined the Lew King Rangers and watched their show on TV are now grown with children of their own. Stars like Marty Robbins, Wayne Newton, Judy Kaye, Linda Carter, and Tanya Tucker were first introduced on the "Lew King Ranger Show." Lew King, Mr. Arizona, as he is sometimes called, is truly a legend in Arizona.

I salute Lew and his many years of bringing entertainment to children of all ages. On April 21, 1990, there will be a celebration in Arizona for Lew King and the Lew King Rangers. I hope that this event brings as much enjoyment to Lew as he has to so many over the years.●

ELECTION DAY IN TELPANECA

● Mr. SIMON. Mr. President, Representative RICHARD LEHMAN has written a firsthand account of election day in Nicaragua. He introduces us to voters in Telpaneca and the emotion and historic significance of the voting process in the town school. I encourage my colleagues to read Representative LEHMAN's account and ask that it be printed in the RECORD.

The statement follows:

The drive from Managua to Telpaneca takes about five hours depending on the condition of your car, which in Nicaragua is almost always bad. Halfway there is a town called Esteli where some of the most vicious fighting of the revolution occurred. Beyond Esteli the road narrows as the mountains open up. Sometimes you can see the ridge line marking the Honduran border in the distance.

There are some risks for travelers in this region but no one knows how great these risks are. Everyone we talked to had a different estimate. A good night's sleep ($7.50 for six persons) and the first rays of sun somehow suppressed our fears.

At Patacaguina we took a dirt road east and climbed the mountain for the last hour to Telpaneca. A power line, some scrawny cattle, a few chickens, pigs and an occasional campesino share this narrow corridor through the rugged chaparral. If one is going to get in trouble, this is where it will happen. "The road is safe till ten o'clock," a U.N. soldier assured me, "after that the only things out there are looking for each other."

Suddenly a remarkable event appeared in the remote gully below us. I counted 130 people standing in a long column stretched around a rural school room. Many had obviously walked a good distance to get there. They were waiting to vote. We stopped and took pictures as the line grew. It moved slowly but the people were patient, quiet and serious. The sign by the door read "Tu Voto Es Secreto" (Your Vote is Secret). It was amazing. Some of them were barefoot. Some were crippled. All of them were very poor. We sensed that something special was happening. We asked a man on his way to the polls who he was voting for. "UNO" he declared. "We need a change. Ten years and nothing good has happened." We asked about the Contras. "Some of them are down there voting," he replied.

It was a theme we had already heard in Managua. The great advantage FSLN (the Sandinista Front) enjoyed in the size of its campaign rallies and amount of visible activity was not reflected in the comments we were receiving on the street. People said they were tired of poverty, sick of war, and wanted U.S. help. UNO represented the change.

The first thing you see when you reach Telpaneca is a chapel standing alone on a hilltop. It is a charming sentinel (belying the town's real condition) and we got excited when we saw it. At 10:00 a.m. Mayor Ramon Gomez, a 30-year old Sandinista, greeted us and provided a fine home-cooked lunch. He was genuinely appreciative of the help Telpaneca has received from its sister city, Fresno, California. "Everyone here knows what Fresno has done," he said.

I took a stroll down the short dirt main street and made my first discovery. "Hello, come in," the slightly broken English caught me by suprise. I entered a sparsely stocked ag-hardware store and met Francisco Matamoros. "I live sometimes in Houston," the old man said showing me his American drivers license and social security card. I knew he probably didn't want to talk politics in front of his young customers but before leaving I ventured "inflation is pretty bad, isn't it?"

"Take it easy," he replied, shrugging me off with a smile.

Across the street I noticed a distinguished-looking old man sitting behind a desk doing some paperwork. "I'm 94," he said "and this is what I have left." He gestured to the building around him. "They (the Sandinistas) took everything else." "Were you compensated?" I asked. "No, they took my land and left me with just this. My children left—LA, Miami, Canada. There was no future for them here. We're too old to go," he said pointing to his wife behind the counter.

"What about the revolution?" "Revolution?" he interrupted. "I've seen four of them starting in 1909. I used to help the Americans when they were here," he said in reference to the brief U.S. intervention during 1909–10 and the subsequent U.S. occupation from 1912 to 1933. That was when Augusto Cesar Sandino, the Sandinista hero led the fight to drive the United States out and establish Nicaraguan independence. When he was killed, Anastasio Somoza the Dictator took over.

The old gentleman was a striking opposite to the young mayor down the street. He no doubt had been one of the "evil" land barons that the Sandinista revolution was all about. Yet he appeared very civil, gentle and family-oriented. As a farmer's son, I could appreciate his aversion to land "reform." Especially when it's your land that's being re-formed.

I thought about all the impoverished kids outside who would never get to Miami, much less Canada. To them, their suffering had been for his gain. I'm sure he had been very rich. What a biography his life would make, I thought.

That night when I asked the mayor about redistribution he replied, "Most of them (the land barons) just left when we took power. The rest we negotiated. Land distribution to the peasants is our policy." It occurred to me that land reform and nationalism, not communism, was what the revolution meant to these people. The peasants lived and worked for centuries in squalid conditions while the often absentee land barons lived the good life. Ultimately in 1979, after a bloody revolution, the peasants drove off their "oppressors" and took the land.

Unwittingly, this produced disastrous consequences. First, confiscating private property is a foolish policy for a nation needing to attract private capital. Second, they misjudged the U.S. response—war and sanctions. Consequently, the Cordoba (their currency) went from seven to one against the dollar in 1980 to 60,000 to one in 1990. Real income fell 90% during the period. Inflation was 1700% in 1989.

No politician could campaign on that record so the FSLN resorted to a slick Madison Avenue style hype campaign selling Daniel Ortega like soda pop. They offered no solutions, only the slogan "things will get better." UNO didn't have to offer anything but an alternative.

I went to the town school to see the voting. It was even more amazing than earlier. There were scores of people waiting to vote. They stood casually but very close together in a straight line. They were friendly but determined. I flashed my badge and entered the polling place with no idea how memorable the next half-hour would be.

To vote they knelt down on bare cement behind a cardboard facade and marked their secret ballots one at a time. Then they folded them purposefully and walked over to the ballot box where they carefully inserted them. It was so quiet you could hear the ballots reach the bottom. The next person in line looked on intently to see how his predecessor did it. I have never experienced a scene so moving. It was the most inspiring thing I will ever be privileged to witness. Our photographer would not leave the little room. He shot eight rolls of film. The turnout was 90% already.

We got in the town pickup truck (provided by the Sister City Committee of Fresno) and drove to the school that three Fresnans built last summer. As an avid mountain enthusiast, they could not have chosen a more breathtaking site for my senses—a magnificent perched overlook above a great expansive canyon with a tiered village in the distance on the other side. The stunning vista provided an almost surreal backdrop for the great human drama unfolding in the little school.

Again, they stood in long lines, back to belly, waiting for an hour or more. One man said he had to walk three miles each way. Another rode a burro and still another a goat. I never saw a single motorized vehicle at a polling place.

The children watched and were well behaved. Voting represented a strange new curiosity and it was happening in their school! I contemplated the future. They're watching and learning, I thought. This experience would be ingrained in their memories. Children watched their parents vote and render their opinions which would count just as much as the opinions of anyone else in the country, rich or poor. Who won was trivial compared with this.

Inside, one of the school teachers was acting as a poll worker. I asked her what she needed most. "Pencils, notebooks," she replied. "This, this" she said pointing to a chair.

A pregnant woman carefully sidestepped down a steep dirt path to cast her first free

ballot. It began to sprinkle and the wind came up but no one cared. A cow stuck his neck through the fence and swished his tail.

Back in town we met the local priest. "I've been here since 1941," he said "and things are worse now than they were then. We lost over 60 parishioners in the fighting during the last ten years. The government can't do anything."

I spent another hour with Mayor Gomez. He is a dedicated and sincere community leader. He is not very ideological. He was a teacher (mostly self-educated) who tried to set up schools throughout the area. The Front recruited him, he said. "They reached out to the young people and made them part of the action. That's why young people support them." His observation confirmed what we had sensed elsewhere.

I asked about communists in the FSLN and he replied that there were communists in UNO as well and that the communist party was listed separately on the ballot. He didn't seem too interested in them. "Can you work together with the opposition?" I asked. "Yes, we work with them. We have to get along—no problem."

Twelve-thousand people live here. There are no telephones and I didn't see any indoor plumbing. People were bathing and washing their clothes in the river alongside cattle. They cook outside so wood-gathering is a daily chore. Rural children do not beg. They play baseball with sticks and anything round.

The government built an impressive secondary school, the first ever in the area. Even critics concede the Sandinistas have done a good job improving access to education.

That night we slept in a 12' by 12' room, two on single spring bunks and three on the floor. Across the curtain door a young mother slept hugging her child. I'm told that the radio came on at three o'clock and announced the UNO victory. At dawn I caught the first rays of light through the slits where the old wood walls would not quite connect. The firefly that had entertained us vanished when the light emerged. We went to have breakfast with the mayor.

The mayor and his friends were sad but not disheartened by the national results. You could feel some tension in the streets caused by the uncertainty of young soldiers not knowing what to do or expect.

I went back to Francisco's store and asked him what the election results meant. "Maybe now I won't go to Houston," he said. "Now the U.S. will help us."

Before leaving we presented our gifts to Mayor Gomez. I told him that I hoped the relationship between Telpaneca and Fresno would become a model for a new relationship between the United States and Nicaragua. "Schools and clinics instead of war and sanctions." He nodded approvingly displaying some emotion.

After leaving some instructions with a helper, he drove behind us in the pickup all the way down the mountain to the paved road.●

TRIBUTE TO MATT F. THOMPSON

● Mr. MACK. Mr. President, I rise today to pay tribute to a great Floridian, Matt F. Thompson, who was recently selected from among more than 5,000 nominees as the Job Corps "National Volunteer of the Year."

The Job Corps utilizes public/private partnerships to assist the U.S. Department of Labor, private business, nonprofit organizations, and educational institutions to bring cost-effective educational and vocational training to thousands of economically disadvantaged young men and women throughout America.

Matt Thompson, a lifelong resident of Jacksonville, FL, is one of thousands of volunteers who worked with more than 50,000 Job Corps students last year. Since he began his volunteer service in 1987, Matt Thompson has personally assisted more than 700 Job Corps students by providing tutoring, counseling, locating employment opportunities for Job Corps students, and providing appropriate referrals.

As an assessment counselor for the city of Jacksonville, Mr. Thompson is responsible for conducting classes to assist welfare beneficiaries in gaining the skills necessary to get off of the welfare roster and onto the payroll of American business. His work with local agencies, private businesses, and State agencies has resulted in identifying and developing jobs for former Job Corps students.

In his inaugural address, President Bush called upon all Americans to return to the spirit of volunteerism. Matt Thompson exemplifies how countless thousands of Americans have answered the challenge by giving of themselves to their communities and their country. Mr. President, I am proud to have Matt Thompson as a constituent from the great State of Florida and congratulate him on being named Job Corps "Volunteer of the Year."●

EILEEN McGINLEY, BURLINGTON, VT

● Mr. LEAHY. Mr. President, Eileen McGinley of Burlington, VT, is a most remarkable woman. At 90 years old she is still an active artist and member of the community.

It has been the privilege of my wife and I to know Eileen for a number of years. We have one of her paintings hanging in the entranceway of our home. Recently, the local newspaper in Burlington did an article about Eileen and I ask to have it printed in the RECORD at this point.

The article follows:

[From the Burlington Free Press, Apr. 6, 1990]

OLD-FASHIONED PAINTING

(By Debbie Salomon)

Eileen McGinley insists on calling her landscape and still-life oils "affordable art." Price $50 to $500, including framing by her grandson. Arguing with a tiny, trim, 90-year-old greatgrandmother wouldn't be polite. Besides, she has creditable reasons.

"I want to sell these painting and give all the money to Dismas House," she states firmly. Dismas is a Burlington inter-faith, half-way house for former prisoners. So McGinley called the Chittenden Bank main office at Two Burlington Square to request display space available to local artists. Then she called the media with her story, supported by enough hard facts to bespeak her first profession: an Iowa newspaperwoman of the 1920s. "I guess you could say this is a one-woman show," she quipped, fully aware of the implication.

McGinley omitted only the critique.

She sees landscapes by the kinder, gentler light of a deeply religious person: "They're the work of the Lord," she says. Environmental upheavals have bypassed the transquil, seasonal scenes she translates, affordably, onto canvas to "help those young men get re-established in the outside world."

McGinley just can't travel as far to paint them any more, unless, for example, she spends the winter in Arizona. "I never drove a car. My husband used to drive me out into the mountains or fields near the places we lived in southern Vermont. He would read, I would paint."

After McGinley's husband died 20 years ago the outings stopped. The old mills and covered bridges remained peaceful; situations changed. "It wasn's safe; a painter friend and I waded out into a river to paint from a rock. A man approached us. He wasn't looking for solitude," she said.

After several such encounters, McGinley made do with painting close to home, from previous sketches, photographs or from a protected spot on the University of Vermont campus where Mount Mansfield dominates the background with the hovering presence of Mount Fugi.

Despite its content, McGinley's work isn't poster art. Her daisies in a pewter pitcher, tiger lilies in a bean pot and finely detailed bachelor buttons in milk glass vase carry the composition of Van Gogh. "Yachting on Lake Chaplain," the oldest of the 15 paintings on display during April, moves too vigorously with wind to have come from an age-weakened brush. "Sugar Shack" isn't sentimentalized with trappings.

"I learned to paint the old-fashioned way, in a class, when I was a teen-ager," she said. Painting was put aside while McGinley raised seven children. Artist friends provided advice and encouragement when she restarted during World War II. "I don't paint figures because I don't do them well enough. I call my work 'realism' or 'naturalism.' I haven't been to many European museums but I do like the French landscape painters, especially Monet—I'd love to see that Boston exhibit. If I could get there I'd see the annual flower show, too," she said.

McGinley painted for pleasure, or to give canvases to friends, until a guest (a nightclub entertainer, she says) saw stacks of her pictures in closets and under furniture. "Why don't you let me sell these for you?" she asked a surprised McGinley. Proceeds from this affordable art helped build a chapel at the Training School in Brandon where McGinley's youngest son, brain-damaged from encephalitis, has resided for years. Her work has been shown at St. Michael's College in Colchester, and once previously at the Chittenden Bank.

McGinley uses her age to excuse very little—"I'm just an ordinary person," she says. It's true painting is possible only during the day, using light from a window she had built into her kitchen. But she travels by city bus, attends Mass at least once a week, and is reading a book by William Manchester that "recalls the times through which I have lived." Her book—yes, she writes, but that's another one-woman

story—is about her parents' journey from an Irish sailing ship to life on the prairie. She did not find a publisher. McGinley may do a rewrite, aimed at a teen audience.

In the meantime, when the petite artists speaks, a representative of the Chittenden Bank listens: "Henry, could you hang my paintings a little lower, at eye level?"

It's not polite to argue with a lady 90 years old.●

COMPLIANCE WITH THE PLO COMMITMENTS COMPLIANCE ACT

● Mr. MACK. Mr. President, on March 19 the State Department submitted the first report required by Congress under the PLO Commitments Compliance Act, introduced last year by myself and the Senator from Connecticut [Mr. LIEBERMAN]. In requiring a report, the intent of Congress was to hold the Palestine Liberation Organization accountable for its commitments to renounce terrorism and recognize Israel's right to exist. The State Department report, unfortunately, glosses over much of the PLO's record since December 1988 in order to reach what I fear was a foregone conclusion: that the PLO has adhered to its commitments.

A number of analysts who have examined the State Department report disagree with its conclusion; they say the report, if not a whitewash, is close to it. The New Republic in its lead editorial on April 16, 1990, writes, "The central, irrefutable, and intrinsically troubling fact is that since [Yasir] Arafat renounced terrorism * * * PLO factions have regularly been launching attacks against Israel."

Barry Rubin, a senior fellow at the Washington Institute for Near East Policy, wrote in the Los Angeles Times, "The State Department report is full of misleading assertions and unfounded conclusions. * * * [It is] more likely to undermine than fortify U.S. policy." Rubin points out that the State Department's claim that it "has no evidence" that the many PLO attacks against Israel were "authorized or approved by the PLO executive committee" is disingenuous because the "PLO as a body has never carried out terrorist acts; these have always been committed by the constituent groups' military organizations."

Steve Emerson, in an op-ed in the Wall Street Journal, observes that even Egypt, which is generally pro-PLO, roundly condemned the PLO for justifying the murder of nine Israeli tourists near Cairo this February. PLO statements celebrating this and other terrorist acts were completely ignored in the State Department report. According to Emerson, the State Department rejects evidence from the Israeli Government based on interrogations of captured terrorists, refuses Israel's offer to interview them, then says it has "no evidence" that the targets of the attacks were civilians.

Emerson also charges that the State Department at first refused to call the incident in which a Palestinian steered an Israeli bus over a cliff—killing 15 Israelis and 1 American—terrorism until it had ruled out PLO responsibility.

By opening official talks with the PLO, an organization formally dedicated to the destruction of Israel and responsible for the murder of a number of American diplomats, the United States accepted a profound responsibility. That responsibility is to demand from the PLO that it transform itself and break fundamentally from its terrorist past.

The distortions and omissions of the State Department report indicate that the United States is unwilling to condemn, or even unequivocally criticize clear failures by the PLO to adhere to its commitments. It is hard to see how the U.S.-PLO dialog can be justified if these conditions continue.

I ask that a report by Anti Defamation League of B'nai B'rith, "PLO Terrorism 1989-1990: Violating the Terms of the U.S.-PLO Dialogue," and three opinion pieces from The New Republic, the Los Angeles Times, and the Wall Street Journal be included at this point in the RECORD.

The material follows:

[From the New Republic, Apr. 16, 1990]

TERRORISM LITE

Three times a year, by congressional mandate, the Bush administration must issue the Palestine Liberation Organization a report card, a written assessment of how closely it has abided by Yasir Arafat's forswearing of terrorism in December 1988. The first of these came in mid-March, and the PLO passed with flying colors. The State Department report asserts at the outset "that the PLO has adhered to its commitment . . . to renounce terrorism." Most who follow the Middle East will wonder about the honesty of such an unnuanced verdict, and even the uninitiated observer would have only to read the rest of the report to become similarly skeptical. Yes, it goes on to concede, at least nine of the thirty attacks launched against Israel by Palestinians since the PLO renounced terrorism have "involved constituent groups of the PLO." But this isn't to say, you understand, that the PLO hasn't kept its word.

The convolutions through which State Department logicians reached this conclusion are instructive. In most of these nine "border and rocket attacks," the report noted, "the intended target of the attack was unclear," and therefore can't be presumed to include civilians; thus it is impossible to say on which side of the PLO's fine line between "armed struggle" and "terrorism" these attacks fall. True, three PLO attacks were undeniably directed at civilians, such as a rocket attack on a border town in which an Israeli child was wounded (or "lightly wounded," as the report put it). But "we have no evidence . . . that the actions were authorized or approved by the PLO Executive Committee or by Arafat personally." Well, no, we don't. Even the new, upstanding Yasir Arafat hasn't yet opened the PLO's executive deliberations to C-SPAN. By this absurd standard of proof, it would be hard to prove that the PLO was ever involved in terrorism in a big way.

Now, it is true that the PLO isn't IBM, and that this chairman can't control the behavior of everyone who carries his logo. Though the Democratic Front for the Liberation of Palestine and the Popular Front for the Liberation of Palestine—both of which have plainly persisted in terrorism—occupy seats on the PLO's executive board, they are hardly Arafat's subordinates. (And still less is Arafat able to yank the leash of many fundamentalist militant Palestinians within the occupied territories, whose violence—which includes, by the way, the annual murder of many Palestinians suspected of collaboration—may in some sense be directed as pointedly at Arafat as at Israel). But bear in mind that various Palestinian terrorists once thought to be rogue groups—remember Black September?—turned out to be part of Fatah, Arafat's own PLO faction. Moreover, the U.S. dialogue that was officially sanctioned at the end of 1988 was not framed as being with Fatah alone, but with the PLO.

Besides, to get bogged down in a debate over what Arafat can and can't control, what he did and didn't approve, is to miss much of the point. The central, irrefutable, and intrinsically troubling fact is that since Arafat renounced terrorism, though Fatah itself has scaled down its direct involvement in terrorism, and perhaps ended it (Israel not implausibly contends otherwise), PLO factions have regularly been launching attacks against Israel. That means one of two things: either Arafat isn't trying to keep the PLO away from terrorism, or he isn't capable of doing so. Either way, one is forced to ponder the value of doing business with this man.

Of course, these two hypotheses aren't mutually exclusive, and both, as a matter of fact, have some truth. Still, there is value in distinguishing between them; it helps isolate what is most wrong-headed about the administration's bowdlerizing of the PLO's recent record.

The apparent aim is to keep the peace process alive. The decision in late 1988 to open communications with the PLO was premised on its continued renunciation of terrorism, and Secretary of State James Baker's fear seems to be that casting much doubt on Arafat's fidelity to this oath might lead Congress to step in and end the dialogue. So Baker chooses, in the name of the greater good, to see no evil.

This is dishonesty of the worst kind: the unproductive kind. Consider again our two hypotheses. To the extent that Palestinian terrorism continues because of Arafat's sheer impotence, things look bleak for the Middle East's immediate future in any event. For the Palestinian problem ever to reach peaceful resolution, Palestinians must have enough political coherence to entrust one person, or one organization, or at least one reasonably unified coalition, with their voice. Obviously, if Arafat and the PLO don't fit that bill, no one else now does. To be sure, if the peace process acquires momentum, and Arafat comes closer to the prize of real Palestinian statehood, his power within the PLO may in some measure grow. And certainly, in that regard, the lack of recent progress is far from being all Arafat's fault; the Israeli government hasn't been showering the Palestinian people with auspicious overtures. But the larger point remains: to the extent that the State De-

partment is right—that Arafat lacks the power to sharply curtail PLO terrorism—things look unpromising regardless of what the State Department does or doesn't say.

To the extent, on the other hand, that Arafat is able but unwilling to stifle terrorism, then things may look better—but only if his attitude changes. It is in this light that the danger of the administration's sophistry is most glaring. Obviously, if Arafat doesn't get his hand slapped when a few PLO missiles find their way into an Israeli town, missiles are likely to keep flying. And once they stop "lightly wounding" and start killing, lasting peace will be more remote than ever.

Actually, the State Department says it has slapped Arafat's hand. Shortly after insisting that he can't be blamed for the PLO's behavior, the report states: "We have made it clear to the PLO that these activities raise serious questions about the PLO's commitment to renounce terrorism. We are disappointed that the PLO has not found a more authoritative way to distance or disassociate itself from activities undertaken by constituent groups acting independently. . . ." Disappointed? At the first official meeting between the United States and the PLO, in December 1988, the United States warned that the new dialogue would be ended if terrorism "by the PLO or any of its factions" continued, and it stressed that the PLO would be expected to condemn publicly all Palestinian terrorism. Now, fifteen months later, PLO factions have persisted in terrorism, and Arafat and his colleagues have done their best to avoid clearly condemning it. (Last summer, after fourteen passengers on an Israeli bus were killed by a Palestinian terrorist, Bassam Abu Sharif, a close adviser of Arafat's, said, "This is not terror. Shamir and his government are the terrorists.") And now, the United States declares itself to be disappointed with the PLO's performance? How about an expression of, say, outrage? Or perhaps even words to this effect, stated publicly: "If terrorist attacks by the PLO continue at their present rate over the next year, we will have to reassess the value of sustaining a dialogue with the PLO."

The administration's aversion to issuing a warning even this fuzzy seems to lie in its fear that the bluff will be called: if Arafat can't or won't stifle terrorism, then the United States will sooner or later have to make good on its threat to stop talking to him, thus throwing a wrench into the works. But again, if Arafat is unable, even under pressure, even after the application of whatever political lubricant he possesses, to make the machine run, then the works are pretty thoroughly messed up to begin with. One more wrench is unlikely to hurt appreciably, and it could end up helping.

[From the Los Angeles Times, Mar. 22, 1990]

How Low Will We Stoop for Arafat?

(By Barry Rubin)

The State Department's new report on the PLO and terrorism may be the most intellectually devious government document since the Vietnam War era. Equally regrettable, this paper is more likely to undermine than to fortify U.S. policy.

Obviously, the Bush Administration chose to trim the facts to suit its thesis that the Palestine Liberation Organization has no involvement with terrorism. The serious miscalculation on which this decision is based—incarnated in the congressionally mandated report released on Monday—may come back to haunt Secretary of State James A. Baker III.

The United States had long demanded that the PLO stop using terrorism before we would negotiate with it. Yasser Arafat made such a promise in December, 1988, and a U.S.-PLO dialogue began. Thereafter, the government stance has been that it must, at least publicly, deny that the PLO is responsible for terrorism—in effect, becoming an apologist for Arafat—or it would have to end the dialogue and abandon the hopeful Israel-Palestinian peace process.

This is a foolish premise. It would have been untenable for a U.S. government to whitewash Soviet human-rights violations or other misdeeds as a condition for bilateral negotiations. Publicly criticizing such acts is basic diplomatic leverage.

The State Department is now in the situation of highlighting criticisms of Israel and rejecting any censure of the PLO. This refusal to be honest about PLO terrorism has seriously undermined Israeli confidence in the United States and makes it harder for Israel to make the concessions required in the peace process.

The U.S. stance also makes the PLO believe that it can get away with continued cross-border attacks on Israel. If the United States does not acknowledge the depredations of the PLO now, what would it do if a Palestinian state broke treaty commitments?

The State Department's report is full of misleading assertions and unfounded conclusions. To name just a few:

The report stresses the absence of evidence that the PLO leadership or Arafat has officially approved any terrorist operations since December, 1988. In fact, the PLO as a body has never carried out terrorist acts; these have always been committed by the constituent groups' military organizations.

The report suggests that three PLO member groups carrying out attacks are marginal, having little to do with the PLO command. In fact, they are the equal of Arafat's group, Fatah. The report does not mention that the leader of the PLO delegation in the dialogue is the No. 2 man in one of those groups.

Although Fatah has greatly reduced its terrorism, the Bush Administration refused to examine Israeli evidence of specific attacks involving Fatah cadres. The report does not even acknowledge the existence of these claims.

Particularly dangerous is the report's refusal to define attempted attacks across the Lebanon-Israel border as terrorist. The argument is that it is not clear what the targets were because Israel killed or captured the terrorists en route. The Administration willfully refused to examine captured evidence of intended targets or even public statements by the PLO member groups. Two Third World diplomats cynically told me that Israel should allow some PLO guerrillas to murder civilians in order to prove its claim.

The State Department says that the PLO has lived up to the resolution of the September, 1988, Palestine National Council. In fact, the State Department rejected that document at the time as not having met minimum U.S. criteria for the PLO's recognizing Israel and rejecting terrorism. The real test is whether the PLO lives up to the more forthcoming promises made by Arafat in Geneva in December, 1988.

The report does not tell members of Congress that the State Department's confidential talking points to the PLO demanded that it "publicly disassociate" itself "from terrorism by any Palestinian group operating anywhere." If any PLO group or its members committed terrorism, "We expect that you not only condemn this action publicly but also discipline those responsible for it, at least by expelling them from the PLO." Even Egypt's government has criticized Arafat's refusal to condemn such operations. To cite one example, Fatah's No. 2 man, Abu Iyad, defined an attack near the Israeli town of Dimona last year, in which three Israeli civilians were murdered, as a legitimate case of armed struggle.

The U.S.-PLO dialogue should continue. But the Israel-Palestinian peace process can only achieve an historic compromise—possibly including a national homeland for the Palestinians—if it is approached honestly. The U.S. government should not twist reality in order to defend the PLO's reputation.

(Barry Rubin, a senior fellow at the Washington Institute for Near East Policy, is author of "Inside the PLO; Officials, Notables and Revolutionaries," published by the institute.)

[From the Wall Street Journal, Mar. 22, 1990]

The Bush Administration's PLO Cover-Up

(By Steven Emerson)

A month ago, terrorists opened fire on a bus of Israeli tourists near Cairo. Nine Israelis were machine-gunned to death. When the Palestine Liberation Organization issued a statement that appeared to justify the attack, the Egyptian government made its fury known to the PLO and the world media. And what was the official American reaction to the PLO statement? Nothing. Not a word.

Refusal to criticize the PLO has now become a cornerstone of Bush administration policy. The latest manifestation of this disposition to whitewash the Palestinian group is the report that the State Department presented to Congress on Monday, as required by the PLO Commitments Compliance Act enacted last month.

In December 1988, Yasser Arafat told the world that he "renounced" terrorism and "recognized" the state of Israel. By uttering those magic words, Mr. Arafat immediately gained the recognition of the U.S. But Mr. Arafat has a long history of saying one thing and doing another. In fact, just one month before. Mr. Arafat had been denied a visa to the U.S. by the Reagan State Department because it found that, despite his claims that he had abandoned terror, he was directing terrorist acts through such front groups as Force 17 and the Hawaii Organization.

CONDEMN TERROR

At the first meeting between U.S. and PLO representatives in December 1988, the Americans told the PLO—according to a list of "talking points" recently published by the Israeli government—that the dialogue would be broken off if the PLO resumed terrorism: "No American administration can sustain the dialogue if terrorism continues by the PLO or any of its factions." In addition, the U.S. required the PLO to "publicly disassociate" itself from "terrorism by any Palestinian groups operating anywhere." Finally, the U.S. said that it expected the PLO to condemn any terrorist act carried out by "any element of the PLO" and to expel that element from the PLO.

The Bush administration maintains that the PLO has met those conditions. Monday's State Department report says, "the PLO has adhered to its commitment undertaken in 1988 to renounce terrorism."

But what about the numerous terrorist attacks on Israel since December 1988? The State Department report reluctantly acknowledge that nine "border attacks"— the new diplomatic euphemism for terrorist attacks—against Israel have been launched by "constituent groups of the PLO" over the past 14 months. Those incidents do not invalidate the report's conclusion, the report says, because "the intended target of the attack was unclear" except for three of the attacks in which the report concedes that "civilians appeared to be the target." But the three attacks directed at civilians were, the report insists, neither authorized nor approved by Mr. Arafat or the PLO Executive Committee.

All of this is dangerously misleading or positively untrue. The State Department report omits any mention of the multiple terrorist attacks carried out by groups that sit on the PLO Executive Committee, including raids by Mr. Arafat's Fatah group. Constituent groups of the PLO have openly taken credit for more than 18 attempted terrorist attacks on Israel from Labanon, Egypt, Jordan and the Mediterranean over the past 14 months. In the West Bank and Gaza, many Palestinians have been murdered at the explicit—and documented—direction of the PLO and Fatah.

As for the nine PLO that the State Department report does acknowledge, it is not true that there is no evidence about their targets. There is clear and compelling evidence that the intended target of each one of them was civilian.

To take just one example: On Jan. 26, three guerrillas armed with machine guns, grenades and explosives attempted to penetrate the northern Israeli border from Lebanon. Intercepted by Israeli soldiers, the squad was killed in a shootout. In the terrorists' possession, besides weapons, was a map revealing one—and only one—target: a kibbutz called Misgav Am. The group that claimed responsibility for the abortive Misgav Am attack—as well as five others that were equally unsuccessful—is the Democratic Front for the Liberation of Palestine, which sits on the PLO Executive Committee. One of the DFLP's senior officials, Yasser abd al-Rabbu, is the head of the PLO delegation to the U.S.-PLO dialogue in Tunis.

Confronted with this accumulation of evidence, State Department spokesman Adam Shub averred: "None of the cross-border attacks has succeeded, so we don't know what the targets would have been. Therefore we can't call them terrorist. We don't know what they were planning." The State Department dismisses the written evidence from the Misgav Am raid as "inconclusive." When offered transcripts of the confessions of captured terrorists by the Israeli government, the State Department said that the interrogations were not "reliable." When offered an opportunity to interview the captured guerrillas first-hand, the U.S. refused.

When the Bush administration finds itself unable to deny that an attack occurred, it blames some rogue Palestinian element, never the PLO itself. As Monday's report puts it, "We have no evidence in those cases or any others that the actions were authorized or approved by the PLO Executive Committee."

But this is to misunderstand how the PLO works. The PLO is an umbrella organization, and its central committees do not attempt to control the operations of its member groups. The issue is not, what does the PLO Executive Committee order or authorize; the issue is, are the groups that constitute the PLO complying with the commitment they collectively made to the U.S. in December 1988? As State Department spokesman Charles Redman said in March 1989, "If the PLO cannot or will not exercise such control, it raises questions concerning the commitment undertaken in the name of the PLO—indeed, questions about the PLO's ability to carry out its commitments."

The Bush administration is particularly at pains to avoid criticism of Mr. Arafat's own Fatah wing of the PLO. On Dec. 5, five guerrillas infiltrated the Israeli Negev from the Egyptian Sinai. They carried no identification and the labels in their clothes had been cut out—all they had were Kalashnikov rifles, explosives and 51 grenades. Israeli soldiers intercepted them.

Faced with incontestable documentation that the five were affiliated with Fatah, John Kelly, assistant secretary of state for Near East and South Asian Affairs, argued before Congress three weeks ago that while "there may have been Fatah members involved," they were "operating without sanctions from their leadership." In private conversation, though, State Department officials have admitted Fatah sponsorship of the attack. It is highly unlikely that Mr. Arafat, a man who insists on approving the smallest actions of his Fatah organization, down to the purchase of its fax machines, could have been unaware of it. The attack is not mentioned in the State Department report.

The contortions the Bush administration goes through to protect the PLO can verge on the grotesque. Last August, a Palestinian fundamentalist from Gaza wrenched the steering wheel of an Israeli bus away from the driver. The bus plunged into a ravine: 15 Israelis and one American were killed. The terrorist act was captured on television, and within six hours of the incident, the Israeli government had provided a detailed accounting of the attack.

The usual unnamed State Department official termed the event "senseless" and "tragic"—but categorically refused to label it an act of terrorism.

WHY THE DELAY?

Only after two days had elapsed—and after a bitter Israel protest that the Bush administration's failure to condemn the murder gave a "license to kill every Palestinian individual or organization"—did the State Department see fit to label it a terrorist attack. Why the two day delay? A State Department spokesman said at the time that the U.S. had only belatedly acquired the necessary information. But in fact, according to a senior U.S. official, the real reason was that the Bush administration was afraid that the mass slaying had been a PLO operation. Only when PLO responsibility was ruled out did the administration feel free to call it a terrorist operation.

Last summer, the Israelis dispatched Yigal Carmon, the Israeli government's adviser on counter-terrorism, to Washington with proof—maps, documents, leaflets—that, despite the American "talking points," PLO groups had not ceased their terrorist raids. He also brought tapes of speeches in Arabic by Mr. Arafat in which he condoned terrorist attacks.

State Department officials at first refused to meet with Mr. Carmon, before finally agreeing to a perfunctory meeting. But the Bush administration apparently did not feel confident that others would find Mr. Carmon's documents quite so uninteresting—so he was instructed not to speak to Congress and the media.

On March 1, Secretary of State James Baker testified before Congres. ". . . we have not received or seen evidence of complicity or encouragement or acquiescence by [Mr. Arafat] of terrorist activity." If Mr. Baker has not seen the evidence, it is because he has ordered his underlings not to collect it.

(Mr. Emerson, who writes frequently on foreign and intelligence matters, is the coauthor of the forthcoming book "The Fair of Pan Am 103: Inside the Lockerbie Investigation" Putman.) ●

PANAMA PACIFIC INTERNATIONAL EXPOSITION

● Mr. WILSON. Mr. President, February 20, 1990, marked the 75th anniversary of the Panama Pacific International Exposition, a world's fair committed to advancing such principles as toleration, cooperation, and mutual respect and admiration. The Gusty Foundation, chaired by Noel M. Stewart, is honoring this anniversary and the principles on which it was based on April 28, 1990. I would respectfully ask that my colleagues in the Senate join me in recognizing the social and historical importance of the exposition and its goals. I would also ask that the Gusty Foundation be commended for their noble efforts in honoring this momentous occasion as well.

The Panama Pacific Exposition celebrated the completion of the Panama Canal and the rebirth of San Francisco from the ruins of the great earthquake of 1906. Fifty-one counties of California, 33 States of the Nation, and 25 nations of the world were represented in an area of less than a square mile, transforming this small area into a microcosm of diverse cultural accomplishments and aspirations. the exposition became symbolic of a spirit of friendship and understanding between diverse peoples and political entities.

This spirit lives on today in the form of the Gusty Foundation, an organization devoted to restoring the tugboat *Gusty* to pristine condition and thereby keeping the ideals of the original exposition alive. The tugboat *Gusty* is one of the few surviving symbols of the original exposition. Used in the construction of the exposition lagoon its restoration will symbolize the continuing commitment of all involved to the ideals of the original exposition as well as provide the present generation with valuable insight to the history of California's shipping and fishing industries.

It is with great pride that I ask my Senate colleagues to join me in saluting the achievements of the Gusty Foundation in commemorating this

significant event in U.S. history. The reaffirmation of principles such as toleration, cooperation, and mutual understanding, inherent in such an achievement, should be applauded and emulated. Therefore, I consider it my privilege, as well as my duty, to commend the Gusty Foundation for its noble ideals and actions.●

DELTA QUEEN STEAMBOAT CO. CELEBRATES 100 YEARS OF STEAMBOATING

● Mr. JOHNSTON. Mr. President, I rise today to honor an important part of America's heritage. Originally used to transport crops and cargo, these vessels were later used for passenger transportation and have inspired the imaginations of young and old alike. I speak, of course, of the great steamboats of our country.

In the 19th century, steamboats were a common sight on our Nation's rivers. At one point during the century, there were more than 11,000 paddlewheelers on the Mississippi and Ohio Rivers alone. Steamboat navigation allowed our inland waterways to serve as highways of discovery for explorers, trappers, voyagers, and settlers of America's heartland.

Steamboats made an immeasurable contribution to the development of towns and businesses along the river banks. By supplying a reliable means of transporting goods such as cotton and sugar cane, these vessels helped businesses to spring up and later to thrive.

Images of the steamboat era evoke feelings of nostalgia in the American heart. Visions of southern belles, diamond studded gentlemen and such famous personalities as President Lincoln, General Grant, and Mark Twain fill the imagination with thoughts of romance and adventure. Today there is a company whose two steamboats serve to preserve that magical era. These "floating white wedding cakes," as they are sometimes called, are owned and operated by the Delta Queen Steamboat Co. of New Orleans which is celebrating its 100th anniversary this year. The company was founded by Capt. Gordon C. Greene whose family eventually owned 28 different steamers.

The only two overnight paddlers that remain from the thousands that once carried passengers are the *Delta Queen* and the *Mississippi Queen*. The former, listed on the National Register of Historic Places since 1970, and recently designated a National Historic Landmark, is the only authentic, fully restored, overnight steamboat in the world. The majestic *Mississippi Queen* was commissioned in 1976 and recalls the traditional lines of steamboats from bygone days. It is the most luxurious steamboat ever to navigate America's rivers. Both boats have unique charm. They combine the Victorian elegance of the steamboat era with the convenience and luxury of floating palaces.

Today I would like to recognize the contributions steamboats have made in American history, from transporting valuable freight to providing a deluxe mode of passenger travel. I salute the Delta Queen Steamboat Co. for its efforts to preserve the wonder, romance and adventure that is steamboating.●

INDEPENDENCE FOR THE REPUBLIC OF LITHUANIA

● Mr. WILSON. Mr. President, I rise this morning to salute the brave men and women of the Republic of Lithuania who dare to imagine a world beyond the shadow of Communist domination.

Armed only with the weapon of freedom's inspiration, the citizens of this Republic demand that the Soviet Union permit them to regain their independence.

The British historian Paul Johnson wrote that in the 20th century, the power of government to repress became much more evident than its power to liberate.

Johnson also reminded us, however, that alongside this tragedy of modern times, democracy also succeeded around the world to the greatest extent ever in history.

And so we now face the question of whether the Lithuanian people will continue to live under the tragedy of dictatorship or realize, as they would like, the promise of democratic pluralism.

I need not belabor the point, Mr. President, that these people now stand at a crossroads. But their fate will play a significant role in determining which of these two political options—the tragedy or the promise—shall become the rule rather than the exception in the governance of this globe.

President Bush understands this challenge. He knows that firm leadership from the United States in support of the captive nations of communism will help the Lithuanians secure their freedom.

President Gorbachev faces this challenge. He knows that communism has only proven efficient at murdering millions and producing stagnation. He has yet to confess the contradiction of trying to make Soviet society more just by only tinkering with a system designed to prohibit its own reform.

But Lithuania's independence is a necessary condition for Gorbachev's success as a reformer. His political position within the Kremlin can only weaken if the gridlock over this issue continues.

At the same time, Mr. President, the Lithuanian Government is not simply waiting for Gorbachev to negotiate. On the contrary, it has repeatedly invited him to do so.

President Landsbergis has offered to directly discuss every Soviet concern about Lithuania until both sides can reach an agreement.

He has explicitly acknowledged Soviet military interests in having a secure and stable border with Eastern Europe.

He has appealed for a close relationship of trade and economic exchange with Moscow.

He has directly offered to discuss the sensitive problems of service in the Red army by Lithuanian residents and the land ownership claims of the U.S.S.R.

And he has opened the door to a gradual, orderly withdrawal of his Republic from the Soviet Union.

The United States, Mr. President, must continue to actively support the Lithuanian Government on each of these points and work to achieve the needed international recognition for President Landsbergis so that he can go to the Kremlin as a credible leader of his people.

We cannot hesitate in reminding the Soviets that America, as one of the world's greatest birthplaces of liberty, will never stop defending Lithuania's natural right to sovereignty.

Gorbachev is running out of excuses. Rumbling tanks and puppet prosecutors will not solve either his problems or those of the Lithuanians. We must impress upon him the moral and political imperative to deal with President Landsbergis in a dialog leading to self-determination for his people.

I am confident, Mr. President, that the Lithuanian leaders will deliver the democratic promise to their land. They have once again taught the world a lesson that men and women can build institutions of tolerance and prosperity if they are only left free.

In this case, the solution exists. It only awaits implementation by a realistic Soviet state and a willing Lithuanian Government.●

BROWARD COUNTY, FL SENIORS HONORED

● Mr. GRAHAM. Mr. President, I would like to take this opportunity to honor several Broward County, FL seniors on the occasion of their March 14, 1990 induction to the Dr. Nan S. Hutchinson Broward Senior Hall of Fame.

It is my pleasure to congratulate Sara L. Pettis, Louise and Robert Creider, Nora L. Goldner, Faye Hollander, Lester B. Trussler, Marie Young, Joanna Bloneva Hayes Bradley, Gerald Kirschenberg, Irvin Footer, Adele Jacobs, Esther Grossman, and Rose R. Sandle for their extensive community servie efforts.

Each of these outstanding individuals have resided in Broward County for at least 10 years and consider south Florida their home. The seniors have volunteered with area hospitals, the Foster Grandparents Program, and the Meals on Wheels Program, among others. Many of these folks have logged in impressive volunteer schedules of tens of thousands of hours.

By honoring these seniors through induction at the Broward Senior Hall of Fame, they are being recognized for their unselfish dedication to the community. Senior citizens have been especially effective and generous in donating their time to volunteer service in Florida. That is why I introduced national service legislation in 1989 to promote senior citizens voluntarism and convened a hearing on elderly volunteers in Boca Raton, FL.

Mr. President, I ask you and my Senate colleagues to join me in congratulating these impressive Americans. Their commitment and accomplishments serve as an example to all of us, and I encourage them to continue their national service endeavors.●

EDWARD MARTENSON ARTICLE "PUBLIC SUPPORT: A CONTRACT WITH THE ARTS"

● Mr. DURENBERGER. Mr. President, much has been said lately about the Government's role in funding the arts, and the role of the National Endowment for the Arts in providing that funding. I ask to submit for the RECORD an article by Edward Martenson of the Guthrie Theater in Minneapolis that I believe carefully points out the societal benefits of Federal funding of the arts and the need for continued support.

The article follows:

PUBLIC SUPPORT: A CONTRACT WITH THE ARTS

(By Edward A. Martenson)

Taxpayer support for the arts is not a handout. It is recompense for public service.

In 1965, the government began to subsidize the arts modestly, in ways that were carefully designed to address some important public purposes. Specifically, these public purposes were:

(1) advancement of the arts, and elevation of American culture;

(2) de-centralization, or enhanced availability of indigenous art in all regions; and

(3) price moderation, so that the arts are affordable to all citizens.

These public purposes are consistent with, but not primary to, the priorities of the artists whose activities are subsidized. Understandably, their primary focus is on creativity and command of craft.

For artists, contributed support is simply a necessary source of funds. Good art may be commercial, but it is not necessarily so; most great art of the past was not. Because the marketplace alone never has supported all art of great merit, artists always have depended on subsidy.

This fact is of concern to the public as well as to artists and private philanthropists. While private philanthropy can ensure the availability of art to the private patrons, public support is our way of ensuring that the arts are not limited to wealthy persons in two or three urban centers. Government, therefore, has a distinct purpose within the framework of arts funding: in a democracy, the public interest demands that art must be available to the many, not to the privileged few.

While government is not obligated to support the arts, a free society is obligated to guarantee the freedom for expression that is art's lifeblood. Not less than in the field of journalism, an atmosphere of free expression is essential to the vigor with which artists perform their function in society. It is no more in the public interest to tame the arts than it would be to hamstring the press.

Because freedom of expression is inconsistent with an exercise of political approval over the content of artworks, the very concept of public arts support depends on political self-restraint. In effect, the public accepts the possibility of an art work that offends as a price to be paid for the greater good that stems from broad availability of the arts in general.

(That public support for the arts is a fragile concept, easily upset by lack of political restraint, is recognized most clearly by its opponents. If they can impose a narrow standard for acceptability of content, they know that artists themselves may come to repudiate public support.)

In general, it is most reasonable to regard public art support as a social contract between public and artists. The public desires cultural advancement, de-centralized availability of the arts and the absence of class-oriented price barriers; in exchange it agrees to respect the a priori requirement for an atmosphere of artistic freedom. The artists desire financial assistance, and in exchange they agree to produce and disseminate their work in ways that serve the public purposes described above.

Obviously, this fragile arrangement can be jeopardized when taxpayers are offended by artworks they have helped to finance. That they may be offended is both understandable and legitimate. Art sometimes reflects the extremes of social reality as well as its middle. Its subject matter is the human condition in all its forms, including aspects of our behavior that some might find more comfortable to deny.

The predictable desire to formulate public policy so as to avoid controversy is no more logical in arts support than it is in relation to government actions in defense, nuclear energy or highway planning. If the test for the appropriateness of government action were that it generated no strong opposition, there would have been no progress in civil rights, labor relations or the environment, nor would we ever succeed in identifying locations for prisons and nuclear waste.

(Recent events suggest that those who are patient with controversy over some government actions, but cannot abide it over arts grants, are precisely the people who don't think art is important enough to disagree about.)

The ability of the people to disagree among themselves is a source of strength for our democratic system. Not every disagreement is the government's business to resolve, most particularly if it arises from a matter of taste. Conservatives and liberals agree on this point, but a surprising number from both camps believe that financial participation creates an obligation on lawmakers to establish limits for the public taste.

The appropriate test for government arts support—the one applied to other government programs—is whether most of the people agree most of the time. Public arts support meets this test with bi-partisan flying colors, because the vast majority of it flows to artists and arts institutions that clearly benefit the public.

The arts have held up their end of the social contract, serving the public interest in ways both qualitative and demonstrably quantifiable. In the lifetime of the NEA, resident theater institutions have expanded from 25 to over 400; they are organized not-for-profit, and so work for public, not private gain; they are located in every region, not just in New York; they have extensive programs; and admission can be gained to most of them for the price of a movie. These are aspects of a public-spiritedness that stems from public support.

But the "contract" between artists and the public can remain strong only so long as public officials restrain themselves from exercising approval over the art's content. Unfortunately, political self-restraint is now undergoing its greatest test in 25 years of public arts support.

The burden of restraint is great for public officials precisely because they are public officials. Even on occasions when an artwork is outside the norms of good taste, lawmakers and the public could reasonably see it as an isolated case that does not affect the overall usefulness of public arts support. On the other hand, a lapse of restraint on the part of public officials necessarily involves an imposition of greater political control (whether or not liberal censorship is involved), and the result is diminished freedom of expression for all.

It is true that withholding of subsidy is not necessarily the same as censorship. But it also is true that withholding of subsidy on grounds of disagreeable content could not be lawfully selective. Such a practice would be a first amendment infringement. (For example, the government may not withhold price support payments from a farmer because he advertises his support of a particular political party or position.)

Those who approve of withholding subsidy on content grounds do not seem aware that guidelines regarding the public acceptability of political, sexual and religious themes would apply to all who apply for NEA support. For this reason, systematic review of content poses a threat to the creative independence of all artists and arts organizations, regardless of their place in the aesthetic spectrum. Even without official censorship, the effect could be the same.

Much misconception stems from the impression that the NEA paid the entire cost of the two photos exhibitions that stimulated the recent controversy, and that it therefore is solely responsible for their availability. In fact, this is not true. The NEA's authorizing statute generally requires at least a one-for-one match for its grant funds; an important implication is that federal money generally cannot flow into an arts project unless it also is validated by private gifts and audience interest. The NEA is far from alone in having seen merit in these projects, and it was a minority partner in financing them.

What damage would be caused by the breakdown of public arts support?

Some suppose that the "punishment" would be felt only by artists and arts institutions, and, of course, it is true that the financial shock to them would be significant. Artists—actors, orchestra musicians, ballet

dancers and writers, as well as visual artists—would be hungrier than they already are.

But the greater effect would be measured by a decline in the quality, quantity and scope of cultural services offered to the public. In particular, the arts would be far less able to pay attention to those important purposes that justified the public support in the first place.

Instead of a noble effort to elevate our civilization, we would embrace a cultural outlook that values only the lowest common denominator. Instead of trying to make the arts available in all regions, once again they would find financial sustenance only in the wealth-concentrated urban centers. And instead of trying to make the arts affordable to all, we would return to a time when the arts were only for the rich.●

ST. BARNABAS MEDICAL CENTER CELEBRATES 125 YEARS

● Mr. LAUTENBERG. Mr. President, on May 12, 1990, the St. Barnabas Medical Center in Livingston, NJ, will celebrate the 125th anniversary of its founding. I rise to congratulate this outstanding medical facility which has educated young doctors since 1880.

Over the years this outstanding medical facility, the first incorporated hospital under New Jersey law in the State, has been recognized throughout the country for its many achievements. The first kidney transplant in New Jersey was at St. Barnabas, and today the medical center is a national leader in treating end-stage renal disease and transplantation.

Thousands of critically burned patients have received treatment and care at the St. Barnabas Burn Center, New Jersey's only certified burn unit. Today St. Barnabas is one of the five leading gynecologic oncology centers in the Northeast, and its radiation oncology department is recognized for its treatment, training, and research programs. More than 70,000 babies have been delivered at St. Barnabas, and this year its high-risk maternity center will deliver over 5,000 infants.

I am pleased to commend the many achievements and contributions of this outstanding medical facility. I congratulate St. Barnabas as it celebrates its 125th year, and may its fine work continue for many more years to come.●

SALUTE TO THE RECYCLING EFFORTS OF ALCAN RECYCLING

● Mr. McCONNELL. Mr. President, I rise today to recognize the efforts a company in Kentucky is making to address three vital issues facing our Nation: solid waste management, energy conservation, and clean air. Alcan Recycling, a division of Alcan Aluminum Corp., recently opened the world's largest aluminum can recycling facility in Berea, KY.

This facility, Mr. President, will produce about 120,000 tons of recycled aluminum a year. To do so, the plant will operate 7 days a week, 365 days a year, recycling 6 billion cans annually. The facility will support about 100 industrial jobs and provide a substantial boost to the economy of the region.

Through its new recycling facility, Alcan is directly addressing the issue of solid waste management. Recycling is one of the four cornerstones of any responsible solid waste management program. The other three are source reduction, landfills, and combustion.

As our Nation's landfill capacity dwindles and local opposition discourages the siting of new landfills, we are rapidly running out of space to put our garbage. Combustion of solid waste involves certain environmental and health risks, and, again, local opposition has precluded siting of new combustion facilities. Recycling has, therefore, assumed an increasingly important role in municipal solid waste management. The Alcan facility in Berea will contribute significantly to the recycling efforts of the Nation in general and of Kentucky specifically.

Alcan is also addressing the issue of energy conservation. As a Nation, we need to reexamine our energy conservation policies. Environmental concerns and resource availability dictate that we must develop new ways to conserve our energy resources. Recycling in general, and recycling of aluminum in particular, is an important step in this direction. At the Alcan recyling facility, creating a new can from an old can requires only 5 percent of the energy needed to create a new can from virgin materials. I'm told that, in 1 year, the energy saved from aluminum recycling would light every home in Kentucky.

Finally, Mr. President, Alcan is addressing the issue of clean air. Clean air, as we all know, has become a very important issue in this Nation. This Congress will soon debate the first major overhaul of the Clean Air Act in 13 years. One of the problems with which we will wrestle is how to balance the need for clean air with the need to maintain a healthy, industrial-based economy. Well, Mr. President, Alcan is doing its part to balance these needs. Alcan's Berea recycling facility is equipped with over $9 million of state-of-the-art pollution control equipment, meaning that over 20 percent of the cost of the Alcan facility is devoted to clean air.

Mr. President, I am proud to represent in the Congress a company so committed to environmental stewardship. The executives and employees of Alcan are to be applauded for their foresight and their understanding of the challenges of our day and for their dedicated efforts to meet those challenges.●

HUTCHINSON ELEMENTARY SCHOOL'S ACCENT ON WRITING

● Mr. HOLLINGS. Mr. President, permit me briefly to salute the fine efforts by Hutchinson Elementary School in Herndon, VA, to stimulate and cultivate in its pupils a lively interest in quality writing.

Nobody ever said that writing is a simple skill. Sports writer Red Smith once remarked ironically, "Writing is easy. All you have to do is sit down at a typewriter and open up a vein." Nonetheless, there are few disciplines taught in our public schools that are more critical to the future success of our young people. Good, solid writing skills are the common denominator of success in virtually every major profession. Accordingly, the teachers and principals who place special emphasis on developing writing skills have truly got their eye on the ball.

Hutchinson Elementary has implemented a whole range of special initiatives aimed at encouraging its pupils to write. One of those initiatives is Young Authors' Week, which the school will observe during the week of April 30 to May 4. Guest speakers from a variety of professional backgrounds will visit the school to speak about the ways they use writing in their jobs and in their private lives.

Not only is Young Authors' Week a great idea educationally. It is also a superb example of a school's using its imagination to reach out to the surrounding community in order to enrich its curriculum. I would like to salute Principal Frank Mehm, as well as Ann Kavanagh, who is directing Young Authors' Week. Their innovative accent on writing is an idea that other schools can learn from.●

DICKINSON CHAMBER OF COMMERCE HONORS BUSINESS AND EDUCATION LEADERS

● Mr. CONRAD. Mr. President, the Dickinson, ND, Chamber of Commerce has honored Donna Fleming and William P. Reiter for their outstanding contributions in the fields of education and business and in community service. Mrs. Fleming is a proven leader and her contributions to Dickinson and the North Dakota education community are many--from chairperson of the Dickinson High School English Department to directing the North Dakota NEA Learning Lab. I am pleased that the community has honored her for her contributions. I ask that the article "Chamber to honor teacher, business person" from the Dickinson Press be printed in the RECORD.

The article follows:

[From the Dickinson (ND) Press, Mar. 27, 1990]

CHAMBER TO HONOR TEACHER, BUSINESS PERSON

The annual Chamber of Commerce Business and Education Banquet is being held tonight to recognize a local educator and business representative for outstanding contributions in their field and community.

This year, the awards will be presented to Donna Fleming and William P. Reiter.

Donna Fleming is an English teacher and department chair at Dickinson High School. She received her bachelor's degree in education from Mayville State University, and completed graduate work at North Dakota State University and the University of North Dakota. She also received a grant to study Chaucer in London, England and Carleton College. She is active in the Dickinson Education Association, served as a delegate to the Midwest Leadership Conferences and to the NEA national convention. She is chairperson of the North Dakota NEA Learning Lab, advisor of the student newspaper, "The Chronicle," and advisor of the Student Congress team. She received "Coach of the Year" award—Student Congress during 1988, has served on the advisory board and state planning committee for the State CloseUp, and participated in National CloseUp in Washington, D.C. during 1984–85.

Fleming has been recognized as a "Distinguished Teacher from North Dakota," Presidential Scholars Program, and a delegate to state and national Democratic conventions. She has served as a CommUniversity presentor, served on Northern Plains Ethnic Festival Committee and has taught Czech classes for Dickinson Arts Council and Dickinson Performing Arts Camp.

Highlights of her career including winning the state championship in Student Congress for five years in a row and being asked to chair the NEA Learning Lab. Her children include James, Michael, Randy and Allan Parke, Michelle and Will Fleming.

William P. Reiter is owner and manager of Reiter Welding, Inc., an oilfield service welding repair and manufacturing; Dakota Homes Inc.—oilfield living quarter rentals; and Reiter Satellite Systems—satellite sales and service.

He graduated from Dickinson High School and North Dakota State School of Science. He is married to Janet Reiter, and they are the parents of Brian, Tim, Jeff, Bradley and Sara.

Reiter has served as past president of North Dakota Metalworkers Association and advisory board of Trade Technical Division at Dickinson High School. He received the "KC of the Month" and "KC Family of the Month" awards, past president of Queen of Peace Parish Council and Trinity Booster Club, general chairman of 1990 Trinity Mardi Gras, and warden for the Knights of Columbus. He is a member of the Dickinson Chamber of Commerce, the Greater North Dakota Association, Knights of Columbus, Elks Lodge, German Hungarian Lodge, and Trinity Booster Club.

He said the highlights of his career was purchasing Reiter Welding from his father, designing and building the first Dakota Homes trailer, and establishing Reiter Satellite Systems.●

HARRIET ALEXANDER NATURE INTERPRETATIVE CENTER

● Mr. BOSCHWITZ. Mr. President, on April 12, I was privileged to visit the Harriet Alexander Nature Interpretative Center in Roseville, MN. Built with a $320,000 bequest from Harriet Alexander to the Roseville Central Park Foundation, this exciting new center has been furnished with many gifts from the private sector. The city of Roseville is funding the maintenance, instruction, and security, as well as the hiring of a part-time naturalist. It's thus an exciting example of how the public and private sectors are working well together in Roseville.

The center will provide environmental and nature programs for seniors, schoolchildren, families, organizations, and just about anyone interested in, or concerned about the environment. Covering 52 acres of mostly untouched land, the center already has lots of small animals and is expected to attract over 150 species of birds when completed.

It it another Minnesota example of thinking globally and acting locally to protect our precious environmental heritage. It is also an outstanding instance of private benefactors, many, many volunteers, and governments getting together to promote an environmental enterprise that will benefit everyone. Contributions, some large, some very small, have come in from most everybody in town—from the American Legion and VFW posts, from businesses and the Park Foundation itself, from small children sending in nickels and dimes.

President Bush has challenged us all to plant a billion new trees in the United States this year. Well, I planted one of them, a white pine, in Roseville last week, when I visited the center. They anticipate that volunteers will plant 10,000 seedlings, mostly pines and maples, in the nature center over the summer months.

The center will be formally dedicated on Earth Day, April 22. I was pleased to be able to visit the center last week and am very proud to be associated with the fine public spirited citizens of Roseville. And decades from now, their children and their grandchildren will visit those 52 wooded acres, listen to the birds, and be grateful for those people who had the foresight, imagination, and energy to create the Harriet Alexander Center.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS UNDER RULE 35, PARAGRAPH 4, PERMITTING ACCEPTANCE OF A GIFT OF EDUCATIONAL TRAVEL FROM A FOREIGN ORGANIZATION

● Mr. HEFLIN. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD notices of Senate employees who participate in programs, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35 for Senator ROTH to participate in a program in England, sponsored by the Ditchley Foundation, from March 30–April 1, 1990.

The committee has determined that participation by Senator ROTH in the program in England, at the expense of the Ditchley Foundation, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Robert McArthur, a member of the staff of Senator COCHRAN, to participate in a program in the People's Republic of China, sponsored by the Chinese People's Institute of Foreign Affairs in conjunction with the US-Asia Institute, from April 9–17, 1990.

The committee has determined that participation by Mr. McArthur in the program in the People's Republic of China, at the expense of the Chinese People's Institute of Foreign Affairs, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Christopher Miske, a member of the staff of Senator PACKWOOD, to participate in a program in the People's Republic of China, sponsored by the Chinese People's Institute of Foreign Affairs in conjunction with the US-Asia Institute, from April 9–17, 1990.

The committee has determined that participation by Mr. Miske in the program in the People's Republic of China, at the expense of the Chinese People's Institute of Foreign Affairs, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Susanne Martinez, a member of the staff of Senator CRANSTON, to participate in a program in the People's Republic of China, sponsored by the Chinese People's Institute of Foreign Affairs in conjunction with the US-Asia Institute, from April 9–17, 1990.

The committee has determined that participation by Ms. Martinez in the program in the People's Republic of China, at the expense of the Chinese People's Institute of Foreign Affairs, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Mr. Gordon MacDonald, a member of the staff of Senator HUMPHREY, to participate in a program in the People's Republic of China, sponsored by the Soochow University, from April 8–14, 1990.

The committee has determined that participation by Mr. MacDonald in the program in the People's Republic of China, at the expense of the Soochow University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Edward Edens, a member of the staff of Senator WARNER, to participate in a program in Taiwan, sponsored by the Soochow University, from April 8–14, 1990.

The committee has determined that participation by Mr. Edens in the program in Taiwan, at the expense of the Soochow University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Maria Gomez, a member of the staff of Senator COATS, to participate in a program in Taiwan, sponsored by the Chinese Culture University, from April 10 to 17, 1990.

The committee has determined that participation by Ms. Gomez in the program in Taiwan, at the expense of the Chinese Culture University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Mr. Jazwick, a member of the staff of Senator SYMMS, to participate in a program in Taiwan, sponsored by the Tunghai University, from April 10 to 17, 1990.

The committee has determined that participation by Mr. Jazwick in the program in Taiwan, at the expense of the Tunghai University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Mary Hawkins, a member of the staff of Senator DECONCINI, to participate in a program in Germany, jointly sponsored by the Congress-Bundestag Staff Exchange and the United States Information Agency [USIA], from April 20 to May 6, 1990.

The committee has determined that participation by Ms. Hawkins in the program in Germany, at the expense of the Congress-Bundestag Staff Exchange and the United States Information Agency, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for John Balbach, a member of the staff of Senator HUMPHREY, to participate in a program in Germany, jointly sponsored by the Congress-Bundestag Staff Exchange and the United States Information Agency [USIA], from April 22 to May 6, 1990.

The committee has determined that participation by Mr. Balbach in the program in Taiwan, at the expense of the Congress-Bundestag Staff Exchange and the United States Information Agency, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Vicki Hicks, a member of the staff of Senator BURDICK, to participate in a program in Taiwan, sponsored by the Tunghai University, from April 10 to 17, 1990.

The committee has determined that participation by Ms. Hicks in the program in Taiwan, at the expense of the Tunghai University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35 for Jim Arbury, a member of the staff of Senator RIEGLE, to participate in a program in Germany, jointly sponsored by the Congress-Bundestag Staff Exchange and the United States Information Agency [USIA], from April 20 to May 6, 1990.

The committee has determined that participation by Mr. Arbury in the program in Germany, jointly sponsored by the Congress-Bundestag Staff Exchange and the United States Information Agency, is in the interest of the Senate and the United States.●

TRIBUTE TO MICHAEL VERSTANDIG, PRESIDENT OF WINDOW HEADQUARTERS, INC., RECIPIENT OF THE 1990 SBA AWARD

● Mr. D'AMATO. Mr. President, I rise today in recognition of the efforts of Mr. Michael Verstandig and his small business Window Headquarters, Inc., which through its remarkable efforts, has been chosen to receive a 1990 Small Business Administration Award.

In 1984, Window Headquarters [WH], Inc., was founded in Brooklyn, NY, by entrepreneur Michael Verstandig. At that time, Window Headquarters consisted of three employees—of which Mr. Verstandig was himself one—one truck, and a loan from the Small Business Administration. Despite its modest beginnings, however, Mr. Verstandig and his two partners, Daniel and David Malek, soon transformed WH into a well-managed and highly productive enterprise. WH currently employs 45 people, and operates seven offices throughout New York and abroad in Israel. As further illustration of its many successes, WH's sales have risen from $1 million in 1984 to over $8 million today, and the company's expansion and profits show no sign of receding.

Although, the outstanding business achievements produced by Mr. Verstandig's efforts are admirable, Window Headquarters, Inc., must also be commended for its commitment to its community. The company participates in a myriad of local volunteer organizations, such as the Halfloh Institute, Tomchei Shabbos, a social welfare organization, and the Young Israel of Staten Island, which sponsors religious programs for students. Moreover, WH not only offers its time, but also donates its doors and windows to needy organizations in the local community.

Small business is the backbone of the American economy: Its employs 6 out of 10 American workers, and produces greater than half of our country's goods and services. The furnishing of capital and long-term loans by the Small Business Administration is critical to the rejuvenation of the United States, and the successes of businesses such as Window Headquarters, Inc., are intrinsic to our overall economic health. For that reason, President Bush has again designated May 6 through May 12, 1990, as "Small Business Week," during which time the SBA will honor those companies such as Window Headquarters, Inc., that have not only shown great financial achievement, but also give something back to the community by creating jobs and increasing the State's productivity.

It gives me great pleasure to congratulate Window Headquarters, Inc., on its success, and I would like to personally thank Mr. Verstandig and the Small Business Administration for their vital contribution to America's future.●

HOOSIER HEROES: JIM CREWS COACHES READING ACES INTO A WINNING TEAM

● Mr. COATS. Mr. President, Jim Crews, head basketball coach at the University of Evansville, has another winner on his hands. Since he arrived in Evansville in 1985 Crews had molded that school's team, the Purple Aces, into a regional powerhouse. The number of Aces victories has risen from 8 the first year to 63 in the last 3 years. Even more significant perhaps is the fact that his players are not academic slouches. Last season, for instance, 8 of the 16 players had grade point averages of 3.0 or higher. One, Scott Haffner, became a first team Academic All-America, and is now a professional player in the NBA. Evidently Crew's crews are just as good in the classroom as they are on the court.

Flushed with such successes, Crews has been putting together another team known as the Jim Crews Reading Aces. Students in grades four through eight in the 20 elementary schools and 10 middle schools of the Evansville-Vanderburg school area are being recruited by their teachers to be members of this team.

The goal Crews has set for his new team is to excite students about reading. To become team players students must read certain numbers of pages assigned by teachers from library books, which the students choose. When the reading goals are reached,

the students win free admission to the Aces basketball games. They also receive certificates of merit from Crews and Purple Aces players. Teachers keep individual scorecards, stamping each player's card every time the student completes a specified number of pages. When all the squares are stamped in bright purple, the Aces' color, the student wins and it officially a Jim Crews Reading Aces.

Parents receive brochures explaining the program and goals set for their child. And each participating classroom is kept up to date on the students' achievements with large Reading Aces scorecards that hang in the rooms.

Nearly 8,400 students are currently enrolled in grades four through eight in area public schools, but not everyone may choose to participate in the program. However, Jack Humphrey, director of reading and special projects for the Evansville-Vanderburgh School Corporation, predicts that the project will be so popular that the stadium will be filled, and nearly all eligible students are expected to take part. Moreover, according to Tom Heaton, advertising manager of the Citizens Bank, the Reading Aces program is expected to be an annual event and in future years is likely to expand to include Evansville's parochial and private schools and many tristate schools as well.

The program is being supported by a number of Evansville area businesses, which are vitally interested in promoting literacy. One local corporation which is heavily involved is the Citizens Bank of Evansville. The idea for the Reading Aces program grew out of the bank's plan to underwrite a community service project that would benefit young people and feature local hero Jim Crews. Crews, himself an avid reader, suggested developing a reading program. Bank officials eagerly agreed, and Crews and the Citizens Bank began working with the Evansville-Vanderburgh school administrators and teachers to establish the Reading Aces.

According to the Evansville Courier, Crews applies the same principles that he has used in building winning basketball teams. "The only way you win at sports is to know—and practice—the basics," Crews is quoted as saying. "Reading is the basic building block for everything else you will learn. And reading also can be relaxing and enjoyable." Like Mr. William Vieth, president of Citizens Bank and CNB Bancshares, Coach Crews is convinced that children are America's most valuable resource, and education is the key to their future.

Mr. President, it is clear that without good reading skills, today's young people will be unable to compete in tomorrow's workplace. The Jim Crews Reading Aces program augments a number of other reading projects provided by the Evansville schools. The importance of this particular program is that it puts a well-known, popular sports figure, a person of considerable class and talent, at the head of a local effort to promote the importance and the joys of reading. It involves students, parents, teachers, businesses, the entire community in an effort which can only pay off in better education and more productive lives for youngsters. It gets everyone—especially students who need it the most—excited about reading.

For Coach Jim Crews, the Reading Aces poses another challenge and promises another victory. I congratulate him for spearheading this local program to encourage reading. And I salute the teachers and business leaders of Evansville, especially the Citizens Bank, for their work making the Reading Aces a success.

Mr. President, I ask that the text of an article on "Jim Crews Reading Aces" from the Winter 1990 issue of the University of Evansville magazine be printed in the RECORD at this point.

The article follows:

JIM CREWS READING ACES

In four years as basketball coach at the University of Evansville, Jim Crews has managed to accomplish what has eluded many of his peers.

He produces winners on the court and in the classroom. For example:

*The number of Aces victories since Crews arrived in 1985 has gone from eight to 16 to 21 to 26.

*Eight of last season's 16 players produced grade point averages of 3.0 or better, and one, Scott Haffner, was a first team Academic All-American.

*All 10 players who have finished their senior years under Crews at Evansville have graduated.

*Two members of this year's team—fifth year seniors Dan Godfread and Larry Brand—already have their bachelor's degrees and are enrolled in graduate school.

Now, Crews is lending his name and time to a new project that has little to do with basketball, but a lot to do with the classroom. The Jim Crews Reading Aces program was developed last summer as an incentive to increase and improve reading among all 10,000 children in grades four through eight in the Evansville-Vanderburgh School Corporation.

"I've always felt that athletics should be geared toward benefiting the kids," Crews says. "Those of us in athletics need to set examples for young people, and if this program can encourage kids to read and enjoy reading, we've accomplished something.

"It needs to be an ongoing process, though. We do no good by creating a reading program for six months or one year and then forgetting it. We need to encourage the kids, give them an opportunity to find out that reading can be both fun and educational, and then keep encouraging them as they get older."

Three different segments are involved in getting the Jim Crews Reading Aces program into the hands of 10,000 fourth through eighth graders. One is Citizens National Bank of Evansville, which is paying for the program. Citizens is publicizing it through advertisements and billboards, and is providing posters for each classroom and "scorecards" for each student to mark reading progress. The bank also picked up the tab for tickets to the Aces' February 8 game against the University of Detroit for all students who met their reading goals.

Secondly, the development of the reading program has been left to the experts—namely the teachers and administrators within the Evansville-Vanderburgh School Corporation. Each teacher has created reading goals for his or her students, and the students are then on the honor system in reporting their progress.

"We gave each school the option of being part of the Jim Crews Reading Aces program," says Dr. Jack Humphrey, supervisor of reading and special projects for the school corporation. "Not only did they all want to participate, but they all wanted to get started ahead of time. The enthusiasm for this program is outstanding, and much of the credit has to go to Coach Crews. People in the community have a high regard for him and the projects he undertakes."

Crews, of course, is the third segment in making the reading program go. He has been visiting schools and promoting the program since it was made public in October. After the Aces' season is completed, Crews and his players will personally present certificates at the schools to children who reached their reading goals at the end of the program.

"All of us can remember back to our school days when the teachers made us read as part of our assignments, and that often seemed like more work than fun," Crews says. "Our message here is that reading is not only important for your education, but that it can be fun, also. The kids are being given realistic goals to shoot for so they can feel a sense of accomplishment and if Aces basketball can help them get enthusiastic over reading, then that's great. After all, part of our responsibility is to give something back to young people."●

WALL STREET JOURNAL ENDORSES CONGRESSIONAL TERM LIMITATION

● Mr. HUMPHREY. Mr. President, a comprehensive editorial in the April 18 Wall Street Journal illustrates the driving force behind the concept of term limitation: the constituency. The Wall Street Journal points out that even as 70 percent of Congress opposes term limitation, the public supports it 2 to 1. The dichotomy between the public and Congress on the issue of term limitation is the very reason why that same public has so overwhelmingly embraced such a reform: Congress repeatedly disappoints its constituency on a host of crucial issues.

The public wants a representative, responsive government, whose primary concern lies outside of the beltway. Some say that the public has only to exercise electoral power, and place new and idealistic legislators into office. Yet elections have become 98.5 percent predictable, and in many districts no alternative candidate exists to challenge an incumbent. The public craves a far-reaching reform that is

Congress proof; one that will guarantee a steady flow of new talent into government.

Mr. President, we are public servants. Simply, if the public desires term limitation, we must serve them in that regard. I ask that the Wall Street Journal editorial appear in the RECORD following my remarks. I urge all Senators to act in their capacity as public servants, and heed the desires of those they serve.

The editorial follows:

[From the Wall Street Journal, Apr. 18, 1990]

LAWMAKERS FOR LIFE

As Congress goes back into session today, the gulf between legislators and the American people has never been greater. A recent Gallup survey found that 70% of House Members oppose the idea of limiting the number of congressional terms, while the public backed the idea two to one. Now a detailed New York Times/CBS poll has found that Members of Congress may be the only demographic group in the country that doesn't favor limits on terms. The rest of the country is frustrated with a legislature where the turnover is about that of the non-elected British House of Lords.

CURBING THE INCUMBENTS

Do you think there should be a limit to the number of times a member of the House of Representatives can be elected to a two-year term, or not?

[In percent]

	Favor	Oppose
Total sample	61	31
By party:		
Republicans	64	28
Democrats	60	30
Independents	58	33
By philosophy/ideology:		
Liberal	58	34
Moderate	64	30
Conservative	63	29
By Presidential preference:		
Voters pro-Bush	61	32
Voters anti-Bush	60	28
By race:		
White	61	31
Black	61	27
By gender:		
Men	57	35
Women	63	27

Sources: New York Times/CBS News poll. Survey of 1,515 adults conducted March 30–April 2, 1990, with a 3% margin of error.

The idea of limiting terms is overwhelmingly popular with Americans regardless of party, ideology or income. Women are more in favor of the idea than men. Martin Plissner, political director for CBS News, says he has "never seen an issue on which there was so little demographic variation." The message is clear. Dissatisfaction with Congress is almost universal.

The root of the problem with Congress is that barring major scandal, it is almost impossible to defeat an incumbent. In the past three elections, 96% or more of House incumbents who ran won. This lack of turnover has resulted in legislative arrogance, a dearth of new ideas and unaccountability. Congress just violated its legal budget deadline; where are the special prosecutors?

Franking privileges, huge staffs, gerrymandering and unfair campaign finance laws have combined to give incumbents a grossly unfair advantage. One out of four House districts this year likely will have an incumbent running with no major-party opposition—up from one out of five in 1988. One-candidate races are now spreading to the Senate. Democratic Arkansas Senator David Pryor had spirited competition in 1984 when he won with 57%; this year he has no opponent at all.

Senators have become just as brazen as their House brethren in shutting out competition. Take Republican Senator Larry Pressler's latest mailing to South Dakotans. It contains five pictures of the Senator and mentions his name 29 times on four pages. Last year, Mr. Pressler sent out more than 2.8 million pieces of mail, the equivalent of 10 pieces per household.

Critics of term-limits say that—franked mail or not—it's wrong to blame Congress for the now nearly 100% re-election rates since it is just as easy to vote against an incumbent as for. Michael Kinsley writes in the New Republic that if incumbents always win, it's because voters can't be bothered.

This presumes that voters can find out who the other candidate is. It is a political axiom that people won't vote for someone they know nothing about. That takes money, and skewed campaign finance laws combined with taxpayer-paid junk mail effectively mean that only incumbents have the cash to make themselves known and to be taken seriously by the media. Incumbents ended the 1988 elections with $63 million left over, while challengers were able to raise and spend a total of only $39 million.

Some complain that limiting terms would infringe on democracy by not allowing voters to elect whom they please. The polls indicate voters by two to one think the only way they can control Congress effectively is by limiting terms. We also note that these critics are not agitating in support of Ronald Reagan's call for repeal of the two-term limit for Presidents. A big problem of the current system limiting Presidents but not Congress is that this means political power is constantly tipped in a favor of the legislative branch.

Getting incumbents to reduce the advantages they have voted themselves is something like asking banks to leave their vaults unlocked. That's why the Washington, D.C.-based Americans to Limit Congressional Terms is asking states to call for a constitutional amendment to limit terms. It already has won in Utah and South Dakota. This fall, the group will try to get both incumbents and challengers to pledge they will not serve more than 12 years in office.

Self-imposed limits on officeholding were once part of this country's public-service ethic, with Members returning to private life after a couple of terms. As late as 1860, the average length of House service was four years. The number of freshmen in a new House never dipped below 30% until 1901. In the current House it is 8%.

Term limitation, once the accepted American tradition, has been replaced by congressional careerism. The opinion polls for term limitation show that the voters don't like the change. They now think the voluntary service limitation of the past must be made mandatory.●

POLISH KATYN MASSACRE COMMEMORATION

● Mr. RIEGLE. Mr. President, 1990 marks the 50th anniversary of the Polish Katyn massacre. This year, however, the commemoration of the massacre has brought unexpected news from the Kremlin. After decades of official denials, the Soviet Government reversed its rejection of responsibility for the massacre and admitted that Stalin's secret police had killed some 15,000 Polish officers and others after Soviet forces occupied parts of Poland in April and May 1940. This atrocity, which for years has fomented suspicion and ill will between the Poles and the Soviet Government, must never be forgotten.

That fateful spring is remembered bitterly by the Polish people, as Soviet authorities did not even allow access to the site in the Katyn Forest until 1988. It was only after Nazi storm troopers captured the region during World War II that the bodies of approximately 4,500 Polish officers were discovered. The Nazis and several international commissions, including the Red Cross, discovered documents in the uniforms of the soldiers and other direct evidence which revealed that Soviet secret police committed this heinous act of genocide in 1940. Until recently, however, the Soviets have blamed the Nazis for the crime, saying that the killings took place in 1941, while the Katyn Forest was in German hands. While the bodies of 4,500 people were found, 10,000 Poles interned at camps in Starobielsk and Ostashkow vanished without a trace. For thousands of Polish families, this is an outrage beyond compare.

The Katyn massacre and the Soviet denial of culpability for this tragedy have been at the center of bitter feelings among Poles toward the Soviet Government. This longstanding point of animosity reached a turning point, though, when on April 12, the Soviet Union officially admitted responsibility for the massacre and expressed "profound regret" to the Polish people and Government. Bronislaw Geremek, leader of Solidarity's political arm in Parliament and a close adviser to the Polish Government, believes that the Soviet Union's admission of guilt could lead to improved relations between Poland and the Soviet Union. He said:

This acceptance of guilt is important for Polish-Soviet relations. The words were pronounced that murder was committed and those who did it were named. These were words that we waited for a long time. It can be said that now, just now, the possibility is open that relations between Poland and the Soviet Union can be put on the right track.

Tass, the official press agency, expressed the Soviet Union's profound regret over the Katyn tragedy, calling it "one of the greatest crimes of Stalinism." Still, many Poles expect more than an admission of guilt. Solidarity leader Lech Walesa commented that while "It's good that criminals admit their crimes, * * * " there must be "punishment of those guilty of the genocide" and reparation for the survivor's families. Understandably, a simple apology for the slaughter of

thousands of Poles falls short of the amends that many Poles would have the Soviets make for this terrible crime.

I believe that commemoration of the massacre at Katyn is important because it forces us to remember the horror of the past so that we may never again experience such a tragic event. While I am glad that the Soviet Union has finally acknowledged responsibility for the Katyn massacre, the atrocity committed against the Polish people must never be forgotten. The President of Poland, Wojciech Jaruzelski, wrote eloquently about the memory of the victims of Katyn in the visitor's book at the site in the Katyn Forest on April 14, 1990:

They fought for an independent Poland. They died innocently, far removed from their families and homeland. They were faithful to Poland and to military honor until they breathed their last. In tribute and in lasting memory to Polish officers, victims of the cruel Stalinist regime.●

TRIBUTE TO BONNI ELLEN SMILES

● Mr. D'AMATO. Mr. President, I rise today to pay tribute to an exceptional teacher and individual, Bonni Ellen Smiles, who sadly passed away on January 22, 1990.

The contributions of Mrs. Smiles to her students, her family, and her entire community were tremendous. The extent of her commitment was partly evidenced by the myriad of community and educational organizations to which she belonged. She was involved in the Jewish Secular Shul of Suffolk County, the East End Reading Council, the International Reading Association, the Port Jefferson Parent-Teachers Association, the Western Suffolk Teaching Center, the Smithtown Teachers Association, and the Special Education PTA. As a Cornell alumnus, Mrs. Smiles interviewed potential Cornell candidates, and was also a member of the Port Jefferson Village Long-Range Planning Committee.

Despite these many involvements, however, Mrs. Smiles was first and foremost a teacher. In these times of increasing concern over the quality of our students' education, it is more important than ever to praise those teachers whose dedication and ideals transform not only the lives of their students, but of their community as well.

Mrs. Smiles is survived by her husband, Peter, and her three sons, Adam, Joshua, and Jacob. Mrs. Smiles will be sorely missed by her family, friends, and students, and I would like to offer my sincere condolences to them all.●

RETIREMENT OF REV. ROBERT E. GIRTEN

● Mr. LUGAR. Mr. President, I take this opportunity to call to the attention of my colleagues Rev. Robert E. Girten, who recently announced his retirement from the position of executive director of the Wayne County Opportunities Industrialization Center, Inc. [OIC] in Richmond, IN. Since 1974, Reverend Girten has provided leadership to this community-based organization as its principal organizer and founder.

Since 1966, Reverend Girten has served as pastor of Mount Moriah Baptist Church and has devoted nearly a quarter of a century of service to his community and the State of Indiana. He established the Wayne County OIC, an affiliate of the national organization, which has provided adults with educational services, job training assistance, employment opportunities, and other services. Under Reverend Girten's leadership, programs were developed to address the youth of his community offering dropout prevention, remedial education, and skills development. In addition, Reverend Girten pioneered the establishment of low-income housing for the city of Richmond.

Born October 15, 1915, in Washington County, KY, Reverend Girten graduated from Bates High School in Danville, KY, before attending Simmons University, where he received baccalaureate degrees in theology and divinity. Reverend Girten is married and the father of three. His community activities include his service as past president of the NAACP local chapter, and past chairman of the Human Rights Commission.

I take great pleasure today in recognizing Rev. Robert E. Girten for his leadership and service to his community, the State of Indiana, and our Nation. On behalf of the citizens of Indiana, I wish him continued success as he begins the next chapter of his life.●

COMMEMORATING THE 25TH ANNIVERSARY OF VALLEY HIGH SCHOOL

● Mr. BRYAN. Mr. President, I rise today to celebrate the 25th anniversary of the founding of Valley High School in Las Vegas and to recognize the school's continuous service to the city of Las Vegas, Clark County, and the State of Nevada.

Since Valley High School opened in 1965, it has graduated approximately 19,000 young men and women. To meet the increasing demands of a thriving and rapidly growing Las Vegas, Valley High School has expanded to serve 2,760 students in grades 10–12, while maintaining a student body and faculty dedicated to the pursuit of excellence in education. Approximately 70 percent of Valley's graduates further their education at institutions of higher learning. In fact, in recent years the school has developed one of the largest advanced placement and international baccalaureate programs in the Nation. In May 1989, more than 500 dual credit exams were administered to the school's junior and senior classes.

Yet, Valley is also dedicated to the overall development of its students. Recognizing the numerous other talents of Las Vegas' young men and women, the school has encouraged creation of more than 40 clubs and organizations on campus, many of which are dedicated to serving the community. In addition, the school has developed a tradition of athletic excellence, achieving 49 Southern Zone titles and 33 State titles in the past 25 years.

There are many reasons for the economic and cultural expansion of the Las Vegas area and our State. However, we cannot overlook the invaluable contributions made to Las Vegas and our entire State by Valley High School alumni. Their talent and success cannot be more ably represented than by the accomplishments of Tara Silvestri, a 1985 graduate, who was selected this year as a Rhodes Scholar.

Mr. President, it is with great pride that I mark the week of April 23–27 as Valley High School's Silver Anniversary Week, in honor of the alumni, student body, faculty, and administration who have made Valley High School the outstanding institution that it is today, and to say thank you to everyone associated with this school for their never ending contributions to Nevada.

Mr. President, I ask that certain correspondence and a profile related to this event be printed in the RECORD.

The materials follows:

VALLEY HIGH SCHOOL,
Las Vegas, NV, March 5, 1990.

Hon. RICHARD BRYAN,
U.S. Senator, Las Vegas, NV.

DEAR SENATOR BRYAN: Valley High School is celebrating its 25th year of service to the City of Las Vegas, Clark County and the State of Nevada. Valley High School has contributed a vast number of accomplished graduates during that period of time to our city, state and nation. The high school has always been looked upon as one of the leading secondary high schools in the State of Nevada. In fact, in recent years the school has emerged with one of the largest Advanced Placement and International Baccalaureate programs in the nation. Our academic accomplishments received the ultimate compliment this year when Tara Silvestri, a 1985 graduate was selected as a Rhodes Scholar.

We have selected April 23–27 as our silver anniversary week. We plan to hold a ceremony on April 25 to recognize some of our distinguished graduates, Valley High School educators that have served over the past twenty five years and unveil an anniversary plaque. The keynote speaker for the evening will be our Rhodes Scholar, Tara Silvestri. We would be very honored if you

could attend and would, of course, place you on the agenda as an honored guest. A formal invitation will follow this letter at a later date.

We are soliciting your support for a proclamation for April 25th or the week of April 23-27 recognizing Valley High School's significant contributions to the city, county and state. If a proclamation is not appropriate, any form of recognition from our leading governmental agencies that would highlight our graduates, our student body, our parents, and the many educators who have served so capably at Valley High School would be truly appreciated.

Sincerely yours,

MIKE EDWARDS,
Principal, Valley High School.

SENATOR BRYAN: We really appreciate you placing our Silver Anniversary in the CONGRESSIONAL RECORD. The 2,760 students at Valley and the approximately 19,000 graduates will be honored.

Enclosed is a school profile and an invitation to the ceremony.

MIKE EDWARDS.

VALLEY HIGH SCHOOL 1965-90

Valley High School opened in 1965-66 with grades 8-11. In 1989-90, it is a large metropolitan high school of 2,760 students serving grades 10-12. The facility has 7½ acres under one roof. The school facility was originally designed for modular scheduling, was altered over the years to accommodate a more traditional program and in 1986-87 the facility was totally vacated for an entire year to remove all asbestos and to retrofit the school to meet the Nevada Fire Code Laws. The student body was housed for one year at Chaparral High School and returned to a new campus in 1987-88. The facility is, today, one of the most atheistically beautiful high schools in our nation.

From the very beginning, the school established a reputation for academic excellence. Approximately 70% of the graduates each year go on to further their education in institutions of higher learning. Valley High School graduates have made major contributions in the professional, political and business world. Today, the school has one of the largest Advanced Placement and International Baccalaureate programs in the nation. In May of 1989 more than 500 dual credit exams were administered to juniors and seniors at Valley High School. The students who graduate from the Advanced Placement and International Baccalaureate programs excel at our nation's most prestigious universities. The academic program received the ultimate compliment in 1990 when Tara Silvestri a 1985 graduate was named a Rhodes Scholar.

There are more than 40 clubs and organizations on campus. A high percentage of the clubs have a reputation for service to the community. The Key Club has been the flagship of the service oriented clubs, and it is recognized as one of the best Key Clubs in the Western United States. The marching band and symphonic band have traditionally received superior ratings in Nevada and California competitions. The songleaders and cheerleaders have qualified to compete in the national finals in their respective categories; both made the National Cheerleaders Association finals in Dallas, Texas this past year. Dance Bravo has been the leading dance group in the Clark County School District dance festival over the past decade and its instructor Miranda Ogawa, was named the Southwest Dance Instructor of the year in 1989.

Valley High School has a tradition of athletic excellence. The school has achieved 49 Southern Zone titles and 33 State titles in its athletic programs over the past 25 years. Most notable are 4 straight men's basketball championships, 6 state titles in baseball during the 1980's, 6 straight women's state tennis titles, 5 straight wrestling titles in the 1970's, and dominance in soccer since it became a competitive sport. This has all been accomplished without sacrificing the development of ethics, character and sportsmanship.

Testimony to Valley High School excellence comes in many forms. A survey conducted with Valley High School parents in March 1990 provided the school with a B+ on the question what grade best describes your overall opinion of Valley High School. The school's reputation with the most prestigious institutions of higher learning is constantly reinforced by the number of scholarships and/or acceptance of Valley High School graduates to these institutions.

Competitions are held throughout the United States in academics, athletics and activities. Valley High School is always at the forefront; it is recognized as a first class high school institution!●

COMMEMORATING THE CENTENNIAL OF THE 1890 MORRILL ACT AND CONGRATULATING ALABAMA A&M UNIVERSITY AND TUSKEGEE UNIVERSITY FOR THEIR UNSWERVING DEDICATION TO EXCELLENCE

●Mr. SHELBY. Mr. President, Alabamians are fortunate to have two preeminent institutions of higher education located in the State. Alabama A&M University and Tuskegee University, with their international reputation have played a vital leadership role in the development and growth of Alabama. The history of these universities is a history of black Americans, and a history of growth and change in America.

In 1890 the Congress recognized the importance of assisting the development of several universities. The outgrowth of this recognition was the second Justin Morrill Act of 1890. This act has helped these fine universities contribute to agriculture through teaching, research, and service. Overall, the commitment Alabama A&M and Tuskegee has to excellence is best shown through the programs established, degrees granted, the composition of faculty, and the relationship the universities have with the community. The institutions are uniquely qualified to provide a top quality education for all promising scholars.

Located in Huntsville, AL, A&M University is a multicultural and cosmopolitan institution with 45 foreign countries and 41 States represented among its students. More than 57 percent of the faculty hold doctorate degrees. The university's public service and community programs have been expanded through the small business development center, the child development center, the national youth sports program, the Upward Bound Program, and the agricultural extension services.

Tuskegee University was conceived by a strong coalition of local citizens and State legislators. Lewis Adams, a former slave and self-established leader of the black community was the first person to urge the establishment of a normal school for blacks. Tuskegee enrolls more than 3,500 students and its teaching faculty numbers more than 300. International students and faculty represent over 50 nations.

Tuskegee's current mission states in summary:

Tuskegee University accomplished its central purpose of developing leadership, knowledge and service through its undergraduate, graduate, professional, research, and outreach programs. Through these programs, students are encouraged not only to pursue careers but to be of service to the society and to remain active lifetime learners. The university seeks to instill a robust thirst for knowledge and a vibrant quest for wholesome patterns of personal and social ethics that have philosophical and spiritual depth. In the process, it seeks to help each student develop an appreciation for the finer traits of human personality, the beauty of the earth and the universe, and a personal commitment to the improvement of the human condition.

Without question, America has benefited from these universities' commitment to excellence. The incurable desire to learn is being cultivated on these two campuses. It is with great pleasure that today we officially recognize Alabama A&M University and Tuskegee University's laudable contributions.●

TRIBUTE TO DR. ADELE HANSEN WOOD

● Mr. INOUYE. Mr. President, recently, professional nursing lost one of its most outstanding national leaders, Dr. Adele Hansen Wood. Since 1978, nurses who sought to pursue careers as nurse scientists were most likely to have had some contact in person or by telephone with Dr. Wood. As director of the National Research Service Award Program of the Division of Nursing, Health Resources and Services Administration, U.S. Public Health Service, and as Chief of the Research Development and Review Branch of the National Center for Nursing Research at the National Institutes of Health, Dr. Wood encouraged, supported, and often motivated "her fellows" through conversations. She was always available to them: providing guidance through the labyrinth of the bureaucracy, helping to make choices about career directions, and keeping in touch even after they obtained their advanced degrees and had begun their research careers. She served as a role model for all nurses—

truly a most compassionate person and leader, ever mindful of finding ways to improve the quality of patient care through research.

Dr. Wood was a licensed clinical psychologist. She served as a member of the U.S. Navy Nurse Corps during World War II and the Korean conflict, completing her military service with the rank of Commander. Before joining the Division of Nursing, U.S. Public Health Service, she was an educational specialist with the Naval Health Sciences Education and Training Command, National Naval Medical Center, where she developed in-service training models and modules of instruction for which she received a Distinguished Service Award. Dr. Wood also served as nursing education consultant with J.B. Lippincott, educational psychologist with the Human Life Foundation, and a staff member of the Naval Medical Research Institute, Bethesda, and Naval Medical Research Unit No. 4 at Great Lakes Naval Training Center IL. Dr. Wood retired from the National Institutes of Health in June 1989; she died of cancer on February 27, 1990, in Ridgewood, NJ. She is survived by her sister, Ella H. (Mrs. Richard E.) Davies, 76 South Murray Avenue, Ridgewood, NJ.

As a living memorial to a person who helped so many individuals in their achievements in nursing as practitioners, teachers, administrators, and researchers, the American Nurses' Foundation [ANF] has established "The Dr. Adele H. Wood Research Grant Award" fund. Dr. Wood will also receive, posthumously, the first Distinguished Service Award of the American Academy of Nursing to be bestowed at its annual meeting in October 1990. Those of us who have been active in nursing issues will truly miss her guidance and vision. I am confident, however, that her "students" will keep her vision alive and flourishing.●

THE 25TH ANNIVERSARY OF HEAD START

● Mr. RIEGLE. Mr. President, I am pleased to join my people across the country in celebrating the 25th anniversary of the Head Start Program. Head Start has been a pioneer program in the area of early childhood development. Through innovative approaches, it has become one of the most successful of all Federal programs.

Research has shown that providing high-quality education and services for preschool children from low-income families is a very effective means of preparing these children for their formal school years and preventing many problems later on. The Head Start Program is successful because it recognizes that high-risk children can have many needs, that they require adequate nutrition and health care, as well as educational activities appropriate to their level of development. It also emphasizes parental involvement which is essential to helping each child develop to his or her potential.

The tragedy of Head Start is that we still do not reach all the children who need help. Only one in five eligible children are currently served. The President is proposing a $500 million increase for Head Start which would enable 180,000 more children to participate. I hope we will be able to fund this increase this year to bring these services to more families, and work toward making it possible for all eligible children to participate in Head Start. I believe this is an important investment in our Nation's future that will help these children become healthy and productive citizens and will also save us money in the long run.

This is an important year for Head Start because it is up for reauthorization. I am pleased to be a cosponsor of legislation to extend and expand this program. Our goal is to have all eligible 3- to 5-year-old children served by 1994. I am also cosponsoring a resolution to commemorate the 25th anniversary of Head Start to help highlight the importance of this program to our Nation's children.

I am encouraged by the attention now being given to early childhood issues. Part of the debate over the need for better and more widely available child care and enhanced early education reflects an increased awareness that helping our Nation's children early in life will also help prevent problems like delinquency and high dropout rates. I strongly believe that Head Start is critical to addressing these needs in our society and should be the cornerstone of early childhood programs.

I would like to express my support and appreciation for all those who participate in this program and work to make it successful. They are providing an invaluable service to our country and their contribution deserves our gratitude.

I am hopeful that we will be able to expand and extend this program so that it will continue to develop and provide high-quality comprehensive services to our Nation's children.●

REMOVAL OF INJUNCTION OF SECRECY—TREATY DOCUMENT NO. 101-16

Mr. GRAHAM. As in executive session, I ask unanimous consent that the injunction of secrecy be removed from the Income Tax Convention with Spain, with Protocol, Treaty Document No. 101-16, transmitted to the Senate yesterday by the President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAHAM. I also ask unanimous consent that the treaty be considered as having been read the first time; that it be referred with accompanying papers to the Committee on Foreign Relations and ordered to be printed; and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

I transmit herewith for Senate advice and consent to ratification the Convention between the United States of America and the Kingdom of Spain for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income, together with a related Protocol, signed at Madrid on February 22, 1990. I also transmit the report of the Department of State.

The convention is the first income tax treaty to be negotiated between the United States and Spain. Based in large part on model income tax treaties developed by the Department of the Treasury and the Organization for Economic Cooperation and Development, it also reflects changes in tax law resulting from the enactment of the Tax Reform Act of 1986.

The convention provides rules governing the taxation by each State of income derived by residents of the other State. The convention also contains provisions that prevent "treaty shopping" and authorize the exchange of information and administrative cooperation between the tax authorities of the two States.

I recommend that the Senate give early and favorable consideration to the convention and protocol and give its advice and consent to ratification.

GEORGE BUSH.

THE WHITE HOUSE, *April 18, 1990.*

ORDER TO STAR PRINT SENATE REPORT NO. 101-103

Mr. GRAHAM. Mr. President, I ask unanimous consent that Report No. 101-103 be star printed to reflect the change I now send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR FRIDAY, APRIL 20, 1990

RECESS UNTIL 8:30 A.M. AND MORNING BUSINESS

Mr. GRAHAM. Mr. President, on behalf of the majority leader, I ask unanimous consent that when the Senate completes its business today it stand in recess until 8:30 a.m., Friday, April 20; that following the prayer, the Journal of the proceedings be deemed approved; that the time for

the two leaders be reserved for their use later in the day; and that following leader time there be 1 hour of morning business under the control of Senator NUNN for his and other members of the Armed Services Committee's usage; and that at 9:30 a.m., there be a period for morning business not to extend beyond 10:30 a.m., with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

RESUME CONSIDERATION OF H.R. 1594 AT 10:30 A.M.

Mr. GRAHAM. Mr. President, I further ask unanimous consent that at 10:30 a.m. on Friday, April 20, the Senate resume consideration of H.R. 1594, the miscellaneous tariff bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 8:30 A.M. FRIDAY, APRIL 20, 1990

Mr. GRAHAM. Mr. President, I ask unanimous consent that at the conclusion of Senator SIMPSON's remarks the Senate stand in recess under the previous order until 8:30 a.m., Friday, April 20.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE JERUSALEM RESOLUTION

Mr. SIMPSON. Mr. President, I thank my friend from Florida. I would just take an additional 6 or 7 minutes to complete some thoughts that were presented this morning by my friend and colleague, Senator DOLE. I accompanied him on the trip to the Middle East to visit with President Assad, to go on to Egypt and visit with President Mubarak, then to Jordan to visit with King Hussein, and then to Iraq to visit with President Saddam Hussein and then in to Israel to speak with all of the principal leaders in that country as they grapple with forming their government.

I just want to add my support to earlier comments made by our fine Republican leader regarding the Concurrent Resolution 106 concerning the status of Jerusalem. That thing apparently is taking on a life all of its own. It is a very curious thing to watch.

I, too, share some of the responsibility for agreeing to cosponsor the resolution without first checking into all of the possible ramifications of that resolution. I think of how many times on this floor when we are usually in the thick of combat and some lovely friend comes up to you and says, "Here's a resolution on whatever." You say, "What does it do?" "Well, it doesn't do anything, really. It probably is going to pass here 100 to nothing." And they usually do.

But let me tell you, ladies and gentleman and colleagues all, somebody knows every word that is in it. Every single word. And somewhere on the face of the globe it raises the most extraordinary passions. Maybe not here.

So we do these sense-of-the-Senate resolutions, and they roll out of here by the metric ton. I know staff are energized by them. You have to get up very early to see that some of the things get in some of them. Baseball; I remember the one on the baseball strike. That was one that we did, where we urged the termination of the baseball strike.

I think my fine friend from New Hampshire, Senator RUDMAN, commented on that very crisply. He said, "Who cares what the U.S. Senate feels about whether the baseball strike ends or not?"

Well, somebody did. And I understand that. Obviously the sponsors did. And they did it with very sincere motives and honest feelings.

But I can tell my colleagues that on this trip to the Middle East, it is very, very clear in Israel about the issue of Jerusalem being the capital city of Israel, which I really do not want to argue with in any great amount. But let me tell my colleagues, when we were in Jerusalem we visited with the Mayor of Jerusalem, Teddy Kollek, and so many of us know him and know what an extraordinary man he is, a man bigger than life, a loving, caring, remarkable person. He was saying to us—and I do not know how his words will be portrayed, but he was saying, in essence: That is not very helpful stuff. We all know what it says. It comes at a very sensitive time when we are forming a government. It is just a very difficult thing, that creates more problems than it should. Not that it is any less a feeling of mine too as he talked about his own feelings about what it was.

But it is now so firmly brought home to me, and it now is not the first time it has happened to me. I went to the Soviet Union 2 years ago. I was again vividly reminded of that trip. It was about a resolution we passed in early 1988 expressing something about a "sense of the Senate" on the millenium of the Christianization of the Ukraine or Kiev or Kievian Russe, in the Soviet Union.

It was worthwhile. It was one of those resolutions that all of us signed. It was one that passed probably by a voice vote, or if it passed by a recorded vote it passed 100 to 0 or 98 to 2.

I was sitting there at a meeting with council people or administrators in Kiev, and a man in a rage said, "Why did you people sitting at this table and being our guests, sign this resolution about the Christian elements of the Ukraine?"

And we said, "what was it again?"

And it disrupted the entire meeting.

Now, at every single Arab country where we were, we had to spend the first 20 minutes of the meeting talking about that resolution. And, meanwhile, it gives everybody a big excuse not to talk about peace. I think we ought to sober up and realize what we are doing with these resolutions. I know I am. I am not going to get involved in them anymore.

When somebody comes up to me and says, "Here is a sense-of-the-Senate resolution," I am going to say, "Are you sure it may not be a nonsense-of-the-Senate resolution?" Here it is then—something we just do not pay enough attention to. Somewhere outside of this Chamber somebody is paying extreme attention to it, using it, then, to disrupt what we ought to be about. And that is to be bringing about accord, instead of discord; bringing peace instead of opportunities to fight and scrap and wrestle over language in some country that very few of our colleagues have ever been to, while we are trying to talk to them about why do you not release our hostages? Why do you not give us the remains of Colonel Higgins? Why do you not start talking with the Israelis about peace? Instead we have to mess around with what we did on a certain sense-of-the-Senate resolution. Yes, we ought to sober up. And it does not have one thing to do with whether you are anti-Israeli or pro-Israeli. I regard it as a painful and valuable lesson to be learned.

As I say, those resolutions do have significance. They have awesome significance to somebody, somewhere; often a lot more than to someone in this Chamber. And we should inform ourselves and educate ourselves of the significance of these measures before we sign on to them.

So, that one well-meaning resolution sent waves through the Middle East and dealt a blow to the peace process. I can tell my colleagues, that is what it did. Instead of being able to focus on peace, we spent this inordinate amount of time talking about a resolution that most Senators, and I defy them to challenge it, did not even realize had been passed by the Senate on a voice vote.

Most of the cosponsors of it were gathered through calls and contacts from the Cloakroom within a period of an hour, probably in both Cloakrooms. You know the call we get. You are at your desk and have four constituents with you: The quick call is, "Do you want to get on this resolution about Israel?" "You bet—put me on." So, there we are.

I want to comment a bit more on it. Jerusalem is a city of great religious significance to Christians, Jews, and Moslems. Palestinians who have no present homeland have a deep and abiding connection with the city.

Meanwhile, we do that resolution and it was not helpful. It was a difficult diversion of extraordinary dimension. It need not have been.

I think that I have learned the lesson twice—actually three times. I hope I chamber that and keep it in memory. I urge my colleagues to take that message to heart as well. I guess if you get kicked in the head by a mule once, you deserve it. If you get kicked twice in the head by a mule, you are a fool.

So I hope we will pay close attention. And the next time one of our remarkable friends and colleagues comes up and says, "This one is easy, it is just a sense of the Senate, it does not really mean anything." I shall say "If it does not mean anything, then do not put it before us."

I know the able majority leader has just returned from the Soviet Union, and I also know he was confronted continually with the resolution which we passed about Lithuania right here on this floor, and it was a diversion for him too, I am certain.

So I hope all of us will come to realize the full impact of what we do with sense-of-the-Senate resolutions, especially when the sponsors, as they go through the Chamber, are saying, "It really does not do anything, but we should do it." I have given you three personal experiences where all it did was divert us from our cause and it was embarrassing and ill timed.

I also think it is a shame, I must say this, to Members of my own party in the House of Representatives, to cut loose on the minority leader about his remarks made in Israel when they do not even know what happened. I am very hurt and disappointed to see NEWT GINGRICH become part of that. That is not helpful at all. The purpose of it remains unknown to me unless it is just pressure to see who can be more pro-Israeli in this body. If that is all we are going to do here, then I do not need to have my credentials checked by anybody as to whether I am pro-Israeli. My parents were there for a lengthy time in the 1950's. I have the greatest respect and admiration for Israel—go look at my voting record.

But people who love to stir all this up—and they are there—are going to simply use this to see who is more pro-Israeli. Contact the members of this delegation that just returned, contact my respected colleague from Ohio, Seantor METZENBAUM, as to what happened. It was a tough one for him. It was a tough one for him to go to Iraq as an American Congressman of Jewish faith. He was tremendous in his dealings face to face with President Saddam Hussein. He was tremendous in his dealings with the leaders of Israel. He said, "I am a friend of yours. If your friends cannot talk to you in honest ways, what is friendship about?" I hope we will not let this slip into something that is at first anti-Israel, then anti-Semitic, and all of this stuff that goes with this ghastly exercise that we press upon each other. It is unbecoming and unattractive in every facet.

I thank the Chair for its patience and for taking the additional time of the body. In accordance with the previous order, I conclude with appreciation to the Chair.

RECESS UNTIL 8:30 A.M. TOMORROW

The PRESIDING OFFICER. Under the previous order, the Senate stands in recess until 8:30 a.m., Friday, April 20, 1990.

Thereupon, at 7:45 p.m., the Senate recessed until Friday, April 20, 1990, at 8:30 a.m.

NOMINATIONS

Executive nominations received by the Secretary of the Senate April 18, 1990, after the recess of the Senate, under authority of the order of the Senate of January 3, 1989:

DEPARTMENT OF STATE

Executive nominations received by the Senate April 19, 1990:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

JOSEPH G. SCHIFF, OF KENTUCKY, TO BE AN ASSISTANT SECRETARY OF HOUSING AND URBAN DEVELOPMENT, VICE J. MICHAEL DORSEY.

DEPARTMENT OF THE INTERIOR

ANTHONY J. HOPE, OF CALIFORNIA, TO BE CHAIRMAN OF THE NATIONAL INDIAN GAMING COMMISSION FOR A TERM OF 3 YEARS (NEW POSITION).

FEDERAL EMERGENCY MANAGEMENT AGENCY

OLIN L. GREENE, JR., OF OREGON, TO BE ADMINISTRATOR OF THE UNITED STATES FIRE ADMINISTRATION, VICE CLYDE A. BRAGDON, JR., RESIGNED.

IN THE COAST GUARD

THE FOLLOWING OFFICER OF THE U.S. COAST GUARD RESERVE FOR APPOINTMENT TO THE GRADE OF REAR ADMIRAL (LOWER HALF):
GEORGE R. MERRILEES.

IN THE ARMY

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT AS VICE CHIEF OF STAFF OF THE ARMY AND APPOINTMENT TO THE GRADE OF GENERAL WHILE SERVING IN THAT POSITION UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTIONS 601 AND 3034:

To be general

GEN. GORDON R. SULLIVAN, xxx-xx-xxxx U.S. ARMY.

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF GENERAL WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, UNITED STATES CODE, SECTION 601(A);

To be general

GEN. ROBERT W. RISCASSI, xxx-xx-xxxx, U.S. ARMY.

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT AS COMMANDER IN CHIEF, UNITED STATES SPECIAL OPERATIONS COMMAND, AND APPOINTMENT TO THE GRADE OF GENERAL WHILE SERVING IN THAT POSITION UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTIONS 167 AND 601:

To be general

LT. GEN. CARL W. STINER, xxx-xx-xxxx U.S. ARMY.

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF LIEUTENANT GENERAL WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, UNITED STATES CODE, SECTION 601(A):

To be lieutenant general

LT. GEN. GARY E. LUCK, xxx-xx-xxxx, U.S. ARMY.

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF LIEUTENANT GENERAL WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, UNITED STATES CODE, SECTION 601(A):

To be lieutenant general

MAJ. GEN. ALONZO E. SHORT, JR., xxx-xx-xxxx U.S. ARMY.

IN THE NAVY

THE FOLLOWING-NAMED CAPTAINS OF THE RESERVE OF THE U.S. NAVY FOR PERMANENT PROMOTION TO THE GRADE OF REAR ADMIRAL (LOWER HALF) IN THE STAFF CORPS, AS INDICATED, PURSUANT TO THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 5912:

MEDICAL SERVICE CORPS

To be rear admiral (lower half)

CAPT. WILLIAM D. SULLINS, JR., xxx-xx-xxxx U.S. NAVAL RESERVE.

NURSE CORPS

To be rear admiral (lower half)

CAPT. MARYANNE T. IBACH, xxx-xx-xxxx U.S. NAVAL RESERVE.

EXTENSIONS OF REMARKS

LIONS, LAMBS AND PEACE TALKS

HON. TOM LANTOS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. LANTOS. Mr. Speaker, the Middle East peace process is too often painted in colors that fail to portray the siege climate Israel has continued to labor under. Israel knows that a lasting peace depends on lasting security, and any peace plan that tries, as an act of goodwill, to trade away strategic Israeli territory for an unsecured promise of peace, is doomed to fail.

Mr. Speaker, I insert the full text of Douglas J. Feith's article "Lions, Lambs and Peace Talks" as it appeared in the Washington Jewish Week on March 22, 1990. Mr. Feith reminds us of the failed attempts blindly to trade land for peace. As he noted, "* * * there is danger in confusing the promotion of peace with the promotion of peace treaties." I urge my colleagues to study Mr. Feith's article closely, and to consider his points as we debate our Nation's involvement in the Middle East's quest for peace.

The article follows:

[From the Washington Jewish Week, Mar. 22, 1990]

LIONS, LAMBS AND PEACE TALKS

(By Douglas J. Feith)

The current controversy over President Bush's Middle East peace diplomacy brings to mind an old Soviet story. It's about a foreigner who visits the Moscow Zoo:

"And here in this cage," the communist guide announces, "you see a lion reclining next to a lamb."

"That's an outstanding accomplishment!" the visitor exclaims.

"Actually," the guide confides, "it really isn't that difficult. Every few hours, we just have to put in a new lamb."

The administration seems to think this is a good time to urge the lions and the lambs in the Middle East to recline together.

For over two decades, every incoming U.S. administration has reviewed Arab-Isreali diplomatic options, concluded (on advice of the State Department's Near East Bureau) that the problem requires urgent, high-level U.S. diplomatic attention, and devised a "plan," invariably implying that Israeli's continuing hold on the territories captured in 1967 is a—perhaps the—principle impediment to peace in the region. That these plans invariably fail has never shaken the confidence of their proponents.

The Nixon administration promulgated in 1969 the so called Rogers Plan, named after the then-secretary of state. It advocated a virtual total withdrawal by Israel from the territories. Every U.S. peace plan since then has been, in essence, a variation on a theme by Rogers.

Like its predecessors, the Bush administration brings more impatience than comprehension to the task of engineering an Arab-Israeli peace. Secretary of State James Baker speaks of the urgency of progress. The Bush-Baker team treat the conflict as a promising project—that is, susceptible of diplomatic amelioration, if not solution at a reasonable cost—if only Washington acts quickly to prevent Israel from further consolidating its hold on the territories.

These assumptions require protection from inconvenient history. So administration policy makers have nothing to say about such questions as: Why the Arab world made war against the Jewish State before Israel acquired the territories? Why the Arab world rejected the Rogers Plan itself when it was first offered? Why those states roundly rejected the 1947 UN Partition Plan which would have afforded the Jews even less territory than they wound up with after the War of Independence. And why, during the 19 years (1948-67) in which the territories were under Arab control, no attempt was made to create an independent Palestinian Arab state there?

Nor has the administration dealt seriously with other fundamental questions: Is it prudent for the United States to pressure Israel into assuming substantial national security risks? Why should the United States want to warrant the dubious proposition that Israel's enemies could be prevented from taking advantage of Israeli concessions that would produce military vulnerabilities? In other words, could the United States make good on "security guarantees" designed to compensate Israel for territorial compromises?

Shunning such questions, the Bush administration has jumped into the same Rogers Plan rut in which our diplomacy has floundered for lo these many years. This is symptomatic of a failing that reaches beyond Middle East policy. When it comes to the role of peace diplomacy in international affairs, many of our policy makers learn nothing and forget nothing. Not even the stunning upheavals in Europe's communist bloc have stimulated a proper reappraisal.

Let us consider the ongoing political upheaval in Eastern Europe and the Soviet Union and its implications for the Arab-Israeli conflict. For years, the conventional wisdom held that the key to enhancing our security lay in peace diplomacy aimed at producing arms control agreements. Dissenters from the conventional wisdom—the "hardliners"—argued that arms control, at best, can make a marginal contribution to security. The key to peace, they said, is the demise of the aggressive totalitarian ideology of our antagonists. The "hardliners" prescription for peace was strong defenses combined with pressure on the Soviet bloc in the spheres of human rights and economics. For this they were denounced as unwilling "to give peace a chance."

As day after day communist leaders confess their oppression and aggressions and admit their treaty violations, the "hardliners" in the West have reasons to feel vindicated. Recent changes in the East bloc have yielded enormous security benefits for the West, none of which to the credit of arms control or peace diplomacy. None resulted from "restraint" in our defense programs or our making "concessions for peace."

The communist governments of Poland and Czechoslovakia were a security threat. But no one in the West views the Solidarity government of Poland or the Havel government in Czechoslovakia as a threat. And this is not because we have peace agreements with them. It is because of what we know of their leaders' philosophies and principles and popular support. We feel secure regarding these countries not because of any formalities but because they wish us no harm.

At no time in the last 40 years would an arms control or peace agreement with these East European countries have been more easily attained and more likely to have been implemented in good faith than at present. Yet such an agreement, which the conventional wisdom deemed highly significant and urgent just a few months ago, now appears superfluous (or in any event no big deal).

Various parties have for many years urged the Israeli government to adopt the view that the key to Israel's security is concluding peace agreements with its Arab neighbors. This diverted attention from the issue of whether those neighbors actually have peaceful intentions and onto the issue of what Israel might give them to induce them to join negotiations.

Peace, to be sure, is a many-splendored thing. But the formalities of an agreement are overrated. Moreover, there is danger in confusing the promotion of peace with the promotion of peace treaties.

Recent events in Eastern Europe remind us that it is not the job of the would-be victim of an aggressive ideology to offer concessions for peace. The interest of peace would not have been served if, in negotiations with the Soviets, NATO countries had chased agreements by making concessions that would have weakened Western defenses. We now see clearly that Western armaments have not been the cause of tension and conflict in Europe. They were a reflection of, and proper reaction to, the tension and conflict resulting from Soviet domination of Eastern Europe.

By the same token, the interests of peace in the Middle East would not be served if, in negotiations with its neighbors, Israel made concessions that weakened its defenses. Israel's control of the territories is not, in my view, the cause of Arab hostility toward the Jewish State any more than Western troops and arms in Europe were the cause of East-West tensions.

If anti-Israel ideology were tossed in history's dustbin, formal Arab-Israeli peace agreements would be both attainable and unnecessary. But the converse of this proposition has more immediate relevance: If Israel's neighbors still want to see Israel eliminated, then Israeli concessions may produce negotiated agreements but they will not produce peace.

The essential question is not who should negotiate or where or about what, but what are the intentions of relevant powers. The Egyptian-Israeli negotiations produced a

treaty because Sadat succeeded in convincing Israel that the Egyptian government no longer aspired to destroy the Jewish State. He made the case that Egypt wanted to recover the Sinai but would not use the land to launch aggressions against Israel. Egypt, as the most populous and powerful Arab state, was in a position to ensure that no other state could exploit Israel's territorial concession.

Unfortunately, the Bush administration's efforts to promote negotiations between the Israelis and the Palestinian Arabs lack the ingredients of success in the Sadat-Begin talks. The gravest deficiency is that the PLO has the ability to dominate, directly or indirectly, the Palestinian Arab participants and the PLO does not pass the good intentions test. For many reasons—the terms of its so-called covenant, its history of targeting children and civilian men and women, and recent incidents (that is since Arafat's putative renunciation of terrorism) of murders of Jews and assassinations of Arab political opponents in the territories—the PLO has, shall we say, a credibility problem.

The German strategist Clausewitz made the famous observation that war is the continuation of diplomacy by other means. The Israelis have grounds to suspect that, for the PLO, the so-called peace process is the continuation of war by other means.

The Bush administration's peace initiative is now off the tracks. Is the current derailment a Bad Thing? This depends, first of all, on one's view of whether current circumstances in the region are promising for peace negotiations—that is, whether sufficient, relevant parties have actually resolved themselves to live in peace. In that case, the negotiations would not be needed to "make peace" but only to memorialize the terms. And secondly, it depends on one's analysis of which side will likely benefit from delay.

In this latter regard, one must take note of the stream—one should say torrent—of Soviet Jews on their way to Israel. Hundreds of thousands. Perhaps as many as 700,000 over the next two years or so. And the total may reach a million. This is an event of historic and strategic significance. If it proceeds as envisioned, it will radically and favorably alter Israel's position economically, demographically and militarily. It will foil for decades the strategies of Israel's enemies.

The Arab world appreciates the momentous implications for the Arab-Israeli conflict of the recent changes in the communist world. Recently, the *New York Times* front page carried the following report from the Middle East:

"The changes sweeping through Eastern Europe represent a major strategic setback for Palestinians and other Arab, regional officials and experts say.

"The consensus of dozens of officials, scholars and businessmen interviewed in the Persian Gulf region and Western Europe is that Arabs, especially the Palestine Liberation Organization, have begun to see a steep decline in the open political, moral and material support that they received for more than a quarter of a century from Eastern Europe.

"Many of those interviewed expressed the view that the end of the cold war has upset basic Arab strategies for dealing with the 40-year Arab-Israeli conflict."

Complete resignation to the futility of fighting Israel—utter abandonment of the hope that efforts to kill Israelis, isolate the Jewish State abroad or demoralize Jews through rock-throwing or other means—may serve to pave the way to a negotiated peace. The Arabs have seen their military attacks fail time and again. They have seen their "oil weapon" exposed as a wooden sword. They have seen their intifada lose steam and evolve toward what is called the "intrafada"—the killing of Arabs by Arabs. They have seen Israel renewing diplomatic relations throughout Africa and now Eastern Europe. They are now seeing a demographic shift of strategic proportions in Israel's favor. One can only hope that at some point the great mass of people throughout the Arab world will reject the failed and costly ideology of war against Israel the way the people of Eastern Europe have rejected their own failed and costly ideology.

TRIBUTE TO SENIOR CITIZENS DAY

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to the Multipurpose Senior Center of my 17th Congressional District of Ohio, which is sponsoring Senior Citizens Day on May 15, 1990.

Senior Citizens Day has been celebrated throughout Ohio since 1976. It is a special day that recognizes and honors senior citizens for the contributions they make to our community. The theme of this years Senior Citizens Day is "A Partnership of Ages."

It is my honor to support this very important event. We owe a great deal to our senior Americans. They have worked hard to make our country a better place, and the least we can do is honor them with their own day.

Mr. Speaker, I would like to salute the senior cititzens of my district. They are very special people who deserve our gratitude and recognition. I am honored to represent these exceptional individuals.

TRIBUTE TO THE MIAMI BEACH DEVELOPMENT CORP.

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I ask my colleagues to join me in congratulating an innovative urban real estate development project in my congressional district, which has won the National Economic Development Partnership Award.

The Ocean Drive project and art deco district has been under redevelopment for several years. With its contribution to the emerging vibrant Miami Beach art deco district, the Miami Beach Development Corp., the Ocean Drive Association and the city of Miami Beach will be accepting the eighth annual National Council for Urban Economic Development.

A national panel of judges selected Ocean Drive based upon criteria including the substantial overall effect upon the local economy, net new jobs created or retained, net increases in the local tax base, spinoff private investment generated, and urban design and esthetic quality.

Ocean Drive completed the final stage of its improvement program that includes street reconstruction, sidewalk promenade and furnishings, greenbelt park landscaping and beach renourishment. The private sector rehabilitation of historic inns and art deco hotels is well underway.

Presentation of the award will be made to Neisen Kasdin as chairman of the Miami Development Corp. and to Tony Goldman as chairman of the Ocean Drive Association for the vital participation of the public and private sectors in this award winning project.

I congratulate all who are involved in this project, on a project extremely well done.

SALUTE TO ELLIOTT OWENS, A DRIVING FORCE BEHIND THE SUCCESS OF THE SHAW COMMUNITY CENTER'S FOOD COMMITTEE

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. FAUNTROY. Mr. Speaker, I rise today to pay special tribute to Mr. Elliott Owens, Jr., who has for more than 15 years been a driving force behind the success of the Shaw Community Center's Food Committee [Shaw Food Committee].

For many years the works of the Shaw Food Committee has helped to enrich Thanksgiving for hundreds of needy families in the Washington community. As a private sector businessman, Mr. Owens has given his time and commitment to several community programs which have enhanced the lives of hundreds of families in the District of Columbia.

Saturday, April 21, 1990, has been declared as Elliott Owens, Jr., Day in the District of Columbia. We will honor Mr. Owens at a prayer breakfast on that day to raise money for Thanksgiving baskets which will be distributed among needy city residents in November.

I especially commend Mr. Owens for his leadership on behalf of this important work. He has demonstrated his civic commitment and community service by utilizing his time, energy, creativity, and resources to aid this program that is dedicated to improving the quality of life for disadvantaged citizens of the District of Columbia.

INTRODUCTION OF UNDERGROUND STORAGE TANK ASSISTANCE AND GROUNDWATER PROTECTION ACT

HON. ARLAN STANGELAND

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. STANGELAND. Mr. Speaker, I rise today to introduce legislation—the Underground Storage Tank Assistance and Groundwater Protection Act—which I believe will help small business owners fulfill Federal regula-

tions with regard to underground storage tanks while at the same time protecting our Nation's ground water.

My bill will provide loan guarantees and limited grants for leak prevention, closure, replacement, and upgrade of underground storage tanks.

Let me assure my colleagues that, in providing relief to small businesses, my bill will not in any way weaken ground water protection efforts or requirements under the Resource Conservation Recovery Act or any other law.

As many of you know, small businesses are having a difficult time finding funds to meet EPA's underground storage tank requirements relating to financial responsibility. Furthermore, banks have been hesitant to loan these businesses money for fear of default on the loan or third party liability. By implementing a Federal loan guarantee program, some of these fears should be allayed. This in turn will allow businesses to improve their underground storage tanks and thus reduce the pollution of ground water and protect human health and the environment.

Mr. Speaker, it makes good environmental and economic sense to provide a moderate level of financial assistance to small owners and operators—of tanks—throughout rural America. We help prevent both pollution of ground water and the closure of businesses providing essential community services. It's a fiscally responsible way to meet environmental goals while recognizing economic needs.

Let me also recognize other colleagues who have worked to address these and similar concerns regarding underground storage tank requirements. My bill contains some of the same provisions in bills introduced by Senator BAUCUS (S. 2175) and Congressman GLICKMAN (H.R. 4319).

I also commend Congressman MARLENEE and scores of other Members who have been instrumental in prodding EPA to address problems regarding impending financial responsibility deadlines. My bill is consistent with these and other efforts to meet small business needs without weakening environmental protection.

For all these reasons, Mr. Speaker, I urge my colleagues to join me in cosponsoring this bill.

SECTION BY SECTION ANALYSIS

SECTION 1

Short title: Underground Storage Tank Assistance and Groundwater Protection Act.

SECTION 2

Establishes underground storage tank loan guarantee and grant programs:

Loans: Provides loan guarantees for the closure, replacement, upgrade, and maintenance of release detection systems for underground storage tanks.

Those eligible for the loan are tank owners with 1 to 12 tanks, and on a case-by-case basis, owners of 13-99 tanks as determined by the Administrator of the Environmental Protection Agency if providing such assistance will increase environmental protection.

The amount of the guarantee may not exceed 90% of the aggregate cost of the activity, and the amount of the guarantee of any loan may not exceed $100,000.

The aggregate amount of guarantees outstanding may not exceed $180,000,000, of which not more than 25% will be made available for owners of 13-99 tanks.

Terms of agreement for the loan guarantee include full repayment in a period not to exceed 20 years and there must exist a reasonable assurance of repayment of the loan.

Grants: Grants are available to an eligible small business if the business is an essential community service, not less than three private lending institutions have declined to provide a loan, and a significant threat to human health and the environment is present.

Grants are available for owners in the 1-12 category and on a case-by-case basis to owners of 13-99 tanks as determined by the Administrator if providing such assistance will increase environmental protection.

The amount of the grant may not exceed 50% of the cost of the activity, and the aggregate amount of the grants may not exceed $20,000,000 a year. Not more than 25% of this aggregate amount should be for owners of 13-99 tanks.

Persons may obtain a loan/grant combination not to exceed 90% of the cost of the activity.

Authorization: These programs expire five years after the date of enactment.

Reporting: The Administrator is required to report to Congress each year on operations of the loan/grant programs and provide any recommendations for improved management of the programs.

SECTION 3

Amends the Solid Waste Disposal Act to insert make pollution prevention projects eligible for assistance by inserting "or threatened release" after "release" and defining "threatened release" to refer to a circumstance where, in the judgment of the Administrator, the failure to take corrective action will result in the release of petroleum.

SECTION 4

Amends the Internal Revenue Code to authorize the loan guarantee program and grant program, as well as authorizing the payment of administrative expenses incurred in connection with such programs.

VRYONIS CENTER TO OPEN THIS MONTH

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MATSUI. Mr. Speaker, it gives me great pleasure to stand before my colleagues today and call their attention to an exceptional educational institution that will officially open this month in Sacramento, CA: The Speros Basil Vryonis Center for the Study of Hellenism.

Originally founded in Los Angeles, CA, the Vryonis Center has relocated to the Sacramento area and will officially open its doors to the Sacramento community on April 22, 1990. The center is an educational institution dedicated to scholarly research of Greek civilization and culture; placing special emphasis on modern Greek history, society, economy, politics, and culture, including the social and cultural dynamics of the Greek-American community. The center's program will incorporate four interdependent areas of activities: Research and documentation, academic programs, scholarly publications, and a cultural outreach program.

This wonderful educational center is made possible by the financial support provided by Mr. Angelo K. Tsakopoulos and the hard work of numerous individuals who also are dedicated to increasing the public awareness of the contributions and effects of the Greek culture and institutions on other peoples and societies. I have no doubt that the operation of the Vryonis Center will be both successful and exciting. This fine establishment will be a welcome addition to the Sacramento community.

Mr. Speaker, I ask that my colleagues join me in congratulating those whose tireless efforts and dedication have made this ambitious program of expansion possible. I commend all of you on a job well done, and I offer my best wishes for the Speros Basil Vryonis Center's continued success.

TRIBUTE TO THE MERCY COLLEGE PEEKSKILL CENTER

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. FISH. Mr. Speaker, in the Hudson Valley of New York, we always have taken higher education seriously, and we are fortunate to have many fine colleges and universities.

One of these is Mercy College, which for 40 years has provided exceptional education to thousands of students. Today it draws students from all parts of New York and other parts of the country.

Its Peekskill branch, opened in 1978, has turned thousands of students into mature, responsible, well-educated adults. With Wiley A. Dickerson as dean, students get a solid grounding in academics, job readiness, career preparation, and self-awareness.

The Mercy College Peekskill Center also is making solid contributions to the Peekskill area. The school's High School Mentoring Program enables Mercy College students to be role models to high school students through tutoring and fun activities. Through another exceptional program, Community Outreach for the Homeless, students collect canned goods, toys, clothes, and money for the disadvantaged during the holidays and other parts of the year.

This college is on the move. Peekskill appreciates all it has done to turn our young people into responsible and caring citizens, and all its contributions to the greater Peekskill area.

On Friday, May 18, Peekskill will say thank you. The NAACP, the Nation's most preeminent civil rights organization, will salute the Peekskill branch of Mercy College with the Prominent Award of Recognition. No college is more deserving of this honor.

Congratulations, Mercy College Peekskill Center.

EARTH DAY DESERVES CLEAN AIR

HON. LOUISE M. SLAUGHTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Ms. SLAUGHTER of New York. Mr. Speaker, this Sunday is Earth Day, the 20th anniversary of the original Earth Day celebrated in 1970. Let's take stock of how far we've come in those two decades.

The health cost of air pollution is $40 billion each year, according to the American Lung Association. It contributes to 50,000 premature deaths annually.

The Environmental Protection Agency estimates that 120 million people live in areas where the air is dangerously polluted.

In 1987, industries reported that they released 2.7 billion pounds of air toxics into the air, ground, and water.

These are not statistics to be proud of.

Yes, it will be costly to lower these numbers. Yes, it will raise the costs of some goods. And yes, spending the money to reduce air pollution emissions will save lives and improve the quality of life for everyone.

How far have we come since the first Earth Day? We're more aware of the problem and we know how to go about solving it. Our path for the next 20 years should be clear; a strong clean air bill is the first step.

TRIBUTE TO GERALD MARKS AND IRVING CAESAR

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. GREEN. Mr. Speaker, I rise today to recognize the well-known songwriting team of Gerald Marks and Irving Caesar for their contributions to the safety and welfare of the children of New York and the Nation. Gerald Marks is known for such outstanding songs as "All of Me" and "Is It True What They Say About Dixie?" Likewise, Irving Caesar is noted for such songs as "Tea For Two" and "Swanee." Marks and Caesar have also collaborated on a song book, "Sing a Song of Safety." That song book is a series of children's humorous musical lessons that have been sung in schools all over the world.

"Sing a Song of Safety" will soon be celebrating its 60th birthday. That occasion is in conjunction with National Safety Month, and "The Safe Kids Campaign," chaired by Dr. C. Everett Koop, former Surgeon General. On May 1, in an effort to mark those affairs, there will be a tribute to Gerald Marks, Irving Caesar, and their work, "Songs of Safety," at the Friars Club in New York.

At this time I should like to thank Gerald Marks and Irving Caesar, two gifted individuals, for their valiant contributions to the well-being of children.

RECOGNIZING MS. CANDACE McKEE ASHMUN

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. COURTER. Mr. Speaker, it is my pleasure to recognize Ms. Candace McKee Ashmun on being this year's recipient of the New Jersey Pride Award for Energy and Environment. Ms. Ashmun, the president of the Association of New Jersey Environmental Commissions, has made an important contribution to our State.

The New Jersey Pride Award honors those individuals who have made significant contributions to their field and to the State of New Jersey. Candace Ashmun has been one of the prime movers in making natural resources an essential part of the State planning process. As a member of the Pinelands Commission, State Planning Commission, and as president of the Association of New Jersey Environmental Commissions, she has woven environmental concerns into the fabric of planning and regulatory system of the State. The cross-acceptance procedure, in which communities and the State are working together in the development of the State's Master Plan, were developed by her in her book, "The Cross Acceptance Game." In addition, Ms. Ashmun has been a director of the Upper Raritan Watershed Association, a member of the Governor's Council on the Outdoors, a member of the New Jersey Natural Resources Council, and a member of the Board of Trustees of the Middlesex-Somerset-Mercer Regional Study Council.

On this occasion of her award, I extend my congratulations to Ms. Candace McKee Ashmun and wish her continued success and best wishes for the future.

ACADEMIC EXCELLENCE

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. PORTER. Mr. Speaker, I am proud to represent one of the most highly educated constituencies in the United States. The public schools in my district are among the finest anywhere in the world.

It is with great pride that I take this opportunity to commend a fine student from Illinois. Carolyn Reinglass was recently named an Illinois State scholar, an honor that recognizes high school academic excellence and places her among the premier students in the State.

In addition, Carolyn was recently named a Moorhead scholar at the University of North Carolina—an appointment I consider among the most prestigious in the country. Carolyn's dedication to education serves as an example for all students.

Mr. Speaker, I am proud to represent Carolyn Reinglass in the Congress. I commend her for her achievements, and wish her the best of luck in the future.

A TRIBUTE TO PAULA FERREIRA

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize an outstanding student from my community who has earned honors along with her classmates for winning the 1990 Rhode Island State Championship title in the Bicentennial of the Constitution and Bill of Rights competition.

Paula Ferreira, of Central Falls, RI, attends Bishop Keough High School in Pawtucket, RI. This competition is held annually to test students' general knowledge of the Constitution as well as their ability to apply the Constitution to contemporary issues. The students were evaluated in three areas: Presentation, overall knowledge of the Constitution, and application of the principles of the Constitution. For Bishop Keough High School, this title was very special for the school finished second last year. Through hard work, combined with the excellent guidance and preparation by her teacher, Ms. Carol Costa, Paula and her classmates were able to achieve excellence. Paula and her classmates, along with Ms. Costa, will now travel to Washington, DC, in May to compete in the national competition against teams from across the Nation.

It is with great pleasure that I salute Paula Ferreira and the members of Ms. Costa's U.S. history class from Bishop Keough High School. Their outstanding knowledge of the Constitution and its principles serves as a reminder to us all about the importance of this great document for all Americans. I would like to wish Paula and her classmates good luck in the national competition.

EARTH DAY

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. PAYNE of New Jersey. Mr. Speaker, the 20th anniversary of Earth Day will be a time of reflection and celebration for New Jerseyans. We have led America's way to improving the environment over the past years, and I have no doubt that we will once again be looked upon for our leadership in the future. However, absent the support of advocate groups, such as Friends from South Mountain Reservation and the North New Jersey Sierra Club, our State would have never made the progress it has in the prior two decades.

The environmental challenge for the 1990's is daunting. Twenty years after the conception of Earth Day, environmental mismanagement continues to threaten our planet. Traditional environmental concerns, upon which the first Earth Day was founded, have been exacerbated by other global crises, such as poverty and war. No longer is conservation exclusively an American ideal, environmental security has now become a global priority.

Progress has provided many benefits, but modern day neglect may eventually rob us of our most important asset. Consequently, preserving clean air and water, lush forests, and fertile soil will require a large diversion of resources that can only be acquired through a serious commitment from ourselves, our neighbors and our Government.

As a world leader, the United States has a unique opportunity to contribute to global environmental health. However, in a time of budget deficits more and more community and individual initiatives will be looked upon to support the Government's environmental efforts. Thinking globally and acting locally is therefore an appropriate theme for today's Earth Day celebration. Because in the end, it is each of us who must undergo the test if our efforts are not successful.

New Jersey continues its contribution to the environment through citizen responsibility and action. We participate immediately by recycling paper, glass, and metal, utilizing public transportation, regulating the detrimental effects of air toxins and properly disposing of our industrial waste. And we prepare for the future by seeking ways to enhance our air and water quality through expanding our infrastructural capacity to handle sewage and run-off effluent and choosing cleaner fuels.

The Earth Day celebration sends a signal to the world that America is preparing to address the environmental needs of the next century. Through the support Sierra Club and other advocates for the environment, New Jerseyans have become well prepared to meet those challenges, and I applaud their efforts.

NATIONAL LETTER WRITING CONTEST FOR TEENS

HON. TIMOTHY J. PENNY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. PENNY. Mr. Speaker, "Respecteen Speak For Yourself" is a national letter writing contest which allows teenagers to share their views on public policy matters with their Representatives in Congress. I am pleased that one of my constituents, Shannon McManimon of Rochester, MN, is the district finalist with her letter regarding school dropouts. Shannon clearly points out the benefits of getting an education. I agree with Shannon and have included the text of her letter.

ROCHESTER, MN,
February 12, 1990.

U.S. Representative TIM PENNY,
436 Cannon House Office Building, Washington, DC.

DEAR REPRESENTATIVE PENNY: In the United States, high school dropouts are becoming a big problem. The approximate dropout rate is 25 percent, around 4,000 students per day.

There are many reasons students drop out. Often, kids in school are faced with failure. The students are not able to live up to others' expectations. If a student is held back one year, there is a 45 percent chance of that student dropping out before high school graduation.

I am proud that in 1984, Minnesota had the lowest dropout rate at four-percent, but even this is too high. To me, it is hard to believe that anyone could drop out when school offers so much: greater career choices, higher income, growth as a person, and greater self-respect.

I think that a driver's license should be revoked when a student drops out. Many states have enforced this law. Other ideas include annual school "report cards" that include attendance, test scores, etc. and the refusal of a job unless the applicant has a high school diploma.

I believe that making laws to prevent dropouts could possibly be the key to other problems. In school, programs teaching about drug and alcohol abuse prevention, AIDS, drunken driving, etc. could educate people on these subjects. If schools could use social workers and counselors to help students with personal problems, students may believe that school is the best idea.

I hope that you will consider high school dropouts as a serious problem and work to pass laws preventing dropouts. People truly do need educations.

Sincerely yours,

SHANNON MCMANIMON.

IN HONOR OF DALE COZART, CHIEF BORDER PATROL AGENT, SAN DIEGO SECTOR

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. LOWERY of California. Mr. Speaker, I rise today to salute the recent accomplishments of an outstanding public servant now completing his 24th year of exemplary service to the U.S. Border Patrol.

For the past 3 years, often under difficult circumstances, Chief Border Patrol Agent Dale Cozart has faithfully served the people of the San Diego area. The 10-mile stretch along the Mexican border near San Diego is the scene of the largest number of illegal entries into the United States each year. And, as many Americans and Mexicans can attest, it is a place of high emotion, crime, and conflict, demanding both courage and patience from those who police it. Few have ever worked as effectively or heroically there as Dale Cozart.

Dale began his career with the Border Patrol in Brownsville, TX, and has risen steadily through the ranks winning the respect and admiration of his peers in each of his assignments. In 1986, he was rewarded and entrusted with overseeing all operations at the San Diego crossing. Needless to say, he has risen to the challenge of this impossible job. He has maintained order and compassion in a place which thrives on confusion.

Mr. Speaker, please join me in saluting the achievements of Chief Border Patrol Agent Dale Cozart as he leaves California for his native Texas and a new assignment. Always professional is his conduct, he has protected our country with a brave heart and a keen mind. We will all miss him.

EARTH DAY 1990: TAKING STOCK OF OUR ENVIRONMENTAL PROGRESS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. LAFALCE. Mr. Speaker, this week marks the 20th anniversary of Earth Day, a worldwide celebration designed to increase awareness of environmental problems and inspire citizens and government action to address them. In evaluating changes in the state of America's environment since the first Earth Day in 1970, I am most struck by how much more we know now than we did then. In 1970, the idea of hazardous waste had not entered our collective consciousness. American industry was spewing toxic materials into the air at a rate of over 200 million tons annually. We had not yet begun to investigate the invisible contaminants killing marine life, and thousands of dead fish were routinely washing up on our shores.

Today we continue to face serious land, air, and water quality problems. But much has changed since 1970. On the State, national, and international levels, we have educated ourselves extensively about the dangers of air pollution, solid and hazardous wastes, as well as toxic water contaminants. The knowledge we have acquired has led to the development of long-term strategies to eliminate these dangers.

In the past two decades, Congress has enacted a multitude of environmental initiatives. The grandfather of them all is the Clean Air Act of 1970, which for the first time set binding national standards for air quality, establishing health-based emissions standards for a number of widespread pollutants, to be met through the use of emission control technology. In compliance with the Clean Air Act, New York State has implemented an aggressive plan to reduce its emissions of sulfur dioxide, nitrogen dioxide, and carbon monoxide.

The tragedy at Love Canal, discovered in 1977, made it clear that we needed a comprehensive, long-term mechanism to pay for the cleanup of hazardous waste sites nationwide. To that end, I introduced the first Superfund legislation, which became the basis for the Comprehensive Environmental Response, Compensation and Liability Act [CERCLA]. The original law provided $1.6 billion for use in enforcement and cleanup efforts, and the Superfund reauthorization of 1986 provided $8.5 billion for use in 1987–91.

One year before Love Canal came to national attention, Congress passed the Resource Conservation and Recovery Act [RCRA] of 1976. RCRA establishes a framework for the safe disposal of all types of solid waste, from household trash to hazardous industrial waste. The act sets up a cradle-to-grave monitoring system through lists defining different types of wastes; official manifests tracking their movements; and performance standards for transportation, storage, and disposal facilities. RCRA requires States to have solid waste management plans; prohibits open dumping; and requires nonhazardous solid

waste to be disposed in sanitary landfills in compliance with EPA criteria.

New York State is to be commended for its efforts in handling solid wastes. The State has one of the most comprehensive and aggressive solid waste management programs in the Nation. The 1987 New York State solid waste management plan calls for 50 percent reduction, reuse, and recycling of waste by 1997. The State Solid Waste Management Act of 1988 sets a 1992 deadline for localities to adopt ordinances on source separation and segregation of recyclable materials from solid wastes. Since passage of the Returnable Container Act of 1983, New York has reduced its solid waste stream by 5 percent and its volume by 8 percent. Today there are 250 landfills in New York, as compared to 1,600 in 1964.

Prompted by concerns about our Nation's water supply, Congress in 1972 passed the Clean Water Act. The act set out the ambitious goal of eliminating all pollution discharge into public waters by the year 1985, with the interim goal of ensuring that all water be "fishable and swimmable" by 1983. To achieve these goals, the Clean Water Act required that all municipal sewage and industrial wastewater be treated before being discharged into waterways. The Federal Government has helped localities meet these requirements by providing grants to States for construction of sewage treatment plants. Limits were also put on the amounts of specific pollutants that could be discharged by these plants and by industrial facilities.

Pursuant to the Clean Water Act, New York State must issue permits requiring wastewater treatment plants; municipal sewer authorities, and industrial dischargers to sample and analyze their releases and report monthly to the State department of environmental conservation [DEC]. A recent study by the Niagara River Toxics Committee indicates that this permit system has played a key role in the dramatic reduction of toxic discharges into the Niagara River. In 1981–82, 2,740 pounds per day of organic and inorganic priority pollutants were discharged daily into the Niagara River. In 1987–88 this number had been cut to 390 pounds per day.

Nationwide, we have made significant improvements in cleaning up our water, land, and air. Still, the problems that remain call for sustained, aggressive action. This year Congress is considering a package of Clean Air Act amendments to further reduce sulfur dioxide, ozone, and toxic air pollutants across the country. The House Energy and Commerce Committee is now revising the RCRA to tighten regulations governing solid and hazardous wastes.

The threat to the environment is far from over, but 20 years after the first Earth Day there is a growing awareness of the problems and a growing commitment to deal effectively with those problems. That, at least, is a good beginning.

FIFTH ANNUAL SALUTE TO PASSAIC SEMI-PRO BASEBALL STARS

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. ROE. Mr. Speaker, there is nothing so truly American as the game of baseball. Like the spring itself, it returns every April and blossoms in a renewal of its affirmation as the true national pastime.

In my 8th Congressional District of New Jersey we have been, indeed, fortunate to have a rich baseball tradition down through the decades, a tradition that has been carried forth by the high level of competition in the Passaic County semi-pro league. On Friday, April 27, 1990, that tradition will again be celebrated with the fifth annual Salute to Passaic Semi-Pro Baseball at the Athenia Veterans Hall in Clifton, NJ.

Mr. Speaker, this year's event is truly special because it will honor six great men whose contributions made their era a golden one both for Passaic athletics in general and for the Passaic semi-pro league in particular. The honored group this year includes John J. Ryan, Herman "Hymie" Osofsky, Jack W. Brady, the late George Raymond Pickett, Joseph A. Stanek, and Augie Lio. I know that, as in past years, this dinner will be a great success, which will be a great tribute to the dedicated dinner committee, comprised of Ted Lublanecki, Charles Lajeskie, Ben Lublanecki, Jean Lublanecki, and Mike Ivanish.

Mr. Speaker, for the benefit of you and our colleagues, I would like to note some of the great accomplishments of these outstanding individuals:

Mr. John Ryan, who lives in Passaic Park, got into semi-pro baseball by keeping the 1927 Passaic High School team together for the summer. The team was called the "Ramblers." That winter Ryan strengthened the team with players from Rutherford, Garfield, and Clifton and named the team the "Passaic Pros." Ryan's team played in the Gersie League which had eight teams from Passaic, Garfield, Clifton, and Allwood.

Herman "Hymie" Osofsky, who retired in 1979, was vigorously involved in sports activities in Passaic for more than a half century. He served 32 years with the Passaic Department of Parks and Recreation, and for 25 years as the director of Passaic Bigger League Baseball and Pony League Baseball. He also organized the Inter-City Playground Basketball League.

Jack Brady distinguished himself from the time he was in high school in Massachusetts—where he earned varsity letters in five sports—to his election to the Bergen County Baseball Hall of Fame. For more than 40 years he was extremely active in numerous sports and organizations in Passaic. This includes 30 years as a coach, manager, and president of the Billy Deitch, Jr., Baseball League. He is also a longtime member of the Passaic Old Timers, Sons of St. Patrick, the Time Out Club, the Passaic Elks, and past commander—1965—of the Gerald V. Carroll Post, American Legion.

Jack Brady has received numerous honors, including beng named to the Bergen County Baseball Hall of Fame. He has also received the 1965 Commissioner Stanek Baseball Man of the Year Award, the Raybestos Manhattan Community Service Award, the 1975 Old Timers Hall of Fame Award, and the Passaic Independent Community Service Organization's Civic Service Award for 1978.

The late Joseph A. Stanek was one of the most outstanding parks commissioners in the history of Passaic, serving as superintendent of the Shade Tree Commission in the Passaic Parks and Public Property Department for more than 30 years. His efforts were responsible for the beautification of Passaic's parks and baseball fields. An Army veteran of World War I, Joseph A. Stanek was extremely active in veterans organizations and was a member of the New Jersey Shade Tree Commission.

The late George Raymond Pickett was an outstanding football and baseball coach at Passaic High School for 27 years, a career he began after completing his World War I service with the U.S. Navy. In the mid-1930's, he was appointed recreation supervisor in Passaic's Third Ward Park, a position he held for nearly 12 years. During that time he organized a highly successful instructional baseball league. He served as president of the Passaic Valley Conference and of the New Jersey State Interscholastic Athletic Association. In 1964 he was given the Joseph Stanek Award as "Baseball Man of the Year."

The late Agostino "Augie" Lio was one of the most colorful, likeable, and respected men in the history of Passaic area athletics. A gifted lineman and kicker, he earned lasting fame for his Thanksgiving Day field goal in 1935 that gave Passaic High School a 3–0 victory over Hackensack High School. Augio Lio received a scholarship to play football at Georgetown University, becoming the school's first All-American selection while also excelling in the 1941 Orange Bowl. He was named All-East for two consecutive seasons.

Following his highly successful collegiate career, Augie Lio went on to the National Football League where he enjoyed a career that lasted 7 years, 3 with the Detroit Lions, 2 with the Boston Yanks, 1 with the Philadelphia Eagles and 1 with the Baltimore Colts of the old All America Conference. He was named All-Pro in 1943 and 1946.

Upon completion of his football career in 1947, Augie Lio stayed close to sports, joining the sports department of the Passaic Herald News where he earned fame as a columnist and editor before retiring in 1985. He covered the New York Giants football team, the first 20 Super Bowls and numerous other major sporting events during his nearly four decades as an outstanding sportswriter.

Mr. Speaker all of these people, through their countless and diverse contributions, have enriched the heritage of baseball and athletics, not just in Passaic County, NJ, but the heritage of baseball wherever competitive sports are played throughout the world. I ask that you and our colleagues join me in saluting these outstanding individuals on their being honored in the fifth annual salute to Passaic semi-pro baseball.

EARTH DAY

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, on April 22, 1970, awareness of environmental protection increased dramatically. A series of environmental occurrences gave rise to the first Earth Day. In towns and cities all over America, millions of citizens demonstrated their concern about air and water pollution and advocated the learning of ecology.

We can get an idea of the impact of Earth Day 1970 on the Nation by asking ourselves some key questions: What changes on the political scene did it bring? What has been achieved? How did it affect public attitudes on environmental issues? Can we see some sprouting seeds that might flower into a national conservation ethic?

According to Gaylord Nelson, the founder of Earth Day 1970, these questions can be answered fairly briefly. Gaylord's major objective in planning Earth Day 1970 was to organize a nationwide public demonstration so large it would get the attention of the politicians and force the environmental issue into the political dialog of the Nation. According to Mr. Nelson, it worked. By the sheer force of collective action on that one day, the American public forever changed the political landscape regarding environmental issues.

As we approach the 20th anniversary of Earth Day, we continue to witness threats that destroy our environment. World-wide efforts are underway to celebrate an occasion to help us recognize the difficulties we face today. Challenges like acid rain, global warming, habitat destruction, and stratospheric ozone depletion continue to linger on into the new decade.

Earth Day offers a special opportunity for everyone to participate by getting involved in a commitment to the protection of the environment. There are countless ways that each individual can participate. Recycling paper, planting a tree, using less energy, or buying recycled products are all simple methods which protect the environment. Everyone can educate themselves about the environment so that we have a better understanding of environmental issues as they unfold.

On Sunday, April 22, 1990, join the celebration of Earth Day in demonstrating to the world our commitment in preserving this planet. Become a team player and protect the environment.

ILIANA A. QUANDER—"WHY I AM PROUD OF AMERICA"

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. FAUNTROY. Mr. Speaker, I want to pay tribute to a young Washingtonian and American who has recently won first place in the District of Columbia contest and seventh place honors in the Voice of Democracy broadcast scriptwriting contest. This year more than 137,000 students participated in the contest, competing for national scholarships, and Ms. Iliana A. Quander was among the 12 national scholarship awardees.

Each year for the last 43 years, this competion has been held. During 1961-62, the Veterans of Foreign Wars assumed sole sponsorship of the competition and expanded the scholarship awards to an actual stipend for 12 finalists, selected from all of the States of the United States. The scholarship awards are impressive and I want to express my gratitude to the Veterans of Foreign Wars for their leadership in this most important crusade—the stimulation and development of sustained interest in education by our young people.

But it is to our District of Columbia scholarship winner that I most want to pay tribute. She is an excellent role model and spokesperson for her peers in these challenging times. Ms. Quander's words follow:

"WHY I AM PROUD OF AMERICA"

My ultimate pride in America stems from Article I of the bill of Rights. It states: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the government for redress of grievances."

Perhaps you still do not understand the extent of power that this gives the American people. Allow me to explain further. This means, my friends, that if one wishes to worship alien beings who one truly believes reveal themselves through our television sets, in America no one will stop you. It means that if your personal belief is that you are in fact Sigmond Freud reincarnated, and want to write a book about your life, in America no one will punish you.

It also means that if a group of people wish to Congregate for a certain cause—lets say their belief is that plants are people too and that their consumption be outlawed and considered murder (well there's no guarantee that Congress will pass a law on this matter)—but in America no one will stop them from peaceably rallying their cause.

In short, as long as there is no immediate danger to public welfare, we're allowed to express ourselves in almost anyway we see fit. And, if what we see fit includes rolling down the hill of the Washington Monument exclaiming, "I'm free! I'm free!" in America absolutely no one will question you.

Why am I proud of this madness? Well, living in America it is common for one to be promenading along only to encounter a variety of people expressing themselves, whether it be for a general cause or for their own.

For this I am proud. Because in many regimented societies, such as the Korean Society, one is expected to express the views and feelings of the masses, rather then the individual.

I have found that freedom of expression is not only a freedom, it is a right. Because to express one's self as an individual is to be human. The woman who walks on all fours and barks is just exercising her right to be human. The gentleman who would much rather date his shadow than one of his own kind is only being human.

This makes me proud. The fact that if one day I suddenly decided to leave civilization, and live off the fruits of my labor, no one except probably my father, will try to block my intentions.

And even if you are not one to worship alien beings, or to condemn plant consumption, or to roll down the hill of the monument, or to walk on all fours, or to date your shadow, do as I do and take pride in the fact that in America we have the right and the freedom to express ourselves in a way that is unique to each and every one of us.

After all, we are only human.

THE RENAISSANCE MAN: MALCOLM FORBES

HON. ARLAN STANGELAND

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. STANGELAND. Mr. Speaker, in May 1989, I captained a bridge team comprised of Members of the House and Senate who played a match against a team of distinguished leaders of business and industry for charity. One of the members of the corporate team was the late Malcolm Forbes, chairman and editor-in-chief of Forbes Magazine, Inc. Forbes had been in the media business since 2 days after his graduation from Princeton. At that time he became owner and publisher of the Fairfield Times, a weekly in Lancaster, OH.

Forbes was a man of many talents and interests. He began his political career when he was elected to the Bernardsville Borough Council in 1949. Two years later he was elected to the New Jersey Senate, a post in which he served until 1958. He ran for the governorship of New Jersey in 1953, but was edged by the incumbent.

As a staff sergeant in World War II, Forbes won the Purple Heart and the Bronze Star with the following citation: "The initiative, resourcefulness, and alert action displayed by Saff Sergeant Forbes prevented possible encirclement of his battalion."

Forbes was the first person to successfully fly coast-to-coast across America in a hot air balloon—1973—setting six world records enroute. He was honored as Aeronaut of the Year in 1975.

Forbes was named Motorcyclist of the Year by Motorcyclist magazine in 1987. In 1988 he was named International Motorcyclist of the Year by the International World of Motorcycles.

Forbes had written several books, the latest of which—1988—is "They Went That-a-way * * *." Other works include "Fact and Comment," "The Sayings of Chairman Malcolm," "Around the World on Hot Air and Two Wheels," and "The Further Sayings of Malcolm Forbes.

Forbes received scores of honorary degrees, was involved in many philanthropic activities, was honored by leaders of many nations, and received dozens of awards for outstanding service and achievement.

Forbes was elected editor and publisher of Forbes magazine in 1954 on the death of his father. Three years later he became editor-in-chief. In 1960 the magazine began a growth spiral that has continued unabated.

His friends and country men will miss him greatly.

A TRIBUTE TO ALAN STEINER

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. FISH. Mr. Speaker, I always have believed that people make the community, and that is true when you look at the life of Alan Steiner of Peekskill, NY.

For more than 15 years, Alan selflessly has devoted thousands of hours to serving the community he loves. His career is a shining example of an individual making a difference.

Alan is a native New Yorker, growing in Batavia, NY, where he attended public schools. After graduation he headed West, where he earned a bachelors from Valparaiso University in Indiana. He picked up a law degree from the State University in Buffalo, and then began his legal career at Westchester County Legal Services.

He stayed there 7 years, working well into the night and many weekends for those who could not afford attorneys.

Alan's civic-mindedness has persisted. He has put in many hours on behalf of Legal Awareness of Westchester, formerly known as Legal Awareness for Women. He sat on the board of the Community Action Program for more than 15 years. To help the needy pay for medical care, he helped start the Westchester Prepaid Health Services Plan. He also has remembered the homeless by providing legal help for the Family Resource Center, chairing the Preservation Co. of the Peekskill Area Health Center and serving on the Hudson Valley Task Force for the Homeless.

The list goes on. Alan Steiner is an individual who never tires of helping others.

For this, his community has said thanks. He has received the Pro Bono Service Award from the New York State Bar Association for the work he has done, at no cost, for individuals and organizations. He also has been awarded the Spirit of Westchester Award for making the Peekskill area a better place to live.

On Friday, May 18, the NAACP presents Alan with yet another honor, the Distinguished Service Award. Being recognized by America's pre-eminent civil rights organization is a high distinction, and is richly deserved by Alan Steiner.

RECOGNIZING DR. T. EDWARD HOLLANDER

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. COURTER. Mr. Speaker, it is my pleasure to congratulate Dr. T. Edward Hollander on being the recipient of this year's New Jersey Pride Award for Education. Dr. Hollander, the chancellor of the New Jersey Department of Higher Education, has made important contributions to our State.

The New Jersey Pride Award honors those individuals who have made significant contributions to their field and to the State of New Jersey. His vision guided the Governor's Excellence Initiatives Program for New Jersey's colleges and universities. He has been a preeminent leader in designing programs to keep New Jersey competitive in the world market by addressing rapidly changing technologies and sciences. At the same time, he has been a powerful force stimulating statewise interest in and concentration on the arts and humanities.

On this occasion of his award, I extend my congratulations to Dr. Hollander and wish him continued success and best wishes for the future.

A TRIBUTE TO SANDRA GONCALVES

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize an outstanding student from my community who has earned honors along with her classmates for winning the 1990 Rhode Island State championship title in the bicentennial of the Constitution and Bill of Rights competition.

Sandra Goncalves, of North Providence, RI, attends Bishop Keough High School in Pawtucket, RI. This competition is held annually to test students' general knowledge of the Constitution as well as their ability to apply the Constitution to contemporary issues. The students were evaluated in three areas: Presentation, overall knowledge of the Constitution, and application of the principles of the Constitution. For Bishop Keough High School, this title was very special for the school finished second last year. Through hard work, combined with the excellent guidance and preparation by her teacher, Ms. Carol Costa, Sandra and her classmates were able to achieve excellence. Sandra and her classmates, along with Ms. Costa, will now travel to Washington, DC, in May to compete in the national competition against teams from across the Nation.

It is with great pleasure that I salute Sandra Goncalves and the members of Ms. Costa's U.S. history class from Bishop Keough High School. Their outstanding knowledge of the Constitution and its principles serves as a reminder to us all about the importance of this great document for all Americans. I would like to wish Sandra and her classmates good luck in national competition.

EDUCATING OUR YOUTH WORK FORCE

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. PAYNE of New Jersey. Mr. Speaker, education in science, engineering, and mathematics is crucial to our country's economic future. We must have a capable scientific and technological work force to remain economically competitive in a global economy. Educating our youth in these areas should be a top priority in the 1990's for us all. The involvement of our corporate citizens, in public-private partnerships, is one way to expose our children to advanced technology and prepare them for our scientific and technological workforce.

On April 23, 1990, I will have the pleasure of meeting with representatives of an innovative program that utilizes a variety of talents, resources, and expertise in such a public-private partnership. These partners are Merck and Co. and the community of East Orange, NJ. Merck & Co., a pharmaceutical firm headquartered in New Jersey, and its employees have lent their time, talents and resources to efforts established to help prepare our young people for bright and productive futures. It is the work of Merck's Dr. Cecil Pickett and Mr. Ibrahim Sharif, an active member of the East Orange community, as well as countless volunteers, that will make the difference in the lives of many of our young people.

Mr. Speaker, New Jersey's 10th Congressional District is truly fortunate to have good friends. I know my colleagues will want to join me as I thank Merck & Co. for being a good corporate citizen and congratulate the volunteers for jobs well done.

HONORING MR. EUGENE MICHAEL CIANFLONE

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. LOWERY of California. Mr. Speaker, I rise today to call your attention to Mr. Eugene Cianflone, an outstanding citizen of San Diego who donates his time and talents to fellow veterans at the local veterans hospital.

Mr. Cianflone is presently one of 960 volunteers who spend more than 150,000 hours each year at the Veterans Medical Center. Not only does he bring love and compassion for the people he visits, but accompanied by his bugle, he rekindles the memories of a time gone by. Whether it be a request for a military theme or a hometown favorite, Eugene Cianflone knows them all. His music truly brightens the lives of those he serves.

But he does more than just perform. A veteran himself, he combines a sympathetic ear with an understanding heart, offering comfort and humor to the people who have valiantly served our country.

Over the years, Eugene has received some 1,000 commendations, 5 Presidential letters of appreciation, and more than 30 local awards. Mr. Speaker, please join me in further honoring this hero for his exemplary service to the veterans of the United States.

JASA

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. GREEN. Mr. Speaker, since its founding in 1968, JASA [Jewish Association for Serv-

ices for the Aged] has developed into a principal voluntary agency in New York providing comprehensive services for the elderly. With the goal of helping older adults to remain in the community, JASA operates 22 social work counseling offices, 26 senior centers, 8 housing facilities for the well elderly, plus an extensive network of home care and community services in New York City, Nassau, and Suffolk Counties. JASA provides a place for older people to enjoy the benefits, as well as cope with the challenges of longer life. This year JASA has assisted 62,000 elderly persons and their families.

On June 14, JASA will celebrate 22 years of outstanding service to the elderly with a gala fundraiser. The event will be held in honor of JASA President Ruth Perelson and Chairman Carl Glick. These dedicated individuals have provided JASA with exemplary leadership and have contributed much to the JASA success story.

As JASA's president, Ruth Perelson has worked to increase community recognition and support for JASA's accomplishments. Through the public forums available to her—the press, radio, speeches at community occasions—she has told the JASA story and has been an effective advocate for senior citizens' needs. She has fostered a strong bond between trustees, staff, and senior citizens—those who serve as volunteers as well as those who receive JASA's services. Under her leadership, JASA has further expanded its services, giving priority to creating affordable housing with essential support services.

Ms. Perelson's leadership in other areas of New York community life has been equally impressive. Her affiliations include: Trustee and former associate treasurer, Board of Jewish Education of Greater New York; delegate, Domestic and Overseas Divisions Assemblies, UJA-Federation of Jewish Philanthropies of New York; personnel committee member, Council of Jewish Federations; and former trustee, Alumni Society of the Baruch School of Business, City College of New York. During Women's History Mouth, April 1989, Ms. Perelson received the New York City Council President's Award for outstanding leadership.

Likewise, under Carl Glick's enthusiastic leadership as chairman and former president of JASA, JASA established new programs to improve the quality of life for thousands of older adults. Services established under his tenure include: Project Crisis, the Mobile Geriatric Crisis Intervention Unit; JASA/Bayview Senior Center; JASA/Luna Park Senior Center; Services for the Aged, a home care program; and two housing facilities, the Evelyn and Louis A. Green Residences in Cooper Square and in Seagirt in the Rockaways. JASA's programs to assist the aged to remain in their own homes and enjoy their later life progressed significantly during Carl Glick's administration.

In addition to his work with JASA, Mr. Glick is president of the America-Israel Cultural Foundation; president emeritus of HIAS; director and chairman of the budget and finance committee of NYANA; member of 11 top boards and committees of UJA-Federation; and president of the Jewish Cultural Foundation of New York University.

The outstanding dedication and inspired support of Ruth Perelson and Carl Glick is truly impressive. It is most fitting that they should be honored on June 14, by JASA, the organization to which they have given their unflagging energy, unique talent, and enthusaiastic commitment.

SUPPORT THE USE OF TARGETED TAX-EXEMPT FINANCING

HON. LOUISE M. SLAUGHTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Ms. SLAUGHTER of New York. Mr. Speaker, I rise today to introduce legislation extending the sunset provision for "small-issue" industrial development bonds from September 30 of this year until December 31, 1995. I strongly support the use of targeted tax-exempt financing to encourage economic development, and feel that the changes made concerning the use of industrial development bonds over the last several years have created a targeted and viable program which deserves extension.

In this era of shrinking Federal resources we must target assistance to areas of greatest potential investment in our economic security. In my view, the current law appropriately targets the use of small-issue bonds to an area which does the most for our economy and our people: the manufacturing sector.

Manufacturing is important for a number of reasons, not least of which is the fact that it is a wealth creating activity, and one that is self-perpetuating. Most innovations and technological breakthroughs come as a part of the manufacturing process. We must support efforts to retain our domestic manufacturing capabilities. Although many argue that there is no problem since manufacturing has maintained its percentage of contribution to GNP, the fact remains that the total number of people involved as a percentage of the work force has diminished, and too much of the actual production of goods is moving overseas. This is not an inevitable fact. It is happening because we allow it to happen.

Furthermore, if we are to turn our trade deficit around, we must face the basic fact that we can no longer consume more than we produce. And to increase production means boosting the U.S. manufacturing base.

There are many approaches to address these issues and strengthen our industrial economy, but the essential element of any approach is finance. The ability of our smaller firms to achieve their full potential, both as a producer for the domestic market as well as for international markets, continues to be limited by the access to capital. With new opportunities opening and encourage investment capital in this area. Industrial development bonds are an important part of encouraging this development and for spurring further investment and development. This is why the small-issue IDB targeted to manufacturing is so important.

The use of IDB's in New York has had a proven track record in promoting local economic revitalization efforts. They are an important tool for State and local governments efforts in this area. This is particularly important considering the fact that over the last 10 years the Federal Government has been shifting many of its burdens to State and local governments, while financial assistance to these groups—in the form of tax benefits or grants—has diminished sharply. To allow the small-issue private activity bond program to lapse would be unconscionable. In these times of shifting burdens, such tax-exempt financing tools will become more and more important to local government.

Tax-exempt financing has been used effectively in the 30th District of New York to finance public/private ventures, and to leverage capital for job creating projects, not to mention the productive uses general obligation municipal bonds have been put toward. The productive capacity of the American economy depends upon a reliable infrastructure and the availability of capital to sustain that infrastructure.

The limitations placed on tax-exempt bonds in the 1986 tax-reform legislation have added an element of responsibility and cost effectiveness to the use of such bonds, whether they be "private activity" or "general obligation." However, I do feel that the arbitrage and refunding restrictions should be loosened and that the volume caps should be reevaluated. These are matters of the larger debate on tax-exempt financing, but I feel that it is important to raise these issues in the context of this bill.

We are still the world's leading military power, but our economic predominance no longer exists. We need to redevelop our infrastructure, and direct some of our efforts at home. However, we need to address these issues in a targeted and cost-effective manner. I feel strongly that this legislation is a step in the right direction. Continuing the tax exemption for small issue-bonds is a way of encouraging economic development from the grass roots in a fiscally responsible manner.

SUPPORT A FREEZE BUDGET

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. PORTER. Mr. Speaker, when asked the most pressing problem facing the country, the people of the United States name many concerns—crime, drugs, homelessness, competitiveness. But repeatedly the same issue tops the list—the budget deficit.

You might think Congress would address the Nation's top priority, but unfortunately nothing could be farther from the truth.

Rather than making the difficult choices our constituents sent us here to make, we cave in to special interests and produce deficit after deficit. Each year it is the same. We convince ourselves that little progress is possible this year, but just wait until next year, or until after the next election, or whenever, so long as it isn't today.

Mr. Speaker, next week I will be introducing my own budget resolution that freezes spending in most of the functions of Government.

Defense spending will be cut to $292 billion and COLA's will be frozen, but demographic growth in entitlement program will remain. This will require us to prioritize spending within all 19 functions of Government, but it will result in real deficit reduction.

Such a plan doesn't come without pain, but it carries with it something the budgets we usually see don't—courage and honesty. I ask my colleagues to support this effort.

DE KLERK BOTTOM LINE REQUIRES THAT SANCTIONS BE MAINTAINED

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. FAUNTROY. Mr. Speaker, what follows is an op-ed article by Washington Post columnist William Raspberry on South African President F.W. de Klerk's April 17 speech before Parliament. Raspberry's commentary offers ample reason why any effort by the Bush administration to have sanctions against South Africa lifted must be strongly resisted by Congress. Further, de Klerk's rejection of majority rule as "not suitable for a country like South Africa," underscores why additional sanctions must not be ruled out by Congress if Pretoria is to be convinced that nothing short of a genuine democracy—as outlined in the December 1989 United Nations Declaration on South Africa which our Government helped draft, and voted for—will lead to a normalizing of South Africa's international economic relations. By firmly reiterating his rejection of majority rule, de Klerk, in effect is stating that democracy is unsuitable for South Africa. And anything less than the establishment of democracy in South Africa necessarily implies continued white minority domination. President de Klerk cannot have it both ways: Stating that all South Africans will enjoy "a vote of equal value for every adult citizen," while rejecting the majoritarian democratic implications of such a claim. Let us hope, as Raspberry suggests, that "de Klerk was simply establishing a bargaining position to counter the ANC's one-man, one-vote stance." Mr. Speaker, given the eagerness of the administration to lift certain sanctions against South Africa as a reward to de Klerk for the preliminary steps he has taken, important though they undoubtedly are, I urge my colleagues to reflect on the assessment of Mr. Raspberry of President de Klerk's latest pronouncements.

[From the Wasington Post, Apr. 18, 1990]

DE KLERK'S REGRESSION

(By William Raspberry)

F. W. de Klerk, who a couple of months ago stirred the passions of those who hope for racial justice in South Africa, has now delivered the equivalent of a cold shower.

He remains in favor of "power sharing," he said in a major speech before the South African parliament, but for the first time he made clear that his view of power sharing does not embrace black majority rule, which he described as "unacceptable."

"We believe that majority rule is not suitable for a country like South Africa because it will lead to the domination, and even the suppression, of minorities."

De Klerk's renunciation of the notion of one-man, one-vote in a unitary system came just two weeks before his scheduled May 2 talks with Nelson Mandela—talks that were expected to set the stage for negotiations toward a new political arrangement that would accord full political rights to all South Africans. It isn't clear what effect his newest statement will have on those talks, but the guess here is that it will make matters a good deal more difficult.

Things were tough enough as it was. The government, pointing to continuing black-on-black violence, has been reluctant to lift the "state of emergency," which the black leadership insists is the major barrier to successful talks. And the black leadership, including Mandela's newly unbanned African National Congress, has refused to renounce armed resistance to apartheid, a refusal the government sees as the principal stumbling block.

The most hopeful sign that peaceful change was about to happen has been the manifest respect de Klerk and Mandela hold for one another.

The possibility remains that the de Klerk speech will leave that mutual respect unchanged. After all, Mandela, immediately after his release from 27 years' imprisonment, made a point of insisting that any new political dispensation protect the rights of the white minority. And de Klerk did stress his acceptance of "full political participation" by all South Africans, with "a vote of equal value for every adult citizen."

But his newly clarified view of "full political participation" is bound to disappoint the ANC Leadership, which seems to have been proceeding on the expectation of a one-man, one-vote arrangement—perhaps with some protections for the white minority, but nothing like de Klerk's notion of constitutional checks and balances, decentralization of power and "the requirement of consensus on controversial matters."

Since the dismantling of apartheid—the very foundation of South Africa's white minority rule—is indisputably "controversial," one reading of the de Klerk speech is that all the talk of breakthrough and fundamental change is nothing but smoke and mirrors.

The only thing that argues against such a reading is the boldness of the moves already taken by the fledgling de Klerk government. Mandela has been released. Some 33 outlawed organizations, including the ANC and the South African Communist Party, have been unbanned. Important political prisoners have been released, and there is serious talk of amnesty for activists who have violated the criminal codes for political purposes. (It is not yet clear whether exiles charged with such crimes as terrorism, insurrection and treason might be included in the amnesty.)

But if these moves suggest that de Klerk is serious, his Wednesday statement suggests serious—perhaps insurmountable—limits on his seriousness.

"We believe that majority rule is not suitable for a country like South Africa because it will lead to the domination and even the suppression of minorities," he said. "Majority rule provides a solution only for whichever group may constitute the majority, but entails great risks for the rights and values of minorities. That leads to a power struggle and domination and is not the right model for a country with a tremendously diverse population."

Perhaps de Klerk was simply establishing a bargaining position to counter the ANC one-man, one-vote stance. maybe some mutually acceptable arrangement will emerge from the negotiations, when—and if—they take place.

But the fear is that de Klerk's speech will needlessly complicate the May 2 "negotiations to negotiate"—unless the government at that time offers some dramatic new concession: for instance, an offer to grant a general amnesty and lift the state of emergency in exchange for a renunication of violence on the part of the ANC.

Surely it is possible for negotiators to work out arrangements for protecting the important interests of South Africa's white minority—including property rights and maintenance of a market economy. But first it will be necessary that all parties take the negotiations seriously. In that regard, the de Klerk speech, however reassuring it may have been for whites, didn't help a bit.

A TRIBUTE TO MARIANNA FORTE

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize an outstanding student from my community who has earned honors along with her classmates for winning the 1990 Rhode Island State Championship title in the Bicentennial of the Constitution and Bill of Rights competition.

Marianna Forte, of North Providence, RI, attends Bishop Keough High School in Pawtucket, RI. This competition is held annually to test students' general knowledge of the Constitution as well as their ability to apply the Constitution to contemporary issues. The students were evaluated in three areas: Presentation, overall knowledge of the Constitution, and application of the principles of the Constitution. For Bishop Keough High School, this title was very special for the school finished second last year. Through hard work, combined with the excellent guidance and preparation by her teacher, Ms. Carol Costa, Marianna and her classmates were able to achieve excellence. Marianna and her classmates along with Ms. Costa, will now travel to Washington, DC, in May to compete in the national competition against teams from across the Nation.

It is with great pleasure that I salute Marianna Forte and the members of Ms. Costa's U.S. history class from Bishop Keough High School. Their outstanding knowledge of the Constitution and its principles serves as a reminder to us all about the importance of this great document for all Americans. I would like to wish Marianna and her classmates good luck in the national competition.

CONGRATULATIONS TO ROBERT AND ELONNA McKIBBEN, THEIR NEW QUADRUPLETS, AND THEIR COMMUNITY

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to Robert and Elonna McKibben and their new quadruplets, who are from my 17th Congressional District of Ohio.

Life with four babies is both busy and happy. There is always something to do, whether it's feeding, changing a diaper, or dressing them. The McKibbens are fortunate to have received a great deal of help from their community. The Cortland Trinity Baptist Church, the First Baptist Church of Howland, and neighbors have all taken turns supplying the McKibbens with dinners. The community has also raised money to build an addition on to the McKibben's house, which cost about $50,000.

But the McKibbens have had their fair share of pain, however. Elonna McKibben was diagnosed as having cancer after the birth of her children. After she was diagnosed, she began using a controversial experimental drug called Can Cell, which she believes has cured her. A recent CAT scan has shown that Mrs. McKibben has no signs of cancer.

Mr. Speaker, I would like to congratulate Robert and Elonna McKibben on the birth of their four babies, Zachary, Brenna, Taryn, and Jade as well as wish them the best of luck. I would also like to commend the many people who have taken the time to help the McKibbens. These people have given of themselves unsparingly and are a shining example of what true friends and neighbors are. I am honored to have these people in my district.

LIMITED USE OF IRA FUNDS FOR FIRST-TIME HOME BUYERS

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MATSUI. Mr. Speaker, I rise today to introduce legislation which would remove a disincentive in the tax laws for limited use of IRA funds for the first-time purchase of a home. I am pleased to be joined in this effort by my colleague from Pennsylvania, Mr. SCHULZE. The proposal which I am introducing today is similar to measures proposed by Senator LLOYD BENTSEN as well as President Bush, but with one significant modification: This proposal would permit withdrawals on a penalty-free basis from existing IRA's for first-time home purchases by not only the home buyer, but also by their spouse, parent, or grandparent. Since the IRA account balance of older taxpayers, such as parents and grandparents, tend to have a larger account balance than those of younger taxpayers, I believe that this proposal would help reverse the decline of home ownership in this country, especially among the prime home buying ages of 25 to 34 years old. In many cases, these individuals are able to support a conventional mortgage, but are simply unable to set aside the needed funds for a downpayment on their first home.

Under this proposal, a taxpayer, as well as his or her spouse, parent, or grandparent would be allowed to withdraw up to $10,000 collectively to make a first-time purchase of a home. While the proposal would exempt withdrawn funds from the 10-percent penalty that is currently imposed under the income tax laws for premature withdrawals, any amounts withdrawn for first-time home purchases would be considered taxable income to the IRA account holder. The definition of a qualified first time home buyer would include any taxpayer who did not own an interest in a principal residence for the past 3 years. In addition, the purchase price of a home acquired with withdrawn IRA funds could not exceed 110 percent of the average area purchase price.

There is no question this country faces a critical problem in the area of housing affordability. During the previous decade, we witnessed a steady decline in the Nation's home ownership rate, reversing a 40-year trend of rising home ownership in this country. A particularly disturbing trend is that the largest decrease in home ownership was noticed by those under 25 years of age, and by those between the ages of 25 and 34. The combined home ownership rate of these two age groups declined by roughly 15 percent during the 1980's. Various studies have cited the inability of young people to save enough money for a downpayment as the single most compelling problem preventing these individuals from buying a home.

Mr. Speaker, investing IRA funds in a home is a very prudent investment. In addition, use of an IRA account to acquire a residence is totally consistent with the overall retirement purpose that IRA's were intended to serve. While adoption of this measure is not a panacea for curing the Nation's housing affordability epidemic, this legislation does constitute a positive, important first step.

RECOGNIZING JEROME H. LEMELSON

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. COURTER. Mr. Speaker, it is my pleasure to congratulate Mr. Jerome H. Lemelson on being the recipient of this year's New Jersey Pride Award for Science and Technology. Mr. Lemelson has made tremendous breakthroughs in the technology world, and has proven to be an important asset to our State.

The New Jersey Pride Award honors those individuals who have made significant contributions to their field and to the State of New Jersey. Mr. Lemelson holds more patents—over 450—than any other active American inventor. If you use a tape recorder, you are a beneficiary of Mr. Lemelson's genius; he conceived the drive motor used in nearly all tape recorders. One of his latest inventions is a thermometer that calls out the temperature measured. Originally invented to provide blind people who live alone with a means of taking their temperature, it is now being applied in hospitals by nurses' aides as a reinforcement to reduce erroneous readings.

On this occasion of his award, I extend my congratulations to Mr. Lemelson and wish him continued success and best wishes for the future.

A TRIBUTE TO KELLY FORCIER

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize an outstanding student from my community who has earned honors along with her classmates for winning the 1990 Rhode Island State Championship title in the Bicentennial of the Constitution and Bill of Rights competition.

Kelly Forcier, of Providence, RI, attends Bishop Keough High School in Pawtucket, RI. This competition is held annually to test students' general knowledge of the Constitution as well as their ability to apply the Constitution to contemporary issues. The students were evaluated in three areas: Presentation, overall knowledge of the Constitution, and application of the principles of the Constitution. For Bishop Keough High School, this title was very special for the school finished second last year. Through hard work, combined with the excellent guidance and preparation by her teacher, Ms. Carol Costa, Kelly and her classmates were able to achieve excellence. Kelly and her classmates, along with Ms. Costa, will now travel to Washington, DC, in May to compete in the national competition against teams from across the Nation.

It is with great pleasure that I salute Kelly Forcier and the members of Ms. Costa's U.S. history class from Bishop Keough High School. Their outstanding knowledge of the Constitution and its principles serves as a reminder to us all about the importance of this great document for all Americans. I would like to wish Kelly and her classmates good luck in the national competition.

FAMILY AND MEDICAL LEAVE ACT, H.R. 770—PART 1

HON. TIMOTHY J. PENNY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. PENNY. Mr. Speaker, the House will soon be voting on a bill to grant extensive leave benefits to American workers. The Family and Medical Leave Act, H.R. 770, would require employers to grant 10 weeks of unpaid family leave over a 2-year period and 15 weeks of unpaid medical leave over a 1-year period to employees who work at least 20 hours per week and have worked for the same employer for at least 1 year.

Providing leave for employees to have a child or care for a sick relative is laudable. But

I believe it is crucial that these benefits be negotiated by employers and workers; not mandated by the Government. By federally mandating specific types and lengths of benefits, we effectively remove all flexibility from the process. Employees and employers find the best arrangement when both agree on a fringe benefit package tailored to their specific needs.

Extensive mandated benefits would create a heavy burden for small businesses. This is important to consider because 66 percent of the jobs held by young Americans, who are most affected by this policy, are provided by small employers. I fear that passage of this mandatory legislation could actually reduce the options that many employees now enjoy. It is obvious that most employers will have to drop other benefits to absorb the increased cost of complying with mandated family leave. Others fear that some employers would discriminate against those job applicants who are more likely to use leave. Employers across America have responded to changes in the workplace over the last several years. For example, the National Federation of Independent Business [NFIB] reports that 70 percent of its members already have agreements with employees to provide leave for the birth of a child.

If we are to consider mandating a leave program, I would favor maternity leave. Such a policy addresses one of the central conflicts two-career families face: how to care for a new born child while holding on to a job that brings needed income home to the family. This type of maternity leave benefit would also strike a fair balance between businesses and employees. Most employers could offer this limited leave option as part of a fringe benefit package without having to cut corners on other benefits to make up the cost.

I am including following this statement materials related to the Family and Medical Leave Act that may be of interest ot Members. In future extensions, I will expand on this statement, and include additional letters, statements, and analyses in opposition to the extensive mandate of benefits contained in H.R. 770.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC., February 8, 1990.

H.R. 770, THE FAMILY AND MEDICAL LEAVE ACT OF 1989

"FEEL GOOD" LEGISLATION THAT IS STILL A BAD IDEA

DEAR COLLEAGUE: Once again rumors are afloat that proponents are preparing to bring to the Floor H.R. 770, the Family and Medical Leave Act. In brief, H.R. 770, often misleadingly referred to as a "parental leave" bill, mandates that employers provide (1) at least 10 weeks of unpaid "family leave" every two years for the birth, adoption, or foster care placement of a child, or the care of a child or parent having a "serious health condition" and (2) at least 15 weeks of unpaid leave each year for an employee unable to work due to a "serious health condition." Health benefits must be continued through the period of leave, and the employee is guaranteed reinstatement to the same or equivalent position. Enforcement is through the Department of Labor or a private civil action with jury trials and damages allowed up to four times lost back pay.

The legislation is counterproductive to the interest of employees and employers: It is one of those unfortunate realities of life that employers have limited resources and that only a certain finite amount can be set aside for employee benefits. A federal mandate dictating what type of benefits must be provided only reallocates portions of the benefit budget to a favored class of employees (those identified by the legislation) at the expense of the rest. If one benefit is required, then another—perhaps one more desired by the employees of a particular company—is eliminated or reduced. Employers should be allowed the flexibility to tailor their benefit plans to the needs of their employees.

The structural framework established by the legislation is unworkable and fails to recognize the legitimate needs of an employer to orderly manage its workforce: Space prevents discussing these problems in detail, but some of the most significant are as follows:

1. H.R. 770 allows employees virtually unrestrained discretion as to when to take leave and when to return. The vague requirements that an employee provide "reasonable and practicable" notice so as not to "unduly disrupt" the operation of an employer lack any substance, and an employer may not even require advance notice of an employee's intent to return. In the meantime, the job in question msut be held open or be filled by a temporary.

2. The eligibility requirements for leave are, at best, few. The critical definition of "serious health condition" in the bill is so elastic as to be meaningless, and there is no requirement that leave be used for exigent or pressing circumstances. Indeed, time could be taken off even though an able-bodied spouse was at home or another relative was tending to the needs of the child or parent. Nor is there a requirement that the period of leave even be used for "family" purposes. The extended familial relationships created by the expansive definitions in the bill of "son or daughter" and "parent" exacerbate this problem.

3. The so-called "Key" employee exemption is no exemption at all as it is limited to the very highest paid employees, whose reinstatement would cause "grievous" economic harm. Would a nurse on an understaffed late shift or an emergency worker of some type meet this definition? Unlikely. Obviously, those workers who are truly critical to the operation of the employer are not necessarily those who are the highest paid. It is also difficult to envision, in any case, a situation in which reinstatement of an individual would result in "grievous" economic harm.

4. The enforcement mechanism is overly complex—indeed, its provisions comprise almost one-half of the entire bill—and would permit an employee to file a private cause of action or a complaint with the Department of Labor, replete with administrative law judge hearings. Possible damages, with jury trials, of up to four times lost back pay are unparalleled under other major labor law statutes.

The costs of this legislation will be considerable: The General Accounting Office (GAO), in November 1987, based on a limited study of two labor markets, put the cost of continued health insurance alone at $188 million (at a 50 or more employee coverage threshold) to $212 million (35 or more employees). In February 1989, GAO estimated these costs would have increased by about 30 percent. Given the unabated, well-publicized increases in health insurance costs, what will the costs be in another year? in two years? in three years? Further, GAO assumed that no costs (such as lost productivity) would be associated with an absent employee or the need to train a temporary replacement worker. In contrast, the American Society for Personnel Administration has estimated that costs for training replacement workers could be conservatively estimated at $56.28 million. Other expenses, such as those associated with litigation, will inevitably be incurred.

Need for the legislation: Of course, perhaps the problems with this legislation could be ignored if there was compelling evidence of a pressing need for its enactment. However, employers are increasingly addressing the family and individual needs of their employees, and this trend will undoubtedly continue as women comprise an ever greater portion of the workforce. A 1987 study by the Bureau of Labor Statistics (BLS) of over a million establishments (including small employers) demonstrated that approximately 63 percent of those surveyed had some type of flexible work schedule/child care policy for their employees. A 1988 BLS benefit plan survey of over 30 million employees at medium and large firms found that approximately 90 percent were covered by disability leave (which, under the Pregnancy Discrimination Act, must cover disability due to pregnancy, child birth, and related medical conditions) with some level of income replacement and that one-third were covered by formal benefit plans providing maternity leave to care for a newborn child; such leave was narrowly defined and considered separately from other leave benefits, such as sick leave or vacation leave, which might also be used for this purpose. Further, as the GAO noted, many employers no doubt accommodate their employees on an ad hoc basis.

Finally, you may wish to ask whether the level of constituent letters that you may have received on this subject indicates that there is a problem here which necessitates the enactment of nation-wide legislation.

We urge your opposition to H.R. 770.

Sincerely,

FRED GRANDY.
TIM PENNY.

INDIA HUMAN RIGHTS PROBLEMS CONTINUE

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. DREIER of California. Mr. Speaker, I was hopeful that the election of Prime Minister V.P. Singh would improve the human rights situation in India. Unfortunately, questions and concerns continue. India remains the only democracy to prohibit Amnesty International from conducting human rights reviews, and the situation in Kashmir worsens daily.

I would like to submit a statement by a member of the British Parliament who personally visited India and shares his experience and views on this important situation.

PARLIAMENTARY DEBATES—HOUSE OF COMMONS—OFFICIAL REPORT

INDIA

Motion made, and Question proposed, That this House do now adjourn.—[Mr. Patnick.]

10 p.m.—Mr. Max Madden (Bradford, West): I am pleased to introduce a short debate on relations between Her Majesty's Government and India, the first such debate in the House for some considerable time, I have recently returned from a brief visit to India and I thank the authorities, especially the governor of the Punjab, for their assistance and co-operation, and a range of human rights organizations and their brave and dedicated members for their help and support during my visit.

My main purpose was to investigate human rights in the Punjab. With the intraciable problem of Northern Ireland much in my mind, I realize that no Britisher in India can feel superior when discussing human rights in the Punjab, where the forces of law and orders are pitched against terrorists. I talked to police officers in the Punjab who, like security officers in Northern Ireland, told me that many of the terrorists were gangsters who prayed on Sikhs and Hindus for money and power. Few, they argued, were motivated by dreams of an independent Khalistan.

I talk to human rights groups in the Punjab who, like their counterparts in Northern Ireland, told me that state violence and repression had alienated many in the Punjab, Sikh and Hindu, and had provoked widespread violence and terror. Both sides claimed, rightly I am sure, that all ordinary people in the Punjab, Sikh and non-Sikh, are sickened by violence and want an end to it. I talked to scores of those ordinary people and their stories were deeply disturbing.

I shall never forget the Sikh father whose 14-year-old daughter was raped and drowned by a police officer. The father was brutally beaten by police three times over two days. He was seeking the return of his daughter's body for cremation. He was warned that if he did not stop complaining, what had happened to his 14-year-old daughter would happen to his 7-year-old daughter. The father is refusing to wear shoes until he gets justice.

I shall not forget the young Sikh who was shot as a terrorist after he stood with his arms above his head in a field for five minutes. The police later admitted that they had made a mistake. Senior police officers saluted at the young man's cremation. His family is still waiting for the compensation that it was promised.

I shall not forget the relatives of the young man who was shot while marching in a Sikh religious festival. Again, the police admitted a mistake. His brother has been warned off pressing for police officers to be punished.

I shall not forget the 500 prisoners in the Amritsar security prison who lined up in the sun to meet me and my team. Each one was holding his record papers. There were more than 300 held on petty offences without bail. The youngest was a boy of 14 and a half who had been held in that prison for eight months without trial.

There were mothers and daughters who talked about their husbands and brothers, who had been abducted by the police months and even years ago. There were men and women who showed us bruises, scars, broken arms and broken legs that were the result of police interrogation. I shall never forget the men and women who complained of systematic police harassment, with regular house searches, property smashed, goods and money stolen, and threats of extortion of money to avoid imprisonment.

There is no doubt that Operation Bluestar, the Army code name for the attack on the Golden Temple in 1984, will never be forgotten or forgiven by most Sikhs. It defiled their holiest place and strengthened the view of many of them that the last Indian Government had embarked upon a deliberate policy of eradicating Sikhs, who form just 2 per cent of India's population. Such feelings were intensified by the massacre of 5,000 Sikhs in Delhi hours after the assassination of Mrs. Indira Ghandi and of many Sikhs in other parts of India.

In Delhi I visited some of the 1,200 widows struggling to bring up their families alone. One woman cried bitterly as she showed me the photographs of her dead husband and sons. She lost 18 relatives to the murderous mobs. From the window of a two-roomed tenament, home to a family of six, I looked down across a mud hut village which is home to 1,000 families who fled east Delhi to find relative safety with other Sikhs in west Delhi. With the monsoons this mud village becomes a sea of mud, with the summer heat a stinking cesspit. There are no drains, water supply or electricity; there are typhoid and cholera. The new governor of Delhi has promised these people a plot of land nearby where they can build decent homes. They hope that this promise will be kept and that the bulldozers will not return to demolish their huts.

None of these people, the victims of murderous communalism, believe that what happened was spontaneous. The mobs were organised. They were led. The plan was to kill as many male Sikhs as possible, including boys and even babies.

While the horror of the massacres will never dim, many Sikhs cheered last year's election of Mr. V. P. Singh as India's Prime Minister. The BJP, the Hindu fundamentalist party, appears opposed to Mr. Singh's pressing on with his plans, announced after his election victory, to secure reconciliation with the Sikhs in the Punjab. Elections to the Punjab state assembly are seen by Mr. Singh as a top priority. However, unless they are called by 11 May, President's rule will continue—and that will surely spark off more and escalating violence.

There are those inside and outside the Punjab who believe that a new settlement of the Punjab is possible. A federal solution, with the central Government retaining powers over foreign relations, defence and communications is widely supported. The Prime Minister and the new governor of the Punjab rightly stress that building confidence and trust is vital if reconciliation is to succeed. Early elections to the Punjab state assembly are seen by many as vital to that confidence-building process.

These should also, in the view of many, be independent machinery for monitoring human rights in the Punjab, together with independent machinery for investigating complaints against the police. Amnesty International, which has hitherto unfortunately been refused permission to visit the Punjab, could offer the governor and the Government of India valuable advice about how to establish that machinery.

During my visit Sikhs complained to me about a number of problems. They complained about there being no Sikh in the Cabinet or in any of the senior executive positions in the Punjab Government. They complained about the apparent bar on Sikhs reaching the most senior ranks of the Army. Many Sikhs believe that they are mistrusted. They resent the propaganda that has depicted the Sikh turban worldwide as a symbol of terrorism.

People living overseas, including British citizens of Sikh origin, find it difficult to visit their families and friends. I hope that the British Government will make representations to the Indian Government to make that easier. I also hope that they will make representations to the Indian Government urging them to allow young Sikhs from the Punjab to study in Britain and other overseas countries. At the moment, they experience great difficulty in obtaining student visas to study here or elsewhere.

If there is uncertainty about the future of the Punjab, there is great anxiety about the future of Kashmir. During my visit to Kashmir there were many reports of mass protests involving anything up to 1 millon people, with deaths, injuries and many more soldiers being deployed. It is now believed that between 200,000 and 300,000 security forces are deployed in Kashmir, and more are on the way. A permanent curfew has been in place for the past nine weeks.

Many argue that the people of Kashmir should be given a referendum in which they could vote freely and fairly for their future. There appear to be three options—for them to remain part of India, for them to join Pakistan or, the option that has been gaining support, for Kashmir valley to join Azad Kashmir and parts of Jammu, to become a new independent state.

During my visit, a promient Kashmiri business man who favoured the third option said:

We could become the Switzerland of Asia, with tourism and the careful development of our natural resources. The borders could be guaranteed internationally, safeguarded by the United Nations. A state of 10 million people, we could become a tranquil, prosperous buffer between India and Pakistan."

The Indian Government are making a serious mistake by alleging that there are those outside Kashmir and outside India who are instigating violence and disorder in Kashmir. In making those charges, the Indian Government's credibility is seriously undermined so long as they refuse permission to foreigners to visit Kashmir and so long as they stop the world's media reporting what is happening in Kashmir.

I hope that India's new Prime Minister will quickly see the difficulties that his Government will face if they continue that policy. I hope that he will allow visitors and the free reporting of what is happening in Kashmir. I hope the Indian Government will agree to a request that I made informally today to the Indian high commission for a parliamentary delegation from the House to be allowed to visit Kashmir shortly. I welcome the visit that is to be made to Kashmir next month by my right hon. Friend the Member for Manchester, Gorton (Mr. Kaufman).

Some 56 British Members of Parliament, representing all political parties and from all parts of the United Kingdom, have now signed and supported motions on the Order Paper calling for the people of Kashmir to be allowed to determine their own destiny.

At this time in Kashmir there are severe shortages of food and water. There are drastic evacuations of non-Muslims from Kashmir. The authorities are transferring large numbers of prisoners from Kashmir to the much hotter climate of Rajastan, and there

are worrying reports that death squads are being formed and trained. As I said earlier, there are reports of substantial extra troop deployments to Kashmir.

There can be no doubt that what has happened in the Punjab since 1984 scars the reputation of India, the world's largest democracy, and that the popular uprising in Kashmir threatens peace in the region. All true friends of India—we are all well aware of the deep affection and regard that you, Mr. Speaker, have for that country which is shared by many hon. Members—wish every good fortune to Mr. Singh and his Government in resolving the vexed and dangerous issues that threaten the future of his Government and, more important, the future and well-being of all the people of all religions of India.

I hope that the Minister can say tonight that the Government are anxious to make representations to the Indian Government—especially on my requests for more efforts to facilitate visits by British citizens of Sikh origin to the Punjab, to help young Sikhs to study overseas, to allow foreign nationals to visit Kashmir and to allow the foreign media to report what is happening in Kashmir.

I do not believe that the true friends of India would be unwilling to make such representations, because—as with any family—there are times when it is necessary for us to express our views robustly in private and, when the need arises, in public. The human rights position in the Punjab and the dangerous position in Kashmir, which seems to be deteriorating fast, call for the British Government to make such representations. Britain has a great historic responsibility for India's past, and it has a great responsibility now to speak up on behalf of people who have many relatives and friends there. The Kashmiri community are desperately worried about their families and their friends and are concerned about the future of their country. Sikhs, too, have great worries. I hope that the Minister will echo their concerns, and will make it clear that the British Government, in the spirit of true friendship, are prepared to make representations to the Indian Government.

DEPARTMENT OF VETERANS AFFAIRS HEALTH PROFESSIONALS COMPENSATION AND LABOR-RELATIONS ACT OF 1990

HON. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MONTGOMERY. Mr. Speaker, I am introducing today, along with BOB STUMP, JOHN PAUL HAMMERSCHMIDT, and Dr. J. ROY ROWLAND, a measure that will enable the Department of Veterans Affairs [DVA] to deliver quality medicial care to eligible veterans by improving its ability to recruit and retain health care professionals. I know that many of my colleagues have received complaints from veterans in reference to their inability to receive health care. Although most of the complaints result from a lack of resources, in many instances we are finding that DVA medical centers are having extreme difficulty in recruiting physicians and nurses to fill existing vacancies. Medical centers are also losing both physicians and nurses at alarming rates. Something must be done to assure our veterans that not only will they be able to receive care, but the care they receive will be top quality. Hiring and retaining top-quality professional staff is the only way it can be done.

Many career nurses, physicians, and dentists have expressed their concern to the committee about the erosion of their DVA pay and other benefits when compared to other employment opportunities.

During the hearings and other oversight activities of the Committee on Veterans' Affairs, we have learned that there are three major areas of incentives for health professionals to come to work for the DVA: First, pay and other monetary compensation, second, the opportunity to conduct health research, and third, the opportunity to teach and train other health professionals. Historically, the DVA, through its affiliations with over 1,400 schools of health professions, has provided opportunities to teach and conduct research. In the last few years, research opportunities have been reduced due to level appropriations for research activities in the face of increasing costs, but the committee and the House continue to be supportive of DVA research efforts which have yielded such important results. The situation with regard to pay, however, has been different.

Currently, physicians and dentists are paid through a two-part system. One part is base pay which is related to the General Schedule for other Federal employees. The other part is special primary and special pay which Congress authorized several years ago. The creation of the special pay authority in 1975, Public Law 94-123, was due to the insufficiency of the base pay authority to recruit highly skilled health professionals. The base pay amounts have not been changed except for the comparability increases for all Federal employees.

In 1980, the Congress increased the maximum allowable special pay for physicians and dentists as part of Public Law 96-330. Since that time, there have been no changes in physician and dentist special pay. As part of Public Law 96-330, the Department of Veterans Affairs was required to make a report by December 31, 1988, and every 4 years thereafter on the compensation of DVA physicians and dentists compared to other employment opportunities, such as academia and the private sector. That report, commonly referred to as the "Quadrennial Report" which was finally provided to the Congress in October 1989, showed that in the last 4 years the salaries of physicians in academia and the private sector have increased substantially while salaries of DVA physicians have remained essentially static.

At a hearing held on October 25, 1989, by the Subcommittee on Hospitals and Health Care, testimony was received from the consulting firm hired to research the issue, the Klemm Analysis Group, Inc., that the salaries of DVA physicians in some medical specialties lag 33 percent or more behind national pay rates. This disparity has led to serious physician shortages in some specialties, either on a nationwide basis or in terms of a specific locale.

As of September 3, 1989, the Department reported 509 vacancies out of 7,075 full-time physician positions. However, this does not completely reflect the extent of the problem because the Department considers a vacancy to be filled if outside physicians are contracted for or hired on a part-time basis. For example, the number of part-time physicians employed by the DVA has grown from 5,065 in 1985 to 5,625 in 1988, while the number of full-time physicians has decreased from 7,207 in 1985, to 7,024 in 1988. Today, part-time physicians comprise approximately 44 percent of the total physician work force. Documents and testimony presented to the committee show that in almost all cases, the additional full-time equivalent employees [FTEE] that have been hired do not satisfy the specialty vacancies of that medical center. Instead, nonspecialists have been hired for specialty positions. Further, the DVA has determined that there are extraordinary difficulties nationwide in recruiting six specialties: Anesthesiology, specialized surgery, general surgery/urology, radiology, spinal cord injury, and psychiatry. Psychiatry, while not officially determined to be scarce nationally, was reported by witnesses at several hearings to have become very scarce nationwide in the last 2 to 3 years. In the case of chiefs of staff, the Klemm report showed that 17 positions have taken over 18 months to fill under current compensation limits.

Mr. Speaker, this bill should go a long way toward enabling the DVA to regain its competitive position in the medical manpower marketplace for physicians, dentists, and nurses. I will only briefly describe the features of this bill at this time: It is derived from both current law and the excellent information provided to the committee by many expert, interested sources.

Like current law, this bill would provide special pay for five characteristics of employment: Longevity or tenure of service, scarce specialty, geographic location, executive medicine, and board certification. This bill strengthens the ability of the DVA to target specific shortage specialties in specific geographical locations. This emphasis on unique characteristics of individual medical facilities allows local directors the opportunity to pay only what is required to recruit or retain physicians and dentists. The result is less costly and more effective.

The bill also contains protections from potential abuse in that any increases of special pay that exceed 50 percent of the previous year's special pay or decreases exceeding 25 percent of the previous years pay would require approval of the Secretary.

This bill also continues to emphasize the importance of full-time employment with the DVA by folding the primary special pay into the full-time pay. While not every medical facility would have the workload to justify full-time employment in every specialty, in general the testimony provided to the committee indicated that full-time employment should be encouraged. This emphasis is consistent with previous actions by the Congress since 1975.

Mr. Speaker, title II of this bill includes a nurse pay provision that this body passed last year in H.R. 1199. No agreement was reached with the Senate on nurse pay. However, the

serious shortage of nurses in the DVA system continues and has resulted in even more ward closures than we reported last year. I hope we are near agreement with the Senate on this issue, but I believe we need to reemphasize our concern.

Mr. Speaker, title III of this bill deals with labor-management relations and disciplinary procedures. For a number of years, the Department of Veterans Affairs and various employee organizations have advocated modernization of the manner in which grievances of health care employees and discipline of such employees are handled. In addition, there has been litigation between employee organizations, the DVA, and the Federal Labor Relations Authority because of confusion over the scope of reforms affecting other Government employees which did not affect DVA health care professionals appointed under title 38 authority. The bill would resolve these issues by explicitly requiring the Secretary to engage in collective bargaining over the hours and conditions of employment, except for those matters concerning professional conduct. It would revise the procedure applicable to major adverse actions arising out of professional conduct or competence to make those procedures more consistent with procedures which affect your Government employees, including a postdisciplinary appeals board. I am pleased to tell my colleagues that this provision of the bill is supported by the VA and the labor unions who have worked with us in drafting the legislation.

Title III of the bill would also require the Secretary to prescribe an alternative grievance resolution procedure covering minor disciplinary matters and cases in which employees elect no to utilize the negotiated grievance procedure.

Mr. Speaker, I believe that this measure needs to be enacted to permit the DVA medical care system to continue providing high-quality care to our Nation's veterans and I urge my colleagues to support the measure. My Subcommittee on Hospitals and Health Care will mark up the bill next Wednesday, April 25.

DECLINING U.S. COMPETITIVENESS

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. RITTER. Mr. Speaker, many of us are concerned about declining U.S. competitiveness in high-technology sectors, including telecommunications, relative to what we see as a growing trend of foreign investment in U.S. high-technology markets. I take this opportunity to include in the RECORD a Wall Street Journal article announcing the entry of Nippon Telegraph and Telephone [NTT] in U.S. data communications services. NTT is the largest company in the world. Its $250 billion capital structure is eight times the size of AT&T. NTT becomes the latest of a number of Japanese companies to enter United States communications markets including Fujitsu, Hitachi, Matsushita, Mitsubishi, NEC, Kokusai Denshin Denwa, Nintendo, Recruit Co., and Toshiba. The importance of competing in the U.S. market is obviously underscored by this trend of foreign investment.

The Wall Street Journal article lists NTT's U.S. competitors in data communications services but fails to mention that, were it not for the modified final judgment [MFJ] restrictions, including most importantly the restriction on providing information services, the Bell companies would be among those U.S. companies best positioned to meet this foreign competitive challenge. I am concerned that while we debate the MFJ restrictions and address the surrounding controversy our Nation's information technology base is being siphoned off by large, powerful foreign companies, many of them subsidized by their home governments.

My concern is heightened by the recent U.S. Court of Appeals opinion reversing and remanding Judge Greene's decision not to allow the Bell companies to provide information services. They found that Judge Greene failed to base his decision on the public interest, despite the fact that all parties to the consent decree were unopposed to the Bells providing information services. Not only is this the clearest example to date of why Congress, not a Federal judge, should set national telecommunications policy, but to the extent that Japan and other foreign nations emerge as the winners in the MFJ debate, it would be potentially devastating to long term U.S. high-technology interests.

NTT UNIT TO VIE WITH U.S. FIRMS IN DATA COMMUNICATIONS SERVICES

(By John J. Keller)

NEW YORK.—A subsidiary of Japan's mighty Nippon Telegraph & Telephone Corp. plans to announce this morning that it will begin competing with U.S. companies that provide data communications services to Japanese companies doing business in the U.S.

The subsidiary, NTT Data Communications Systems Corp., has leased the top four floors in an office building in Jersey City, N.J., across the Hudson River from lower Manhattan. From there is plans to manage the data transmission facilities of its Japanese customers along with their office phone systems. It also plans to develop software and train its customers' employees to run corporate data networks. U.S. companies could become future targets for service, NTT said.

NTT Data, which ended 1989 with 7,000 employees and $2.7 billion in revenue, wouldn't comment on whether it will set up similar sites around the country. But such facilities would seem necessary to handle the data communications traffic of large corporate customers with multiple U.S. sites.

The project, which initially will cost less than $100 million, represents the largest investment yet by NTT Data in the U.S., according to a spokesman.

The attraction is quite obvious: At $40 billion in the U.S. alone, data communications services are hot and growing some 25% a year, according to Arthur D. Little Inc., Cambridge, Mass.

NTT Data's plans will put it in direct competition with such U.S. giants as American Telephone & Telegraph Co., General Motors Corp.'s Electronic Data Systems, and US Sprint Communications Co.—and Japanese newcomers. Telehouse International USA, a unit of Japan's long-distance company Kokusai Denshin Denwa, and Recruit America, a subsidiary of the giant Recruit conglomerate, are also trying to gain a foothold in the U.S. facilities-management business.

But analysts say that neither of these companies has the clout or resources of NTT Data. Meanwhile, U.S. data services companies have begun to set up shop in Japan. But it has been hard for them to attract corporate customers and meet Japan's stringent technical specifications, according to Victor Krueger, an analyst for San Jose, Calif.-based Dataquest Inc.

NTT Data's effort in this country isn't the first by an affiliate of NTT, which has eyed participation in the U.S. market ever since the 1984 breakup of AT&T. The U.S. now accounts for 38% of the $455 billion world telecommunications market, according to Dataquest, a market research concern. And the Japanese government has licensed other carriers to compete with NTT in several areas, including data communications services.

Because it is a domestic communications carrier, NTT is barred by Japanese law from making direct investments in business ventures outside Japan. But it can pursue its goals through arms-length subsidiaries such as NTT Data and affiliates such as NTT International, of which NTT owns just over 50%.

NTT International executives have set up a Delaware corporation called Dynamic Loop Corp. to make investments in various communications projects in the U.S. NTT International executives have repeatedly refused to comment on Dynamic Loop, a privately held company.

COMMANDER IN CHIEF TROPHY

HON. JOEL HEFLEY

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. HEFLEY. Mr. Speaker, I rise today to urge my colleagues to join me in congratulating the U.S. Air Force Academy football team in receiving the 1990 "Commander in Chief" trophy.

In a special ceremony at the White House, President Bush presented the three-sided trophy, which stands over 2 feet high and weighs in at 170 pounds, to 24 seniors from the winning team. Following the trophy presentation, President Bush graciously invited the team to tour the Oval Office and individually congratulated each player.

After the tour, I had the honor of escorting the team and its head coach, Mr. Fisher DeBerry, on a tour of the Capitol and then for lunch. I felt privileged to have the opportunity to spend some time with these fine young leaders during their special day in Washington, DC.

I'm very proud of the Falcons. They really deserve the award. The strong spirit and determination of these fine, young men combined with the terrific leadership and encouragement from Coach DeBerry and his staff, added up to a great team and terrific season.

In order to capture this year's award, the Falcons soundly defeated the Naval Academy in Annapolis by a score of 35 to 7 and the

U.S. Military Academy at West Point by 29 to 3.

The idea for the competition between the three academies was conceived in 1972. Since then, each one of the academies has won the trophy five times. Three other times, the teams have tied.

MASSACHUSETTS, BIRTHPLACE OF THE AMERICAN REVOLUTION

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. DONNELLY. Mr. Speaker, this past Monday marked the 96th celebration of Patriots' Day in Massachusetts, commemorating the battles of Lexington and Concord, which took place on this day, April 19, 1775. These famous battles marked the beginning of the American Revolution and our Nation's stuggle for freedom.

In addition to numerous parades, the annual running of the Boston Marathon and a Red Sox home game, Patriots' Day is celebrated by a re-enactment of the midnight ride of Paul Revere and William Dawes. Although Dawes participated in the original warning action, he never achieved the renown that Revere did.

On the eve of Patriots' Day, a rider dressed as Paul Revere waits on horseback on the Warren Bridge, watching for the "one if by land, two if by sea" lamp signal from the Old North Church. Seeing the lanterns, he starts his ride through the surrounding towns. Later he meets with the impersonater of Dawes, who has already sounded the alarm in other neighboring towns, and has been temporarily apprehended in Cambridge by Harvard students disguised as British soliders. The two then ride together into Lexington.

Mr. Speaker, the ride of Paul Revere and William Dawes, and the battles of Lexington and Concord marked a critical turning point in American history. As the Birthplace of the American Revolution, the people of the Commonwealth of Massachusetts have celebrated Patriots' Day in honor of the role their forefathers played in the founding of this Nation.

Finally, Mr. Speaker, I would like to share with my colleagues the official patriotic song of Massachusetts. The words and music were written by my constituent and friend, Bernard Davidson of Randolph, MA. It commemorates in song the important role that Massachusetts played in the birth of America.

MASSACHUSETTS, BECAUSE OF YOU OUR LAND IS FREE

Oh, Boston, Massachusetts
That's where I was born
Where two lanterns on a steeple
Brightened up the dawn
And I looked out all around me
And guess what I did see
A man a riding horseback
On the road to liberty
There was Paul Revere and Franklin
John Adams, Hancock, and me
Fighting for independence
Until our land was free
And I'm coming back to Boston
Lexington and Concord, too
Because my name is Freedom
And Massachusetts I love you
Oh, Massachusetts
My Massachusetts
Cradle of Liberty
Oh, Massachusetts
My Massachusetts
Because of you our land is free

Oh, Charleston, Massachusetts
On top of bunker Hill
Where the Muskets and the cannon
Now are very still
And the U.S. Constitution
Still master of the sea
Is guarding Boston Harbor
Where we threw out all the tea
We must always fight for freedom
On the land and on the sea
As did our founding fathers
Who died for Liberty.
So, I'm coming back to Boston
Lexington and Concord, too
Because my name is Freedom
And Massachusetts I love you

Oh, Massachusetts
My Massachusetts
Cradle of Liberty
Oh, Massachusetts
My Massachusetts
Because of you our land is free.

THE BRETHREN'S HOME'S VOLUNTEERS SHINE BRIGHTLY

HON. DONALD E. "BUZ" LUKENS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. DONALD E. "BUZ" LUKENS. Mr. Speaker, we have all heard our President, Mr. Bush, mention his now famous thousand points of light, people helping people all across America. Well, I am proud to say, the light is shining brightly in Greenville, a town of 15,000 people in Darke County, OH. Next week, the Brethren's Home will honor 1,200 individuals who have performed 35,802 hours of volunteer service for that retirement community.

Young people, adults, local churches, and residents volunteered their time to do sometimes menial and seemingly insignificant chores to help out the older residents who live there. They did laundry, read books for those with poor eyesight, wrote letters, and shopped, among other things. Their efforts saved the need for 18 full-time staff members, the cost of which would have placed a serious burden on this church-supported retirement and nursing home facility.

These special volunteers are deserving of our recognition and appreciation for being a light in their community. I salute each and every one of you. Keep up the good work. I am proud to represent you in Congress. Mr. Speaker, it's great to know that one of the brightest points of light is shining in Greenville, OH.

LEGISLATION INTRODUCED PROVIDING FOR THE LONG-TERM REAUTHORIZATION OF THE NATIONAL MARROW DONOR PROGRAM

HON. C.W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. YOUNG of Florida. Mr. Speaker, over the past few weeks, I have corresponded at length with my colleagues about the National Marrow Donor Program—today's medical miracle that every day is saving the lives of otherwise terminally ill individuals.

More than 100,000 Americans, including this Member, have already volunteered to have their blood typed to be included in the national registry, and I have made arrangements for next Thursday to HLA type all of my colleagues who want to be a part of this very special program.

In just 2½ years, the National Marrow Donor Program has matched more than 320 donors and patients and is currently finding matches at the rate of 25 to 30 per month. The only limiting factor now on this program is recruiting enough volunteers to find a match for every one of the estimated 9,000 Americans each year who are in need of a marrow transplant. Because the chances of finding a matched, unrelated donor are just 1 in 20,000, we need a large and ethnically diverse registry of volunteers. Our current goal is a national registry of 250,000 potential donors and access internationally to more than 1 million volunteers.

Through my work on the House Appropriations Committee I have worked to establish and fund the national registry. The program originally was established through the Department of the Navy with funds I included in the fiscal year 1988 Defense appropriations bill. Subsequent funding was included in the fiscal year 1989 Defense appropriations bill.

With the strong support of the Energy and Commerce Committee, the Congress in 1988 approved legislation shifting oversight of the registry from the Navy to the National Institutes of Health. This 2-year authorization expires at the end of this fiscal year, so today, along with the distinguished chairman of the Energy and Commerce Subcommittee on Health, HENRY WAXMAN, I have introduced legislation that would provide for a long-term, 10-year reauthorization of the National Marrow Donor Program.

Much has been accomplished in the short time since this program has been activated. More importantly, it has given us the opportunity to save lives. Bone marrow transplantation is a treatment for more than 60 life-threatening blood disorders and very promising research is underway to expand its use for treatment for a number of cancers and other diseases. By providing for a long-term extension of this program, we can ensure continued Federal support for the operation of the National Marrow Donor Program, for the recruitment of thousands of volunteers, for the establishment of links with similar registries throughout the world, and for research into

countless new ways in which marrow transplants can be used to save lives.

Mr. Speaker, I look forward to working with Chairman WAXMAN, the ranking minority member ED MADIGAN, my colleagues MIKE BILIRAKIS and HOWARD NIELSON, and the other members of the Energy and Commerce Committee to expedite the consideration of this legislation to continue the great strides we have made through this program to give hope for the living gift of life to thousands of people throughout the world for whom there was little hope just a few short years ago.

THE DISTRICT'S YEAR UNDER WILLIAM BENNETT'S PLAN

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. JACOBS. Mr. Speaker, "I'm gonna get a big club and knock your head off."—Brer Bear from Tales of Uncle Remus by Joel Chandler Harris.

We now have a year's worth of the dismal record of this administration's great drug fighter.

Like the impact of the Carter administration's great inflation fighter, and that of the weavers of the emperor's new clothes, his impact is best measured by the amount of our money he has spent.

They say that if you are not part of the solution, you are part of the problem.

I am sure Mr. Bennett is not part of our drug problem, but he very definitely is part of our fiscal one.

[From the Washington Post, Apr. 13, 1989]

THE DISTRICT'S YEAR UNDER WILLIAM BENNETT'S PLAN[1]

Feb. 14, 1989: Thirteen people are shot in the District, making it the District's bloodiest day in memory. "It brought back images of the St. Valentine's Day massacre," said Marvin Barnard, director of D.C. General Hospital's emergency room. Three victims died.

March 13: William J. Bennett is sworn in by President Bush as the new federal drug policy director. He tells reporters the District is "as bad as it can get," and that he wants to make the city a "test case" in the federal drug war.

March 20: D.C. Mayor Marion Barry calls for a military invasion of South America to solve the drug problem. "Send the Army, the Navy, the Air Force, the Marines, the Coast Guard. Burn up those fields, eradicate those coca leaves. . . . Stop it at the source." Barry says on ABC's "This Week With David Brinkley."

April 11: Bennett, calling the city "out of control," unveils an emergency $80 million plan to attack the city's drug problems. Among the proposals: Build a new federal prison and a new jail in the D.C. area, create a federal anti-drug task force to go after high-level traffickers, evict drug dealers from public housing projects and bring in additional federal prosecutors, drug agents and military intelligence analysts.

April 15: U.S. Bureau of Prisons states that 700-bed new D.C. area prison, costliest element in the Bennett plan, won't be built. Bennett aides blame political opposition to the proposed site at Fort Meade in Anne Arundel County.

April 17: Rayful Edmond III and Tony Lewis—believed to control as much as 20 percent of the cocaine and crack markets in the District—are arraigned on charges of conspiracy to distribute cocaine. Their arrests are the result of a two-year joint investigation conducted by the Drug Enforcement Administration, the FBI and D.C. police.

Oct. 17: Bennett's efforts are failing to make any discernible dent in the local drug trade, federal and city officials say at the six-month point in the federal drug policy director's plan. They cite his biggest failure as inability to relieve crowding in the city's prisons, noting that there is still no site for a 500-bed federal jail Bennett had promised.

Oct. 19: Bennett charges that local political leaders are undercutting his efforts to build the jail. "Politics has essentially put up the roadblocks. . . . We have not seen the kind of willingness at the local level to get the thing built."

Dec. 6: Edmond and 10 other defendants are convicted on conspiracy to distribute cocaine in the District in the city's longest and most expensive drug trial in the city's history.

Dec. 15: D.C. Police Chief Isaac Fulwood Jr. criticizes Bennett for underemphasizing treatment for drug users and failing to communicate with District officials. "Bennett's approach is absolutely wrong," Fulwood said. "I don't even know if he has an approach."

Jan. 1, 1990: The District homicide count for 1989 is reported at 437 deaths, making it the most murderous year in city history. An additional 127 were slain in Prince George's County, also a record.

Jan. 19: Mayor Barry is arrested on a charge of possession of cocaine at the downtown Vista Hotel.

April 11: A 72-year-old woman is beaten and robbed and then killed in her apartment in the 1400 block of Newton Street NW. She became the city's 131st homicide victim of 1990, leaving the city's homicide rate about on par with last year's

PLUMBERS AND GASFITTERS U.A. LOCAL UNION NO. 48 CELEBRATES 90TH ANNIVERSARY

HON. HELEN DELICH BENTLEY

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mrs. BENTLEY. Mr. Speaker, my fellow colleagues, on April 21, 1990, I will have the pleasure of attending the 90th anniversary celebration for the Plumbers and Gasfitters U.A. Local Union No. 48.

This celebration will be in combination with the plumber apprentices' 19th annual awards dance. For 90 years Local Union No. 48 has worked to protect the interest of its membership while providing a comprehensive certified apprentice program for 44 years. However, local No. 48 has also taken an active role in the community as well. Currently, they are involved in a variety of charitable functions including, the Free Furnace Start Up Program, Dollars for Diabetes, and a charitable golf tournament for the Childrens Hospital at Johns Hopkins.

For any group or organization to be successful throughout the test of time, they must have a well organized and dedicated membership. Obviously, Plumbers and Gasfitters U.A. Local Union No. 48 possesses these qualities. Indeed, no organization can exist, especially for 90 years, without hard work and diligent attention from its members.

Perhaps it is most appropriate to recognize U.A. Local Union No. 48 not as a group, but as individuals. Undoubtedly, the success of Local Union No. 48 can be attributed to the efforts of each individual who together form a group.

Unfortunately, all too often we tend to forget that we must stand together and work together to achieve a common goal. Whether it be as a community, a work force, or a nation, we must not forget that together our unified presence is a necessity. I wish not to diminish the importance of the individual, I simply wish to stress that whatever the cause, unity and direction are a prerequisite for success.

As our Founding Fathers sought to secure their freedom, they never could have confronted Great Britain as 14 separate and rival colonies. They recognized the need for planned and deliberate action and together they conceive the greatest nation ever known to mankind. We should all take note because, for any endeavor to be successful it not only must be a unified effort but, it must also meet to the approval of the consensus and not exist to exclusively serve the needs or interest of one particular minority. Remember, it was Abraham Lincoln who said that if this Nation was to falter, that it would not be from abroad, but from within.

I have no doubt that just as our Nation continues to grow and prosper, U.A. Local Union No. 48 will continue to do the same. I feel secure that as long as both are allowed to operate, just as they were conceived, with good intentions and for the betterment of others, they both shall enjoy many more anniversaries to come.

Mr. Speaker, my fellow colleagues, it is with great respect and admiration that I commend the membership of Plumbers and Gasfitters U.A. Local Union No. 48 on 90 years of hard work and dedication. I also wish to commend those apprentice graduates 'who were recognized during the Plumber Apprentices' Annual Awards.

Their names are as follows: Mr. Kevin L. Chmielewski, Mr. Paul F. Albert, and Mr. Michael G. Conley for top competitive exam scores. Those graduates recognized with perfect attendance awards are Mr. Dean W. Otte and Mr. Troy Almes for 4 years and Mr. Michael Conley for 1 year and those who displayed extra effort were Mr. Kevin L. Chmielewski and Mr. Ricky K. Goodman. Although the following names are not graduates, I feel that Mr. Paul W. Hahn, Jr., Mr. Stephen P. Kvasnovsky and Mr. Alan H. Kvasnovsky deserve special recognition as well, for these underclassmen have not only had perfect attendance but also have maintained the highest grades in their class. Mr. Speaker, these men truly exemplify the American spirit. Their eagerness to succeed, willingness to learn, and commitment and hard work are the very

characteristics that have made this Nation great. May they all have many happy and successful years ahead.

CONGRESS SHOULD TAKE A HARD LOOK AT THE STATUS OF PUERTO RICO

HON. JAIME B. FUSTER

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. FUSTER. Mr. Speaker, the other day I called to the attention of my colleagues a lengthy and well-reported article in the New York Times of April 7, 1990, which was headlined, "Statehood Is Seen as Setback for Economy of Puerto Rico." That article was based on a recently released study by the Congressional Budget Office which was entitled, "Potential Economic Impacts of Changes in Puerto Rico's Status Under S. 712."

Soon after the appearance in the Times of that article, which should be required reading among my colleagues as status plebiscite legislation for Puerto Rico makes its way through Congress, the Wall Street Journal published an article based on that same CBO study. I am inserting that article below because it, too, has portents about the enormous cost that statehood would represent to both Puerto Rico and the United States.

Mr. Speaker, as my colleagues are well aware, I favor no statehood for Puerto Rico, nor independence, but an enhancement of the existing commonwealth status. I have great respect for the institution of statehood but I do not believe it to be in the best interests of either Puerto Rico or the United States. On the other hand, commonwealth status has been a proven success story ever since it was created by Congress in 1952. It would work even better with the enhancements outlined in S. 712, which is known as the Puerto Rico Status Referendum Act.

The committee of jurisdiction in the other body marked up S. 712 last August, and hearings on a similar proposal have recently been held here and in Puerto Rico by the House Subcommittee on Insular and International Affairs.

These articles in the national press, Mr. Speaker, are reflecting the high expectations in Puerto Rico about the plebiscite, expectations that have been partly created in Washington itself. For example, President Bush went before a joint session of Congress early last year, and during the course of his speech told of his favoring statehood in the context of self-determination for Puerto Rico. Naturally, this was major news in Puerto Rico.

Then came the hearings on S. 712 before the Senate Energy and Natural Resources Committee—formerly the Senate Interior and Insular Affairs Committee. These all-day Senate hearings were televised live, and in their entirety, back to Puerto Rico. All of these things have had the effect of changing Puerto Rico's political reality, and Congress should take a closer look at what is going on, as the New York Times and the Wall Street Journal have been doing with these articles.

If Congress does not take a closer look, the relationship between the United States and Puerto Rico may become strained. If it is the intent of Congress not to take a closer look, then the people of Puerto Rico should be told that, so that they do not delude themselves.

Mr. Speaker, statehood is not really an alternative for Puerto Rico, as I think a careful reading of the Wall Street Journal article will show. And Congress cannot just walk away from this issue.

The Wall Street Journal article is attached.

[From the Wall Street Journal, April 13, 1990]

STATEHOOD PROPONENTS GAIN FAVOR IN PUERTO RICO AS DEBATE OVER ISLAND'S STATUS HEATS UP AGAIN

(By Jose de Cordoba)

SAN JUAN, PUERTO RICO.—Carlos Romero Barcelo often flies to Washington to argue that Puerto Rico should become the 51st state.

Thousands of Puerto Ricans "have bled for their country," he told a Senate committee last year. For example, a young Puerto Rican pilot was killed in the 1986 bombing raid on Libya, he said, yet the pilot's mother has no right to vote for the president who ordered the raid because she lives in Puerto Rico.

In Juncos, a hurricane-beaten town half an hour from here, an excited crowd gathers to hear Mr. Romero Barcelo, a former governor of Puerto Rico, preach his statehood message with a different emphasis. To the triumphant strains of the theme from "Rocky," he bounces onto a makeshift stage and enumerates statehood's potential benefits:

A person who now receives a $90 monthly check for food assistance would receive more than $130. Aid to families with dependent children would more than double to $200 a month. And, since a majority of Puerto Ricans make too little to pay federal income tax, "just for filling out the income-tax form, many people will get $910 back," the Yale-educated Mr. Romero Barcelo says. Almost overcome by emotion, Juan Hernandez, a retired accountant, shouts from the audience: "If we were a state, billions of dollars would roll down the street."

What is surprising in these days of U.S. budget deficits is that Washington's biggest proponent of sending those dollars rolling Puerto Rico's way is President Bush. (Just last week, a study released by the Congressional Budget Office said that under statehood, payments to Puerto Rico under U.S. entitlement programs would increase by $1.7 billion in 1992.)

To the dismay of U.S. corporations here, Mr. Bush is aligned with Mr. Romero Barcelo. It was Mr. Bush, a statehood supporter since his days as ambassador to the United Nations, who surprised everyone earlier last year by the last-minute insertion of a plea for statehood in an address he read to Congress. For President Bush, says Andrew Card, the White House's assistant chief of staff, the debate about economics, taxes and welfare is not the point. "It's more a human-rights, a civil-rights issue," says Mr. Card.

RED HOT

The issue of Puerto Rico's status is once again red hot here. Legislation moving through Congress would set a 1991 referendum on the island's future, giving voters a choice among statehood, a version of the present commonwealth system or independence. The issue has always deeply divided Puerto Rico. But now the tide of statehood is slowly rising.

Sooner or later, the island will be knocking at Congress's door. The question then will be: Is the U.S. ready to accept as a state what is in essence a Latin American country—densely populated. Spanish-speaking, culturally different and poor?

In Washington, where few are paying close attention, even fewer think Congress will act on the referendum bill this year. But here the status question is an obsession. Not much is heard about the principles of justice, democracy or patriotism Mr. Romero Barcelo elaborated on before Congress. Instead, the most talked-about question is money and who is going to get it—individuals or corporations.

Statehood advocates, for the first time in history ahead of commonwealthers in the polls, promise a welfare bonanza. They say the more than 50% of Puerto Rico's families that receive money for food and other welfare assistance would get a $2.3 billion yearly windfall.

CORPORATE GOLD MINE

Opponents of statehood—including a Who's Who of big multinationals that, although officially neutral, lobby vigorously behind the scenes in Washington—say statehood would mean the end of what has been a corporate gold mine. It would cost about 400 U.S. companies here federal tax exemptions valued at about $1.9 billion, and that in turn would mean a corporate exodus costing the island many of the 300,000 direct and indirect jobs the companies provide.

Like the statehooders, Gov. Rafael Hernandez Colon, the chief of the pro-commonwealth forces, seeks a richer piece of cake. He wants broadened powers for the commonwealth—for instance, the right not to apply certain federal laws to Puerto Rico—and more federal aid.

Mr. Hernandez Colon says his party probably won't go along with the plebiscite unless the commonwealth option is assured the same welfare payments available under statehood. He's against paying federal taxes. The governor doesn't see any problem with this, but Congress does. The independentistas, a tiny minority who get only about 5% of the vote in gubernatorial elections, propose dual Puerto Rican-U.S. citizenship for islanders born before independence is granted.

The debate is illuminating the complex relationship that ties the U.S. and Puerto Rico, which the U.S. seized at the end of the Spanish-American War in 1898. Puerto Ricans, citizens since 1917, have fought in all U.S. wars beginning with World War I. Yet, they can't vote for president, and are represented in Congress by a resident commissioner in the House who votes in committee but not on the floor. They pay no federal income taxes, but receive most federal benefits. (Federal transfer payments make up 31% of an average Puerto Rican's individual income. That's twice as high as the figure for mainland citizens.) Most Puerto Ricans have relatives in the U.S. and more than two million are in the U.S.

The island, with a population of 3.3 million, has a per-capita income of $5,653, about half that of Mississippi, the poorest state. But thanks to the U.S. factories lured here by the tax-exemption program and the welfare entitlements, the island, whose poverty once rivaled Haiti's, is Fat City by Latin American and Caribbean standards.

Last year, Puerto Rico imported about $9.4 billion of U.S. goods and exported $14.2 billon to the mainland. And among other measures of wealth, it boasts one of the

largest and most-profitable shopping malls in the U.S. (The J.C. Penney Co. store at the Plaza Las Americas mall chalked up sales last year of more than $70 million and is the 1,700-store chain's most-profitable location.)

LIFE PRESERVER

Most Puerto Ricans agree that if it weren't for the U.S. connection, the island, crowded and resource-poor, would be locked into extreme poverty. "Puerto Ricans hang onto the U.S. like a drowning man to a life preserver," says Alex Maldonado, a political analyst here.

Almost to a man, the island's cultural and intellectual elite are independentistas. But for the vast majority of the population, independence is a dirty word.

Antonio Colorado, the commonwealth government's development chief, worries about what life would be like if statehood wins and the federal tax exemption, known as Section 936, is repealed. He paints a grim picture—unemployment could jump to 35% from the present 14% (low for Puerto Rico), pushing one million Puerto Ricans to emigrate to the U.S. in search of work.

Last week's Congressional Budget Office study said a phase-out of Section 936 would hurt the island's development and eliminate as many as 100,000 jobs by the year 2000. "The economic situation in Puerto Rico would be black without 936," says Narmo Ortiz, the head of government relations for American Cyanamid Co.'s Puerto Rico unit.

DISTINCT CULTURE

Beyond the dollars and cents of the status debate, cultural issues are involved. Commonwealthers and independentistas worry that statehood would spell the end of Puerto Rico's distinct culture. "The question is, are people ready to push the button that will spell the end of one of the nationalities on the planet?" says Sen. Marco Rigau.

As it is, the island's culture already has been bent out of shape by its close encounter with the U.S. Sometimes the cultural clash takes on an absurdist tone. Luis Rafael Sanchez, a Puerto Rican writer, remembers that in 1952 the mayor of San Juan brought a planeload of snow to Puerto Rico so the island's poor children could see snow first hand.

The snow, gathered by children in New Hampshire, was met with great fanfare and escorted to a sports stadium. There, children bused from the city's meanest slums made snowmen, which in the hot Caribbean sun melted in the twinkling of an eye.

THE CENTRAL EUROPEAN ENVIRONMENTAL AND HEALTH IMPROVEMENT ACT OF 1990

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. LAFALCE. Mr. Speaker, in January, I led a 13-member congressional delegation to central Europe. We visited Yugoslavia, Poland, East Germany, Hungary, and Czechoslovakia and met with the political leaders and economic experts of those nations. Our discussions focused on three issues: trade and investment, developing an enterprise sector, and people-to-people exchanges.

However, intruding palpably on our discussions of all these issues was the problem of environmental degradation. On our trip to central Europe we saw great hope and great expectations. But we also saw polluted rivers and the dull, gray, hazy hues of polluted skies. Wherever we went, wherever we looked, we could not escape the problem

Twenty years ago communities across America celebrated Earth Day. It proved to be a turning point in our efforts to clean up our environment. The series of events held around the Nation created the momentum leading to the creation of the Environmental Protection Agency. It resulted in passage of the Clean Air Act, and the adoption of stricter standards in the previously passed Clean Water Act.

The results have been encouraging. By 1983, a majority of U.S. surface waterways were deemed "fishable and swimmable." Great efforts have been made to clean up existing hazardous waste sites and the Resource Conservation and Recovery Act is designed to prevent future problems such as Love Canal.

Now, we are preparing to celebrate the second Earth Day with a week-long series of events. This time, the United States is not alone. Citizens from around the world, from Europe, to South America, to Southeast Asia and Japan are organizing their own activities to demonstrate their commitment to a cleaner environment.

While we may properly congratulate ourselves on the progress we have made, we must not be lulled into thinking that our task is complete, either here in the United States, or abroad. It is sobering to realize how much more progress remains to be made. In fact, we need only look to central Europe to get an idea of how we would be living had we not taken the steps we had. Indeed, the problems are daunting and can barely be exaggerated:

Sixty percent of the Vistula River, a main source of Poland's drinking water, is categorized by the authorities there as being too polluted for even industrial use because it would clog and corrode machinery. The Central Statistical Office in Poland simply classifies the Vistula as a sewer.

In the Upper Silesia region, the Polish Academy of Sciences notes an "appalling increase" in mental retardation because of metal particulates in the air. In addition, 30 to 45 percent of students are below international norms for weight, height, and other health parameters, and 10 to 15 percent of chronically ill.

Up to a quarter of Poland's farmland is so polluted with lead, zinc, mercury, and other metals that it is probably dangerous to grow crops in.

In Hungary, life expectancy is declining and mothers are protesting in the streets because of the respiratory problems the polluted air is causing their children. An estimated 10 percent of deaths in Hungary are directly related to the high levels of pollution.

Budapest has air pollution that reaches 30 times the levels considered safe by U.S. standards. The pollution is so bad that people line up to spend 15 minutes in "inhalitoriums," booths where people can breathe otherwise unavailable clean air.

Thirty percent of Czechoslovakia's forests are dying, another 20 percent are damaged.

Sulfur dioxide levels in Czechoslovakia are eight times higher than in the United States. In central Europe as a whole, over 17 million tons of sulfur is poured into the air annually according to a recent Wall Street Journal article. This is the equivalent of 5 million dump trucks full of the dangerous pollutant.

A secret Czech Government report estimates that pollution shortens life expectancy by 3 to 4 years in northern Czechoslovakia. The situation is so bad in this region that the Czech Government pays a bonus to those who live in the area for more than 10 years. Czechs call this sum "burial money."

In his inaugural address, Czech President Vaclav Havel emphasized the importance of facing the environmental crisis immediately.

Members of my delegation, and other Members of the Congress will be working with the administration over the next several years to accomplish the goal of economic development and political stability. On the issue of people-to-people exchanges, we can expect vastly expanded sister-city programs, exchanges between teachers, students, scientists, doctors, writers, and entrepreneurs. We expect that Peace Corps volunteers by the hundreds or thousands will be sent to central Europe.

American technology and modern business skills will also be exported to central Europe. That region has simply not kept up with the modern, increasingly globalized world economy. Accountants, lawyers, and management consultants will all have to contribute to building a modern framework for the growth of an enterprise economy in central Europe.

Already, entrepreneurs in the United States, western Europe, and Japan are seeking out investment opportunities for joint ventures in central Europe. This is an excellent approach to contribute the technology, expertise, and capital needed to jump-start these emerging market economies.

Nonetheless, the evolution of a Communist state into a market economy must necessarily take time—currencies must become convertible, banking and trade laws made compatible with modern commerce, appropriate regulations adapted, telephone and transit systems modernized, and linkages of all types with our society established. For our part, most-favored-nation status must be conferred; outdated Cocom restrictions ended; and Export-Import Bank and OPIC relationships developed.

Clearly, most of the attention of the world has been focused on the breathtaking political breakthroughs and the problems of transforming communism into market-based economies. But we cannot ignore the environmental nightmare which adversely affects central Europeans day in and day out in countless ways. Indeed, environmental degradation may well be the final and longest lasting legacy of the Stalinist period.

It threatens the health and the economies of the people of this region, and it affects nations outside of central Europe. Pollution is being poured into the Baltic Sea, damaging European fishing industries; powerplants burning high-sulphur coal are depleting the ozone

layer and increasing acid rain. And the problems are only getting worse. The reality is that in all of these countries there are few, if any, sewage treatment plants; few, if any, smokestack scrubbers; and almost no expertise and experience in dealing with environmental problems.

Why, many of my colleagues have asked, should we single out the environment for special action when there are many other problems that need addressing?

There are several answers to this question. Of course, we all know about the enormous strides that must be taken to successfully convert these nations into open market economies. Such aid will be the primary focus of the World Bank, IMF, and other development agencies active in central Europe. The private sector here, in Europe, and Japan have already begun to seek out investment opportunities, bringing with them the seeds of a successful transition—individual entrepreneurship.

But by making these environmental issues an immediate priority, we will be making a commitment to enhance the quality of life for tens of millions of people in a very basic way. Actions toward this end will also continue to pay returns in lower health costs, more productive workers, and thriving tourist economies far into the future. This emphasis will in no way reduce our concern and support for more general programs. However, it may help to ensure that environmental improvements, which are so necessary for the people and economies of central Europe, does not get reduced to a back burner issue.

While the United States is obviously short of funds, we still have the political power and the moral authority to exert leadership. Therefore, I urge my colleagues to join me in taking two immediate steps, contained in the legislation I am introducing today—the Central European Environmental and Health Improvement and Progress Act—to help alleviate the environmental burdens of emerging central European democracies:

First, the United States should promote debt-for-environment swaps, allowing bilateral loans to central Europe to be paid into a local currency fund to be devoted to environmental projects.

Second, establish an Environmental Trust Fund at the new European Bank for Reconstruction and Development.

The United States should allow all official debts owed to us by Poland and the other central European nations targeted in the bill—Hungary, Czechslovakia, and Yugoslavia—to be paid in local currency, which would then be invested in environmental cleanup programs. In doing so, we should not act alone, but ask other creditor nations to do the same.

Poland's debts to the industrialized democracies amount to about $30 billion—out of a total debt of $40 billion—of which $3 billion is owed the United States Government. Instead of repaying this debt, it has been rescheduled over and over again, most recently last month. That agreement put off any principal or interest payments for all of 1990 and the first quarter of 1991. It would no doubt be postponed again and again, ad infinitum.

In January, Poland's Prime Minister, Tadeusz Mazowiecki, sent a letter to these creditor governments calling the debt the main obstacle to the success of Solidarity's economic plan. Although no payments have been made in recent years, the spectre of a $40 billion debt hanging over a fragile economy creates a serious chill on needed foreign investment because no investor can have confidence in an economy that is constantly threatened with what is, in effect, foreclosure.

Other central European countries, such as Hungary, with the highest per capita debt burden in the world—$20 billion debt with a population of 10 million—owe most of their debts to commercial banks. For some of these nations, these commercial bank obligations are selling at deep discounts. We would expect that these commercial banks would be willing to do their share to relieve the debt burdens of central Europe, so long as their governments lead the way.

In 1953, the United States convened a meeting of our World War II allies to negotiate substantial foregiveness of West Germany's debts. As a result, Germany was freed from burdens it could not bear, and its economic growth, described now as miraculous, began. In all, $2.2 billion of Germany's debt to the United States, Britain, and France was forgiven. In 1989 dollars, this figure amounts to $10.9 billion.

Now that our foreign policy has finally achieved its ultimate aim in Europe, we should be no less generous to those countries whose economies have been saddled with inefficient and unworkable Communist economies.

Let us act in 1990 to help free these nations from debtors prison and put them on a path to economic as well as political freedom. Our leadership on this issue will set an example and pose a challenge to our partners in western Europe and Japan.

Equally important, we should look to a future of multilaterial cooperation in helping central Europe, starting with the establishment of the European Development Bank recently negotiated by the Bush Administration. Having completed the first step—agreement on the size and operations of the new bank—we should seek the creation of an Environmental Trust Fund within it, to be capitalized with contributions from the industrialized democracies at up to $20 billion over the course of the decade. The Trust Fund would make loans at highly concessionary rates supplementing local currency contributions with foreign currency needed for those environmental projects.

Under its charter, the EBRD will promote in the full range of its activities environmentally sound and sustainable development. This is a crucial commitment. However, additional steps are needed to clean up the legacy of pollution that poisons the region.

Trust fund loans must be made at concessionary rates because, unlike loans for projects such as roads, bridges, or business start-ups, environmental clean-up does not generate a specific stream of income that can be dedicated to repaying the loan. The trust fund should help solve problems, rather than saddling these emerging democracies with additional debts.

In the United States, a total of $81 billion was spent in 1987 for pollution control and abatement. Of this, $49 billion was spent by industry, the balance by the various levels of government. The U.S. Government spends $1.7 billion annually on Superfund, and an estimated additional $1 billion of clean up of nuclear facilities. None of these costs include, for example, the cost of catalytic converters on cars, which would likely add hundreds of millions of dollars to the total; this is counted as personal consumption. It is probably fair to estimate that the totals, in 1990, have come close to $100 billion.

In the United States, we have decided that private businesses must, as good corporate citizens, help bear the burden of keeping our skies, water, and land clean. Economically, this improves efficiency by including in the costs of production the costs of keeping the environment clean.

But central Europe does not have any private sector to help it bear these burdens. Instead, its industries have been owned and run by the state. It is one of the great ironies of our age that the Communist economies, the purported "workers' paradises," have produced more pollution than profit-oriented capitalist economies. Indeed, the statistics on health related problems resulting from pollution were treated as state secrets in countries where the theory, though clearly not the fact, was that the worker reigned supreme. The governments rightly feared the impact such facts would have on the beneficiaries of the Communist system.

The new governments of central Europe recognize the follies in this and are now all working toward the development of vibrant private sectors. However, until this develops, we must help handle the grave environmental threat they face through this modest-cost proposal.

All of us are hopeful that the economic ferment—joint ventures, direct investment, and individual entrepreneurship—will one day bear fruit. While we await that day, however, the industrialized democracies can help improve the lives of central Europeans in the short term by addressing the serious environmental problems of the region. Pushing forward with the new development bank and calling for the creation of an Environmental Trust Fund can quickly improve the quality of life and economies of these nations. The people of central Europe courageously demanded political freedom in 1989, and they were able to attain it essentially through their own efforts. But they will need substantial help if they are ever to be able to free themselves from environmental degradation.

To date, several western European nations have indicated an interest in helping with the environmental cleanup process. While these efforts are well worthwhile, they are almost by definition piecemeal. A true solution can only be achieved in a multilateral, well-coordinated approach to the problem.

Finally, I want to point out that U.S. businesses are in the forefront of the environmental technology needed to deal with these problems; this legislation would create an important overseas market for U.S. waste management and technology companies. This opportunity could prove to be of significant long-term benefit to our trade position in the world. Furthermore, it will anchor U.S. economic rela-

tions with the emerging market economies of central Europe, economies that will be the source of much of the economic growth as we approach the next century.

THE CENTRAL EUROPEAN ENVIRONMENTAL AND HEALTH IMPROVEMENT ACT OF 1990

In order to advance these goals, I am introducing today The Central European Environmental and Health Improvement Act of 1990. The bill seeks to achieve the goals I have just outlined by:

First. Authorizing the President to allow central European countries to pay back their loans from the U.S. Government to a trust fund targeted to each nation individually. These payments would be made in local currency, for use in paying for environmental cleanup projects.

Second. Establishing the Environmental Trust Fund within the European Bank for Reconstruction and Development. The Bank will rightfully emphasize long-term economic programs, particularly privatization of industry. It will also may be involved in balance-of-payments lending, an important short-term need for the region. But the Bank should also make the environment an equal priority.

Such an Environmental Trust Fund will make long-term loans at highly concessional rates to the emerging market economies. The loans will be used to build water purification plants, reduce plant emissions, clean up toxic waste dumps, and other projects designed to alleviate or prevent environmental problems.

Mr. Speaker, let us use the occasion of Earth Day to spur us into action beyond our borders. The text of my legislation follows:

H.R. 4569

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. INCLUSION OF ENVIRONMENTAL TRUST FUND IN PROPOSED EUROPEAN BANK FOR RECONSTRUCTION AND DEVELOPMENT.

(a) FINDINGS.—The Congress finds that—

(1) there has been overwhelming damage to the environment in the Central European countries with newly emerging market economies;

(2) there is a mounting threat to the health of the people living in such countries;

(3) the impact of such problems on the economies and the health of the people of such countries is severe, including—

(A) an increase in mental retardation among children due to metal poisoning from air pollution;

(B) so much pollution of farmland with lead, zinc, cadmium, and mercury that the land may be unsafe for use in growing crops;

(C) children and adults who suffer from extensive respiratory problems, including high levels of cancer, due to air pollution;

(D) children who suffer from congenital heart problems;

(E) an unusually high number of birth defects;

(F) the death or substantial damage of large percentages of forests; and

(G) potable water becoming increasingly scarce due to the pollution of rivers and lakes;

(4) the economic and political reforms taking place in such countries offer significant opportunities for restoration, protection, and enhancement of the environment, of public health, and of natural resources throughout the world;

(5) nongovernmental environmental organizations in such countries have been key actors in the process of political and economic reform, often at great risk to the leaders and members of such organizations; and

(6) full access to information and participation by such organizations and the general public in the planning and implementation of all bilateral and multilateral assistance to such countries is essential to realizing the goals of restoration, protection, and enhancement of the environment, of public health, and of natural resources in the region.

(b) ENVIRONMENTAL TRUST FUND.—The Secretary of the Treasury shall negotiate for the establishment within the European Bank for Reconstruction and Development of—

(1) an Environmental Trust Fund—

(A) from which long-term loans will be made at highly concessional rates of interest for projects designed to alleviate, eradicate, or prevent damage to the environment, including projects aimed at—

(i) water purification;

(ii) waste water treatment;

(iii) reducing the polluting emissions of power plants by applying technology such as scrubbers;

(iv) providing assistance in converting energy systems from coal to other, cleaner systems;

(v) managing solid waste, including cleaning up toxic waste dumps;

(vi) improving agricultural techniques to prevent ground and surface water pollution; and

(vii) end-use energy efficiency improvements on a large scale; and

(B) to which contributions will be made by the member countries of the institution on the same proportional basis as such countries make contributions to the institution; and

(2) requirements for detailed environmental impact assessment of all proposed operations with potentially significant environmental impacts, including requirements that comments will be solicited from the public at each stage of the assessment process, and that all assessment documents will be made available to the public in borrower and donor countries.

SEC. 2. SOVEREIGN DEBT OF CENTRAL EUROPEAN COUNTRIES WITH EMERGING MARKET ECONOMIES PAYABLE TO UNITED STATES IN LOCAL CURRENCIES FOR USE BY SUCH COUNTRIES FOR ENVIRONMENTAL PURPOSES.

(a) AUTHORITY OF THE PRESIDENT.—The President may permit any Central European country with an emerging market economy to pay, in the manner provided in subsection (b), such aggregate amounts of principal and interest payable on a liability of the country, incurred before the date of the enactment of this section, to the United States or any agency or instrumentality thereof, as the President may determine.

(b) MANNER AND SCHEDULE OF PAYMENTS.—If the President exercises the authority provided by subsection (a) with respect to an amount payable by a country, the country shall, in lieu of paying the amount on the date such payment would (but for this section) be due, pay into local currency accounts described in subsection (c), on each of the 1st 10 anniversaries of the due date, 1/10 of such amount, in an equivalent amount of the local currency of the country as determined by the official exchange rate for United States dollars.

(c) PAYMENTS PLACED IN TRUST FOR USE BY THE COUNTRY FOR ENVIRONMENTAL PURPOSES.—

(1) CREATION OF TRUSTS.—The United States shall establish a trust account for each Central European country with an emerging market economy. The United States shall own each such trust account.

(2) TRANSFERS TO TRUSTS.—Each payment made pursuant to this section by a Central European country with an emerging market economy shall be deposited in the trust account established for the country under paragraph (1).

(3) BENEFICIARIES.—The country from which payments made to the United States are deposited into a trust established under paragraph (1) shall be the beneficiary of the trust.

(4) TRUSTEE.—The Secretary of the Treasury shall be the trustee of each trust established under paragraph (1).

(5) EXPENDITURES FROM TRUSTS.—The Secretary of the Treasury shall authorize payments to be made from a trust established under paragraph (1) of this subsection to the government of the country that is the beneficiary of the trust only for projects described in section 1(b)(1)(A) or other economic development projects.

(6) REGULATIONS.—Within 6 months after the date of the enactment of this Act, the Secretary of the Treasury shall issue regulations specifying the manner in which a country must demonstrate a commitment to carrying out projects referred to in paragraph (5) before obtaining payments from the trust established for the country under paragraph (1).

(d) FACTORS TO BE CONSIDERED.—In determining whether and the extent to which the President will exercise the authority granted by subsection (a) of this section, the President shall treat each Central European country with an emerging market economy on a case-by-case basis taking into account the need for the country for financial resources and the commitment of the government of the country to carrying out projects described in subsection (c)(5).

SEC. 3. DEFINITION OF CENTRAL EUROPEAN COUNTRIES WITH NEWLY EMERGING MARKET ECONOMIES.

As used in this Act, the term "Central European countries with newly emerging market economies" means—

(1) the Czechoslovak Socialist Republic;

(2) the Hungarian People's Republic;

(3) the Polish People's Republic; and

(4) the Socialist Federal Republic of Yugoslavia.

AFL-CIO WORKS TO FREE JOE DOHERTY

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MANTON. Mr. Speaker, I rise today to congratulate the membership of the AFL-CIO and their president, Lane Kirkland, on that union's recent unanimous adoption of a resolution in support of Joseph Patrick Doherty. Mr. Doherty is an Irish national who has been imprisoned in this country for nearly 8 years despite the fact he has never been charged with, or convicted of a crime here.

Mr. Speaker, it is fitting that the AFL-CIO has joined in the fight for justice for Joe Doherty because America's labor unions have always taken the side of the little man fighting the system for justice.

Mr. Speaker, I want to commend my colleagues attention to the AFL-CIO's recent letter to President Bush and resolution in support of Joseph Doherty and ask unanimous consent that they appear in the RECORD immediately following my remarks.

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, DC, April 4, 1990.

The PRESIDENT,
The White House, Washington, DC.

DEAR MR. PRESIDENT: Pursuant to the unanimous action of the most recent AFL-CIO Convention, I am forwarding, under the cover of this letter, a copy of the Convention Resolution calling on "the Attorney General to grant bail to Joseph Doherty and, ultimately political asylum",

As the Resolution states in more detail, the nearly eight-year incarceration of Joseph Doherty in federal prison even though he "has never been convicted of—nor even charged with—the commission of any crime in this country" and even though "federal immigration judges have consistently rendered decisions in [his] favor . . . and against the government," raises the most serious civil liberties issues.

I speak for every delegate to the AFL-CIO Convention and all the working people those delegates represent in asking you to give Mr. Doherty's case your personal attention.

Sincerely,

LANE KIRKLAND,
President.

SUPPORT FOR JOSEPH PATRICK THOMAS DOHERTY

Whereas, Joseph Patrick Thomas Doherty began his seventh year in federal prison on June 18, 1989; and

Whereas, He has never been convicted of—nor even charged—with the commission of any crime in this country; and

Whereas, In the past six years, federal immigration judges have consistently rendered decisions in favor of Mr. Doherty and against the government in every proceeding initiated by the government; and

Whereas, Mr. Doherty would never dishonor those who have supported him by failing to respect and scrupulously abide by any and every condition imposed on him in conjunction with the grant of bail; therefore, be it

Resolved, That America has always been a place of asylum for the oppressed and a haven for the politically persecuted; and, be it further

Resolved, That the AFL-CIO petitions President George Bush and Attorney Genral Richard Thornburgh to implement the provisions of House Concurrent Resolution No. 62, introduced by U.S. Rep. Thomas Manton on February 28, 1989, which calls upon the Attorney General to grant bail to Joseph Doherty and, ultimately political asylum; and, be it further

Resolved, That copies of this resolution will be forwarded to President Bush and Attorney General Thornburgh and to all U.S. Congressmen who have not yet co-sponsored House Resolution 62 or Senate Resolution 62.

EARTH DAY

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. HUNTER. Mr. Speaker, in honor of Earth Day, I would like to call attention to the efforts to save the California oak tree. This effort, led by many of President Bush's thousand points of light, will one day bring the California oak back to the majestic prominence it once enjoyed.

The article printed below, written by Robert O. Hunter, details many of the efforts to save the oak.

EARTH DAY

(By Robert O. Hunter)

California is a beautiful state—and much of its beauty lies in the rolling foothills, and the oak trees that are native here, rising from the seacoast to the elevations where they mingle with the pines. 1990 has been proclaimed the Year of the Oak by the California Oak Foundation, a non-profit group dedicated to protecting our native oaks and planting more. In many parts of the state the native oaks have been cut down, which prompted Senate Concurrent Resolution 60, authored by Senator Dan McCorquodale and 27 others, calling attention to the need to restore oak woodlands throughout the state.

Girl Scouts, Boy Scouts, 4-H Clubs, school organizations, and service clubs are being enlisted in the gathering of acorns, planting them in milk cartons, then re-planting the milk cartons with oak seedlings in them. Ranger Roger Wong of the Forest Service at Ramona explained to me recently that oak roots are more fragile than pine roots, for example, so that the procedure in planting oaks requires planting the slit milk-carton, with oak seedling in it, after cutting off the bottom of the carton. In this manner, the emerging oak roots are not disturbed. The U.S. Forest Service plants many oaks, along with pines each year on national forest land.

The California Oak Foundation is the moving force behind the Year of the Oak, and has two publications available from its office at 900 12th St., Suite 125, Sacramento, Cal. 95814, Keren Leigh is the secretary there. The publications include "Care of Native Oaks", which alerts tree owners to the hazards that oaks face in urban settings. The second publication, "How to Collect, Store, and Plant Acorns", was prepared in cooperation with the University of California's Hardwood Range Management Program, and gives the basic information needed by anyone planning an oak planting project. In California there are 7,300,000 acres classified as hardwood range, the official term for the beautiful California hill country that is dotted with oak trees.

Curricula being prepared by the Oak Foundation on the study of oaks, are offered by the Oak Foundation in three sets for schools in the state. Volunteers around the state have formed groups, and are already engaged in oak planting and oak maintenance. One such group, the Nature Conservancy's habitat restoration program at the Cosumnes River Preserve, is now in its third year, and has planted thousands of oaks in addition to weeding and maintaining seedlings on 73 acres of newly planted oak riparian forest. Of 5,955 acorns planted, first year survival was over 90%.

Generous grants are being made to another non-profit organization in California, People for Trees, for the purpose of planting and maintaining trees in cities as well as countrysides. This funding comes via the bond issue passed last year by California voters, and can do much to increase California's great heritage of beautiful and useful trees. In addition to information from the local People for Trees chapters, further information can be secured through the various county Farm Advisors' offices. Some cities, of which Visalia is a notable example, have city ordinances protecting oaks and municipal oak groves. Ginger Strong, at the city of Visalia, phone (209) 738-3522, is secretary of the California Oak Foundation.

THE SAVINGS AND LOAN RIOT

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. OWENS of New York. Mr. Speaker, the costs of the savings and loans associations bailout continues to mushroom. Five hundred billion dollars is now considered the most honest and intelligent estimate of the cost of this monstrous adventure into socialized banking. A huge new Federal bureaucracy known as the Resolution Trust Corporation has erupted to administer this gargantuan effort. More than 6,000 people will be employed in this salvage operation before it ends. The long-awaited peace dividend resulting from a reduction in defense expenditures will now have to be poured into the bottomless pit of the S&L bailout.

Mr. Speaker, ordinary words and plain prose are not adequate to describe this giant public scandal. Perhaps the language of the new street poets, the Rap artists, can best describe this continuing fiscal atrocity.

Mr. Speaker, a continuing concern of mine is the education of school age children of America. I am particularly concerned about education in high schools and junior high schools where we begin to lose such a large number of our children. Several years ago my concern with education led me to set up a Martin Luther King Commission in my district which was primarily concerned with the improvement of education. Each year we sponsor essay, poetry, and art contests.

Last month this Central Brooklyn Martin Luther King Commission voted to initiate a Positive Rap Project designed to explore ways to use Rap, a teenage craze which often employs rhythm and rhyme in ways that are quite creative. There is considerable controversy about the substance of what is often being said; however, the format, the medium, is an exciting one. Our commission voted to seek ways to promote positive substance in the Rap style.

Although I am not a musician, the purely poetic component of the Raps has aroused my interest since I sometimes write poetry as an outlet for my political frustrations. Very few Federal actions have been as frustrating as the bailout of the Savings and Loan Associations.

Today my two concerns came together. As a way to illustrate some understanding of the young Rap artists I decided to write a few Rap style poems. My second attempt has focused on my frustration with the Congress and its silence on the S&L excesses. I would like to offer "The S and L Riot." This poem is dedicated to the millions of Americans who will never see the peace dividend because it will all be used to bail out the racketeering Savings and Loan Associations:

THE S AND L RIOT

There's a riot at the mint!
But you gotta be a gent
To break in here only MBA's
You must comprehend their deregulated ways.
There's a riot at the mint!
Don't just stand there
Kick the treasury door down
You know the auditors promised
That they wouldn't come around.
Despite bright daylight they'll take every cent
There's a riot at the mint!
No cop sirens will wail
No nice gents will they jail.
There's a riot at the mint!
You can't hole up here with a Honda
Bring your Lincoln, Cadillac, Mercedes or Rolls Royce
Champagne, Caviar—the very best when they rejoice.
Reagan was the host
Who gave them the most
But there's a new chump now
Hurry old boys wherever you are
Come and milk the golden cow
Push the RTC to give more milk
Wrap your rotten bankruptcy in priceless silk.
There's a riot at the mint!
You must comprehend their deregulated ways
No loot for anybody but MBA's.
There's a riot at the mint!
Don't you wish you were a gent?
Thoroughbreds race to the scene
All of their riders are mean.
When our mint is picked clean
Hear these haughty hogs all scream
That there's no free lunch!
Only this plump bunch
Deserves a national free lunch.
There's a riot at the mint!
None of these gents plan to repent
This rape is obscene
These gents are real mean
Keep your children inside
Teach them true national pride.
There's a riot at the mint!
There's a riot at the mint!

MEXICO MAKES PROGRESS

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. PEASE. Mr. Speaker, I would like to call attention to an important study just completed by the U.S. International Trade Commission: Review of Trade and Investment Liberalization Measures by Mexico and Prospects for Future United States-Mexico Relations, Phase I: Recent Trade and Investment Reforms Undertaken by Mexico and Implications for the United States.

This study highlights what some of my colleagues and I have been saying for a long time. In a relatively short period, Mexico has achieved a remarkable degree of trade liberalization for a developing country. Though there is still room for improvement, Mexico has dramatically opened its economy to foreign products and investment.

The executive summary of this report follows:

EXECUTIVE SUMMARY

This report covers the first phase of the Commission's investigation of Mexico's trade and investment reforms and the implications of those reforms for the United States. On October 18, 1989, the Commission received a request from the House Committee on Ways and Means to provide a comprehensive review of Mexico's recent trade and investment reforms and to explore experts' views on prospects for future U.S.-Mexican relations. In response to the Committee's request, the Commission instituted a two-phase study, investigation No. 332-282, under section 332(g) of the Tariff Act of 1930. Phase II, Prospects for Future United States-Mexican Relations, will be submitted to the Committee in October 1990.

OVERVIEW: THE MEXICAN ECONOMY

Prior to its recent reforms, Mexico's economic policies during the post-war era were highly interventionist and protective

Like many other developing countries, Mexico pursued industrialization through import substitution. It imposed formidable tariffs and nontariff barriers on imports and subsidized manufacturing industries. Moreover, the Government restricted direct foreign investment and foreign ownership of assets, controlled the peso exchange rate, restricted access to foreign exchange, assumed direct control of more than 1,000 business enterprises, and established complex regulations for others. These policies helped to develop the manufacturing sector, but they also created problems that contributed to the economic crises Mexico faced in the 1980s.

By the late 1970s, Mexico had accumulated a sizable debt that it could not service without additional loans

The world's commercial banks stopped lending to Mexico in the summer of 1982. On August 8, 1982, Mexico announced that it could not make scheduled payments on its $86 billion debt and turned to the IMF for assistance.

After the 1982 debt crisis, the Mexican economy began to expand in 1984, but the improvement was short-lived. By 1985, economic stagnation had again set in. New international financial agreements were reached in 1986

Major shocks, including a devastating earthquake in 1985 and dramatic declines in world oil prices, virtually halted Mexico's economic growth. Mexico obtained new agreements with the IMF, World Bank, and commercial bank creditors in 1986. In exchange, Mexico agreed to major reforms of its economic policies, including reductions in tariffs and restrictions on trade, liberalization of foreign investment, reductions in public spending, tax reform, divestiture of state-owned enterprises, and reform of domestic price controls.

On July 23, 1989, Mexico became the first country to reach a tenative new debt agreement under the Brady Plan

Mexico's commercial bank creditors agreed, for the first time, to forgive part of Mexico's medium- and long-term debts to them. The agreement also provides for a substantial reduction in interest rates on part of the debt, and for several billion dollars in new loans and other assistance.

GATT ACCESSION AND OTHER INTERNATIONAL DEVELOPMENTS

On November 26, 1985, President Miguel de la Madrid announced that Mexico would begin negotiations with GATT for membership. In August 1986, Mexico became the 92nd Contracting Party

Mexico first attempted to join the GATT in 1979. However, on March 18, 1980, President Jose Lopez Portillo announced that Mexico would delay its entry to GATT, based on various internal political and economic considerations.

Mexico agreed to become a signatory to five of the Tokyo Round Codes: licensing, customs valuation, antidumping, standards, and subsidies

Mexico signed three of the codes on July 26, 1987; the Standards Code was signed in January 1988. The Subsidies Code has yet to be signed.

Two "Understandings" between the United States and Mexico have emphasized the importance of liberalized bilateral trade

Most analysts agree that the 1987 Framework Understanding was a catalyst that improved U.S.-Mexican bilateral relations. The 1989 consultative Understanding Regarding Trade and Investment Talks created a parallel mechanism for industry-specific and cross-sectoral negotiations. Negotiations on various topics will be completed over the next several years; standards and petrochemicals have been chosen as the first topics.

Mexico is viewed as a moderate in the Uruguay Round; it has offered highly regarded proposals in three traditionally controversial areas

In the services negotiating group, Mexico has advocated the principle of "relative reciprocity." In intellectual property rights discussions, Mexico has proposed a balance between protection and development. In investment, it proposed a study of trade-related investment measures. During the investment discussions, Mexico was singled out by U.S. representatives as an example of a country that has eased investment restrictions without hampering development.

DEREGULATION AND PRIVATIZATION IN MEXICO

Based on the premise that excessive and obsolete regulations were largely responsible for inefficiency in the use of Mexican resources, Mexico has implemented a far-reaching program of deregulation

The Mexican Secretariat of Commerce and Industrial Development (SECOFI) has been given the mandate to make new rules that are simpler, less pervasive and rigid, and that allow more room for private initiative and competition. The extensive regulatory revision currently underway in Mexico amounts to a deregulation of the economy as a whole and paves the way for privatization in many areas.

Over 25 different areas of the Mexican economy have been deregulated or are currently being reviewed for deregulation

These areas include domestic motor carriers, telecommunications, petrochemicals, standards and packaging, the financial system, insurance, customs brokers, certain commodities (sugar, cacao, coffee), fishing, technology transfer, trade secrets, and agriculture.

Although many of the deregulations have been implemented only very recently, some implications are already emerging

For example, the liberalizing effect of the new trucking rules on the maquiladora industry is likely to reduce costs and improve economics of scale. Better opportunities for sales by U.S. agricultural exporters could result from the reorganization of Mexico's farm sector.

The Government of Mexico is proceeding with a program of privatization with the clear objective of divesting public enterprises in favor of private, including foreign investors

Mexican policymakers have stated their intention to reduce the public burden by subsidizing unprofitable enterprises and to generate revenues by the sale of state-owned entities.

As part of the privatization process, the Mexican Government has partially scaled down its participation in some sectors and completely withdrawn from others

For example, the Mexican Government has scaled down its participation in such areas as food processing, production of textiles, secondary petrochemicals, wood and paper products, and construction materials. The Government has reduced its presence in the automobile industry by selling Renault de Mexico. Sales of state-owned enterprises producing tructs, buses, tractors, motor, and autoparts have also taken place or are in progress.

In December 1982 the Government of Mexico owned 1,155 entities. As of February 1990, 801 of those entities have been divested or authorized for divestment

As of February 1990, the privatization process had been finalized for 619 companies and was still in progress for 182 companies. The companies that are yet to come up for sale are of larger size and complexity than those for which transactions have already been completed. Also, some of the new candidates for privatization operate in noncompetitive markets. Therefore they will require regulatory, financial, and operational adjustments before being offered for sale in a competitive market.

Mexican officials have encountered difficulties in selling a number of companies earmarked for divestment at a price they consider fair

This problem explains the relatively large number of entities for which authorized divestment has not yet been completed. A notable example of a difficult privatization effort is the Compania Minera de Cananea, Mexico's largest copper company and one of the largest copper mines in the world. Private investors are reluctant to assume Cananea's huge debts.

MEXICO'S TRADE REGIME

Mexico has reduced its maximum import tariff from a level of 100 percent in 1986 to a current level of 20 percent

This exceeds Mexico's commitment to the GATT to reduce its maximum tariff to 50 percent. Mexico's trade-weighted average tariff is currently about 11 percent—low by developing country standards.

As a result of major trade liberalization measures begun in mid-1985, Mexico has moved from an extremely restrictive import regime in which almost every item was subject to an import permit, to a regime in which quantitative restrictions now apply in only a few selected sectors of the economy. However, Mexico continues to maintain import permit requirements for roughly 330 items (about 3 percent of total number of tariff items)

For example, quantitative restrictions continue to apply for oil and oil derivatives, motor vehicles, pharmaceutical products, footwear, electronic equipment, and certain agricultural products. About 59 percent of the value of U.S. agricultural exports to Mexico require import permits. According to a recent GAO report, these requirements are significant barriers to U.S. agricultural exports to Mexico.

Mexico is currently considering or is in the process of liberalizing its rules regarding the three sectors that are regulated by industrial development plans

New rules regarding the automotive, pharmaceutical, and electronics sectors will open these traditionally protected sectors to foreign competition.

In 1986, Mexico enacted a statute containing antidumping and countervailing duty laws. Mexico has initiated countervailing duty investigations very seldom, however, a recent study identifies Mexico as the 5th most frequent initiator of antidumpings during the 1987-88 period, behind the United States, Canada, the European Community, and Australia

FOREIGN INVESTMENT

In May 1989, Mexico made sweeping reforms to its rules governing foreign investment

Without changing the 1973 law that significantly restricts foreign investment, Mexico has promulgated new rules that provide for greater transparency, increased foreign participation, and greater efficiency in the application process.

Among other things, the May 1989 foreign investment regulations include provisions that allow up to 100-percent foreign investment in companies in unclassified activities

The range of economic sectors expressly open to wholly foreign-ownership has been broadened significantly. Foreign investment of up to 100-percent is allowed in unclassified activities which account for 72.5 percent of the 754 economic activities that comprise the Mexican economy. Included are certain industries such as glass, cement, iron, steel, and cellulose for which administrative restrictions had previously restricted majority foreign participation. Of the remaining 207 classified activities, 40 more are open to 100 percent foreign investment, with prior approval. Moreover, majority foreign participation in many of the classified categories is possible through a temporary 20-year trust mechanism.

While the new foreign investment regulations affect a wide range of activities, the implications in several areas are especially noteworthy. For example, telecommunications is now considered a classified activity in which foreign investment is allowed up to 49 percent

Prior to the 1989 regulations, foreign participation in telecommunications services was prohibited.

In an effort to deregulate the petrochemical industry and provide greater opportunities for private investment, on August 14, 1989, Mexico announced a major reclassification of petrochemicals

Fourteen basic petrochemicals were reclassified as secondary, further reducing the list of basic petrochemicals from 34 to 20 products. In addition, the number of petrochemicals classified as secondary was drastically reduced from approximately 605 to 66 products as 539 products moved into the unrestricted tertiary category.

The limitation on foreign investment in the Mexican insurance industry has been relaxed

A new insurance decree lifts the prohibition on new foreign investment in the insurance industry and raises the allowable level of foreign participation from 15 percent to 49 percent.

In December 1989, Mexico published new regulations which open state banks to limited foreign participation

Under certain conditions, foreign investors are now able to obtain up to 34 percent ownership through new non-voting shares. Direct foreign participation is still prohibited.

In December 1989, a new maquiladora decree significantly changed the rules relating to the issue of maquiladoras selling products in Mexico

Under certain conditions, a maquiladora may now sell locally an amount equal to 50 percent of its total sales during the preceding 12 months. Local sales must be in addition to the maquiladora's pre-established level of exports. Therefore, to sell on the domestic market, a maquiladora must increase its production.

The 1989 maquiladora decree included significantly streamlined administrative procedures to encourage the expansion or establishment of a maquiladora

A "single window" was created at SECOFI to handle all administrative details. Under the prior regulatory framework, negotiations with 9 different government agencies was required.

The 1989 maquiladora decree creates a more predictable environment for long-term investments

The term for which maquiladora licenses are effective has been changed to an indefinite, open-ended period. Previously, such licenses (although routinely renewed) were valid for only 2 years. The new decree provides greater certainty for long-term investments.

CURRENT MEXICAN INTELLECTUAL PROPERTY PROTECTION

Mexican law and enforcement of intellectual property protection has undergone significant change over the past several years

Mexico has announced plans to strengthen process and product patent protection and improve the enforcement of trademarks and trade secrets. As a result of this action, Mexico has been removed from the U.S. Special 301 "Priority Watch List."

Prior to 1987, Mexican law provided no trade secret protection. Amendments in 1987 to the 1976 Law of Inventions and Trademarks (LIT) provides limited protection of trade secrets

Additional trade secret protection was provided in January 1990 with the promulgation of regulations liberalizing the regis-

tration of license agreements between foreign companies and Mexican subsidiaries.

REMEMBER OUR POW'S AND MIA'S

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. DORGAN of North Dakota. Mr. Speaker, I would like to take a moment to share a poem I received from Ann Hultin of Devils Lake, ND. As Ann said in her letter to me, "We must pay attention to the hostages that have been held the longest. * * * These men are paying for our government's mistakes * * * [and] they should certainly be rescued. * * * Spring is coming and the longings for their native land must be strong." I hope the poem Ann has written will remind us of our responsibility to bring our dedicated countrymen home.

OUR MIA'S

To once again walk my native land,
In green grass and whispering trees.
To hear the lovely song of birds—
On the morning's tranquil breeze.
The loved ones left so long ago—
When last farewells were said.
Have they forgotten me at last
And given me up for dead?
Please hear my cry beloved ones—
I'm here—please hear my cry!
Think of me, don't leave me please—
In this strange land to die!

A SALUTE TO LOURDES P. AGUILA

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, it is with great pleasure that I rise today to congratulate and commend Lourdes P. Aguila, general coordinator of Miami's Liga Contra el Cáncer/League Against Cancer. Recently, Lourdes was singled out as 1 of 19 recipients of the prestigious volunteer—The National Center 1990 President's Volunteer Action Award.

Instituted in 1982, the President's award was designed to honor outstanding volunteers and volunteer organizations and to call public attention to the many contributions which they make to our Nation. This is the most prestigious award ever given for volunteer service. Those who have been honored will visit Washington during National Volunteer Week.

Among the many wonderful things which Lourdes is involved in as general coordinator of Liga Contra el Cáncer, is the upcoming 14th annual telethon. It will be held on Sunday, May 6 and broadcasted live. It is an effort that involves over 1,000 volunteers. The telethon is expected to raise approximately $2½ million; over 200 telephone lines will be operated by volunteers in Miami alone. Other areas, such as Tampa, West Palm Beach, Belle Clades, Fort Lauderdale, and Hollywood will participate by satellite hookup and telephone.

This annual event is the Liga's principal fundraiser. According to Lourdes.

We get massive support from the public each year. South Floridians knows the importance of the League Against Cancer. Almost everyone has a relative or friend who has been helped by the league in a time of need—when cancer strikes and you have no adequate medical insurance or money to pay for treatment, the League is there to help.

As part of the effort to increase donations and awareness, a former patient of the Liga, Gonzalo Giannotti, age 24, is touring the State of Florida on a bicycle tour which will stop in Tallahassee. There Gonzalo will address the Florida legislature to help the Liga to obtain such needed State funds. This tour will cover 1,000 miles and last 26 days. It will reach its finish line on May 6.

Mr. Speaker, I would like to share with my colleagues the remarks which Gonzalo will make during his address to the Florida legislature on April 24.

On my half-way point of this bicycle tour of the state of Florida, that the League Against Cancer has named "Pedaling for Life", I feel a sense of tremendous pride and responsibility in addressing you on behalf of thousands of patients who are treated every year, and for the past fifteen, by the League Against Cancer.

The League Against Cancer, a unique institution in the United States, has provided treatment to almost 20,000 patients who simply cannot afford the high cost to battle this killer disease.

Over four years ago, I was diagnosed as having Hodgkin's Disease. At that point, my family did not have insurance or the means to face the expensive operation and radiation therapy that I required. The League Against Cancer took on my case and as you can see, today I an able to thank them and trying to raise funds and awareness in this sunshine state, where unfortunately the sun goes off over ninety times a day on people suffering from cancer.

When patients are diagnosed with cancer, and are unable to pay for their treatment, the League Against Cancer helps the State of Florida to save thousands of dollars, not to mention the relief that Jackson Memorial Hospital gets by not having to cope with its already congested waiting list. And as you know, when fighting cancer, time is crucial.

But the League Against Cancer survives through the generosity of the community and our annual telethon.

However, today, in the month of April, a few days away from the telethon, the League's building is being once again mortgaged, and we are already over one and a half million dollars in the red. And the number of patients keeps growing.

Think if you will, for a moment, the disastrous consequences for the State of Florida and these needy patients if the League Against Cancer would have to close its doors.

This is something that we as concerned Floridians cannot allow to occur.

Tomorrow in Washington, at the White House, Lourdes Aguila, General Coordinator and a founder volunteer of the League Against Cancer, will receive from the President of the United States the Volunteer Award, the highest award conferred upon charitable organizations. The League Against Cancer was chosen along with eighteen other among over 4,000 institutions nationwide.

As you can see, we need the League Against Cancer, Patients need the League Against Cancer.

But most importantly, the League Against Cancer needs your help.

May I respectfully submit to you, that through legislation you allocate one million dollars annually to the League Against Cancer, in order to keep the doors open, and help people win this formidable battle.

We need you.

Since its foundation in 1975, the Liga has served almost 20,000 people, including adults and children, from 38 countries. Many lives have been saved because of the work of more than 170 local physicians who donate their services and the hundreds of volunteers who work for the Liga, as well as the generosity of the Miami community. The money raised pays for hospital costs, cancer treatment, medications, and administrative costs, which are kept under 12 percent thanks to the extensive and dedicated volunteer network.

Mr. Speaker, I am proud to recognize Lourdes' wonderful contributions and example to eveyone in Miami, as well at that of the many volunteers who have given so selflessly of their time and energy toward the betterment of our community. And I salute Gonzalo Giannotti, a true example of the brave cancer patients who are helped every day by Liga's volunteers. Their strength is an inspiration to us all.

THE PEACE PARK ANTINUCLEAR COALITION

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. FAUNTROY. Mr. Speaker, I would bring to the attention of my colleagues the earnest endeavors of a coalition of citizens entitled "The Peace Park Antinuclear Vigil."

Though their efforts have often been against the dominate currents of public policy, their message is one of universal importance.

In a plan for global nuclear disarmament, they repeat their plea:

We pray that humankind will abandon the military course which the nations of the world have historically pursued . . . and turn instead to international agreements to replace the present chaos.

As we near "Earth Day, U.S.A., 1990," their plea takes on special poignance and meaning. Their pleas are jointly directed to the legislatures of both the Congress of the United States and the Supreme Soviet and its politboro in the form of a petition which was recently hand delivered to the Supreme Soviet by members of the coalition.

I would ask that we all remember the message they would have us carry to all corners of our precious Earth on this most important commemorative day.

A TRIBUTE TO MAUREEN DROHAN

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize an outstanding student from my community who has earned honors along with her classmates for winning the 1990 Rhode Island State Championship title in the Bicentennial of the Constitution and Bill of Rights competition.

Maureen Drohan, of Providence, RI, attends Bishop Keough High School in Pawtucket, RI. This competition is held annually to test students' general knowledge of the Constitution as well as their ability to apply the Constitution to contemporary issues. The students were evaluated in three areas: Presentation, overall knowledge of the Constitution, and application of the principles of the Constitution. For Bishop Keough High School, this title was very special for the school finished second last year. Through hard work, combined with the excellent guidance and preparation by her teacher, Ms. Carol Costa, Maureen and her classmates were able to achieve excellence. Maureen and her classmates, along with Ms. Costa, will now travel to Washington, DC, in May to compete in the national competition against teams from across the Nation.

It is with great pleasure that I salute Maureen Drohan and the members of Ms. Costa's U.S. history class from Bishop Keough High School. Their outstanding knowledge of the Constitution and its principles serves as a reminder to us all about the importance of this great document for all Americans. I would like to wish Maureen and her classmates good luck in the national competition.

TRIBUTE TO RAYMOND J. VINCENT, RECIPIENT OF AMTRAK'S AWARD FOR VALOR

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. LEHMAN of Florida. Mr. Speaker, next week, Amtrak President W. Graham Claytor, Jr., will present Amtrak's Award for Valor to Raymond J. Vincent of Hialeah, FL, one of my constituents and a longtime Amtrak employee, for service truly above and beyond the call of duty.

Mr. Vincent, chief of on board passenger services on the Silver Star Florida-to-New York run, wrestled a gun from an apparently mentally deranged passenger who had just shot someone while conductor John F. Garrard grabbed the gunman and restrained him. Mr. Speaker, these heroic actions merit our recognition and thanks. I include hereafter a brief description of the events of that evening of July 3, 1989, and I know that all my colleagues join me in extending our congratulations to Raymond Vincent and John Garrard for a job well done.

The article follows:

PRESIDENT'S AWARD FOR VALOR

John F. Garrard, Assistant Passenger Conductor Transportation, Jacksonville.

Raymond J. Vincent, Chief, On Board Services Passenger Services, Miami.

The evening of July 3 seemed much like any other night aboard the New York-bound Silver Star, Amtrak Train No. 92: Big Apple-bound revelers looking forward to the July 4th holiday, families returning from summer vacation, grandparents on their way to pay a visit. Just the normal summer train trip from Florida to New York. Normal, this is, until the shot rang out in the vestibule of the baggage-dorm car.

The drama unfolded when an apparently mentally deranged passenger wandered into the vestibule of the train's lead car. The attendant told the man there was nothing in that direction but baggage and led the man back to his seat. Moments later, the man again headed into the vestibule. Another passenger, sensing the man was lost, stepped inside the vestibule to offer his assistance. The mentally deranged passenger pulled out a gun and shot the other passenger in the head.

Witnessing the shooting, the coach attendant raced back to the dining car where he found John Garrard and Ray Vincent. He told them what happened and they immediately ran to the scene, where they found the gunman still standing over his victim.

Without regard for his personal safety, John Garrard grabbed the gunman and wrestled him to the ground. Ray Vincent then took the gun away. The gunman was restrained with baggage tie straps and shut into a bathroom until police arrived on the scene.

Meanwhile, John and Ray returned to the mortally wounded passenger, administering first aid. They also helped calm and soothe terrified passengers.

Both John and Ray then calmly continued with their "normal" duties aboard this no-longer "normal" trip.

H.R. 4566

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mrs. JOHNSON of Connecticut. Mr. Speaker, I am introducing H.R. 4566, the Medicare Malpractice Dispute Resolution Act of 1990. This bill will assure timely, equitable benefits for Medicare beneficiaries who are victims of malpractice and create the legal liability framework essential to eliminating costly and unnecessary defensive medical practices. Very simply, it reforms the process by which medical malpractice disputes are resolved.

While most people agree that this Nation's dispute resolution process for medical malpractice does not work well for patients or medical providers, H.R. 4566 takes a gaint step toward resolving some of the problems of the malpractice liability system. It provides greater equity to disabled and senior Medicare beneficiaries and ultimately reduces costs by eliminating unnecessary tests and procedures.

The goals of the current medical malpractice system are twofold: To protect patients from negligent medical practices, and to provide compensation for damages to victims of malpractice. The current system does a poor job of both for the majority and an even worse job for seniors. In fact, the current system deters people from filing for compensation because of the time it takes to pursue a claim and the cost of the process.

A recent comprehensive study by Harvard researchers on malpractice in New York concluded that eight times as many patients suffered an injury from negligence as filed a malpractice claims, and 16 times as many patients suffered as received compensation from malpractice claims. The same study found that a shocking 78 percent of the injuries for which claims were not filed were for patients over 70, years old.

Our current system discriminates against senior citizens in a number of ways: The elderly typically do not have the resources and are reluctant to bring a suit that will take years to resolve. With H.R. 4566 our senior citizens will have greater access to compensation for malpractice because the costs to pursue a complaint will be lower, the time in which a decision must be made will be limited, and the process will be less confusing and complicated.

The current system is plagued with high costs and inefficient practices:

Physicians spent $5 billion on malpractice insurance premiums in 1988.

Yet less than $3 billion was paid to injured plaintiffs.

Costs for malpractice insurance for physicians rose 100 percent between 1983 and 1985 while hospital costs rose 57 percent; the Consumer Price Index rose only 8 percent and the Medical Care Index rose 13 percent during the same period.

In response to today's legal environment, physicians order more tests and x-rays from laboratories, seek more consultations, and maintain more records to document their actions. The cost of these defensive, unnecessary services has been estimated at 15 percent to 30 percent of the Nation's total health care bill.

Access to medical care is gradually reduced because physicians leave practice early, limit the difficulty of the procedures they perform, refuse high risk patients, and restrict the specialties they enter. In a survey by the American College of Surgeons, 40 percent of their members did not accept high-risk cases in consultation, and 28 percent did not perform certain procedures because of the risk of malpractice suits.

The average malpractice case takes 2 to 5 years to litigate. In some States, for example, Illinois, it can take 7 years.

A report by the Harvard Medical Practice Study on New York hospitals found that out of the cases that led to moderate to severe disability, involved strong or certain evidence of negligence, and in which a malpractice claim was not filed. 78 percent of the injuries occurred in patients over the age of 70.

As a result of these problems, patients pay more for treatment and health insurance, physicians spend more time documenting and discussing each case, and the elderly are discouraged from seeking compensation. The delivery of obstetrical care and other specialties is harmed or limited, which has particularly affected access to care for poor women.

The American College of Obstetricians and Gynecologists reports that almost one in eight obstetricians has stopped performing deliveries (two-thirds of those before the age of 55) solely because of the risk of malpractice suits. And of the $450 million that Congress will allocate for neighborhood health clinics, approximately $50 million goes to malpractice insurance for this high risk patient group.

We cannot wait any longer to address the problems of the malpractice liability system. We need to insure that there are mechanisms that will prevent, identify, and correct malpractice, and provide victims with fair compensation. By correcting the problems of the system for disabled and senior Medicare beneficiaries, we will also lower the costs of liability and health insurance premiums, increase access to medical care, and improve the relationships between doctor and patient.

We know that alternative methods of dispute resolution work. It is time for the Federal Government to take a leadership role through Medicare, and set an example for the States to follow.

My bill has two parts: process reform and liability reform. Under process reform, my bill will:

Require binding arbitration for all Medicare beneficiaries and providers;

Recognize an arbitration process that may already be in place in certain states or establish an arbitration process that will be set up and run by qualified disputers; and

Streamline the process so that costs and the length of litigation are limited.

Under liability reform, my bill will:

Assure full compensation for medical costs and income replacement, limit non-economic damage awards and contingency fees, and adopt a uniform national statute of limitations; and

Apply a collateral source rule so awards reflect payments from other sources.

My proposal takes an important first step toward addressing the problems of the current system. It targets our Medicare beneficiaries who are most disadvantaged by today's system. H.R. 4566 will reduce the time and agony of the malpractice process, build on the best of arbitration experience, and create a package that will ultimately reduce costs while increasing equity.

A SALUTE TO NATIONAL HIGH SCHOOL ESSAY CONTEST WINNER PARAS P. MEHTA

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. DORNAN of California. Mr. Speaker, an April 3, 1990, Washington Post article decried the lack of educational preparation's in our public schools. The article painted a bleak picture. Assistant Secretary of Education Christopher T. Cross was quoted as saying that "youngsters who stand less than a year away from the voting booth have, as a group, a tenuous grasp of institutions and ideals that make freedom possible." This should be of great concern to all of us.

Fortunately, the news is not all bad. There are many teachers and students who work hard to set standards of excellence for all educators who follow. I am proud to bring to my colleagues' attention the winning entry of the United Nations Association of the United States 1989 National High School Essay Contest. The essay, written by Paras P. Mehta, a constituent of mine who is a senior at Cerritos High School, demonstrated that not all is "gloom and doom" in our public schools. Indeed, Paras Mehta's essay displays outstanding writing skills and sophisticated and thoughtful insight into the role of the United Nations in the World in which we live.

I commend Paras' achievement and extend my congratulations to Paras' parents and teachers. Mr. Speaker, I am honored to share this award-winning essay with all of my colleagues.

The essay follows:

UNITED NATIONS ASSOCIATION OF THE UNITED STATES 1989 NATIONAL HIGH SCHOOL ESSAY CONTEST WINNING ENTRY BY PARAS MEHTA, CHS JUNIOR

A quarter of a century ago, an American President, addressing this same assembly of sovereign states, issued a solemn warning to the peoples of the world: "Never have the nations of the world had so much to lose or so much to gain. Together we shall save our planet or together we shall perish in its flames. Save it we can and save if we must, and then shall we earn the eternal thanks of mankind and, as peacemakers, the eternal blessing of God."

Today, 28 years later, we find ourselves in a world not so different from the one confronted by our forebears. The threat of nuclear annihilation still holds hostage every individual on Earth. Billions of human beings continue to suffer under the iron hand of dictatorship and the merciless grasp of disease, hunger, and poverty. And today, more than ever before, the very Earth that sustains and nourishes us is showing signs of weakening under the oppression of man's exploitation.

But if the problems that face us today seem more insurmountable than ever before, we can take comfort in the knowledge that our potential to confront and overcome these challenges is also at its peak. We must first come to the understanding, however, that if one trend characterizes the change in world affairs since the signing of the Charter 44 years ago, it is the increasing interdependence of the countries of the world. As Secretary-General Trygve Lie noted in his first acceptance speech, the United Nations has been given a mandate "to build a firm foundation for the peace of the world. We may find difficulties and obstacles ahead of us. But the harder the task the higher the prize. It is the future of the whole civilized world which is at stake." And so it must be the responsibility of every civilized nation to partake in the solutions to the problems that threaten all of us. America makes a pledge today, and calls upon the nations of the world to join in its commitment, to a policy of internationalism in addressing the problems of the world. From war and peace, to hunger, to human rights, to the environment, we can achieve no more working separately then we could working together. We can either overcome global problems together, or we shall submit to them separately.

The success of internationalism in global cooperation is only now becoming apparent, just as a new, vital role for the United Nations is becoming more clearly defined. The achievement of a cease-fire in the Iran-Iraq War, the finale to over eight years of warfare, and the withdrawal of foreign troops from Afghanistan resulting from United Nations talks in Geneva concluded on April 14 of last year, both serve as powerful testimony to the abilities of this organization. Nevertheless, in the United States' vision of the United Nations and internationalism, the responsibility of the United Nations does not stop with the cease-fire in the Persian Gulf and the Geneva accords on Afghanistan. We have yet to settle the boundary conflicts between Iran and Iraq, and despite the withdrawal of foreign forces from Afghanistan, that nation still suffers from the illegitimate rule of a client government put in power against the will of the people. Thus, it is not enough that the United Nations accept the responsibility of solving world problems, but it must also commit itself to solving these problems completely; it is not enough that the United Nations serve as a peace maker, but it must serve as peace keeper as well; it is not enough that the United Nations strive to create peace, but it must also ensure that justice accompanies peace. Our work in the Persian Gulf and Afghanistan is far from over. But the beginnings of a lasting framework for regional and international security arrangements have been established.

The keystone of international security today is the continued progress of disarmament. The significance of the highly praised INF Treaty between the United States and the Soviet Union is truly two-fold. On one hand, it reflects a new era in United States-Soviet relations: the cold war has melted into warm cooperation and détente has been replaced by genuine goodwill. At the same time, the treaty marks historic movement towards the elimination of an entire class of nuclear warheads. Nevertheless, we still have far to travel in escaping from nuclear terror. We must now commit ourselves to the reduction of nuclear warheads carried by intercontinental ballistic missiles, the ulitmate threat to the security of mankind. The United States has noted Soviet President Mikhail Gorbachev's proposal for complete elimination of nuclear weapons by the year 2000, and we are eager to negotiate the overtures he has made. However, the United States remains solidly committed toward the need to achieve a conventional weapons balance in Europe. While we note with appreciation the proposed unilateral reductions made by Mr. Gorbachev in his address to this Assembly in 1988, we are convinced that further reductions are necessary to ensure the security of Europe and the success of further nuclear reduction.

On the issue of disarmament, the United States reiterates its commitment to the effort that was started sixty-four years ago: the elimination of the threat of chemical weapons. To this end, we continued to encourage multilateral talks, as in Paris, that aim towards the complete elimination of such devices. Finally, the United States reaffirms its dedication to the Nuclear Non-Proliferation Treaty and attempts to stop the spread of the deadly atom.

Last year, we celebrated the 40th anniversary of the Universal Declaration of Human Rights. To the United States, a nation committed to and built upon a tradition of equality, democracy, and human dignity, this document holds a special role in world affairs. Unfortunately, the status of human rights in the world remains quite distress-

ing. The United Nations must take a firm stand and ensure that all countries, large and small, powerful and weak, rich and poor, respect the equality and dignity of the individual and his rights. The United States remains committed towards helping those peoples around the globe who are struggling for greater democracy and human rights, as the United Nations is committed to do under its Resolution 36/102 on the "Implementation of the Declaration on the Strengthening of International Security." Nevertheless, the United States always favors voluntary and peaceful recognition of human rights by every government over violence within countries to enforce the principle of human rights. Still, however, no government can claim greatness when the dignity of its individual citizen is abased.

It is impossible to ignore, especially in countries of the Third World, the direct correlation between the absence of adequate human rights and the status of economic deprivation. And in all cases, the rising of economic standards of a people inevitably leads to an improvement in their dignity as human beings. In assisting developing nations, the United States remains committed to certain principles. First and foremost is the need for developing countries to help themselves, by improving human rights in order to increase the potential of their citizens, and by facilitating economic growth by maintaining peace in their foreign relation. Then, we should work to assist developing nations both through direct economic assistance and through a more beneficial economic policy. This policy should include providing the Third World with increasing industrialization, greater agricultural productivity, better medical facilities, lower trade barriers, and greater North-South cooperation. Moreover, Non-Governmental Organizations may potentially play the largest role in assisting developing nations to maximize their potential and the potential of their peoples.

Undoubtedly, the one problem that most threatens our nations and our planet itself is that of the changing environment around us. This problem is most obviously manifested in global warming trends. The United Nations Environmental Programme has estimated that future global warming patterns could result in a temperature increase of over 9 degree Fahrenheit. The resulting changes will ultimately affect the global sea level and climate patterns. The potential for disaster is great.

What makes this problem most complex is the fact that global warming trends are ultimately rooted in changes in the biosphere and atmosphere above. This is not the domain of any single nation, but the common heritage of mankind. And as such, it is for the nations of the world to solve together. First, the industrial nations of the world must collaborate to agree on worldwide limits on the emission of greenhouse gases. We must also attack the equally ominous problem of ozone depletion. The Sept. 15 Protocol on Substances that Deplete the Ozone Layer is one step in this endeavor. Finally, in addressing the global environment threat, we have yet another opportunity for cooperation between the developed and underdeveloped world. Reforestation to combat the pressing problem of desertification in both underdeveloped Africa and South America holds promise as a new way to make fertile once again important regions of the globe.

The challenges that these United Nations face today will be the ultimate test of our Charter and our commitment to its principles. We must realize, however, that the solutions to the problems that we face cannot be buried in partisan demagoguery but rather must be decided in the common interest of all mankind. This is the new mandate of internationalism that the people of the world have demanded and that our Charter envisions. Over the past 44 years, we have witnessed a unique growth in the number of independent nations. Let us declare today not our independence, but our interdependence, and with it, a new commitment to solving the problems of the world for the collective good of all mankind.

EARTH DAY

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. UDALL. Mr. Speaker, with just 3 short days until the celebration of the 20th anniversary of Earth Day, it is appropriate for us to focus on the oft forgotten critical problem of worldwide shortages of usable freshwater resources.

Between 1950 and 1987, world population doubled from 2.5 billion to 5 billion. By the end of the decade, we are expected to add another billion people to our planet. While over 70 percent of the Earth's surface is covered by water, a tiny 3 percent of that is freshwater. Under the best circumstances—equitable distribution of water resources; clean, nonpolluted water; population distribution according to available water supplies; and effective water use strategies—we would have ample freshwater supplies. However, our wasteful and harmful practices place this most basic resource on the endangered list.

As we celebrate Earth Day on Sunday, we need to look ahead toward effective measures to ensure our freshwater supply. Most of our freshwater is used to grow food. A whopping 70 percent of all water use is irrigated agriculture. Irrigated lands have tripled since 1950. Unfortunately, irrigation is one of the most wasteful water uses. Only 37 percent of irrigation water actually contributes to crop growth. The remaining 63 percent is wasted. This sad fact calls for immediate action.

While personal water uses pales in comparison to agricultural use, it is one area where all of us can make a difference. This Earth Day, citizens around the world are making a personal commitment to change their practices and habits to make a difference. We use, on average, 9 gallons of water when we brush our teeth with the tap running. We use 100 gallons of water to wash the car. We use 5 to 7 gallons every time we flush the toilet—40 percent of total household freshwater use. By making a few changes in each of our lives, we can have a tremendous impact on preserving our freshwater supply.

"Fifty Simple Things You Can Do to Save the Earth," a book published by the Earth Works Group, spells out many opportunities for each of us to adopt environmentally sound practices in our own homes. Turning the faucet off while brushing your teeth will save 9 gallons of water each time. Washing the car with a sponge and bucket rather than the hose will save over 100 gallons of water. Using a plastic bottle to displace water in your toilet tank can save 8 to 16 gallons of water each day. Other practices like safe disposal of household chemicals and cleaners, watering lawns in the morning hours, and taking shorter showers can help protect our water supply.

This Sunday is a New Year's Eve celebration for the environment. Let's all make part of our environmental New Year's resolution a pledge to save water. Government, industry, and agriculture must pledge to address pollution, acid rain, and wasted irrigation water. Each of us must also pledge to change our personal habits to conserve and protect our water supply.

THE FOREIGN INVESTMENT POLICY-MAKING IMPROVEMENTS ACT OF 1990

HON. PHILIP R. SHARP

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. SHARP. Mr. Speaker, foreign investment in this country has increased rapidly over the years, and the American public is unsettled by this trend. When we meet with our constituents, they often raise questions about the extent and implications of foreign ownership. Unfortunately, we lack some basic, coherent information on foreign investment, either to inform ourselves and our constituents, or to make the decisions that should be made on national security grounds.

A few months ago, in response to this problem, I, along with Representatives HAMILTON, JOHNSON, JACOBS, and LUKEN, introduced H.R. 4060, the Foreign Investment Policy Improvements Act. We have been very pleased with the favorable attention it has received. Our discussions with many experts in the field—in business, labor, academia and government—has led us to develop several refinements to H.R. 4060.

Yesterday, we—along with Representatives LYNN MARTIN, SANDER LEVIN, and DAVID BONIOR—introduced a new bill, H.R. 4520. The new legislation retains the three central elements of H.R. 4060.

First, it corrects a serious deficiency in the data now available on foreign investment by directing two Department of Commerce agencies to merge their data bases. Currently, the Bureau of Economic Analysis does surveys of foreign investors that lump all a business enterprise's economic activities into a single, broad category. The Bureau of the Census collects good industry-specific data from all American businesses on such items as employment, payroll, shipments, plant and equipment, and value-added. The list of foreign-owned firms from the BEA can be used on census files to develop equally good industry-specific measures of the size and performance of foreign-owned firms.

Second, pertinent data from this exercise would be made available to the President and officials he designates to consider the national security implications of certain foreign direct investments. It is very important that he and these officials have basic background informa-

tion on the past performance of the parties involved, and on the scope and performance of foreign ownership or control already within the industry.

Third, the bill would make the data available to the General Accounting Office to perform its historic and necessary function of oversight and independent analysis. That will engender confidence within the Congress that the data is being presented faithfully. It would also give us the ability to request specific analyses from the GAO of concern to Members of Congress, without our being in possession of the confidential business information itself.

H.R. 4520, our new bill, refines H.R. 4060 in several critical aspects. First, it directs the Secretary of Commerce to produce an annual report on foreign investment, industry by industry, so that a comprehensive, single reference exists. His department includes not only the two key statistical agencies (BEA and Census)—but also the International Trade Administration, ITA. The ITA issues an annual volume with a company by company description of expansions in foreign direct investment. More importantly, ITA also houses a large staff of industry experts who closely follow foreign investments in their respective industries. We now lack that regular channel for their analyses to come to us and the public.

The annual report from the Secretary of Commerce would bring together this practical, up to date industry expertise in the ITA with the statistical information available throughout the Government and the private sector. Only those Government officers and employees working on the annual report would have access to the appropriate data, provided they met the necessary safeguards for protecting confidentiality.

Second, H.R. 4520 would address another serious problem that plagues the BEA data: its lack of timeliness. Our bill requires the attention of a competent person at higher levels within the company than typically now occurs, and permits the Commerce Department to issue a subpoena or seek higher penalties for failure to comply with the International Investment and Trade in Services Survey Act.

Third, this legislation makes explicit, in the legislative language, our intent not to add to the paperwork burden on business, domestic or foreign.

The Federal Government already collects substantial information from foreign investors, but the Government does not organize and present that data in a way that answers questions instead of raising them. Our first priority should be to utilize fully the information already being collected.

HOLOCAUST REMEMBRANCE DAY

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. WEISS. Mr. Speaker, this Sunday, April 22, 1990, is Holocaust Remembrance Day. I rise in recognition of this important day. As painful as it is to speak about the Nazi torture and murder of millions of innocent people, we must never stop doing so. As the old Hassidic saying goes: "forgetfulness leads to exile while remembrance is the secret of redemption."

Notably, the East German Government recently acknowledged its country's role in the horrors of the Holocaust. On behalf of its people, the East German Parliament asked Jews around the world for forgiveness. It declared its willingness to contribute as much as possible to the healing of mental and physical sufferings of survivors and to provide just compensation for material losses.

Although this recognition and apology is long overdue, its importance cannot be overstated. The truth about the Holocaust must be known and continually recognized by everyone, Jew and gentile alike. History once forgotten repeats itself.

On Holocaust Remembrance Day 3,000 young people from countries around the world will march the 3-kilometer distance separating Auschwitz from Birkenau, the largest concentration camp complex built by the Nazi during World War II. They will retrace the steps of the "March of Death," which countless numbers of people were forced to take on their way to the gas chambers. This time, however, there will be a difference; it will be a "March of the Living." These teens will be actively affirming their commitment to keep alive the memory of those who perished at the hands of the Nazis. They will be marching to make sure that the world never forgets the black chapter of history known as the Nazi Holocaust.

LEGISLATION TO PROTECT VICTIMS OF CAMPUS CRIME

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. LEVINE of California. Mr. Speaker, today I introduce a bill that will address the needs of millions of disenfranchised Americans: the victims of crime. For far too long have they been cut out of the justice system, falling to the wayside to lick their wounds and begin the long healing process alone.

College students who are victims of crime are particularly in need of the protections in my bill. On their own for the first time, away from the comforts of home and far from support networks that have held them up all their young lives, these people are frequently the prey of violent criminals who find students vulnerable and easy victims. In fact, nearly 36 percent report being the victims of violent crime.

Tragically, the educational system, as it stands, contributes to the harrowing experiences that campus crime victims face. Because of the provisions under the General Education Reform Act, victims who choose to bring their cases before college judicial trials are denied knowledge of the outcome of those trials. Victims who have suffered not only the abuses of the crime itself, but have also been excluded from the trial except to present testimony are left with no sense of closure to the case. These victims currently have no right to know what punishment, if any, the accused was dealt. The perpetrator of a violent crime may never be removed from the campus or the victim's dormitory forcing the victim to confront his or her attacker daily. And without knowledge of the outcome of the judicial proceedings, victims can make no decisions concerning their own future. They do not know whether to transfer to a new school or residence in order to avoid their attackers, whether they will face the attacker in class each day, or whether the attacker has been removed from the college setting and no longer poses a threat to the victim and other students.

It is clear that college victims of crime must be afforded at least the few rights that are given to victims in the American judicial system. They must be able to make an informed choice regarding the measures they need to take in order to regain their sense of security and to continue with their lives as students. The bill I introduce today will allow colleges and universities to let victims know of the outcomes of the disciplinary hearings which they initiate. I urge my colleagues to support this legislation and protect the victims of crime whose needs and trauma are too often neglected by our judicial system.

IN MEMORY OF SENATOR SPARK MATSUNAGA

HON. J.J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. PICKLE. Mr. Speaker, I join my colleagues today in mourning the passing of our good friend and comrade, Senator SPARK M. MATSUNAGA of Hawaii, who died last Sunday after a long fight against cancer.

SPARK was first elected to the House of Representatives in 1963, the same year I first came to Congress. He served for 14 years in the House, becoming a deputy whip and serving on the Rules Committee. He won election to the Senate in 1977, and immediately gained a seat on the Finance Committee.

Senator MATSUNAGA was steadfast in his legislative interests, especially his advocacy of free trade, the peaceful exploration of space, and justice for Japanese-Americans who had been interned during the Second World War. His successful 9-year effort to pass legislation redressing the unjust internment of Japanese-Americans may have been one of his greatest legislative accomplishments.

SPARK MATSUNAGA was born on the island of Kauai, HI, in 1917. He graduated with honors from the University of Hawaii with a degree in education. Upon the outbreak of World War II, he joined the Army and served with distinction in Italy, earning the Bronze Star Medal and two Purple Hearts. After the war, he graduated from Harvard University law school in 1951 and served as an assistant prosecutor in Honolulu before entering into private practice.

SPARK MATSUNAGA was recognized for his ability and determination in his particular areas of legislative interest. He influenced legislation

through his charm and persuasion, and he was deeply loved by his colleagues.

SPARK MATSUNAGA enriched all our lives with his warmth and friendship. His innumerable contributions left this institution and this Nation far richer and better than he found them. He will be remembered and revered for his achievements.

On a personal basis, Mr. Speaker, SPARK MATSUNAGA was elected to the House of Representatives in the 88th Congress the same year that many of us were elected to this great body. We elected SPARK MATSUNAGA president of the 88th Congress, and he has remained our president ever since, even after he was elected to the Senate.

He was loved by all the Members and his charm and wit and friendliness helped keep us together as a group all these years. The 88th Club has met on or around St. Patrick's Day every year for over 26 years, and I think that is an all-time record for any one congressional class. SPARKY and his wife Helene were our leaders, were our inspiration, and they were the love of all.

Even as services are being held in Hawaii this week, I think Senator MATSUNAGA would like to know that the 88th Club remembers him with great fondness, and we drink a toast to him today. One of our members, Federal Judge William Hungate, has written a toast of the 88th Club, and I quote it to you: "88th, 88th, here's a toast to thee, banner class, the very best, in our history!" Mr. Speaker, SPARK MATSUNAGA was the very best in our history.

THE ULTIMATE QUEST: THE RACE TO DISCOVER THE BUILDING BLOCKS OF MATTER

HON. ROBERT A. ROE

OF NEW JERSEY

HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. ROE. Mr. Speaker, on behalf of myself and the distinguished gentleman from Pennsylvania [Mr. WALKER], the ranking Republican member of the Committee on Science, Space, and Technology, I wish to submit the following article from the April 16 issue of Time magazine. The article discusses the important contributions of high-energy accelerators and the role of the Superconducting Super Collider [SSC] in keeping the United States in the forefront of particle-physics research.

The Committee on Science, Space, and Technology recently reported H.R. 4380, the Superconducting Super Collider Project Authorization Act of 1990. As chairman of the committee and ranking Republican member, we wholeheartedly seek the support of all our colleagues for this forward-thinking legislation.

THE ULTIMATE QUEST

(By Michael D. Lemonick)

The elevator doors opened into a cavernous room in an underground tunnel outside Geneva. Out came the eminent British astrophysicist Stephen Hawking, in a wheelchair as always. He was there to behold a wondrous sight. Before him loomed a giant device called a particle detector, a component of an incredible machine whose job is to accelerate tiny fragments of matter to nearly the speed of light, then smash them together with a fury far greater than any natural collision on earth.

Paralyzed by a degenerative nerve disease, Hawking is one of the world's most accomplished physicists, renowned for his breakthroughs in the study of gravitation and cosmology. Yet the man who holds the prestigious Cambridge University professorship once occupied by Sir Isaac Newton was overwhelmed by the sheer size and complexity of the machine before him. Joked Hawking: "This reminds me of one of those James Bond movies, where some mad scientist is plotting to take over the world."

It is easy to understand why even Hawking was awed: He was looking at just a portion of the largest scientific instrument ever built. Known as the large electron-positron collider, this new particle accelerator is the centerpiece of CERN, the European Organization for Nuclear Research and one of Europe's proudest achievements. LEP is a mammoth particle racetrack residing in a ring-shaped tunnel 27km (16.8 miles) in circumference and an average of 110 meters (360 ft.) underground. The machine contains 330,000 cubic meters (431,640 cu. yds.) of concrete and holds some 60,000 tons of hardware, including nearly 5,000 electromagnets, four particle detectors weighing more than 3,000 tons each, 160 computers and 6,600 km (4,000 miles) of electrical cables. Tangles of brightly colored wires sprout everywhere, linking equipment together in a pattern so complicated, it seems that no one could possibly understand or operate the device. In fact, it takes the combined efforts of literally hundreds of Ph.D.s to run a single experiment.

LEP and other large accelerators have been built to probe the nature of matter on a scale far smaller than that of the atom. The goal is to answer ancient and fundamental questions: What is the universe made of, and what are the forces that bind its part together? These questions cannot be answered without an understanding of what happened in the Big Bang, the unimaginably hot and dense fireball that 15 billion years ago gave birth to the universe and all it contains.

In a very real sense, accelerators are time machines that recreate the primordial fireball in miniature to unlock its secrets. The collision of two accelerated particles releases enormous bursts of energy. But that energy instantly condenses into a new array of particles, some of which may not have existed since the Big Bang.

This power to go back 15 billion years in time has touched off one of the most heated competitions in the history of science, a race that pits Europe's LEP against U.S. entries led by the powerful Tevatron at Fermi National Accelerator Laboratory (Fermilab) near Chicago and the Stanford Linear Accelerator Center (SLAC) in California. Huge teams of physicists at the rival centers are working day and night to discover the next new particle and to explain the behavior of those already found. In recent years, each lab has had its share of triumphs.

But none of the current generation of accelerators are big enough or powerful enough to re-create the very earliest fractions of a second after the Big Bank, where answers to the most intriguing mysteries are thought to lie. So U.S. physicists have embarked on a bold quest: the building of a colossal collider that will dwarf today's accelerators. Called the superconducting supercollider, it will have a tunnel that will circle for 87 km (54 miles) under the cotton and cattle country surrounding Waxahachie, Texas. Expected to be completed around the year 2000, the SSC will cost $7 billion to $8 billion.

That enormous price tag has fueled a growing controversy over how much the U.S. can afford to spend on such megaprojects, especially when the knowledge to be gained is so abstract. Critics complain that the money could be better spent on more practical goals, like fighting poverty and improving education. Some scientists, including many researchers in other branches of physics, fear that funding for the SSC will come out of their own budgets. Cynics have argued that the SSC is just another pork-barrel construction project, being foisted on the public by the powerful Texas congressional delegation and backed by a President from Texas.

Yet the support for a giant accelerator goes deeper than a desire for federal dollars. To many scientists and politicians, national pride is at stake. Proponents insist that the SSC is necessary to keep the U.S. in the forefront of particle-physics research. Americans dominated the field from the mid-1940s to the 1970s, but Europe's CERN started stealing much of the glory in the 1980s. Without the SSC, its proponents contend, many of the best American physicists will emigrate to Europe. In fact, the brain drain has already begun: last year, for the first time, the number of American experimenters working at CERN surpassed the total number of scientists from CERN's 14 member countries who had moved to U.S. research centers.

The international competition has spurred remarkable progress in the effort to understand nature's mysteries. Says theoretical physicist Steven Weinberg of the University of Texas in Austin: "Before, we had a zoo of particles, but no one knew why they were the way they were. Now we have a simple picture." That picture, known as the Standard Model, is based on a set of theories that attempt to describe the nature of matter and energy as simply as possible. The model holds that nearly all the matter we know of, from garter snakes to galaxies, is composed of just four particles: two quarks, which make up the protons and neutrons in atomic nuclei; electrons, which surround the nuclei; and neutrinos, which are fast-moving, virtually massless objects that are shot out of nuclear reactions. These particles of matter are, in turn, acted upon by four forces: the strong nuclear force, which binds quarks together in atomic nuclei; the weak nuclear force, which triggers some forms of radioactive decay; electromagnetism, which builds atoms into molecules and molecules into macroscopic matter; and gravity. An entirely separate set of particles—the bosons—are the agents that transmit these forces back and forth between particles, people and planets.

The basic "family" of particles is supplemented by two more exotic families, each of which has a parallel structure: two quarks, a type of electron and a type of neutrino. These two extra families are all but extinct in the modern universe, but they apparently existed in the searing heat of the Big Bang, and only accelerators can re-create them. In fact, all of the quarks in all of the families have been found or re-created—except for the one called the top, which is believed to be the heaviest of all (its mass is at least 90

times that of a proton). Because it would complete the set and thus vindicate decades of theory building, the top quark has become the object of an intensive international search. And because the top is so massive, it will take the energy of the most powerful accelerators to produce it.

But researchers will be awfully disappointed if all they succeed in doing is to fill out the known family tree of particles. Too much predictability can make science dull. Says Samuel Ting, an M.I.T. physicist and one of the head researchers at CERN: "I will only consider our experiment a success if we discover something really surprising—new types of quarks, for example—that would explode the standard theory."

Anyone able to take particle physics beyond the Standard Model will automatically win prizes, prestige and added power in the profession. The quest has attracted some of the most driven personalities in science. The leaders, including Ting, CERN director Carlo Rubbia and Stanford's Burton Richter, are known for their relentless ambitions, feisty competitiveness and monumental egos. All have already won Nobel Prizes, but that seems only to have increased their desire for greater achievements. In the rush to get results, they push their staffs mercilessly and are furious—at least in private—whenever they come in second.

It is this rivalry that speeds the accumulation of knowledge. Observes Jack Steinberger, another Nobel laureate at CERN: "Competition in science is not always a pretty thing, but it's always stimulating and productive." The search for the nature of matter requires brash risk takers because it is a venture into the unknown and perhaps the unknowable. Explains Roy Schwitters, director of the new SSC project: "The physics we do is like a voyage of discovery. You can imagine you're Columbus. We're setting sail to who knows where—a new world, we hope."

Only a few places are equipped to catch glimpses of that new world. A look at the major explorers:

FERMILAB

The machine most likely to find the top quark first is Fermilab's mighty Tevatron, which has been operating for 6½ years beneath the waving grasses of the Illinois prairie. In the Tevatron, strong magnets guide subatomic particles through a circular tunnel that is 6.4 km (4 miles) in circumference. The accelerator is built as a ring so that particles can go around the track again and again, picking up speed with each lap. The ring was built large so that the particles would not have to make sharp turns.

When the machine is running, one beam of particles travels in a clockwise direction while a separate beam goes the opposite way. After reaching maximum speed, the two beams are forced together, and the particles begin to smash head-on into one another, creating fireballs that are 400 million times as hot as the sun—but so tiny and short-lived that they pose no danger to the accelerator. The Tevatron can produce 50,000 such collisions in a single second. In each of these explosions, the original particles are transformed into a shower of new, short-lived particles. The collisions take place in a detector, which contains a giant magnet that bends the newly created particles in different directions. Scientists cannot see the fresh matter directly, but its characteristics are recorded in computers, and the trails it leaves can be pictured as brightly colored streaks on a video display screen.

Though the Tevatron is considerably smaller than CERN'S LEP, the collisions that Fermilab's accelerator produces are much more powerful. Reason: the Tevatron smashes protons into antiprotons, while LEP uses electrons and positrons.* Protons and antiprotons collide with much more force because they pack more energy than electrons and positrons. Think of it as if the Tevatron were crashing Mack trucks together, as opposed to Volkswagens.

The Tevatron collisions produce dense blizzards of particles. Most are uninteresting because they have been observed before, but the chances are relatively good that hidden somewhere in the debris is an exotic new particle. Finding it, though, is no easy task. One reason CERN chose to make LEP an electron-positron machine is because of its comparatively "clean" collisions: though fewer particles are produced, they are easier to locate and study.

Fermilab's physicists believe they have already seen what might be the top quark, but they will have to gather a lot more data to confirm such a discovery. Confidence is already building. Contends James Trefil, a George Mason University physicist: "If the top quark is going to be found, it is going to be found at Fermilab sometime in the next five to six years."

Fermilab is led by director John Peoples, who is widely respected for being a hands-on physicist. But experiments at the lab are not dominated by superstars, such as CERN'S Rubbia and Ting. Instead, the atmosphere is one of relative consensus and collegiality. Explains researcher Melvyn Shochet, who commutes to Fermilab from the University of Chicago: "We have pushed to set up a more democratic system, rather than an autocratic system where one person heads up the project." When one team of scientists goes off duty and another comes on, they often share an informal dinner right in the control room. "There's Chinese food with chopsticks, dripping all over the logbooks," says Fermilab physicist Drasko Jovanovic.

It would be a mistake, though, to assume that Fermilab's scientists are any less competitive than their rivals at other labs. The masters of the Tevatron positively gloated last year when they defeated Stanford in a race to measure the mass of the Z^0 particle, a boson that carries the weak force. Says Thomas Devlin, a Rutgers physicist working at Fermilab: "That was fun to beat out our West Coast colleagues. They were hopping mad for a time, but they learned they weren't the only ones to walk on water. It's time they recognized that we also can do good work."

CERN

"Many people doubted that Europe could pull off this venture," said French President Francois Mitterrand in a speech at the gala official opening of CERN's new accelerator last November, "but the achievement of LEP shows that Europe can harness its cultural diversity." In fact, LEP, which took more than four years and nearly $1 billion to build, is much more than a European showcase; it is a laboratory for the entire world. It has attracted scientists from 29 countries in both the West and the East. More than one-third of the Soviet Union's particle physicists are registered to work at CERN, as well as a quarter of their colleagues from China.

Most of LEP's 2,000 scientists are split into four teams, each of which operates one of the four particle detectors spread around the accelerator ring. The team leaders are Americans Ting and Steinberger and Italians Ugo Amaldi and Aldo Michelini. The groups compete just as fiercely with one another as they do with outside rivals, creating a setting that is more charged with tension than the comparatively fraternal atmosphere at Fermilab.

The tone and pace for the whole CERN operations is set by Rubbia, a pushy director with a thirst for glory and little patience for laggardly performances. Says one senior CERN researcher: "Rubbia is insensitive, abusive, intolerant and high-handed." Yet no one denies his brilliance, energy and vision. "He works incredibly hard," observes a staffer, "and every waking minute is dedicated to physics." Concedes a critic: "If he was not respected intellectually, he would not be able to get away with the way he behaves. The other mitigating factor is that he is rude to everybody, high and low; he doesn't discriminate." Says Rubbia: "This is my life. There are no half measures."

Rubbia's hard-living style has paid off. In the early 1980s he was leader of a CERN detector team that discovered the W and Z bosons, crucial linchpins in the Standard Model. That earned Rubbia and colleague Simon van der Meer the Nobel. But Rubbia sometimes goads his scientists into announcing results prematurely. In 1984, for example, he said CERN had found evidence of the top quark, but later had to retract the claim.

By all accounts, the toughest team to belong to at CERN is Ting's. The stern leader would never allow chopsticks and Chinese food in his control room—or any kind of refreshment, for that matter. He once sent a memo to his staff decreeing that there should be no tardiness, food, drink, joking or shooting the breeze in his lab. "Working for Ting," says one of his senior staffers, "requires the same sort of commitment as taking monastic vows back in medieval times. There is no room here for anybody who is not consumed by the desire to push back the frontiers of physics."

There are no doubt plenty of frontiers left for CERN to push back. Though LEP does not appear to be powerful enough to find the top quark, the "clean" electronic-positron collisions could reveal many other exotic phenomena. One long shot is the much-sought Higgs boson, named for British theoretical physicist Peter Higgs, one of the first to recognize its importance. According to some theories, the Higgs boson is what gives all particles their mass. The idea is that everything in the universe is awash in a sea of Higgs bosons, and particles acquire their mass by swimming through this "molasses."

But what the CERN researchers really expect, and hope to find is something totally unpredicted. "In science nobody really knows what is going to come next," says Rubbia. "We always pretend that we know the answers, but nature keeps advising us that we don't."

To keep finding new answers, Rubbia is determined to improve CERN's technology. He plans to boost LEP's power 50% in the next year or two. CERN is also trying to persuade its member nations to put up the money to build a proton-proton collider in the same tunnel with LEP. Called the large had ron collider, it would be four times as

* Antiprotons and positrons are examples of antimatter, a rare set of particles that mirror normal matter. A proton is positively charged, but an antiproton is negative. The counterpart of the negative electron is the positive positron.

powerful as the Tevatron and almost half as forceful as the proposed superconducting supercollider in Texas. Rubbia thinks he can finish the LHC several years ahead of the SSC and thus beat the Americans to many important discoveries. If the LHC measures up to Rubbia's expectations, SSC could end up standing for superfluous supercollider.

SLAC

Burton Richter, director of the Stanford Linear Accelerator Center, is the maverick of particle physicists. While others have recently concentrated on circular accelerators, he has touted the merits of linear models. His latest machine shoots streams of electrons and positrons down a straightaway and then loops them through two semicircular sections onto a collision course. Linear accelerators cannot produce nearly as many collisions as do circular models of comparable power, but Richter claims that the noncircular approach can be an economical way to make discoveries in the vanguard of physics.

Richter has already made his share of breakthroughs. In 1974 he found and named the psi particle, which gave physicists conclusive evidence that quarks really exist. For spotting the psi, Richter shared the Nobel with Ting, who found the same particle at the same time and called it the J. The particle now bears both names, but, says Richter, "when you're talking to Ting, you'd better call it the J/psi. When you're talking to me, call it the psi/J.

Last fall Richter did it again. He was using his new linear collider in a duel with his better-equipped rivals to measure the lifespan of the Z^0, the particle that carries the weak nuclear force back and forth between other particles. Just one day before CERN was set to announce its measurement, Richter called a press conference to put forward his own figure. The calculation was extremely significant because it provided strong evidence that only three families of matter exist. CERN's Steinberger was furious at being upstaged. "I guarantee our results are more accurate than Stanford's," he told the New York Times. "The people at Stanford knew perfectly well that we were going to do this. They timed their press conference to get in ahead of us, even though we have ten times as much useful data. They've done some nice work, but I don't like it when they try to beat us by one day."

Richter believes that LEP is the end of the line for circular electron-position colliders. He once calculated that a LEP-style machine with ten times LEP's power would have to be at least 2,700 km (1,680 miles) around. Thus Richter is convinced that linear colliders are the machines of the future. He is hoping to build a 7-to-8-km (4.4-to-5-mile) linear model that he figures could be five times as powerful as LEP. The only catch: it would require acceleration technology that has not yet been invented.

SUPERCONDUCTING SUPERCOLLIDER

For all Rubbia's and Richter's plans, the SSC will clearly have the best chance of unlocking the deep secrets of the universe. Its scale and complexity will make even LEP look puny. The 10,000 magnets will require as much steel as a battleship and enough superconducting wire to circle the earth's equator 25 times. The counterrotating beams of protons, each as thin as a fork's tine and containing quadrillions of particles, will whip around the ring-shaped tunnel 3,000 times, producing up to 100 million collisions, every second.

Building such a mammoth machine from scratch is scary even to Schwitters, a Harvard physicist and leading particle experimentalist who left Fermilab to take charge of the SSC. Says he: "We have to build the equivalent of the Fermilab complex and then the SSC itself." Moreover, since no one has ever built an accelerator of such size and power, each component will have to be reliably mass-produced, which will inevitably cause unanticipated problems. Schwitters is determined to use the best possible designs, even if Congress grimaces at the $7 billion-plus price tag. Former Fermilab director Leon Lederman, one of the early champions of the SSC, thinks it would be idiotic to cut corners on such a complex machine. Say he: "The worst thing in the world would be to build a machine that doesn't work, or one where you have to struggle along."

Another challenge facing Schwitters, who alternates between private fights with Government bureaucrats and public appearances in cowboy boots and a ten-gallon hat, is to recruit hundreds of physicists to work on the accelerator. That may not be so easy. Once it is built, the SSC will be a magnet for young, ambitious scientists. But since Congress will have to appropriate hundreds of millions of dollars each year for the next half-decade for the project, there is always a chance that the money will suddenly dry up, along with jobs. CERN's budget, on the other hand, is shouldered by 14 European governments, thereby spreading the risks and costs.

But for the top physicists, who will have no trouble finding jobs even if the SSC construction were to stop suddenly, the lure of the giant collider is irresistible. In fact, the leaders of the 500-scientist teams that will eventually run the SSC's enormous detector experiments are already beginning to organize. One such collaboration is being formed by Ting. Politically shrewd, he has wooed physicists from a number of weapons laboratories and Southeastern universities, which until now have not been powers in the field of particle physics. Observers expect he will run the experiment in the strictly hierarchical fashion he has displayed at CERN. At the same time, physicists from Lawrence Berkeley Laboratory, Fermilab, Argonne National Laboratory and Japan are drawing up a collaboration that will be run along the more democratic lines of Fermilab. The clash of cultures between the CERN and Fermilab styles of management may make the sociology of the SSC nearly as interesting as the science.

The science should be nothing short of spectacular. By the SSC's projected startup date of 2000, most of the *i's* and *t's* of the Standard Model should long since have been dotted and crossed. Finding the Higgs boson should complete the task. But, contends Columbia University's Frank Sciulli, "there are intrinsic limits to the model, and people believe those limits are going to show up in the SSC, along with a whole new layer of matter we didn't know of before."

The layer that theorists most eagerly hope for is a new class of matter called supersymmetric particles, whose existence is predicated on the so-called grand unified theories now being explored by physicists. Some think that supersymmetric particles are the long-sought components of "dark matter," the invisible stuff that is believed to make up 90% or more of the universe.

Supersymmetric particles could also give a boost to superstring theory, one of the hottest ideas in theoretical physics. Superstring theory holds that every particle is really a vibrating loop of stringlike material that exists in ten-dimensional space (most of these dimensions are confined to such a small scale that we never notice them). Whether the string takes on the role of a quark or an electron or a Higgs boson depends simply on how it vibrates.

Or the theorists may be on the wrong trail entirely. While such ideas as supersymmetry and superstrings may be elegant physics, the supercollider could just as easily reveal a subatomic monkey wrench. That could force a crisis in physics, followed by a far more basic set of theories than physicists now dream of. It may be, for example, that quarks are not fundamental after all, but are themselves made of still more basic building blocks. Some forward thinkers have already coined a name for the ingredients of quarks: preons.

But is finding such exotic particles worth the multibillion-dollar price tag of the SSC? Is it a good investment? No one can know what the payback will be, but past breakthroughs in physics have tended to create whole new industries. Radar, X rays, television, microwaves, semiconductors, computers, lasers—technologies that now produce as much as a quarter of the U.S. gross national product—stemmed from discoveries in quantum physics made between 1910 and 1930. "If all of the physics generated by the SSC and its cousins doesn't have a profound effect," says Lederman, "it will be the first time in history."

There is no reason for the U.S. to shoulder the full cost of the SSC. When the supercollider was first proposed, it was assumed that other countries would help support the project both scientifically and financially, much as CERN's LEP is backed by its participating nations. Several foreign governments have offered to do just that. The Japanese have made involvement in the SSC a high priority, and even India has offered to donate $50 million worth of goods and services. Unfortunately, nothing has come of these overtures. Part of the problem, insiders say, is lack of follow-through by the staff at the Department of Energy, which is overseeing the venture. But the SSC remains all-American largely because a few key Congressmen still believe that sharing knowledge about subatomic particles is somehow akin to sharing the secrets of the atom bomb.

Whether or not the U.S. pays the entire cost of the project, there are no guarantees that the SSC will yield practical results anytime soon or that the physicists will not be back ten years from now asking for an even costlier machine. In the end, the only real justification for building the supercollider is for its value to science, for what it may add to the storehouse of human knowledge. It is difficult to put a price on such a commodity. How much is it worth to know what matter is made of, or what happened in the very first moments after the Big Bang? The answer will vary from individual to individual. Some people think the space program was a big waste of money. Others believe it was worth the cost just for one picture of the earth floating like a fragile island of life in the black void of space.

Particle accelerators have come a long way since the 1930s, when they were literally no larger than a bread box. Since then, each bigger and better machine has pushed physics to a new energy level and has uncovered important and fascinating new facets of matter. If the SSC is built, it should do the same—taking yet another step in a

mind-stretching adventure whose end is not yet in sight.

NEED TO REDUCE THE FEDERAL BUDGET DEFICIT

HON. DAN SCHAEFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. SCHAEFER. Mr. Speaker, as the Congress considers various proposals for the fiscal year 1991 budget, it is important to recognize the main threat to our continued economic well-being. I am certain that the only issue that we can all agree on is the need to reduce the Federal budget deficit.

Our current year deficit is predicted to surpass $150 billion, and next year's will likely exceed $100 billion. Despite the well-known economic damage caused by our Federal deficit, Congress again appears unwilling to take meaningful action against it.

I do not believe that the American people are over-taxed; instead the Federal Government over-spends. Since fiscal year 1983 Federal revenues have increased every year. On average these increases have been over $55 billion a year. I find it hard to imagine that yearly revenue increases, ranging from 5 to 8 percent a year, cannot adequately fund Federal programs and leave enough for deficit reduction.

By controlling the yearly growth in Federal spending Congress can meet the Gramm-Rudman targets, and eventually balance the budget. This could be accomplished without tax increases, which only serves to fuel additional spending. New taxes will not reduce the deficit. In fact for every $1 in new taxes, the Federal Government spends $1.58. Although I am not a mathematician I can see that new taxes are counter-productive to this end.

That is why I am introducing a Concurrent Resolution that simply outlines the best means of addressing the budget deficit. This measure calls on the House and Senate to meet the fiscal year 1991 Gramm-Rudman target by limiting the growth in spending from the previous year. Also, to discourage attempts to raise taxes, it calls for any funds from such taxes to be placed in the Public Debt Reduction Fund. There it could not be used to increase spending, but instead would begin to reduce the outstanding debt to be paid by each new generation of Americans.

I urge my colleagues to cosponsor this simple formula for fiscal responsibility.

HONORING THE THROGGS NECK VOLUNTEER AMBULANCE CORPS

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. ENGEL. Mr. Speaker, in honor of National Volunteers' Week, I would like to recognize the fine work being performed in my district by the Throggs Neck Volunteer Ambulance Corps. Since 1979, the corps has provided community-based emergency medical care to the residents of Throggs Neck, Pelham Bay, Country Club, and LaSalle areas. Fully trained and State-certified emergency technicians, drivers, and attendants volunteer their time in order to make vital services available to the public.

The more than 100 members of the Throggs Neck Volunteer Ambulance Corps are all active in their community. In addition to the training it provides for its members, the corps also conducts classes that teach the public first aid and CPR. Corps members help organize and then participate in community parades. They also attend health fairs, where they share ideas and experiences with other volunteer groups and the public.

I have watched the corps grow into a strong, active community group, and I know it will continue to provide its important services for many more years to come. I congratulate the members for their fine work and thank them on behalf of my constituents. The Throggs Neck Volunteer Ambulance Corps truly embodies the spirit of American voluntarism that we are honoring in the U.S. Congress. It is a spirit that continues to makes the Throggs Neck community a great place to live and work.

FAIR WINDS AND FOLLOWING SEAS FOR LT. COMDR. SHAW COHE, U.S. NAVY

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. GINGRICH. Mr. Speaker, it has come to my attention that Lt. Comdr. Shaw Cohe completed his tour as the Navy's Liaison Officer for Acquisition and Contracts with the Congress on April 16, 1990.

As the Navy's primary resident spokesman for these matters on Capitol Hill, Lieutenant Commander Cohe has performed in an extraordinary manner in support of the Navy and the members of this body. His unique expertise and extensive grasp of acquisition policy matters is well known and respected by me and so many of my colleagues. I believe that I share this view with almost 100 Members whom Lieutenant Commander Cohe personally escorted on congressional fact-finding delegations or supported with congressionally sponsored procurement seminars in their districts. These seminars have resulted in teaching tens of thousands of constituent businesses how to effectively and properly conduct business with the Navy.

Lieutenant Commander Cohe has also been instrumental in promoting and supporting congressional member and staff participation in the Naval War College's Global War Game. I can speak firsthand of the great value of this unique and rewarding experience.

Lieutenant Commander Cohe's dedication and commitment to the Navy and the Congress will be sorely missed. It gives me great pleasure today to pay tribute to Lieutenant Commander Cohe's outstanding service to the Congress and the Nation. On behalf of my colleagues, I extend the traditional Navy salutation of "fair winds and following seas" to Lieutenant Commander Cohe in his future Navy assignments.

THE TIME TO PROTECT THE GREAT LAKES IS NOW

HON. JIM MOODY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MOODY. Mr. Speaker, last week the International Joint Commission issued its Fifth Biennial Report on the Great Lakes Water Quality Agreement. Although there have been some areas of improvement, the report presented the strongest argument yet that the United States and Canada are doing far too little to prevent great damage to the environment of the Great Lakes.

Sunday is Earth Day 1990. Twenty years after Wisconsin Senator Gaylord Nelson sponsored the first Earth Day it is appropriate to recognize that protection of the environmental, human and wildlife health of the Great Lakes must be a top priority.

The Great Lakes Basin is one of the Nation's richest and most diverse ecosystems, as well as the home to over one-fourth of the country's population. Toxic air pollution, acid rain, ground water contamination, sewer runoff and ozone depletion have all contributed to the deterioration of the Great Lakes and their abundant resources, both plant and animal.

The IJC report underscores that people are also at risk because of environmental carelessness. Toxin-exposed fish from the Great Lakes pose health risks. A study of children whose mothers regularly ate Great Lakes fish during their pregnancies concluded that birth weights and infant motor and behavioral development had been adversely affected, and evidence points to chemical traces found in fish. Furthermore, residents of the Great Lakes region, particularly those in nonattainment urban areas along the lakes, are exposed each day to harmful toxics in the form of air pollution from factories and auto emissions.

In the past we have failed to adequately address the environmental problems facing the Great Lakes. Solving those problems only becomes more difficult the longer we put off makng the tough choices and a true commitment to protecting the environment.

Tough does not mean impossible, however, and it is all the more fitting that we recognize and take on the problems now when Congress is on the verge of passing comprehensive clean air legislation.

The report on the Great Lakes, Earth Day, the pending clean air legislation—all combine to emphasize that our environment is threatened and offers hope that, at long last, environmental protection is getting the attention it deserves. The International Joint Commisison concluded that:

Despite the significance of the Great Lakes and our collective rhetoric to restore and enhance them, we as a society continue to mortage their future by poisoning, suffocating, and otherwise threatening them be-

cause of insufficient knowledge, other priorities, and shortsightedness.

It is in our best interest to control environmental damage of the Great Lakes now. Our economy and our health depend on it.

As the House begins consideration of the clean air bill next month I urge my colleagues to support the passage of a strong environmental bill. It is time to make those choices and get tough for the sake of the Great Lakes, the sake of the people of this Nation, and for the sake of the Earth.

TRIBUTE TO PROF. DANIEL JOHN SCHROEDER

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. ASPIN. Mr. Speaker, today I pay tribute to a great American scientist, Prof. Daniel John Schroeder. Dr. Schroeder is one of the 19 scientists working on the Hubbell space telescope. He is the only member of the Hubbell team who is from a small liberal arts institution, Beloit College in Beloit, WI.

The long-awaited Hubbell space telescope will blast into space aboard the space shuttle *Discovery.* The city bus size telescope is expected to do more for modern astronomy than Galileo's telescope did for his time. The Hubbell telescope will be free from the distorting effects of the Earth's atmosphere and it will increase the picture's resolution by 10 times that of any telescope on Earth.

Dr. Schroeder is the project's telescope scientist. This means that he is one of two men whose job it is to help the National Aeronautics Space Administration [NASA] ensure that the telescope exceeds the specifications established by the designing astronomers. Dr. Schroeder has been involved with the project for more than 15 years.

Dr. Schroeder's telescope is expected to launch from Cape Canaveral aboard the *Discovery* on April 24. The initial launch of the telescope was delayed because of the *Challenger* disaster in 1986. After the telescope goes through 3 months of orbital verification checks, the exploration phase will begin which will open an entirely new era in our astronomical understanding of the universe.

This new era of telescope development will allow astronomers to explore a volume of space 1,000 times larger than has been possible with earthbound instruments. With the Hubbell space telescope, Dr. Schroeder will attempt to find a distant galaxy, quasars and planets orbiting other stars.

Dr. Daniel John Schroeder has been a faculty member of Beloit College since 1963. He is currently the chair of the physics and astronomy department at the college. He was born in Manitowoc, WI in 1933. He earned his bachelor of science degree in 1955 from Beloit College and went on to receive his masters and Ph.d. degrees at the University of Wisconsin, Madison. Dr. Schroeder and his wife LaVerne have two children, James and Judy.

The residents of Beloit, WI, as well as the Nation are indebted to Daniel John Schroeder. His many years of work and dedication will enable us to see further and more clearly into the universe in which we live. Dr. Schroeder is truly one of America's greatest teachers and scientists.

RENEWABLE ENERGY AND ENERGY EFFICIENCY TECHNOLOGY COMPETITIVENESS ACT OF 1989

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MAVROULES. Mr. Speaker, in an environment-conscious and import energy dependent society there is a clear need to improve our energy efficiency and utilize new energy resources. Energy efficiency improvements certainly decrease pollution. Along with better energy efficiency, renewable energy resources, which include those derived both directly and indirectly from solar energy, as well as other sources such as geothermal and tidal energy, offer the United States a viable alternative to increased dependence on fossil fuels from overseas markets.

Unfortunately, since 1980 national support for renewable energy resources has dropped significantly. Likewise, support for energy conservation programs has decreased 72 percent from $344 million in 1980 to $96 million in 1990 and renewable energy programs have been cut 87 percent, from $647 million in 1980 to $87 million in 1990. Along with this cut in funding has come a resulting decrease in the percentage of the worldwide market for renewable energy technologies controlled by U.S. companies. Three years ago, domestically produced technologies dominated the world market; now U.S. firms have less than one-third of the market for these technologies.

The New England region is known for being an energy-conscious region, and the people of New England, including Massachusetts, are acutely aware of the need to conserve fuels and find new sources of energy. Recognizing this several of my New England colleagues and I have established a bipartisan New England Congressional Energy Caucus. Its purpose is to focus on important energy issues affecting the New England region.

In my effort to improve energy conservation and environmental protection, I have cosponsored legislation which encourages the development of renewable energy technologies, H.R. 1216, the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989. This legislation establishes performance goals for DOE's renewable energy research programs; provides stable 3-year authorization levels for the renewable energy and energy conservation research programs; requires DOE to enter into joint ventures with industry; and expands efforts by Federal agencies to help market U.S. renewable energy products in foreign markets. This legislation, in the form of a companion bill in the Senate, S. 488, passed the House of Representatives on November 17, 1989, and was signed into law by the President on December 11, 1989 (Public Law 101-218).

On January 26, 1990, DOE Secretary James D. Watkins proposed initiatives to increase energy efficiency and the use of renewable energy resources. It is reassuring to see the administration join Congress in beginning to reverse the decline in support for these vital technologies.

Additionally, we have begun to further develop the necessary technologies to improve energy independence while simultaneously reducing pollution from fossil fuel use. We must build on this progress and regain our lead in worldwide manufacturing and development of renewable energy technologies.

The Department of Energy, after 8 months of public hearings on energy conservation and renewable resources, has issued an Interim Report on National Energy Strategy. This report has compiled ideas from all regions of the country on how to increase efficiency of energy use; to protect the environment while meeting our energy needs; to secure future energy supplies; and to encourage the development of technology to do these things. Its purpose is to build a consensus for a national energy policy in these areas, and, after a period of public comments in the summer of 1990, a final report will be issued in the spring of 1991.

In formulating this new policy, I encourage DOE to focus especially on the following areas. First, it is imperative that cost-effective renewable energy sources be developed, especially to provide electricity and heat for residential and commercial buildings. This is particularly important since it is more difficult to develop renewable sources for transportation. Because of the large capital investments necessary to build renewable energy systems for utilities, it is important for government to mitigate the cost of these systems for utilities. More needs to be done, however. I encourage DOE to explore additional possibilities in this area.

In addition, there is considerable potential for solar thermal, solar photovoltaic, and wind sources to contribute to our Nation's energy supply. I have been a leader in the support of solar energy/photovoltaic programs. Back in 1983, through my work on the House Armed Services and Small Business Committees, I sponsored legislation, which was adopted, to set up demonstration programs in photovoltaic technology. Again, it will take action on the national level to see that cost-effective technologies are developed and that these technologies be marketed to national and international markets. This will ensure that the United States, and U.S. firms, be on the cutting edge of new technologies and are able to reap the rewards of a large worldwide demand for these nonpolluting energy sources. This will also reduce our dependence on foreign energy sources and prevent dependence on foreign technology. It should also be a top priority that technology originally developed by the United States, not be taken over by foreign interests—for example, the purchase of Arco Solar by Siemans. Prudent Government policy will prevent this.

Finally, Government can play a role in encouraging the development of new technology to enhance environmental cleanup. One result of the original clean air bill was to spur devel-

opment of technology to clean up emissions from automobiles and powerplants. The catalytic converter and scrubbers are examples of this. This push to engineer new products must continue, with the beneficiary being not only a cleaner environment, but also an enhanced and invigorated technological base. As a member of the House Small Business and Armed Services Committees I plan to ardently work for adoption of a strong and comprehensive energy and environmental policy.

POST COLLEGE CELEBRATES CENTENNIAL

HON. JOHN G. ROWLAND

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. ROWLAND of Connecticut, Mr. Speaker, I rise to bring to the attention of my colleagues the fact that Post College, in Waterbury, CT, will soon celebrate 100 years of excellence in education.

April 27 marks the centennial of this important institution. Over this period of time, Post has grown from a small shorthand school to a fully accredited baccalaureate institution serving over 1,800 students.

Post College ranks as the fourth largest business college in the State of Connecticut. They offer 12 bachelor's degrees in varying fields of study on the main campus as well as at 8 off-campus sites.

Mr. Speaker, Post College has made numerous contributions to the Waterbury area over the years. With over 6,000 alumni of record, Post College has likewise made many contributions to the State as a whole.

I have the privilege of representing Post College in the House. Today, it is a pleasure to mark 100 years of educational service by this fine institution.

ENVIRONMENTAL VIGILANCE ACT

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. WYDEN. Mr. Speaker, it is appropriate on Earth Day to review our actions as stewards of this Earth. And one duty we have as stewards is to be watchful—to monitor the environment and be sure we are not harming it.

With all our environmental laws and agencies, you would think we would be doing a fairly good job of watching the environment. But the truth is, some things are falling between the cracks.

That came to light recently in the Pacific Northwest, when dioxin was discovered in the lower Columbia River. Now, the State of Oregon had been monitoring the polluters on its side of the river, and the State of Washington had been monitoring the polluters on its side of the river, but no one, not the States or the Federal Government, had been checking the river itself.

When the dioxin was discovered in river sediments, there was a great deal of finger pointing and arguing about who should have been watching for it—but the bottom line was, no one had been watching.

I've done some checking, and I've found that this situation is not unique. Many critical environmental resources, particularly those that cross State lines, are not being adequately monitored. And whether the problem is dioxins in our rivers or carcinogens in our air or toxins in our soil, someone ought to be watching.

That is why, today, I am introducing the Environmental Vigilance Act, a bill giving the Environmental Protection Agency the responsibility to identify critical environmental resources and to see that they are adequately monitored. EPA will periodically report to Congress on the need for additional monitoring efforts.

In cases where the agency finds a specific toxic substance or its natural byproducts posing a risk to the environment, the bill clarifies the agency's authority, under the Toxic Substances Control Act, to have the manufacturer of the substance monitor the substance's presence and effects in the environment.

Mr. Speaker, watchfulness is the first duty of responsible stewards. I invite my colleagues to join me in supporting this effort to keep watch on planet Earth.

THE SWISS AND THEIR GUNS

HON. CHUCK DOUGLAS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. DOUGLAS. Mr. Speaker, as we move into the period of time when we may begin debating issues like H.R. 4225 which would move toward gun control in America, I wanted to share with you the results of an article about Switzerland. The article appeared in the American Riflemen Magazine but having had a sister who lived in Switzerland for 10 years, I know only too well its accuracy. In a nation of 60 million people, 1 out of every 10 owns a fully automatic assault rifle with ammunition and yet Switzerland has the lowest murder by gun rate in Europe. It is lower than England which has very strict gun controls and is even a lower murder rate than Japan which basically prohibits guns. I think the myth of gun control is exploded in this very important article that I want to share with our constituents.

THE SWISS AND THEIR GUNS

(By David B. Kopel and Stephen D'Andrilli)

In the right to bear arms debate, pro-gun Americans point to Switzerland where almost every adult male is legally required to possess a gun. One of the few nations with a higher per capita rate of gun ownership than the United States. Switzerland has virtually no gun crime. Therefore, argue the pro-gunners, America doesn't need gun control.

Yet Handgun Control, Inc. (HCI), in its brochure "Handgun Facts," points to Switzerland as one of the advanced nations with "strict handgun laws." The brochure states that all guns are registered, and handgun purchases require a background check and a permit. Gun crime in Switzerland is virtually nonexistent. Therefore, concludes Handgun Control, America needs strict gun control.

Who's right? As usual, Handgun Control is wrong, but that doesn't necessarily make the pro-gun side right. Gun ownership in Switzerland defies the simple categories of the American gun debate.

Like America, Switzerland won its independence in a revolutionary war fought by an armed citizenry. In 1291, several cantons (states) began a war of national operation against Austria's Hapsburg Empire. In legend, the revolution was precipitated by William Tell, although there is no definitive proof of his existence.

Over the next century, the Swiss militia liberated most of Switzerland from the Austrians. The ordinary citizens who composed the militia used the deadliest assault weapons of the time, swords and bows. Crucial to the Swiss victory was the motivation of the free Swiss troops.

From the very first years of Swiss independence, the Swiss were commanded to keep and bear arms. After 1515, Switzerland adopted a policy of armed neutrality. For the next four centuries, the great empires of Europe rose and fell, swallowing many weaker countries. Russia and France both invaded, and the Habsburgs and later the Austro-Hungarian Empire remained special threats. But Switzerland almost always retained its independence. The Swiss policy was Prevention de la guerre par la volonté de se défendre. (Prevention of war by willingness to defend ourselves.)

During World War I. both France and Germany considered invading Switzerland to attack each other's flank. In World War II, Hitler wanted the Swiss gold reserves and needed free communications and transit through Switzerland to supply Axis forces in the Mediterranean. But when military planners looked at Switzerland's well-armed citizenry, mountainous terrain, and civil defense fortifications. Switzerland lost its appeal as an invasion target. While two World Wars raged, Switzerland enjoyed a secure peace.

At home, the "Swiss Confederation" developed only a weak central government, leaving most authority in the hands of the cantons or lower levels of government. The tradition of local autonomy helped keep Switzerland from experiencing the bitter civil wars between Catholics and Protestants that devastated Germany, France and England.

In 1847–48, liberals throughout Europe revolted against aristocratic rule. Only in Switzerland did they succeed, taking control of the whole nation following a brief conflict called the Sonderbrund War. (Total casualities were only 128.) Civil rights were firmly guaranteed, and all vestiges of feudalism were abolished.

Despite the hopes of German reformers, the Swiss did not send their people's army into Germany in 1848 to assist popular revolution there. When the German revolution failed, autocratic Prussia considered invading Switzerland, but decided the task was impossible.

As one historian summarizes: "Switzerland was created in battle, reached its present dimension by conquest and defended its existence by armed neutrality thereafter." The experience of Swiss history has made national independence and power virtually synonymous with an armed citizenry.

Today, military service for Swiss males is universal. At about age 20, every Swiss male goes through 118 consecutive days of recruit training in the Rekrutenschule. This train-

ing may be a young man's first encounter with his countrymen who speak different languages. (Switzerland has four official languages: German, French, Italian and Romansch.)

Even before required training begins, young men and women may take optional courses with the Swiss army's M57 assault rifle. They keep that gun at home for three months and receive six half-day training sessions.

From age 21 to 32, a Swiss man serves as a "frontline" troop in the Auszug, and devotes three weeks a year (in eight of the 12 years) to continue training. From age 33 to 42, he serves in the Landwehr (like America's National Guard); every few years, he reports for two-week training periods. Finally, from ages 43 to 50, he serves in the Landstrum; in this period, he only spends 13 days total in "home guard courses."

Over a soldier's career he also spends scattered days on mandatory equipment inspections and required target practice. Thus, in a 30-year mandatory military career, a Swiss man only spends about one year in direct military service. Following discharge from the regular army, men serve on reserve status until age 50 (55 for officers).

By the Federal Constitution of 1874, military servicemen are given their first equipment, clothing and arms. After the first training period, conscript must keep gun, ammunition and equipment an ihrem Wohnort ("in their homes") until the end of their term of service.

Today, enlisted men are issued M57 automatic assault rifles and officers are given pistols. Each reservist is issued 24 rounds of ammunition in sealed packs for emergency use. (Contrary to Handgun Control's claim that "all ammunition must be accounted for." The emergency ammunition is the only ammo that requires accounting.)

After discharge from service, the man is given a bolt rifle, free from registration or obligation. Starting in 1994, the government will give ex-reservists assault rifles. Officers carry pistols rather than rifles and are given their pistols at the end of their service.

When the government adopts a new infantry rifle, it sells the old ones to the public.

Reservists are encouraged to buy military ammunition (7.5 and 5.6 mm—5.56 mm in other countries—for rifles and 9 and 7.65 mm Luger for pistols, which is sold at cost by the government, for target practice. Non-military ammunition for long-gun hunting and .22 Long Rifle (LR) ammo are not subsidized, but are subject to no sales controls. Non-military, non-hunting ammunition more powerful than .22 LR (such as .38 Spl.) is registered at the time of sale.

Swiss military ammo must be registered if bought at a private store, but need not be registered if bought at a range. The nation's 3,000 shooting ranges sell the overwhelming majority of ammunition. Technically, ammunition bought at the range must be used at the range, but the rule is barely known and almost never obeyed.

The army sells a variety of machineguns, submachine guns, anti-tank weapons, anti-aircraft guns, howitzers, and cannons. Purchasers of these weapons require an easily obtained cantonal license, and the weapons are registered.

In a nation of six million people, there are at least two million guns, including 600,000 fully automatic assault rifles, half a million pistols, and numerous machineguns. Virtually every home has a gun.

Besides subsidized military surplus, the Swiss can buy other firearms easily, too. While long guns require no special purchase procedures, handguns are sold only to those with a Waffenerwerbsschein (purchase certificate) issued by a cantonal authority. A certificate is issued to every applicant over 18 who is not a criminal or mentally infirm.

There are no restrictions on the carrying of long guns. About half the cantons have strict permit procedures for carrying handguns, and the other half have no rules at all. There is no discernable difference in the crime rate between the cantons as a result of the different policies.

Thanks to a lawsuit brought by the Swiss gun lobby, semiautomatic rifles require no purchase permit and are not registered by the government. Thus, the only long guns registered by the government are full automatics. (Three cantons do require collectors of more than 10 guns to register.)

Gun sales from one individual to another are regulated in five cantons and completely uncontrolled in all the rest.

Retail gun dealers do keep records of over-the-counter gun transactions; transactions are not reported to or collected by the government. (This is also the policy in the U.S., during those periods the Bureau of Alcohol, Tobacco and Firearms feels like obeying the law.) In Switzerland, purchases from dealers of hunting long guns and of smallbore rifles are not even recorded by the dealer. In other words, the dealer would not record the sale of a .30-'06 hunting rifle, but would record the sale of a .30-'06 Garand, since.

Thus, Handgun Control's assertion that all Swiss guns, are registered is just plain wrong, and its claim that "Switzerland and Israel strictly control handgun availability" is more than a little inaccurate.

Anybody, including this author, can make mistakes about the complexities about foreign gun laws. Nevertheless, even the most careless authors ought to do better than Handgun Control's brochure "Handgun Facts," in which almost every "fact" about Switzerland is wrong.

But Handgun Control's misstatements are no worse than those contained in a highly biased Library of Congress book Gun Control Laws in Foreign Countries (which tax dollars paid for). That book claims that in Switzerland "the policy is not to provide automatic guns and other dangerous weapons to the general population"—an utter untruth, at least if one considers adults to be part of "the general population." The book also asserts that "the sale of handguns to individuals is restricted and reflects a clear Swiss government policy of keeping this strict control." Yet the only individuals who are "restricted" from buying handguns are children, the insane and ex-criminals.

If ever a nation had "a well-regulated militia," it is Switzerland. Nineteenth-century economist Adam Smith thought Switzerland the only place where the whole body of the people had successfully been drilled in militia skills.

Indeed, the militia is virtually synonymous with the nation. "The Swiss do not have an army, they are the army," says one government publication. Fully deployed, the Swiss army has 15.2 men per square kilometer; in contrast, the U.S.A. and U.S.S.R. have only .2 soldiers per square kilometer. Switzerland is 76 times denser with soldiers than either superpower. Indeed, only Israel has more army per square kilometer.

Switzerland is also the only Western nation to provide shelters fully stocked with food and enough supplies to last a year for all its citizens in case of war. The banks and supermarkets subsidize much of the stockpiling. The banks also have plans to move their gold into the mountainous center of Switzerland in case of invasion.

The nation is ready to mobilize on a moment's notice. Said one Swiss citizen-soldier, "If we start in the morning, we would be mobilized by late afternoon. That is why the gun is at home, the ammunition is at home. The younger people all have automatic rifles. They are ready to fight." Citizen-soldiers on their way to mobilization points may flag down and commandeer passing automobiles.

Since 1291, when the landsgemeinden (people's assemblies) formed circles in the village squares, and only men carrying swords could vote, weapons have been the mark of citizenship. As a Military Department spokesman said, "It is an old Swiss tradition that only an armed man can have political rights." This policy is based on the understanding that only those who bear the burden of keeping Switzerland free are entitled to fully enjoy the benefits of freedom.

In 1977, the Munchenstein Initiative proposed allowing citizens to choose social or hospital work over military duty. It was rejected at the polls, and in both houses of parliament (the Bundesversammlung's Nationalrat and Standerat). There are provisions for conscienctious objectors, but this group only numbers .2% of conscripts.

In 1978, Switzerland refused to ratify a Council of Europe Convention on Control of Firearms. Since then, Switzerland has been pressured by other European governments, which charge that it is a source for terrorist weapons. As a result, in 1982 the central government proposed a law barring foreigners in Switzerland from buying guns they could not buy in their own countries and also requiring that Swiss citizens obtain a license to buy any gun, rather than just handguns.

Outraged Swiss gun owners formed a group called "Pro Tell," named after national hero William Tell. In 1983, the Federal Council (the executive cabinet) abandoned the restrictive proposal because "the opposition was too heavy" and suggested that the cantons regulate the matter. A few months earlier, the Cantonal Council of Freiburg had already enacted such a law by a one-vote margin. A popular referendum overturned the law the next year, by a 60%-40% vote.

Whatever the effect of Swiss guns abroad, they are not even a trivial crime problem domestically. Despite all the guns, the murder rate is a small fraction of the American rate, and is less than the rate in Canada or England, which strictly control guns, or in Japan, which virtually prohibits them. The gun crime rate is so low that statistics are not even kept.

The suicide rate, though, is almost double the American rate. Guns are used in about one-fifth of all Swiss suicides compared to three-fifths of American and one-third of Canadian suicides.

It is not Switzerland's cultural makeup, or its gun policies per se, that explain that low crime rate. Rather, it is the emphasis on community duty, of which gun ownership is the most important part, that best explains low crime rate.

In Cities With Little Crime, author Marshall Clinard contrasts the low crime rate in Switzerland with the higher rate in Sweden, where gun control is more extensive. The higher Swedish rate is all the more surprising in view of Sweden's much lower population density and its ethnic homogeneity. One of the reasons for the low crime rate,

says Clinard, is that Swiss cites grew relatively slowly. Most families live for generations in the same area. Therefore, large, heterogenous cities with slum cultures, never developed.

Proud to have the weakest central government in the West. Switzerland is governed mainly by its 3.095 Einwohrnergemeinde (communes, sub-states of a canton). Several cantons still make their laws by the traditional Landsgemeinden system, whereby all eligible voters assemble in annual outdoor meetings.

Unlike the rest of Europe, the police force is decentralized. Judges and jurors are popularly elected. With less mobility and more deeply developed community ties, there is less crime.

Most democratic nations impose long prison terms more frequently than does America, but Switzerland does not. For all crimes except murder, the Swiss rarely inflict a prison term of more than a year: most serious offenders receive suspended sentences. As in Japan, the focus of the criminal justice system is on the reintegration of the offender into the community, rather than punishment.

As for the non-criminal Swiss, the saying is that everyone is his own policeman. Foreign visitors are surprised to see Swiss pedestrians always waiting at traffic lights, even when there is no traffic. The mass transit systems successfully depends on voluntary payment.

Clinard infers that strong central governments, weaken citizen initiative and individual responsibility. He concludes: "Communities or cities that wish to prevent crime should encourage greater political decentralization by developing small government units and encouraging citizen responsibility for obedience to the law and crime control."

In Nations Not Obsessed With Crime, Freda Adler comes to many of the same conclusions as Clinard. She, too, emphasizes the communal system of government—in which all laws are enacted by popular vote—and the stability of residential patterns.

Most Swiss still live in traditional patriarchial families. In fact, Switzerland has the lowest percentage of working mothers of any European country. While America was debating the Equal Rights Amendment, Switzerland was wondering whether women should be allowed to vote. (The long delay in female suffrage may have something to do with the equation of civil rights, and militia service.)

Schools are strict, and teenagers have less freedom than in most of the rest of Europe. Studies show that Swiss teenagers, unlike teenagers in other countries, feel closer to their parents than to their fellow teenagers. Communications between the generations are open.

Among the factors contributing to the inter-generational harmony is military service, which provides an opportunity for all groups of males to interact. Adults and youth share many sports, such as skiing and swimming.

Target shooting is another important shared pastime, with community awards and team trophies often displayed in restaurants and taverns. At the annual Feldschiessen weekend, more than 200,000 Swiss attend national marksmanship competitions.

In the home, writes John McPhee, "while a father cleans his rifle at the kitchen table his son is watching, and 'the boy gets close to the weapon.' " Marshall Clinard explains that because army weapons must be kept in the home ". . . much activity associated with the proper care of weapons, target practice, or conversations about military activities become common in the family. All of this, together with the other varied activities carried out in Switzerland across age lines, has served to inhibit the age separation, alienation, and growth of a separate youth culture that has increasingly become characteristic of the United States, Sweden, and many other highly developed countries. Although these factors represent only one aspect of a total Swiss way of life, they play no small part in the low crime rate and the crime trend."

Close analysis of Swiss gun laws also shows how silly it is for Handgun Control to point to Switzerland as a model. If—as Handgun Control claims—Switzerland's lenient licensing system is the reason Switzerland has so little handgun crime, then handgun Control ought to commit itself to reform of several American laws.

First of all, Handgun Control should oppose the gun prohibition laws in Washington, D.C., and other cities—since Switzerland proves that lenient licensing is all that is needed to stop gun crime.

Second, Handgun Control should work to repeal laws which prohibit Americans from owning howitzers, anti-aircraft guns, and other militrary weapons. Switzerland allows ownership of these weapons by anyone who can meet the simple requirements for a handgun license. And thanks to the "howitzer licensing" system there is no howitzer crime in Switzerland. Since Swiss-style handgun licensing is the main reason Switzerland has no handgun crime (claims Handgun Control), a Swiss-style system of howitzer licensing would also be a good idea for America.

Lastly, Handgun Control should reverse its policy, and work for repeal of America's ban on the possession of machine guns manufactured after 1986. Handgun Control should push America to adopt the Swiss policy: having the government sell machines guns at discount prices to anyone with an easily obtained permit.

It is not likely, though, that Handgun Control will follow the logic of its advertising, and work to let Americans own licensed machine guns and howitzers. But until Handgun Control does so, it should stop talking about what a good handgun licensing system Switzerland has.

If Handgun Control should stop its rhetoric about Switzerland, what should pro-gun Americans do? They can talk about Switzerland, but they cannot expect to win the American gun argument with the Swiss example.

Analysis of Switzerland does demolish the simplistic notion "more guns, more gun crime." More important than the number of guns is their cultural context. In Switzerland, guns are an important element of a cohesive social structure that keeps crime low.

While Switzerland is clear proof that guns are not in themselves "demons" (as one Denver priest recently claimed). Switzerland does not by itself prove the case against gun control in America. Indeed, author Clinard argues that strict gun controls are necessary in the U.S.

Clinard's argument cannot be dismissed out of hand. After all, few readers of this magazine would want America to adopt the lenient criminal sentencing practices of Switzerland. Opponents of lenient sentencing would argue, correctly, that America does not have the stable, integrated community structures of Switzerland. Thus, the American government must take a more coercive, authoritarian role in controlling prisoners, to make up for the lack of community controls.

The same point might be made about guns. Although guns are more available to the Swiss. Swiss gun culture is more authoritarian then America's. Gun ownership is mandatory community duty, not a matter of individual free choice. In Switzerland, defense of the nation is not a job for professional soliders or for people who join the army to learn technical skills for civilian jobs. Defense of the nation is the responsibility of every male citizen.

Thus, American gun owners must win the gun control argument based on conditions in America, not conditions in Switzerland. The implicit argument of Clinard (and of most American gun controllers) is that while the Swiss may be responsible enough to own even the deadliest guns, Americans are not.

Before rejecting this argument, American gun owners might wonder if an unmanned American mass transit system could count on payment by the honor code. Further, America obviously has a large criminal class of gun abusers, and Switzerland does not.

If strict gun control could actually disarm that criminal element in America, there might be an argument for gun control. But as Josh Sugarmann, former communications director for the National Coalition to Ban Handguns (NCBH), write in the Washington Monthly: "handgun controls do little to stop criminals from obtaining handguns."'

Sugarmann and NCBH favor gun control not to disarm criminals, but because they believe that non-criminals Americans cannot be trusted with handguns. The coalition's political affairs director, Eric Ellman, has said that "the majority of gun owners are not responsible. "Yet a look at the facts shows that more than 99% of American citizens who are not professional felons are just as suited for gun ownership as any Swiss militiaman.

Ordinary American citizens use guns compentently. Every 48 seconds, someone uses a handgun to defend himself against a crime (according to Florida State University's Gary Kleck, using data collected by liberal pollster Peter Hart in a poll paid for by the anti-gun lobby).

Regular American citizens do not shoot each other in moments of passion; the vast majority of such shootings are perpetrated by thugs with a record of violence and substance abuse.

And contrary to the claims of the anti-gun lobby. Americans are not so careless that they cannot be trusted with potentially dangerous objects like guns. Gun accidents account for less than 2% of the nation's 92,000 accidental deaths annually.

Suicides have little to do with gun availability. Japan has no guns, while Swizerland is deluged with every gun in the book, and both nations have the same suicide rate.

Of course the more that U.S. governments can do to make gun use in America even more responsible, the better. Switzerland shows how successful governments can be in promoting responsible gun use.

Elementary schools in America should have gun safety classes which teach children never to touch a gun unless a parent is present, and they should be taught to tell an adult if they see an unattended gun. The NRA actively promotes this idea, and the National Association of Chiefs of Police endorses it. But Handgun Control opposes this

reasonable, sensible safety measure. Has HCI gone off the deep end?

High schools and colleges wishing to offer target shooting as a sport should be allowed to do so. Unlike football or swimming, scholastic target shooting has never resulted in a fatality. The anti-gun groups oppose the sensible step of allowing the schools to offer students the safest sport ever invented. Have they gone off the deep end?

Finally, local governments should enact reasonable zoning laws which allow the construction of indoor shooting ranges (properly ventilated and sound insulated) in urban areas. In some cases, governments should subsidize the building of ranges. At target ranges, Americans can take lessons in gun responsibility, and practice safe gun handling skills. As you might expect, the anti-gunners oppose this simple safety measure too. They've gone off the deep end.

What have we learned from Switzerland? Guns in themselves are not a cause of gun crime; if they were, everyone in Switzerland would long ago have been shot in a domestic quarrel.

Cultural conditions, not gun laws, are the most importanat factors in a nation's crime rate. Young adults in Washington, D.C., are subject to strict gun control, but no social control, and they commit a staggering amount of armed crime. Young adults in Zurich are subject to minimal gun control, but strict social control, and they commit almost no crime.

America—with its tradition of individual liberty—cannot import Switzerland's culture of social control. Teenagers, women, and almost everyone else have more freedom in America than in Switzerland.

What America can learn from Switzerland is that the best way to reduce gun misuse is to promote responsible gun ownership. While America cannot adopt the Swiss model, America can foster responsible gun ownership along more individualistic, American lines. Firearms safety classes in elementary schools, optional marksmanship classes in high schools and colleges, and the widespread availability of adult safety training at licensed shooting ranges are some of the ways that America can make its tradition of responsible gun use even stronger.

A CONGRESSIONAL BIRTHDAY SALUTE TO GOV. EDMUND G. "PAT" BROWN, SR.

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. ANDERSON. Mr. Speaker, it is with great admiration and respect that I rise today to pay tribute to California's elder statesman, my good friend Edmund G. "Pat" Brown, Sr. On April 24, 1990, Governor Brown will be celebrating his 85th birthday. This occasion gives me the opportunity to express my deepest appreciation for his many years of service to his fellow man.

After serving as the district attorney of San Francisco and later as California's State Attorney General, he was elected Governor in 1958. Having served under Governor Brown for 8 years as Lieutenant Governor of California, I can attest to his strong leadership and ability to get the job done. And yes, while California has produced a number of good Governors, Pat Brown is remembered as one of the great ones. As one who has been in public service for half a century, I view my years in Sacramento serving under Governor Brown among the finest.

Throughout his life's trials and tribulations, he has received the unending support and strength of his wife, Bernice. It is often said that behind every successful man, there is a woman. Mr. Speaker, one only needs to look at Pat and Bernice Brown to find the truth to this age old phrase. Governor Brown's dedication to public service provided a strong example for his children, Kathy and Gerry, who have also taken up the calling.

On this milestone event, Governor Edmund G. "Pat" Brown Sr.'s 85th birthday, my wife Lee, joins me in extending our heartfelt best wishes. We are both greatful for having had the opportunity to share in many of these wonderful years. We wish Pat, his wife Bernice, their children Kathy and Gerry, and all their grandchildren, all the best in the years to come.

EARTH DAY

HON. JOHN JOSEPH MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. MOAKLEY. Mr. Speaker, this week marks the 20th anniversary of Earth Day. In September of 1988, then Vice President Bush campaigned across my congressional district and made a pledge to the people of the Commonwealth of Massachusetts that he was the man destined to fix the ocean. Fully 2 years later, Massachusetts and Boston Harbor have yet to realize a cent from the promise made by the Vice President during his photo opportunity at the harbor.

Was it political theater? Was it a brandishment? Or was it just another failed campaign pledge? Candidate Bush failed repeatedly to mention that it was the Reagan administration, of which he was a component, that continuely slashed EPA and Interior funding. The Reagan administration vetoed the Clean Water Act and that prevented any Federal support for the cleanup of Boston Harbor. The Clean Water had $100 million appropriated by the Congress for the cleanup of the harbor.

Two years later, as we reexamine the fiscal year 1991 budget, we realize that once again the administration has not put its money where its mouth is. Zero funding for the clean up of Boston Harbor, has clearly shown the residents of Massachusetts as well as committed environmentalists across this land that this administration's clean water and clean harbor track record is not to be taken seriously, and that if we are to see strides made in cleaning up America's waterways in this decade then we here in the Congress will have to start asking tough questions and following them up with practical, fiscally sound, and innovative approaches to ensuring clean urban waterways for our children in the 21st century.

ANTARCTICA WORLD PARK AND PROTECTION ACT OF 1990

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. RAHALL. Mr. Speaker, I was pleased to join our colleague, BRUCE VENTO, in introducing the Antarctica World Park and Protection Act of 1990 on April 4, 1990.

This legislation seeks to address the future of Antarctica and the question of whether the United States either will be a party to the exploitation of that continent's most fragile environment, or will be in the forefront of international efforts to preserve its unique ecosystem for the benefit of the global environment, scientific research and future genertions.

I think it is notable that this bill is being sponsored by the gentleman from Minnesota, the chairman of the Subcommittee on National Parks and Public Lands, and this gentleman from West Virginia, who chairs the Subcommittee on Mining and Natural Resources. Additional cosponsors include Representatives GEORGE MILLER, LAGOMARSINO, DELUGO, KOSTMAYER, OBERSTAR, WAYNE OWENS, and LEACH, all whom are paving the way for future bipartisan support from the array of commitees through which this legislation will travel. Moreover, this bill also enjoys the support of the chairman of the Committee on Interior and Insular Affairs, MO UDALL, and the chairman of the Committee on Foreign Affairs, DANTE FASCELL.

Due to a growing interest in the possible exploitation of Antarctic minerals, and the fact that the Antarctic Treaty of 1959—which provides for international cooperation on matters pertaining to scientific research—does not address nonliving resources, efforts began in earnest in 1981 among the consultative parties to the Treaty to devise a minerals regime for Antarctica. The consultative parties are the seven nations with territorial claims in Antarctica as well as 13 other countries, including the United States, involved in scientific research in Antarctica. These efforts culminated with an agreement adopted by the consultative parties in Wellington, New Zealand, in 1988 known as the Convention on the Regulation of Antarctic Mineral Resource Activities. This Convention establishes the regulatory framework for the prospecting, exploration, and development of mineral resources. On November 30, 1988, the United States became the 10th nation to sign the Convention. A total of 19 nations are party to the Convention.

It should be noted that this convention was adopted even though there is a great deal of uncertainty and debate on the extent of Antarctica's mineral wealth, and the ability to exploit it with existing technology. Even the American Mining Congress, in recent testimony before Congress, conceded that the region not only poses overwhelming obstacles to mineral exploration and development, but that any minerals likely to be found in Antarctica are abundant elsewhere and will continue to be readily available in the foreseeable future.

Nonetheless, the specter of mining in the fragile Antarctic environment, given credence

by an international agreement on mineral exploitation, is of great concern to many in this country and elsewhere.

This is a justifiable concern in light of the degradation of the Antarctic environment that is already taking place, not by developers, but by explorers and the very scientists charged with conducting research in Antarctica. A recent issue of Time magazine succinctly identified the situation as follows: "Over the years, human invaders have spilled oil into the seas, dumped untreated sewage off the costs, burned garbage in open pits, and let huge piles of discarded machinery slowly rust on the frozen turf."

To its credit, Australia was the first nation to announce that it would not sign the convention and would instead work for a permanent ban on the exploitation of Antarctica's mineral resources. Joined by France, Australia is now advancing a proposal for a new convention based on establishing a comprehensive framework for the protection of Antarctic's environment.

Both Australia and France are among the seven nations which have territorial claims in Antarctica and as such, their refusal to ratify the convention effectively blocks it from ever going into force. Despite this fact, the Bush administration strongly opposes abandoning the convention and is stubbornly pressing forward with various activities aimed at its ratification.

With this legislation, we are seeking to send a message to the world that the Bush administration's position is not necessarily the one held by the Congress of the United States.

The Democratic leadership of the Committee on Interior and Insular Affairs, in particular, is on record in support of the consideration of other alternatives than what is represented by the Convention on the Regulation of Antarctic Mineral Resource Activities. I, for one, am deeply concened that the course of action suggested by this convention will lead to irreversible adverse consequences on Antarctica's exceedingly fragil environment. The Antarctica World Park and Protection Act of 1990 would send a message to the rest of the convention members that the protection and management of the Antarctic is a preferable option.

The Antarctica World Park and Protection Act of 1990 would make it the national policy of the United States to protect and manage the lands and resources of Antarctica for the benefit of present and future generations of people of all nations. The Secretary of the Interior, acting through the Director of the National Park Service, would spearhead this effort. Although this legislation would provide a comprehensive approach toward protecting and managing the Antarctic, I would like to point out several provisions.

Under the bill, the Secretary would prepare both an inventory of Antarctica's resources and of the areas that are in need of restoration and special management due to past activities, and a general management plan appropriate for the management of Anarctica as a World Park. Copies of the inventory and plan would be sent by the Secretary of State to other nations. Beginning at the special consultative meeting of Antarctic Treaty parties in Chile in 1990, the United States would begin negotiating with the other Antarctic Treaty parties to establish Antarctica as a world park, to prohibit the prospecting, exploration, or development of mineral resources, and to minimize the adverse impacts on the environment of any ongoing or future activities.

In addition, this legislation would amend several environmental and historic preservation laws to further protect Antarctica. The Mining and Minerals Policy Act of 1970 would be amended to prohibit any mineral exploration or prospecting activity or mineral development activity in Antarctica by U.S. citizens. Any U.S. citizen or firm who violates this prohibition would be ineligible to obtain a Federal claim or mineral lease in the United States. In addition, the National Historic Preservation Act of 1966 would be amended to conform with the purpose of this legislation.

Mr. Speaker, the opportunity for the United States to protect and manage one of the world's last environmental refuges is now before the Congress. Without the necessary support, this opportunity could slip right through our fingers. I urge my colleagues to join Mr. VENTO and myself in supporting the Antarctica World Park and Protection Act of 1990.

SOVIETS SHOWING THEIR TRUE COLORS IN LITHUANIA

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. SOLOMON. Mr. Speaker, as we rush to reduce our defense budget we ought to pause long enough to learn the lessons being taught so clearly in Lithuania.

It should be obvious to everyone, Mr. Speaker, even to the greatest enthusiasts for glasnost, that Mr. Gorbachev is showing his true colors in crushing the freedom loving people of Lithuania.

And while we're at it, Mr. Speaker, we ought to encourage Norway, our ally, to give the brave Lithuanians the oil and gasoline they need, the fuel that Mr. Gorbachev is cutting off to make the Lithuanians submit to continued slavery.

But isn't this typical of the Communists? Isn't this proof they haven't changed one bit, despite their Western manners, their tailored suits, and mastery of modern PR techniques?

Over 50 years ago, the Soviets starved millions of Ukrainians to death rather than let them exercise even the most basic freedoms.

A few years after that, as part of a cynical deal with Hitler, Stalin gobbled up the Baltic States. Now, Stalin's heir and Time magazine's Man of the Decade won't let the Baltic States have their freedom.

The Lithuanians are fighting for their freedom, and we should do everything we can to help them.

THE NEWSPAPER RECYCLING INCENTIVES ACT OF 1990

HON. D. FRENCH SLAUGHTER, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. SLAUGHTER of Virginia. Mr. Speaker, as publicly elected officials, we have the responsibility to shape those policies which will better enable the American people to share in a commitment toward better preservation of our surroundings and an overall reduction of waste. Whether or not our efforts are directed toward cutting the Federal budget deficit through an elimination of spending or toward abating our national solid waste problems, we must stop wasting time. I believe that we, as Members of Congress, must also increase our role as active participants in the race toward effective waste elimination.

The national pollution statistics are startling. In the United States, we generate 3.5 pounds of municipal solid waste per person per day, representing a total generation of approximately 150 million tons for the entire population per year. Given that only 10 percent of this waste is recovered through recycling or other conversion methods, the need to improve our resource recovery system is imminent.

Recycling represents one of the most effective methods by which we can promote a healthier environment. By establishing greater incentives for recycling and resource conservation now, we can defeat the rising trends in pollution.

In this regard, I am pleased today to introduce the Newspaper Recycling Incentives Act of 1990, legislation to provide a tax credit to publishers of newspapers who use recycled newsprint. Some reliable estimates suggest that it takes some 18,000 trees to publish 1 Sunday edition of a major newspaper. When only 2.5 percent of newspaper in the United States is recycled, a recycled newsprint credit against income tax would encourage our newspaper publishers to purchase and print on paper with recycled fibers. The legislation I am proposing would offer, initially, a 15-percent credit to publishers who use paper consisting of at least 40 percent recycled newsprint materials.

It is my hope that the recycling newsprint tax credit bill will help the waste reduction and conservation campaign.

COMING AGE OF THE TILTROTOR

HON. CURT WELDON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. WELDON. Mr. Speaker, Congress must decide this year whether it will fund the V-22 Tiltrotor Aircraft Program. As everyone knows, our decision will have a major impact on national security. What many people aren't aware of is the fact that this military investment has enormous potential for huge payoffs

in civil transportation and industrial competitiveness.

The American Helicopter Society recently published an article, "The Coming Age of the Tiltrotor," outlining one aspect of the civil benefits of the V-22 Program. Mr. Speaker, I ask that this article be inserted in the RECORD, and urge all of my colleagues to consider its implications as we work to craft a Federal budget that meets the many needs of this Nation with increasingly limited resources.

Finally, Mr. Speaker, I urge those who believe that the United States must fully pursue development of the Tiltrotor aircraft to join the congressional Tiltrotor technology coalition, and work with us in legislative process to exploit this development which will keep America No. 1 in the aerospace industry.

[From the Vertiflite, March/April 1990]

THE COMING AGE OF THE TILTROTOR

(By Philip C. Norwine)

(In Part 1, published in the January/February issue of Vertiflite, Mr. Norwine discussed the history of the V-22 and tiltrotors, as well as a number of development studies and potential configurations for civil operations of the tiltrotor.)

NEW DESIGN CIVIL TILTROTOR AIRCRAFT

All-new designs [of tiltrotors for the civil role] started with an 8-place corporate executive or public service aircraft, which would be very similar in size and appearance to the present XV-15.

The next size studied was an all-new 19-place corporate aircraft which features a canard, V-tail, and mid-wing arrangement. This design has fixed engines, with only the rotor and transmission rotating. This size tiltrotor could be effectively used in emergency medical service.

The largest configuration studied was an all new 75 passenger commuter aircraft. This was configured with 15 rows of seats in a 3-2 abreast arrangement. As with all of the designs, it includes space for luggage and normal airliner amenities.

WHERE IS THE MARKET?

A market assessment of these configurations, [including those starting with the V-22 as a base, discussed in Part 1] found the largest requirement in the 36-45 seat range. This was driven by the high density intercity commuter market, which was the largest market segment. It is noted that the relatively small demand for the 31-place version is due in large part to this being the only unpressurized alternative.

FAA TAKES ACTION

In response to the National Aeronautics and Space Administration/Federal Aviation Administration/Department of Defense study results published in June 1987, the FAA took action. FAA Administrator, T. Allan McArtor, announced in June 1988 that the FAA would be ready for provisional certification of the V-22 by late 1992 (now 1993) and would be ready to certify a pressurized derivative by the end of 1995 (now 1996). This and other regulatory actions have been taken by the FAA to prepare for the advent of civil tiltrotor aircraft. Actual dates will depend on the combined planning and funding of aviation agencies, operators, and industry.

CIVIL TILTROTOR BENEFITS

Given the above indications of a marketplace, what are the civil benefits of a tiltrotor aircraft? The principle benefit a tiltrotor aircraft brings to civil aviation is that it does not need a runway. This significant characteristic, plus the en route turboprop speed and the fact that its range matches a large majority of current airport-airport traffic, brings with it an impressive list of attendant benefits to both the traveler and the community as a whole. Let me enumerate some of those benefits.

1. Tiltrotor will improve efficiency and extend economic life of the currrent infrastructure, e.g. airports.

The upward growth statistics in the U.S. air transportation system are now daily news, and it should be pointed out that much of Europe and some points in Asia are in even worse condition. Much can and will be done to alleviate both air and groundside congestion. In the wake of growing air traffic, hub-and spoke operating systems, and airline deregulation, one of the most visible issues is congestion and delay at most major airports.

The annual number of U.S. air passengers will exceed 500 million this year and will double again in a decade. This growth in travel demand is a principal reason why the FAA deems 16 airports to be "congested" (meaning they experience more than 20,000 hours cumulative delay). The FAA forecast that 58 airports will be congested by the year 2000. It is estimated that in 1988 congestion cost airlines $2 billion. Although the Department of Transportation is taking steps to alleviate delays, particulary during peak hours at major hubs, a number of aviation experts believe that congestion may soon become intolerable at many major airports. The fundmental limits to growth in air travel are airport, runway, and air space capacity. Ways are being taken to expand those limits efficiently and safely. To offset the trend, huge amounts of money are being programmed. In New York, up to $6 billion will be spent on airport improvements to get through the 1990's. A new airport in the New York region is out of the question. At DFW airport, a $3.5 billion airport improvement program was announced in October 1989 to get through this decade. But the limits to continued growth of coventional air travel ultimately remain.

One principal contributor is the inefficient use of available runway slots. Short haul and long haul aircraft use equivalent runway slots, which have equal benefit to travelers, but represent a great spread in economic benefit to operators. It is notable that for 41 percent of the flights arriving at the 10 busiest airports in the U.S., the average flight travels less than 300 miles. This statistic increases to 75 percent of all flights to Boston, where population centers are more concentrated, and decreases to 15 percent of flights to Denver, where the population is less dense.

New York is a prime example of runway economic inefficiency. Here, 56 percent of the slots accommodate 82 percent of the passengers while 44 percent of the slots accommodate only 18 percent of the passengers. Even more significant, of the 2,650 daily commercial operations from New York's three airports in 1988, 50 percent of the origins/destinations were within 300 miles of New York. What can be done? This is where a tiltrotor could show very high economic value.

For the 300-500 mile market, a tiltrotor transportation network would be a collector-feeder service for existing airports neither requiring runways nor occupying fixed wing approach or departure slots. It would also provide direct point to point (city to city) service. A tiltrotor system, supplementing existing fixed wing service, would delay the need for airport expansion or replacement as traffic demand continues to increase. What it provides in return is billions in additional revenue for the operators who would use the runway slots offloaded by tilt-rotor for longer range, higher revenue producing flights. Future airports could be remotely located, devoted to long haul traffic with tiltrotor connections to city centers in the region.

The best use of a tiltrotor occurs as the transportation system evolves and a national network of vertiports is constructed to service cities and non-aviation communities. This extension of the system would bypass airports completely, at far less fixed investment cost than is involved for airport expansion or relocation. In round numbers, air travel could be brought to some 200-300 widely dispersed vertiports for the same price as building one modern airport which serves only a single population center. Such a system would proclude or postpone the need for airport expansion.

2. Tiltrotor will save travel time for the passenger

It can be shown that over ranges of 100 to 500 miles, depending on the specific city pairs, a tiltrotor with a cruise speed of over 300 miles an hour, considering ground travel and normal airline procedures (independent of increasingly probable delays) promises to provide a passenger with 2-4 hours of portal-portal time savings per trip when compared with conventional jet transport. This means many overnight trips could be replaced with day trips to accomplish the same business purpose. Vacationers could extend usable vacation time by a whole day in many circumstances. It is interesting to realize that for short distance intercity travel, airline trips are mostly spent on the ground. At a distance of 700 miles, 50 percent of the total trip time is spent on the ground. For 300 mile trips, this increases to two-thirds of the trip time. In reviewing the delay statistics for the U.S. in 1988, it is amazing to realize that the cumulative delay cost over 50,000,000 lost hours of passengers' time. And it's getting worse.

3. Tiltrotor affords flexibility in destination sites

Some vertiports will be located at airports, using land already dedicated to aviaiton but not needed for fixed wing operations, with connections to long range aircraft. These will connect to small suburban vertiports in various cities within 300-500 mile range.

Those with vision realize that the two dimensional congestion in high density areas is overcome in the third dimension by a tiltrotor. An urban vertiport requires only a small area. A 4.5 acre facility can handle 3,000 passengers per day, or about a million passengers per year. Studies conducted under FAA auspices indicate that a "typical" vertiport for tiltrotor passenger services would range in cost from $11 million to $80 million, depending on whether it is in a suburban area, located over a river, or built over a highway.

Many cities are surrounded by highway networks. Selected locations on these roads could be bridged by a vertiport using already public property, in an existing noise environment. A bridge vertiport could bring together airport connections, rail or subway connections, plus road, car, and bus connections. Tiltrotor adds a new dimension and can offer intermodality with every other form of transportation.

As population shifts occur, new vertiports can be built to accommodate transportation needs at very low relative cost. This is in contrast to airports (or rail terminals) which remain fixed transportation nodes regardless of demographic changes. It is highly likely that further construction of airports, conveniently located to meet the needs of a shifting population, will be neither environmentally nor economically possible. By contrast, a tiltrotor system would provide flexibility to adjust to changing transportation needs by planning vertiports in advance of population growth, i.e. in low density areas. In fact, a tiltrotor transportation system will attract new centers of economic development.

Building tops, river piers, and super highways become usable sites for vertiport locations. Most cities are on rivers. Such sites afford excellent access to city centers without need for land space. One solution, planned by the Port Authority of New York and New Jersey, will bridge existing piers on the Hudson River to create a large vertiport adjacent to downtown New York.

4. Tiltrotor has low environmental impact

Vertiports, although not without cost and environmental concerns, require far less land space, as stated, and create far less environmental impact than do airports. Experience to date is that tiltrotor noise levels are considerably less than much smaller helicopters at takeoff and much lower than same weight fixed wing aircraft in cruise flight. According to the FAA/NASA/DoD study, tiltrotor noise will be well within Stage 3 fixed wing or helicopter levels. Additonally, because of its high angle approach and departure paths a tiltrotor characteristically presents a very small noise footprint, inconveniencing a relatively small area compared to other types of aircraft.

5. Tiltrotor requires modest fixed infrastructure investment.

It has been noted that the fixed investment for vertiports themselves (including ground access, parking, and terminals) is inexpensive in relative terms. Whereas $4-6 billion is required to build one airport (assuming site availability), it would cost far less for a total tiltrotor system, including aircraft development and production together with 18 vertiports. A network of vertiports around New York connected with a network of vertiports around Washington and Boston would serve a high percentage of the air travel on the Northeast corridor. It is interesting to note that a 300 mile radius from these cities reaches half of the U.S. population.

Additional needs are communication, navigation, and air traffic control systems which would be independent of but interrelated with ATC facilities already in place. Using GPS (Global Positioning System), a tiltrotor aircraft could operate safely providing true point to point service with a high degree of three dimensional navigation precision. It is noted that GPS is already planned as the eventual universal navigation system which, incidentally, will be useful to all forms of transportation. In the meantime, LORAN or equivalent would provide adequate point to point navigation for a tiltrotor system with an MLS approach control.

6. Tiltrotor can foster economic development.

The need for access to air transportation in today's economy is essential. When a tiltrotor transportation system becomes available, new economic nodes, i.e. commercial/industrial population centers, can be expected to develop around vertiports in previously uninhabited or under-developed land. As the capacity for services at major airports becomes increasingly saturated, efficient economic development would thus benefit from a tiltrotor reliever system, decentralizing economic nodes to points of new economic development remote from current airports.

Civil Tiltrotor Criticism

Having reviewed some of the benefits, some of the philosphical obstacles to the evolution of a civil tiltrotor system should be mentioned. There are always detractors to new ideas: those with parochial interests; those whose thinking is more guided by past experience than by future, opportunities; those who insist that anything new be measured within certain existing standards; those who simply fail to understand or are uninformed find various criticisms more readily than they find workable solutions.

"It Won't Work"

There are those who say, "it has been tried before, and it didn't work." This generally refers to several helicopter airport to downtown or intercity routes which have been operated with limited success. If helicopters haven't worked economically, why should tiltrotors?

First, the tiltrotor isn't a helicopter. It will operate at longer ranges and higher speeds; that is, at more productivity per unit investment. It will operate at higher levels of reliability and lower levels of cost. These factors will work to offset the higher initial cost of a tiltrotor.

Two non-economic reasons that helicopters have had limited success are lack of broad-based demand and lack of adequate heliports. These factors go together. From the congestion situation, which is given very limited discussion above, will come new levels of demand for air transportation alternatives which have not existed in the past. The helicopter has been a short distance convenience rather than a forecast 300 mile necessity. Heliports/vertiports will follow the demand for growth in service.

In this regard, one should look at the growth in the use of hospital heliports. What were once sacrosanct "quiet zones" have been transformed by helicopter emergency medical service (EMS). Today, there are 911 hospital heliports in America. When a need is clarified, the facilities will follow. I forecast that the demand for alternative (non-runway) air service will meet with open arms an effective, safe, and swift civil tiltrotor service within the decade.

"Tiltrotors Will Damage the Commuter Fixed Wing Market"

Many manufacturers are competing with fixed wing aircraft in the commuter market. In addition, an estimated 5,000 additional long haul jet transports will be added to the already taxed air transport system in the next decade. But the number of slots per runway are relatively fixed. Both the commuter airplane and the long range jet markets will flourish as long as there is runway space in a particular market region. As runway space reaches saturation, operators may be expected to seek higher economic return from available slots with larger, longer range aircraft. This would be possible if part of the traffic demand is transferred to non-runway tiltrotors.

A tiltrotor system will relieve runway traffic by operating between city centers independent of airports and/or in bringing air terminals. For some markets, the runway slots made available could increase capacity for either commuter airplanes or long range airplanes. That selection of aircraft is up to the operators. The tiltrotor, rather than harming, should thereby enhance the commuter market in many regions.

"Your Machine Is Too Complex for Commercial Service"

While it is granted that a tiltrotor has more mechanical parts than a fixed wing airplane, its mechanical reliability is in nearly the same category. Like a turboprop, it has a turboshaft engine with reduction gear box and propeller in each nacelle. These components are mounted on a common spindle for conversion. A ball-screw actuator, which is much like the flap actuator on a conventional airplane, moves the nacelle for vertical flight. Since it spends most of its life in an airplane mode flight, a tiltrotor's components and airframe accumulate no greater fatigue stress than any other airplane. Modern maintenance avoidance technologies plus on-board diagnostic systems assure on-condition maintenance equal to or better than most modern jet aircraft. It is noted in this regard that the two "low technology" XV-15's have been flying for 12 years with essentially no spare parts and very little mechanical difficulty. This record would be enviable for an aircraft in daily service and is truly remarkable for a research aircraft.

"It Won't be Allowed to Operate in Cities"

This is a time-honored objection. The same was said of barges, trains, street cars, automobiles, airplanes, and helicopters. Each in its day met serious community objection, but in each case public need led to public acceptance. Today, of course, this issue is tempered by environmental sensitivity. Locations in established public areas, as suggested above, with existing "acceptable" noise levels would not be adversely impacted with the addition of a vertiport. In the early days of the "steam carriage," the laws in Great Britain provided that at least three persons had to be employed to drive the steam carriage, and while the vehicle was in motion, at least one had to precede it on foot no less than 20 yards ahead. The city of Jacksonsville, Florida, in the early days of aviation, had a law that for the safety of the community, no airplane would be allowed to pass over the city at any height above 500 feet. Times change and attitudes change. Meeting needs requires education and acceptance.

It Costs Too Much

Saving the best for last, one runs into the "comparison syndrome" in regard to cost. The tendency in today's analytical world when evaluating anything new is to immediately find some way to "make a comparison" with the nearest existing alternative. The established measure of cost comparison in the transport industry is cost per seat mile. Critics are quick to first study the seat mile cost of a tiltrotor and say that since it costs more than an airplane it has no chance economically. This over-simplified assumption is sufficient for some to rule out the tiltrotor.

Although it flies like an airplane, a tiltrotor is not an airplane in the economic sense. One does not evaluate a taxi on a seat mile as if it were an air transport. If that were the case, an economist would never get in one. New economic measurements must be applied, which includes such aspects as portal to portal cost, the economic leverage of runway value for the operator, the major

reduction in fixed facilities cost, and the value of time to the tiltrotor passenger. These are all significant factors which require a tiltrotor be assessed by a different economic standard than those measures which are simply "historically available."

"What About Cost?"

What about cost? The FAA/NASA/DoD study stated "Tiltrotor is competitive with fixed-wing aircraft under certain conditions, especially when used in applications for which it is best suited, namely, when VTOL capability is desired for at least one end of a flight. In order for the civil tiltrotor to compete successfully with fixed-wing aircraft, a supporting infrastructure needs to be in place."

The study included a thorough cost analysis which reveals how a tiltrotor can be competitive. For example, in a 300 mile trip between two airports, the block time for a tiltrotor is equal to or less than a turboprop, or in most cases, a jet transport. However, a comparison from runway to runway doesn't take full advantage of the principal attribute to a tiltrotor. While it competes in time, it will not compete cost wide when so used. Ground transportation costs make up the difference.

Preliminary analysis of actual operating cost in the FAA/NASA/DoD economic analysis examined a 230 mile trip. In rough terms, the tiltrotor trip cost is projected to be $22 more per seat than a turboprop, but $36 less per seat than a helicopter. Consider, however, that each element in an air trip has a cost. When ground transportation cost is included, the total portal to portal cost will most often be in favor of a tiltrotor. This factor closes the cost loop! On a portal to portal trip of under 500-miles, given properly situated vertiports, trip time will always favor a tiltrotor. Looking at the question in this light, if these facts hold true, it's a dynamite market!

The challenge to the tiltrotor transportation system is that it must be perceived as affordable and economically justifiable at startup. The civil tiltrotor will not have the luxury of beginning its competitive life at square one; it will be born into an era of fixed-wing transportation that is fully matured and is known for its affordability.

Civil Intercity Tiltrotor in Europe

Looking at Europe, it is reported that 35 airports are now experiencing serious congestion levels aggravated by substantial air traffic control problems over the continent. With use of a tiltrotor, most of the continent is within two hours of London. Operating from uncongested vertiports near city centers, rapid air service could be added to the present system without burdening either airports or the converntional air traffic.

Civil Tiltrotor in Japan

In the island nation of Japan, a network of rapid transportation is needed. Tokyo is too crowded. As virtually all of the nation is within two hours of Tokyo by tiltrotor, there are various plans for spreading the development and financial centers to other parts of Japan. This will be made possible, in part, by adding a VTOL transportation system. Recommendations for such a system range from establishing a system of 50 heliports—or one per prefecture—to Heliport 600, which would divide Japan into 600 30km squares with one heliport/vertiport each, to the Japan Heli-Network or JHN 3300 concept, for which a national study has been established. In the JHN 3300 project, it is proposed to cover the entire Japanese archipelago with a complex of helicopter service in a network of 3300 heliports or one for every municipality in Japan. Services would include passenger, emergency medical, rescue, agricultural, media and business, etc., using both helicopter and tiltrotor.

Civil Tiltrotor in the U.S.

Within the U.S., I have no doubt that by the late 1990's, we will have a tiltrotor transportation system in the Northeast corridor, and that there will be plans for its expansion into other regions of the U.S. and many other industrial nations.

Although my view must be regarded as somewhat parochial, it is apparent to many observers that the tiltrotor is unique among various potentials for providing a truly effective new element in transportation. Tiltrotors will link populations centers with distant cities, suburbs, airports or proposed remote area airports where they interconnect with long haul aircraft. The tiltrotor's principal contribution, that of relieving airports which are on the verge of strangling with success, is by itself sufficient justification for national commitment to tiltrotor. Although principal emphasis has been on city-city transportation, the added value of tiltrotor aircraft in off-shore oil service, package express, emergency medical service in remote areas, public use in border control/drug interdiction, and coastal rescue operations, all add to quality of life in unmeasurable terms.

By all accounts, there is no more exciting technology on the transportation horizon today than the tiltrotor. Its value to public transportation in the 21st century can be likened to the impact of the airplane in the 20th century.

It is a great honor to have been selected for this prestigious lecture opportunity. I want to thank you, and to close with the observation that I believe Sir George Cayley would be an ardent supporter of the coming age of tiltrotor.

CELEBRATION OF EARTH DAY

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mrs. MORELLA. Mr. Speaker, I have listened with great interest to my colleagues talking about Earth Day events around the country and I am very impressed with how far we have come since the first Earth Day 20 years ago. But the environmentalists are right: we should and must do more. One important way to accomplish this is to recognize the importance of what we are doing this week to celebrate Earth Day, and then to pledge ourselves to continue working toward these goals. Let me then, point out a few of the many projects which I have come in contact with or know about.

In celebration of Earth Day, I took the Metrorail to work today. The Washington Metrorail entices commuters to choose alternative transportation. It was a delight to reach my destination in 29 minutes, travel in a clean, safe environment, have time to read my paper, chat with constituents, and know that my car was not adding to the congestion and air pollution in the Washington metropolitan area. Congratulations and commendations to Montgomery County for offering riders free ride-on and Metrobus service to Metrorail.

Activities within the State of Maryland in which many of my constituents will participate include "Give a Day for the Bay," when on Saturday, April 21st, 150 volunteer groups will be cleaning up the Chesapeake Bay. I have been told that over 30,000 people will be participating in over 1,000 events having to do with the Chesapeake Bay.

Save Our Streams has organized an "Adopt-a-Stream" activity with a goal of having 5,000 miles of streams adopted. Already, they are over their goal and we are still 3 days away from April 22. At least one of my staffers has pledged a section of "her stream."

In the city of Baltimore, an international tree-planting will take place with Jean-Michel Cousteau, representing the Jacques Cousteau Society, helping Gov. William Donald Schaefer plant trees. Earlier today, I joined several of my colleagues in a tree-planting ceremony on the northeast side of the Capitol.

In neighboring Montgomery County, my congressional district, Sunday April 22 will be Rockville Science Day at Montgomery College. Programs that day will show how science affects our lives. With recycling as a theme, a rap singer will pay a musical tribute to recycling, and a demonstration will be given on how old paper is recycled.

Thinking worldwide, practicing locally, we can all work to make this Earth more livable.

U.S. MUST OPPOSE CUTTING OFF FUEL TO LITHUANIA

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Ms. OAKAR. Mr. Speaker, I rise in opposition to President Gorbachev's decision to begin tightening the economic noose around Lithuania.

The United States must respond unambiguously to the Soviet Union's decision. I urge President Bush to immediately communicate to President Gorbachev that cutting off any fuel to Lithuania is unacceptable.

Lithuania stands like David against Goliath, with faith and determination against formidable odds. In this hour of fear and uncertainty, the United States must do all that it can to strengthen our commitment to an independent and democratic Lithuania, free from foreign domination.

For two generations, we supported the aspirations of the Baltic peoples. This generation of Lithuanians now affirms its right to self-determination and its intention to rejoin the community of sovereign nations. As a Nation of free men and women, we cannot forget our commitment to freedom and independence throughout the world.

PRESIDENT MOBUTU OF ZAIRE SHOULD NOT BE CRITICIZED

HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. BURTON of Indiana. Mr. Speaker, it has come to my attention that several Members of Congress recently made very disparaging remarks about the President of Zaire in committee. I believe such conduct is not only unprofessional, but also reflects poor taste.

Zaire suffers from the same problems as almost all of Africa: Problems of poverty, economic development, political evolution, and human rights. We ought to continue to press for improvement in all these areas. Indeed, President Mobutu has shown great responsiveness to demands for reform from the people of Zaire. But in all discussion of Zaire, in all fairness, there ought to be mention made of President Mobutu's very real achievements and contributions. After all, it was President Mobutu who stabilized the ethnic situation in Zaire and put an end to the rampant bloodshed of the early 1960's. It was President Mobutu who stood fast as one of America's few loyal allies in Africa throughout the 1960's and 1970's. And most recently, it was President Mobutu who played a key role in moving along the peace process in Angola. That peace process is showing signs of revival, and Mobutu continues to play a crucial part in it.

Friendship ought to count for something in this world, and at the very least, we ought to be fair when we raise our voices to criticize.

THE AFFORDABLE HOUSING FOR YOUNG AMERICANS ACT

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. SCHULZE. Mr. Speaker, most young Americans today cannot afford to buy a first home. The rate of home ownership for young Americans is falling rapidly for the first time in recent history. Today, with my Ways and Means colleague, BOB MATSUI, I am introducing legislation to take a first step in providing affordable housing for young Americans.

The Affordable Housing for Young Americans Act would allow parents and grandparents to provide starter home seed money to their children and grandchildren from their individual retirement accounts. Recent studies show that the lack of an adequate downpayment is the chief reason young people can't afford a first home. By allowing IRA account transfers without penalty, our legislation would help provide the necessary funds for young Americans to buy their first home.

Mr. Speaker, a first home for a young couple is often the key in our society to ensuring upward mobility, personal savings, and social stability. I urge my colleagues to support this measure, drafted carefully to provide a new pool of capital for young Americans to afford the American dream of a first home.

I urge my colleagues to support our bipartisan legislation and take an urgently needed step in reversing the decline of home ownership by young Americans.

IN HONOR OF ARCHBISHOP DESMOND TUTU

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. DIXON. Mr. Speaker, I rise today to honor a man of tremendous courage, persistence, and vision. For well over a decade, Archbishop Desmond Tutu has been a prominent exponent of the horrors of apartheid in South Africa. With frank eloquence, Archbishop Tutu has spoken openly of the grave injustices suffered by black South Africans under a system explicitly predicated upon the notion that black and white should remain separate and unequal. In recent years, this Nobel laureate has raised the consciousness of millions worldwide and helped to persuade and inspire governments, institutions, and individuals to join the effort to peacefully dismantle the violent system of white minority rule in South Africa.

On May 17, Archbishop Tutu will be honored by the South African Refugee Scholarship Fund, a program he founded to enable student activists, forced to flee from their homes in South Africa and Namibia, to complete their education. The scholarship fund, administered by the Phelps-Stokes Fund, provides for tuition, room and board, transportation, books, and other basic services such as dental and medical care. Refugees now attend colleges and universities across the United States. The program boasts a 90-percent graduation rate and propels scholarship recipients into careers such as nursing, engineering, agronomy, and education which are crucial to the growth of Third World nations.

Born to a schoolteacher in the western Transvaal, Desmond Tutu attended high school in a black township outside of Johannesburg from 1945 to 1950. Unable to afford a medical education, he earned a teacher's diploma at Pretoria Bantu Normal College, and in 1954 received his B.A. degree through the University of South Africa. Having taught for 3 years, Tutu enrolled at a seminary outside Johannesburg, becoming deacon of that city's racially mixed St. Mary's Anglican Cathedral in 1960.

He studied and lectured in London for several years before returning to Johannesburg in 1975 as the first black Dean of the Anglican Church in South Africa. Tutu next assumed leadership of the South African Council of Churches. During this 7-year stewardship, the council provided legal and financial aid to victims of apartheid, detainees and the families of political prisoners, and Tutu spoke out against foreign investment in South Africa, openly supporting the aims—though not the tactics—of the then-banned African National Congress.

In 1984, Archbishop Tutu was awarded the Nobel Prize for Peace and became the first black Anglican Bishop of Johannesburg. In 1986, he was appointed Archbishop of Cape Town, in which capacity he continues. He has been Chancellor of the University of the Western Cape since 1988.

Recent concessions by the South African Government, such as the release of Nelson Mandela, the unbanning of the African National Congress, and the easing of certain restrictions on the rights of black South Africans under apartheid, can be attributed to the imposition of economic sanctions by nations and corporations which have heeded Archbishop Tutu's urgent appeals for action.

As the Southern African Refugee Scholarship Fund prepares to honor its distinguished founder, I ask you to join me in applauding the Herculean efforts of Archbishop Desmond Tutu to bring peace, freedom, justice, and opportunity to the oppressed black people of Southern Africa, and in wishing for him, his wife Leah and their four children long life and continued strength and success in their ongoing struggle to halt the violent cycle of death and deprivation imposed on the black people of Southern Africa by South African apartheid.

BEECHWOOD BISONS

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. FEIGHAN. Mr. Speaker, I am here today to pay tribute to the Beachwood Bisons, high school basketball champs from Beachwood, OH. The Bisons finished the season with a 22–2 record, the best in school history, and good enough to win the first title of the Metropolitan Area Conference. The Bisons also gave us a thrill with their success in the State tournament, snagging the sectional title before falling in the district finals.

I would also like to recognize each and every player, coach, and school representative and to congratulate them for a fine season:

Players: Neal Jacobs, Rondell Lewis, Adam Stern, Troy Thomas, Derrick Britton, Mike Gottfried, David Kaye, Doug Bloom, Tony Britt, Chris Gates, Rodney Lemons, and Elliot White.

Pat Moore, head coach Dennis Honkala, assistant; Tom Michaels, assistant; Bill Schumacher, athletic director; Mike Sherer, trainer; Alan Rosenthal, team physician; Warren Snow, student trainer; Lee McMurrin, superintendent; Randy Boroff, principal; Joe LaGuardia, assistant principal.

Thanks again for a great season!

YOU WOULD HAVE TO CUT 700 THOUSAND-YEAR-OLD REDWOODS TO PAY THIS CORPORATE RAIDER'S YEARLY SALARY

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. STARK. Mr. Speaker, too often the headlines about corporate raiders makes the average reader's eyes glaze over. What does it mean, they ask?

Let us put the salary of one of the more ruthless corporate raiders, Charles Hurwitz of Texas, in terms everyone can understand, redwoods. Hurwitz is chairman of the board of Maxxam Corp. which owns Pacific Lumber. Pacific Lumber has the largest holding of old growth redwoods in America.

Hurwitz was paid about $8 million. Pacific Lumber would have to cut 700 old-growth redwoods, each approximately 1,000 years old, to pay his salary.

Old-growth redwoods are being buzz sawed every working day to either pay this corporate raider's huge salary or to pay off the junk bonds with which he has saddled Pacific Lumber. This is wrong. These towering symbols of California and America deserve a better fate then to end up as an extra zero on Hurwitz's bonus check.

Let us also put Hurwitz's salary in perspective. His salary was more than the combined pay of the chairmen of General Motors, IBM, and General Electric. Hurwitz is one of the highest paid chairmen of the boards in America.

The price Americans are paying for that greed is the destruction of pristine old-growth redwood forests. Majestic and stately trees are being mined for quick profits. The heritage of California and America is being looted by an old-fashioned robber baron.

What has Hurwitz done for the local communities in northern California? He has hastened their demise by at least a decade by accelerating the cut of old growth. He is sending the logs to Japan rather than having them worked in the United States. Profits go in his pocket or for interest on junk bonds. More than anyone else the people in northern California should be outraged at the behavior of Hurwitz.

Mr. Speaker, I invite my colleagues to join me in cosponsoring pieces of legislation. The first is H.R. 3818, which would put a spectacular area known as the Headwaters Forest, scheduled for cut by Pacific Lumber, under study for inclusion in the Wild and Scenic Rivers Act. The second bill, H.R. 4168, would impose an excise tax of 35 percent of the value of the old-growth redwoods cut down.

Both of these measures are needed because of the mindless actions by a ruthless and greedy corporate raider. Every action taken by Hurwitz has been in the interest of greed and against the interest of employees and environmentalists. It is time to end this national tragedy.

HONORING HARVEY E. TAKACS

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Ms. KAPTUR. Mr. Speaker, it is a privilege to introduce to my colleagues in the House of Representatives a man from my district who has dedicated his working life to building, developing, and strengthening the trade union movement in the Toledo area, especially for skilled tradespeople who operate as professional ironworkers. Mr. Harvey E. Takacs has achieved better hours, wages, and working conditions for those ironworkers to raise their economic standard in this craft higher than ever before. His steadfast determination has made him well known throughout local 55, as well as throughout the Greater Toledo area. He has been able to balance labor and management concerns for his union, a necessary prerequisite for equality in bargaining for long-term contracts acceptable to all parties. Those who have benefited from his hard work have the highest respect for this man. He is best known for living by the words, "An honest man's word is as good as his bond." His sincere personality and sterling reputation influence everyone he interacts with and results in a faultless impression. However, this is not the only commitment to which Harvey gives more than 100 percent of his energies. He has been a loyal and committed husband to Joyce for 40 years, caring and loving father of William and Robin, and affectionate and entrusted grandfather to Allison, Meredeth, and Brecken. On April 20, this well regarded man will retire from the ironworkers, after 43 years of hard work. He will be able to spend more of his time with his family and devote time to his other interests which are substantial and diverse.

Harvey began his career by following in his father's footsteps. His father had been a business agent for local 55, and Harvey joined the ironworkers profession as an apprentice at the age of 15. Shortly after, he began serving local 55 as an elected officer as part of the examining board and the executive board and has held offices such as business agent, president, and president-assistant business agent. Harvey has demonstrated his skill and made the most progress for the ironworkers in his 22 years as chairman of local 55 negotiating Committee. He has also served as a delegate to Northwestern Ohio Building and Construction Trades Council, and held the position of vice-president and president. Obviously, Harvey has been concerned throughout his career about the future of the ironworkers. He has served as chairman of the joint apprenticeship committee to make sure that the future ironworkers of Toledo will be just as strong an organization, if not stronger, than it is today. Mr. Takacs is also concerned with the quality of life for members currently working as ironworkers and has served as a trustee to local 55 pension fund, as well as senior labor trustee to Ironworkers' Health and Welfare Fund. Harvey Takacs has never taken small steps or restricted his vision only to his local. For 22 years, he has served the Ironworkers as a delegate to the Michigan, Great Lakes, and vicinity Ironworker's District Council. Also for the last 6 years, he has served in the capacity of financial security-treasurer for that organization.

On the international level, Mr. Takacs has been elected 5 consecutive times as a delegate to the international convention and has been selected as a member of the labor delegation to tour Israel. He has done his share of community service as well. Harvey is a member of the executive board of Substance Abuse Service Inc., better known as SASI, and is a member of the Toledo Dental Society Peer Review Committee.

Mr. Speaker, I am very honored to be able to recognize Harvey E. Takacs today. He has improved the quality of life for the ironworkers and all working people through his vision, strength, integrity, and honesty. During negotiations, he always tried to achieve what was best for our community and for the ironworkers because of his commitment and dedication. Because he has always been completely upfront with his feelings and opinions, I do not believe their is a single person who does not respect the positions that he holds. He has made a difference in Toledo, and for all workers and families in our Nation. It gives me great pleasure to share with you a glimpse of the hard work and accomplishments of Harvey E. Takacs. For all of these reasons, I hold the deepest respect and admiration for this man. He well embodies the words of John Fletcher, an English dramatist who wrote, "That soul that can be honest is the only perfect man."

"BIGHOUSE" GAINES: WINNINGEST COACH

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 19, 1990

Mr. NEAL of North Carolina. Mr. Speaker, the winningest coach in college basketball today is Clarence (Bighouse) Gaines of Winston-Salem State University. Only two college coaches in basketball history have won more than 800 games—Bighouse Gaines and the late Adolph Rupp of Kentucky.

And let me assure you, Mr. Speaker, that Coach Gaines hasn't finished yet. At age 66, after 44 seasons at Winston-Salem State, he has 806 wins and 395 losses, and shows no interest in retirement. He may well surpass the record of Coach Rupp, who had 875 wins.

On April 28, there will be a "Bighouse Gaines Tribute" in Winston-Salem at the Lawrence Joel Memorial Coliseum, giving thousands of Coach Gaines' admirers a chance to honor him at a black-tie dinner.

The honorary co-chairmen of this event are Earl (the Pearl) Monroe, who starred at Winston-Salem State before his NBA career in Baltimore and New York, and Billy Packer, the CBS basketball analyst, who lives in Winston-Salem and was himself a great player at Wake Forest. The tribute is being organized by Mrs. Claudette Weston and others in Winston-Salem.

Mr. Speaker, in Winston-Salem we are extremely proud of Bighouse Gaines. Not only is

he one of college basketball's greatest coaches; he is one of our finest and most effective community leaders.

He has helped and influenced thousands of young people—not all of them athletes—steering them through rough spots in their lives and inspiring them to make the most of their talents and opportunities.

In addition to his heavy duties at Winston-Salem State, he has been deeply involved in community activities, organizing youth sports and programs, and serving on more committees, boards, commissions, and fundraising campaigns than anyone could count.

Clarence Gaines was born and grew up in Paducah, KY. He was an All-American football player at Morgan State in Balitmore, where he got his nickname. A college official saw the 6-foot-5, 250-pound freshman Gaines get out of a car and remarked: "I've never seen anything bigger than you but a house."

Bighouse also played basketball, but mainly to stay in shape for football, and never dreamed he would wind up coaching the roundball game.

He graduated from Morgan State in 1945, intending to go to dental school at Howard University, but couldn't come up with $400 for tuition. Instead, he went to Winston-Salem State as an assistant coach, figuring to stay only a year. When head coach Brutus Wilson left in 1946, Gaines, with a year of experience, was named athletic director and head basketball coach—and has been there ever since.

On January 24, 1990, Bighouse coached his 800th victory as the WSSU Rams defeated Livingstone College, 79 to 70. Over 44 years, he has averaged more than 18 wins a season. He has won eight conference titles and the 1967 NCAA College Division Championship. He has had three losing seasons.

Bighouse Gaines already has been inducted into the Basketball Hall of Fame in Springfield, MS (as well as four other Halls of Fame) and has received numerous other honors, including the Paul Robeson Award.

Mr. Speaker, so that our colleagues and others may know more about this remarkable man, I ask that we include in the RECORD at this point two articles by Mike Mulhern in the Winston-Salem Journal entitled, "No. 800 for Bighouse" and "Gaines Hasn't Forgotten His Rough Road to No. 800," both published in January 1990. I also ask that we include an article by John X. Miller and John Myers, entitled "Coach Poised to Attain 800th Victory," from the January 19 USA Today.

The articles follow:

[From the Winston-Salem Journal, Jan. 25, 1990]

No. 800 for Bighouse—Gaines Reaches Milestone in His Illustrious Career as WSSU Basketball Coach

(By Mike Mulhern)

In his 44 years in Winston-Salem, Clarence "Bighouse" Gaines has been through it all, several times over.

With 800 victories, a national championship and Earl "The Pearl" Monroe in his scrapbook, as well as a hallowed spot in the basketball Hall of Fame, what else could a coach want?

Win No. 800 came last night, as Gaines' Rams pulled out a 79-70 victory over Livingstone in Salisbury. (Story, Page 33.)

But the real Bighouse Gaines isn't just the man whose name is on all the plaques and awards that fill trophy case after trophy case at Winston-Salem State University.

Earl Monroe may have become the most famous man to have played for Gaines, but Bill English, the other All-American of that era's national-championship team (he was "William" English then), may know the real Bighouse better than anyone else.

"When House brought me to Winston-Salem State back in 1965, I didn't have any parents, and I didn't have any shoes," English recalled. "'Son,' he told me, 'I'm going to give you an education. The rest you'll have to get on your own.

"He's been a father figure for me, literally. He helped me out as a player, and he's helped me out as a man."

English has endured more than his share of turmoil in the past few years. When his house burned down, he lost everything, including all the clippings about the February night in 1968 when he scored 77 points for Gaines.

Then he faced a medical crisis: surgery to remove two disks in his back. The last three seasons, English missed most WSSU games while recovering, his absence from Bighouse's bench did not go unnoticed. "Clara (Gaines) told me the other day: 'You know why Bighouse is winning again, don't you? It's because you're back,'" English said. "I told her: 'No, ma'am. I'm back because I love the man.'"

English, who runs the Martin Luther King city recreation center, is as huge as Gaines. He played with the Detroit Pistons after he graduated from WSSU in 1969.

"This is my 18th year as an assistant coach with House, and he has changed tremendously since I first met him in 1965. He's mellowed; when he coached Earl and us, he was tough. Now he's leaving the tough stuff for me. But Chief—we all call him the Chief—is still the intimidator. And I'm just happy to be back with him.

"You look at all the games Bighouse has won, and all you see are basketball games. But it's what he does behind the scenes that makes Bighouse what he really is. I know, because I've needed his help. When I had those two disks cut out of my back, he was right there for me, financially and as a friend."

English's eyes well up and his voice grows even softer as he looks out of his tiny office at the youngsters clamoring through the front doors into the rec center in the early afternoon.

"Bighouse and I realize that, when you work with a lot of kids like we both do, some of them are going to get into trouble," English said. "And coach has taught me to take the time to watch out for them when they need help. Coach doesn't leave anyone out in the cold. Coach don't forget about 'em. Not House."

The first thing one notices about Bighouse Gaines is not his size but rather his eyes. Then, you notice his style: folksy, talkative, inquisitive.

Only gradually do you begin to understand his real power: his quick insight, his ability to out-think you on whatever level, whichever subject.

He doesn't have an act he has to go into, a protective facade or routine; he's straight-up. And that's the way he likes it.

"When I go, I want to be remembered as a person who was a straight-shooter," Gaines said. "I try to be honest with everyone. And I expect that from them. I tell my kids, 'Never lie to me, because, if you ever get in any trouble, I may be the only friend you've got.'"

Gaines, now the president of the National Association of Basketball Coaches, didn't plan to spend his life winning 800 basketball games. He didn't expect to spend all those nights on the road with a bunch of teenagers, fighting the cruel vagaries of segregation.

When he arrived in Winston-Salem in the summer of 1945, he was simply looking for a brief job, to make a few bucks.

"I was going to be a dentist," he recalled. "I'd just finished up at Morgan State, and I'd been accepted into dental school at Howard University that fall. But I didn't have a quarter for tuition."

So he accepted a job offer to be assistant coach of everything at WSSU and somehow just never left.

"I guess sometimes the Lord bumps you in the right direction," he said. "I just stumbled into this place. And, at 22, I'd never seen so many pretty girls.

"We were a teacher's college back then, and all we could offer was a degree in elementary education." And now Gaines reveals one of his old recruiting secrets: "But I'd tell the kids that there were six girls for every boy."

Bighouse resisted all those charmers, though, and in 1950 married Clara, a Latin major from the University of Pittsburgh who had come South in the postwar years to find a job. She was teaching Latin at Atkins High School when Gaines began bringing his team over to play in the high school gym.

Clara realizes that he might have been a far richer and more famous man, with all his talents, if the social changes in American society had come sooner.

"But it all came too late for him," she said. "I've told him, if he were white, he'd be president of the United States. He's the CEO type. But he doesn't look back; he might as well not."

Bighouse may live in one of the most famous stretches of basketball highways in America. But as far as his fellow coaches in the Atlantic Coast Conference are concerned, Gaines might as well be playing ball on Mars. Certainly Dean Smith, North Carolina's renowned coach, must be on a first-name basis with Gaines? No, says Gaines: "I see him at meetings, but we live in two different worlds.

"Now, I have an excellent relationship with Billy Packer (the CBS sports analyst). When he was at Wake back in the early 1960s, he'd bring the whole team over here and scrimmage us.

"And I have a lot of admiration for Gene Hooks, Wake's athletics director; I think he does a heck of a job. But I don't think any of the Wake coaches have ever even been over to our campus."

The issue of race is one Gaines has faced every day of his 66 years. And he concedes that it's more than a little ironic that he is now joining the late Adolph Rupp, who coached at the University of Kentucky, as the only men to break the 800-victories mark.

Gaines, who is from Paducah, KY, knows well Rupp's reputation as a man not friendly to blacks.

"I don't think Rupp even had a black dog in his house," Gaines said dryly. And Gaines vividly remembers what life was like growing up in Kentucky, with his parents running a small hotel.

"Rupp had a heck of a record. But remember, who else was recruiting basketball players in the SEC besides him all those years? No one. The need to put an asterisk beside Rupp's name. It's pretty easy to dominate when no one else is offering much competition.

"I remember taking a course on athletic administration at Columbia University, back when I was getting my master's. The professor went into a session about black schools and black administrators. And what he told us, essentially, was the rule of the day was: If you can't keep them niggers in line, we'll find somebody who can.

"You can say, 'Oh, I'm not bitter, But. . . ."

GAINES HASN'T FORGOTTEN HIS ROUGH ROAD TO NO. 800

(By Mike Mulhern)

Life on Tobacco Road has changed a lot since Bighouse Gaines first came to Winston-Salem State. And over the past few weeks, as he rolled toward that magical 800th victory that came against Livingstone, the legendary basketball coach took time to reflect on his 44 seasons on the bench.

Tonight, before the Rams face Fayetteville State, Gaines will be honored by the CIAA, friends, former players and fellow professors. And today has been proclaimed "Bighouse Gaines Day" in the CIAA by Leon Kerry, the commissioner of the conference.

But the pregame hoopla, and all the attention he has received on the march to No. 800, will not wipe away the scars that remain from that era not so long ago when Gaines couldn't even buy his own ticket to watch an N.C. State basketball game in Raleigh.

"The first games I went to at N.C. State were rough," Gaines said. "We could only sit in the worst seats in the house, way up in the far corner of the rafters, with the chauffeurs and the waiters. And the only way we could even get a ticket was to have somebody else buy it for us.

"You couldn't understand it because you haven't been black, but these other coaches felt that a black guy couldn't do anything.

"I remember when we went to one basketball convention and Cal Irvin, the coach at A&T, was going to give a seminar. The sign they put up for his seminar read 'Cal Irvin. North Carolina A&T. On Our Basketball." You knew exactly what they were saying: 'nigger basketball.'

"And yet it' so hard to paint the true picture for you guys. When we drove the team to Baltimore, the only place we could stop between here and there was at Slaughter's Hotel in Richmond. And between here and Slaughter's there might not even be a place to stop and go the bathroom if you were black.

"Whenever we went to Georgia it was like that too. We tried to make sure we had enough gas to get to the Atlanta city limits.

"We took the team to Tuskeegee, Ala, once too, and couldn't find a place to stop.

"You sometimes ask yourself. 'Why did you stay here?' Well, you stayed here the first 20 years because there was no place to go.

"No, I'm not bitter about being black. But it's just so dammed inconvenient," said Gaines, his eyes betraying not bitterness but rather the sadness of it all. "It's all right to be proud and all, but . . .",

When he's not thrashing the blackboard in the gym, or admonishing a student to get his homework in on time, or working the phones in his office, Gaines likes to hang out a the Jetway Barber Shop, around the corner from his Eastside home, and play five-card tonk with the guys.

"When Bighouse walks through that door," said his wife Clara, sitting in the family's new garden-den and nodding toward the front of their home, "he puts all that school stuff out of his mind. I just wish he were a little more handy around the house, though.

"And that gruff act of his, he's really a soft patsy. He only pretends to be gruff."

Gaines office walls are adorned with mementos of basketball trips to nearly every corner of the world, South America, Africa, Europe, the Orient. "I've got a lot of gypsy in me, I guess," Gaines said. "I enjoying traveling."

But there are gaps, gaps Bighouse Baines works every day to try to fill. And the frustration shows on his face. Frustration, sadness, more than anger or bitterness.

"Do I feel respected by the big-power white coaches? Yes, I do . . . when you finally get them to listen to you," Gaines said. "Forget the black-white thing. I just don't think they're cognizant of life below Division I. Those $500,000-a-year coaches believe they're the last word on everything in this business. If I'm proud of anything I've done, I'm proud of having done my best just to let those guys know that Division II sports exist. You guys in the media keep raping us Division II schools, by focusing so much on Division I schools and pretending we don't even count.

"But if I get whipped in a poker game, I'm not going to complain about the hand I was dealt. You just prepare as best you can and go from there.

"And I've been here for more than 40 years, and things haven't changed that much really. Wake Forest can pick up $1.5 million for its athletic program without a sweat. And N.C. State, North Carolina and Duke can't even spend all the athletic money they get.

"I had a television show on WXII once, and our ratings were higher than the Wake Forest show. But I never got to watch it, because it didn't come on till midnight. And then they canceled it because they couldn't find any sponsors. But it can't be the economics, because 40 percent of the people in this town are black. Yet we even have trouble getting ads for our football programs.

"No, there are no spoils that come with all this. This entire department operates on $20,000 a year. And I haven't spent even $5,000 a year on recruiting since I've been here—and the big schools will spend more than that on their telephone bill alone."

In a sense, No. 800 was more than just a milestone for Bighouse Gaines, basketball extraordinaire. It was also a milestone for Winston-Salem State and the city of Winston-Salem.

But, Gaines said, "The city of Winston-Salem has never really accepted Winston-Salem State. If this deal is so important to Winston-Salem, you'd think more people would come out and take a look at what we're doing."

Bighouse Gaines is as at home and as dominating a presence at an Arts Council party or at the Winston-Salem Symphony as he is on 10th Street Bottom.

One of Gaines' biggest joys is his summer camp at WSSU. But this isn't a big-bucks summer camp like many top Division I coaches, and their bankers, enjoy. Gaines has spent the past 12 summers running what at times looks like a kid-salvaging project, as he tries to offer youngsters alternatives to the often drug-infested streets.

"I used to think little girls were all sugar and spice until I started this camp," Gaines said wearily. "Some of these we get will cuss you like a sailor. Their mothers send them here saying, "Bighouse, can you please do something with her?"

"And some of the boys will come up to me and say, 'Hey, Bighouse, I like your camp, and I want to go swimming now. Can you hold this for me?' And then they'll hand you $400 or $500. And you know where they probably got that kind of money.

"It's a challenge. And I keep a big belt here in my office, and if they act up, they get five good whacks. Sometimes it works, sometimes it doesn't. But you've never seen the defiance you'll see in some of these kids."

Gaines, though, loves a challenge.

"The number of wins is really somewhat insignificant to what this is all about—the kids are what's really important," Gaines said.

"I like the game, and I like people. And when you look at all the lives you've touched, and realize the environment you've taken them out of, that makes it worthwhile."

And, wistfully he recalls name after name, memory upon memory: Oris Hill, Willis Johnson, Carl Green Jack DeFates, Cleo Hill, Teddy Blount. . .

Ironically, Earl Monroe, the greatest player Gaines ever coached, didn't make it down for No. 800. His father died two weeks ago.

"And Earl is in bad shape right now, with arthritis from all those years of pounding the courts," said Bill English, Gaines assistant coach and an All-American center on the Monroe teams of the late 1960s. "Earl is hurting; he didn't even make it down for homecoming, and Earl never misses homecoming."

Winston-Salem State is a quiet, peaceful, somewhat sleepy, and rather middle-class college, all in all. There are more than a smattering of 300 Zs and other ritzy machines clogging the twisting campus streets, searching for one of those precious-few parking spots. Of its 2,500 students, 22 percent are white, most of them day students. Construction projects have raged all over campus for years now, after a generation of neglect. Nevertheless, the dorms remain less than first-class accommodations, and Gaines said the dining hall has been there since he first set foot on campus in 1945. One of the dorms, Gaines said, is so bad it should simply be torn down.

"Dean Smith, for example, has everything to work with at North Carolina," Gaines said. "We, though, because of lack of funding, don't have nearly the equipment. There are high schools in this state that have better weight rooms than we can afford here. And I feel we've been fortunate to accomplish what we have with the resources we have.

"The NCAA'S got that $1-billion television contract now. Well, what somebody ought to do is file a class-action suit against the NCAA to force it to share that wealth."

When Gaines started out at WSSU, he didn't even have a gym. "We played our games in what was really a boiler room," he said. "Man, you could set a zone in that place and the other team would need radar to get the ball inside."

Gains is a hands-on coach. He keeps his hands on the money, the key to the gym, and the keys to the bus. And he's not above

using his huge hands to keep his players in line, as English can attest.

"I got my nickname, 'App', from House in a game in '67, "English said with a grin." There were three seconds left in the game, and the score was tied, and House called timeout to set up a play for Earl to shoot. But when I got the ball, I drove to the corner and put up a perfect jumper that hit nothing but net.

"House charged out on the court and slapped the back of my head and yelled, 'You apple-head! I said get the ball to Earl.'

"From then on, when House said it was Earl's shot, it was Earl's shot. I've seen House come across the back of a bunch of heads. He knows how to make his point."

Even John Thompson has felt Gaines' heavy-handed touch.

"John and I drove back one day from Colorado Springs to Denver, and I really lectured him the whole way," Gaines said. "John could have made a bunch of money on the talk circuit, but he's just too abrasive.

"I once had to sit through a dinner with John Thompson on one side and Bobby Knight on the other. Now I think Bobby Knight is one of the greatest humanitarians I've ever known. But those two guys are certainly two of the orneriest SOBs you could ever meet . . . though still two of the nicest guys I've ever known."

Gaines looks lighter on his feet this season than he has in the last few. How much longer does he want to go on? He said he's not even thinking about retirement. Might he try to go for Adolph Rupp's all-time record of 875 wins?

"Coach loves basketball so much I don't think he'll ever get out of it," English said. "When we go out of town to a game, people keep coming up to him all night to shake his hand."

Indeed, it is one of the stranger sights in sports, walking into a foreign gym and watching Bighouse Gaines sitting up in the stands, shaking hands with almost-reverent friends. Grown men lift their kids to his face so he can smile on them.

English said, with some awe, "His presence is something you can just feel. Whenever you see Coach Gaines walking up those steps, you just feel different. You start working a little harder, coaching a little harder."

Gaines is as much an institution as he is a legend. "Hey, don't talk like that," Gaines said with a laugh. "Somebody wants to fire me every day."

When asked about his proudest accomplishments, Gaines pointed not to his many wins, but to the many players who came his way and left WSSU the better for it. And Gaines points with pride to his work in attempting to defuse the bitter racial crisis of the late 1960s in this area.

"Jim Hamilton, who was the athletic director at High Point College, and I would schedule a doubleheader each season," Gaines recalled. "But because of the strict segregation patterns back then, we could never play each other. Now, Jim—and you've got to understand him to understand this—is probably one of the whitest white men I've ever known. He finally said 'House, why are we wasting money? Let's just go ahead and play each other.' And we did."

English said those years, the Monroe years, were a watershed for Gaines. "In 1967 we found ourselves going into places where there were more whites than blacks," English said. "That's when whites started to respect Winston-Salem State and Coach Gaines. When we played St. Augustine's that year in Raleigh, we played it in the N.C. State gym, the only place that could hold all the people. And when we got back from winning the nationals, there were more whites than blacks at the airport to greet us.

"House has had a couple of opportunities to leave and go elsewhere. But we'd talk about it, and he'd say 'App, I'm not going.'

"A man knows when he's found a good home."

COACH POISED TO ATTAIN 800TH VICTORY—GAINES KEEPS GAME SIMPLE FOR GOING ON 43 SEASONS

(By John X. Miller and John Myers)

WINSTON-SALEM, N.C.—When you walk into the athletic center, you are struck by the sight of trophy cases filled with championship memorabilia, brick walls adorned with plaques and scarlet-and-white banners, testaments to a legendary coaching career.

Look closely. You're not at Indiana's Assembly Hall or Kentucky's Rupp Arena. Not even North Carolina's Dean Dome or UCLA's Pauley Pavilion. You're in the Clarence E. Gaines Center at Winston-Salem State University, and it's the house that "Bighouse" built.

For 43 seasons, Clarence "Bighouse" Gaines, 66, has coached and nurtured a college basketball program that has averaged more than 18 wins a season, produced NBA-caliber players and graduated hundreds of men.

Possibly this weekend, Gaines will surpass a threshold only one other college basketball coach, Kentucky legend Adolph Rupp, has crossed: winning 800 games in a career. His overall record is 799-390 after Thursday night's 82-69 victory against Livingstone College.

The milestone could come Saturday at home against North Carolina Central.

Times have changed, but certain things remain the same in Gaines' program. There is no longer an abundance of talent for Gaines' NCAA Division II program. Players prefer the larger, more glamorous Division I programs.

The talent drain aside, Gaines' program epitomizes the same traits today as it did during the glory days of black college basketball: work ethic, holistic understanding of the game and sound skills.

"Basketball is a simple game. People do everything they can to make it complicated," Gaines said. "You help kids master the fundamental skills, then everything falls in place."

How has he won almost 800 games, second only to Rupp's 875? With an up-tempo running style that changes from season to season depending on the caliber of players.

"We go with four basic patterns, teaching kids how to react to situations. Once a kid is able to read his opponent, then he can take what's there," said Gaines, who was inducted in the Naismith Basketball Hall of Fame in 1983.

"It's obvious he knows how to coach and has done it well for years," North Carolina coach Dean Smith said. "It's unfortunate that in the modern television era a lot of people haven't seen his teams play."

Growing up in Paducah, Ky., Gaines lived in the shadow of Rupp's program, but basketball did not fascinate him. He played at Morgan State College only to stay in shape for football, where he had an All-American career. He graduated from Morgan State in 1945 and first coached football at Winston-Salem.

But his legend started with his nickname, Bighouse.

It was given to him when Jimmy Carter, Morgan's business manager, saw the 6-5, 250-pounder get out of a car: "I've never seen anything bigger than you but a house."

While building a top program at Winston-Salem—his teams have won eight conference titles, the 1967 NCAA College Division championship and had only three losing seasons out of 43—Gaines has established a way of life.

"Developing the work ethic is important," Gaines said. "But it's hard to convince kids who have talent that they can't play only off that."

Now there's little time or money for recruiting, so Gaines relies on the same networks he has used for years. He maintains his program through contacts established years ago when segregation restricted black athletes to predominantly black campuses.

"I respect the things he's had to go through in order to achieve what he has," said Georgetown's John Thompson. "When I won the national championship, I pointed out there were several guys of color that had not been given the opportunity I had, and Bighouse was one of the people I was talking about."

Gaines was in large part responsible for Thompson getting Eric "Sleepy" Floyd, who captained Thompson's first NCAA Final Four team in 1982. "I called Bighouse and told him I needed a shooting guard, and he helped me get Eric."

In the 1950s and '60s, Gaines did most of his recruiting through a "key man" system—friends, coaches, former players and alumni who found promising high school players.

Black athletes and parents trust Gaines. He tells parents that "if the kid got nothing else, he'd get an education."

Earl Monroe, the All-American guard who led Winston-Salem to its 1967 NCAA College Division championship, later starred with the NBA's Baltimore (now Washington) Bullets and New York Knicks. He says if it wasn't for Gaines, he might not have gone to school.

Theodore Blunt, a starter for Gaines from 1963-66 and now a city councilman in Wilmington, Del., thanks Gaines for the opportunity to prove himself.

"What impressed me was Gaines' coming all the way to a North Philadelphia playground to watch me play and affording me the chance to get an education," Blunt said.

Harold Bell, a Rams player from 1959-63 and now a sports radio talk show host in Washington, D.C., summed it up best: "He taught me how to play the game of life."

Playing for Gaines means playing by his rules or not at all. He motivates his players to play with a certain amount of fear, but urges them to learn while sitting on the bench and to be ready when called.

"He teaches you that nobody will give anything and that you have to take it if you want it," said senior forward Toby Barber, who led Division II in rebounding (13.6) last year. "That gives you the attitude for working hard . . . to give it all you have."

Gaines has mellowed, but there is an unmistakable ire that players try to avoid.

What does Gaines see as his legacy? The boys he has turned into men, and his role as a catalyst for integration.

"It was a time when sports emerged as a rallying point for communities and fans," Gaines said. "The attitude and phenomenon carried over into other aspects of life. Sports had become a great social force."

Said Billy Packer, CBS basketball analyst who as a Wake Forest University guard played against Gaines' athletes during pickup games:

"He doesn't speak loud, and he doesn't speak long, but he speaks straight. He's one of the people in regard to race relations who has bridged the gap over the years."

When will Gaines quit?

"I enjoy what I am doing. As long as my health stays like it is, I'll continue. The Lord has blessed me in so many ways."
